Key:**Dark Green** - Excellent 100%**Light Green** - Excellent, but some targets missed**Amber** - Effective**Red** - Ineffective**Additional information about ‘ambers’ and ‘reds’**

The VMD continuously monitors all targets and puts in place countermeasures, where possible, to ensure targets are met.

However, sometimes a performance standard may fall into the effective or ineffective category and there are a number of reasons why this may happen, e.g. high volume of applications, staff resource, complexity of applications requiring additional input, etc
