

Transport use change

Transport use in Great Britain has decreased since the imposition of social distancing rules.

The percentage change in the use of all motor vehicles, National Rail, the London Underground (TfL), and bus travel (TfL).

New UK cases

Cases are reported when lab tests are completed. This may be a few days after initial testing. Testing capacity is increasing, which is resulting in a greater number of observed cases. (Confidence: testing capacity constraints mean there are likely many more cases than currently recorded here).

Hospital Admissions

England hospital admissions COVID-19.

Hospital admissions for COVID-19 rose by over 20% on previous day in the North West and South East. (Confidence: a new categorisation has been added to an existing high quality administrative data set).

Global comparison of deaths

Global deaths comparison.

Countries are aligned by stage of the outbreak. Day 0 equals the first day 50 deaths were reported. (Confidence: deaths are reasonably accurate, but international reporting lags are unclear, so may not be comparing exactly like for like).

Source: Public Health England, Worldometer. Reporting of UK deaths may lag by up to several days. Logarithmic scale – see international tab for linear scale.
