

Housing Benefit is an income related benefit that is intended to help meet housing costs for rented accommodation. Speed of processing relates to the average time taken to process new claims and change of circumstances for this benefit. The average time is measured in calendar days, rounded to the nearest day.

Main stories

Due to the seasonal nature of the data, quarterly figures are compared to equivalent figures from the same quarter of the previous year.

- In quarter 2 of the financial year 2019/20, 95% of Housing Benefit claims processed were change of circumstances on existing claims and the remaining 5% were new Housing Benefit claims.
- The average time taken to process a new Housing Benefit claim during quarter 2 of the financial year 2019/20 was 17 calendar days and is the lowest it has been to date. This is five days lower than in the same quarter of 2018/19 which was 22 days.
- The average time taken to process a change of circumstance on an existing Housing Benefit claim during quarter 2 of the financial year 2019/20 was 6 calendar days. This is two days lower than in quarter 2 of 2018/19.

17 days to process new Housing Benefit claims in the second quarter of 2019/20.

Average processing time (calendar days) per quarter

The average time taken to process new claims is decreasing over time. Processing time in quarter 2 of 2019/20 is five days lower than in quarter 2 of 2018/19.

6 days to process change of circumstance on existing Housing Benefit claims in the second quarter of 2019/20.

Average processing time (calendar days) per quarter

The average speed of processing on change of circumstances varies throughout the year, but is decreasing over time. Processing time in quarter 2 of 2019/20 is two days lower than the same quarter of 2018/19.

What you need to know

National, Official and Experimental Statistics are produced in accordance with Statistics and Registration Service Act 2007 and the Code of Practice for Statistics (the Code). National Statistics status means that official statistics meet the highest standards of trustworthiness, quality and public value, signifying compliance with all aspects of the Code.

Official and Experimental Statistics may be awarded National Statistics status following an assessment by the Office for Statistics Regulation, the regulatory arm of the UK Statistics Authority. Further information about National, Official and Experimental Statistics status can be found in the Code glossary.

This release contains Official Statistics on Speed of Processing of Housing Benefit (HB) claims for quarter 2 of 2019/20.

The statistics show speed of processing of new claims and changes of circumstances. Volumes of claims, changes and the total days to process are included in supporting detailed tables.

Further information and detailed tables, including a breakdown by Local Authority, can be viewed at the [Housing Benefit Speed of Processing Collection Page](#).

The statistics are released quarterly in April, July, October and January and are sourced from data originally collected via administrative systems (Single Housing Benefit Extract).

Genuine variations between months can occur at a Local Authority (LA) level. For example, some of these are caused by time limited issues or localised changes in operational policy. Hence, figures for individual LAs should be interpreted with care.

Quarterly totals may not be entirely consistent with monthly figures as any Local Authorities that do not have data for every month of the quarter are not included in the quarterly breakdowns.

From April 2013, [Universal Credit](#) (UC) was introduced. The process began with single claimants and was expanded to other claimant types via the UC Full Service (UCFS). The UCFS rollout was completed in December 2018 and it is now available in every Jobcentre across the UK. The rollout schedule for Full Service can be found [here](#). UCFS implementation dates for each Local Authority are provided in the supporting tables for this release.

The roll out of UCFS has an impact on figures at LA level; namely that the number of new claims is decreasing in these areas and therefore the processing days for the new claims may change. Due to this, care should be taken when interpreting the data at LA level.

The next release will be on 29 April 2020. This will contain data for quarter 3 of the 2019/20 financial year (October 2019 to December 2019).

Average Housing Benefit Speed of Processing

Average processing time (calendar days) per quarter

The average time taken to process new HB claims in quarter 2 of 2019/20 was 17 calendar days. This is five days lower than in the same quarter of 2018/19.

In quarter 2 there were 100 thousand new HB claims. This represents a decrease of two thousand (2%) since the last quarter and a decrease of 92 thousand (48%) since quarter 2 of 2018/19.

The average time taken to process change of circumstances to existing HB claims in quarter 2 of 2019/20 was 6 calendar days. This is two days lower than the same quarter of 2018/19.

