Only use the charger that came with your vape

Take charge of battery safety

- ✓ Never charge your vape with a phone, tablet or other device charger
- ✓ If buying a replacement charger, only buy from reputable retailers, check it is suitable for your vape and look for the CE safety mark, plus details of the manufacturer

Office for Product
Safety & Standards

Regularly inspect the batteries in your vape

Take charge of battery safety

- ✓ Stop using and replace your batteries if they get damaged, wet or leak
- ✓ Many lithium-ion 18650 batteries are not designed for use in vapes. Check what type of battery you have and if manufacturers say it is safe for vape use

Safety & Standards

Unplug your vape once it's fully charged

Take charge of battery safety

- ✓ Regularly check on your vape whilst it's charging
- ✓ Don't leave it charging for longer than recommended

Office for Product
Safety & Standards

Protect your vape from extreme temperatures

Take charge of battery safety

- ✓ Do not leave your vape or spare batteries in direct sunlight or in your car on a freezing cold night

Office for Product
Safety & Standards

Store spare vape batteries in a plastic case

Take charge of battery safety

- ✓ Keep batteries away from other metal objects like coins or keys in a pocket or bag to avoid accidental contact as this can cause a short circuit
- ✓ Store them out of the reach of children
