INFORMATION FOR HEALTHCARE PROFESSIONALS

To: Healthcare Professionals

Re: Temporary supply of a different presentation in market and changes to the instructions Noradrenaline (Norepinephrine) 4mg/4ml Concentrate For Solution For Infusion (PL 04515/0240)

- Due to a significant demand increase we are temporarily managing the supply of Noradrenaline (norepinephrine) 4mg/4ml from 7 April 2020 with alternative US product - Levophed Bitartrate Concentrate for Solution for Infusion.

- US vials of Levophed Bitartrate are considered an unlicensed product in the UK

- See table for differences in presentation, dilution, storage conditions, and warnings between products

- Levophed contains sodium metabisulfite (not more than 0.2mg/ml), a sulphite that may cause allergic-type reactions including anaphylactic symptoms and life-threatening or less severe asthmatic episodes in certain susceptible people

- Please note the expiry of the LEVOPHED 4mg/4ml is July 1 2020.

To help mitigate the national shortfall in supply against demand Pfizer has obtained a non objection from the Medicines and Healthcare products Regulatory Agency (MHRA) to import Pfizer stock of Levophed Bitartrate Concentrate for Solution for Infusion from the US.

The UK Summary of Product Characteristics and Patient Information Leaflet for Noradrenaline (norepinephrine) 4mg/4ml can be found at: https://www.medicines.org.uk/emc/product/4115/smpc#companyDetails

The US Summary of Product Characteristics and Patient Information Leaflet Levophed Bitartrate Concentrate for Solution for Infusion can be found at: https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=c4de72a8-2a75-4984-ce90-e4870226dc12