For quarter 2 there were 1.9 million changes of circumstances to HB claims. This is a decrease of 710 thousand (28%) since last quarter and a decrease of 440 thousand (19%) cases since quarter 2 of 2018/19.

There are increases in the number of change of circumstances and decreases in processing time for these in quarter 4 each year. The average time taken to process change of circumstances tends to decrease in February and/or March. Quarter 4 coincides with the end of the financial year, when local authorities tend to allocate extra resources to deal with a higher volume in change of circumstances of tenants and the uprating of their rents, leading to a decrease in the average processing time.

There was little monthly variation in processed volumes and average processing times for new HB claims and change of circumstances during quarter 2 of 2019/20.

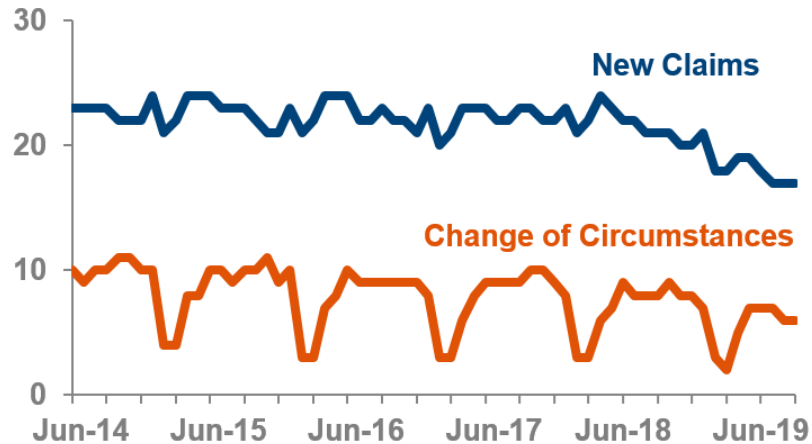

The average time taken to process new HB claims was: 17 calendar days for July, 17 calendar days for August and 17 calendar days for September.

In quarter 2 of 2019/20 there were 100 thousand new HB claims:
 35 thousand in July
 31 thousand in August
 32 thousand in September

The average time taken to process change of circumstances to HB claims was: 7 calendar days for July, 6 calendar days for August and 6 calendar days for September.

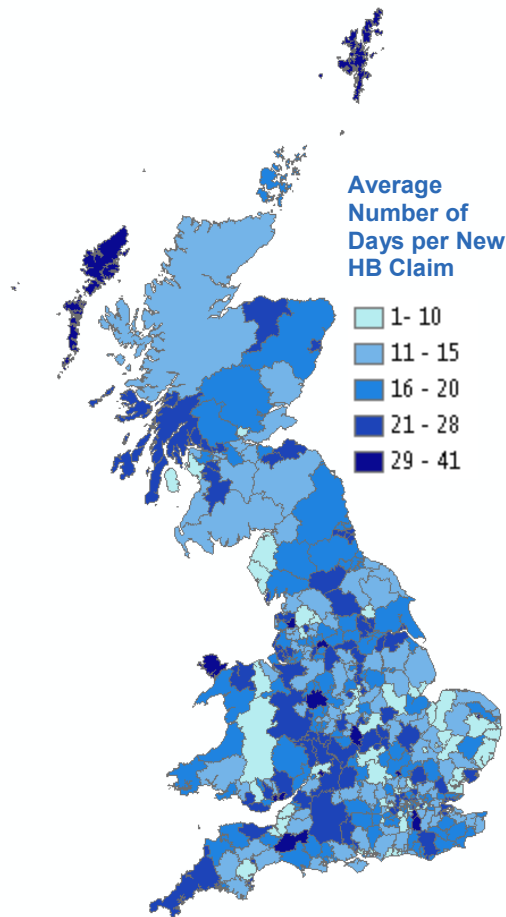

In quarter 2 of 2019/20 there were 1.9 million changes of circumstances to HB claims:
 700 thousand in July
 580 thousand in August
 600 thousand in September

