I am writing to tell you what we are doing about Coronavirus.

Coronavirus is a new disease that is quickly spreading all over the world.

Many people will catch it.

Most people won't be very ill.

Some people will get very ill and need to go to hospital.

Some people will die.

We have said that people must stay at home and away from other people.

This is to slow down the spread of Coronavirus.

If too many people get the disease at the same time, the NHS will not be able to help everyone and more people will die.

You must stay at home

You must not meet up with any friends or family that don't live with you.

You can only go out to:

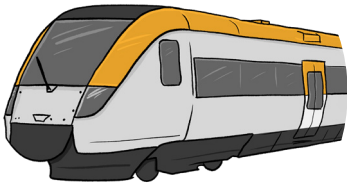

- Buy food or pick up medicines.

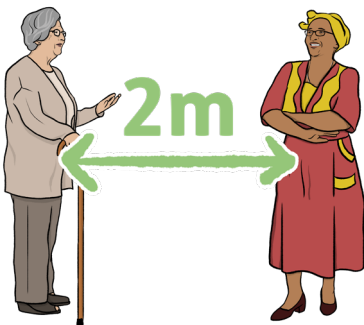

- Exercise, once a day.

- Get medical help.

You can travel to work, but only if you cannot work from home.

When you do leave your home, you should stay 2 metres or 6 feet away from other people.

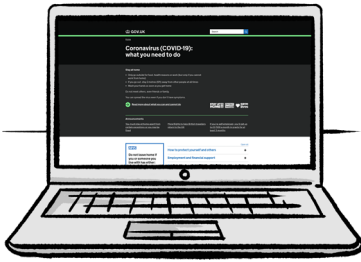

You must follow these rules.

The police will make sure people follow these rules.

People are worried about money

We have done a lot to help people who are worried about money.

You can find out more on the website:
www.gov.uk/coronavirus

Doing the right thing

We are doing the right thing at the right time.

We are listening to the doctors and the scientists.

But we know that things will get worse before they get better.

By following the rules, you will be helping to save lives.

Thank you

Thank you to all the people who are working hard to beat Coronavirus.

Especially all the people who work in the NHS and who care for people.

Together we can beat Coronavirus

With everyone following the rules and working together, we can beat this disease.

We can all do something to help - Stay at home to protect the NHS and save lives.

From,

Boris Johnson
Prime Minister