Average processing time (calendar days) per month

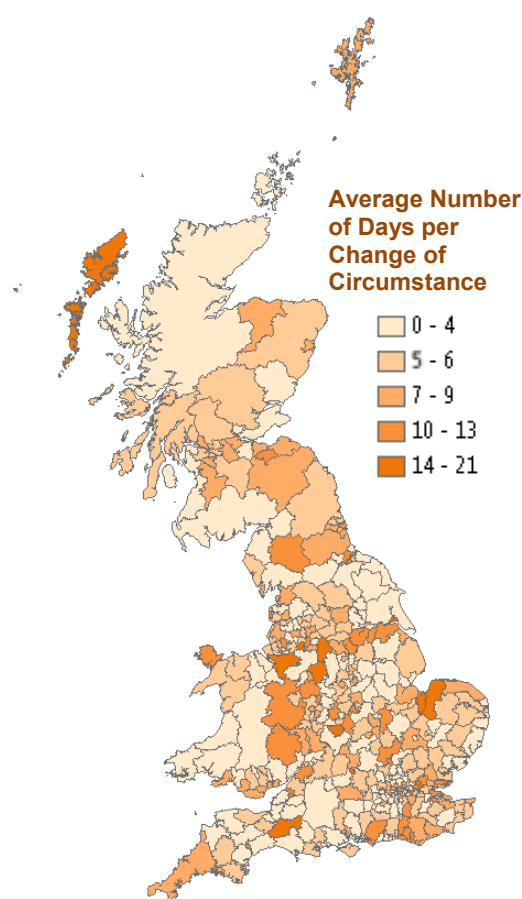

Average Housing Benefit Speed of Processing by Local Authority (LA)

Average number of days to process a New HB Claim by LA

Average number of days to process a Change of Circumstance on an existing HB claim by LA

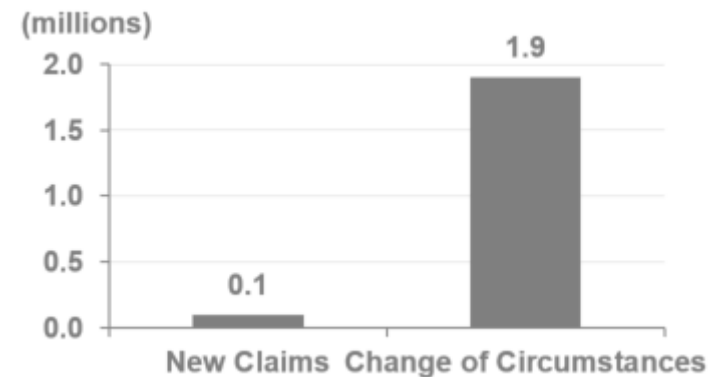

The maps show the average number of days taken to process a HB claim or change of circumstance. The average number of days taken to process either a new claim or a change of circumstance varies widely between LAs, with those LAs that take longer to process a claim or change being represented by a darker colour in the map.

On average a new claim takes longer to process than a change of circumstance claim. These maps show there is considerable variation in the average speed of processing days across LAs. Detailed figures in the accompanying tables show greater variability for new claims in comparison to change in circumstance claims.

Although there could be different reasons for the variations between the number of days that each LA takes to process a new claim and a change of circumstance, it is worth noting that LAs process on average a much greater number of change of circumstances than they do new claims. This difference is clearly reflected at the national level, as shown in the following bar chart.

New Claims and Change of Circumstances processed in Great Britain (Q2 2019/20)

Find more statistics about HB SoP in your LA on our [interactive map](#). Key statistics for a LA can be viewed by clicking the relevant area of the map.

For further information on supported browsers, please visit the following website:
<http://doc.arcgis.com/en/arcgis-online/reference/browsers.htm>

There were 1.9 million changes of circumstance on existing HB claims and 0.1 million new HB claims processed in Great Britain during quarter 2 of 2019/20.

Where to find out more

The historical [Housing Benefit & Council Tax Benefit Claims Administration Quarterly Performance Data](#) which is available to 2007/08 are based on clerical returns made by individual local authorities. Breakdowns of new claims and changes in processing times are available historically, and the new claims processing times are broadly comparable over time. However, a change in definition for change of circumstances between 2007/08 and 2009/10 means that direct comparison of this element with Speed of Processing statistics is not meaningful.
