Year: 2020 Week: 22

Summary.

Subscribe to the weekly syndromic surveillance email

Reporting week: 25 May to 31 May 2020.

During week 22, community-based respiratory indicators, including 'COVID-19-like' indicators, decreased or remained stable across all syndromic surveillance systems.

There were small increases in syndromic 'impact of heat' indicators during week 22, in line with the recent warm weather.

Please see the 'notes and caveats' sections in each individual syndromic surveillance bulletin for information about 'COVID-19-like' syndromic indicators, including important caveats around the interpretation of these indicators.

Remote Health Advice:

During week 22, NHS 111 'potential COVID-19' telephone calls and completed web assessments decreased nationally and across all age groups and PHE Centres (figures 2a-c & 3a-c).

Access bulletin

Calls for eye problems, heat/sun impact and insect bites increased in line with the recent warm weather (figures 11-13).

GP In Hours:

Access bulletin

During week 22, COVID-19-like GP consultations decreased; rates continue to be highest in the 75+ years age group (figures 1 & 1a). All other respiratory indicators decreased or remained stable at, or below, baseline levels.

Allergic rhinitis and heat/sun stroke consultations increased during week 22, in line with recent warm weather (figures 21 and 22).

GP Out of Hours:

During week 22, GP out-of-hours consultations for influenza-like illness consultations remained above baseline levels (figure 3).

Access bulletin

Emergency Department:

During week 22 the number of ED COVID-19-like attendances continued to decrease with levels remaining highest in the 65+ years age group (figures 3 & 3a).

Access bulletin

The number of ED attendances for acute respiratory infections and pneumonia decreased (figures 5 & 8). Attendances for both ARI and pneumonia remained highest in the 65+ years age group (figures 5a & 8a).

Ambulance:

During week 22, COVID-19-like ambulance calls remained stable (figure 2).

Access bulletin

Calls for falls/back injuries and overdose/ingestion/poisoning have increased and are now similar to baseline levels (figures 5 & 8).

PHE Syndromic Surveillance Summary

03 June 2020

- Key messages are provided from each individual system.
- The different PHE syndromic surveillance systems access data from different areas of the national health care system.
- Each syndromic surveillance system is able to monitor a different selection of syndromic indicators based upon a different case mix of patients.
- Access to the full version of each syndromic surveillance bulletin is available through the PHE
 Syndromic Surveillance website found at: (https://www.gov.uk/government/collections/syndromic-surveillance-systems-and-analyses); reports are made available on Thursday afternoons.

Remote Health Advice Syndromic Surveillance System:

A remote health advice syndromic surveillance system that monitors syndromic calls from remote health advice services e.g. NHS 111 each day across England.

GP In-Hours Syndromic Surveillance System:

A large general practitioner surveillance system monitoring daily consultations for a range of clinical syndromic indicators across England.

GP Out-of-Hours Syndromic Surveillance System (GPOOHS):

A syndromic surveillance system monitoring daily GP out-of hours activity and unscheduled care across England using a range of clinical syndromic indicators.

Emergency Department Syndromic Surveillance System (EDSSS):

A national ED network across England monitoring daily attendances and presenting symptoms/diagnoses.

National Ambulance Syndromic Surveillance System (NASSS):

The national ambulance syndromic surveillance system (NASSS) monitors daily calls made by persons to an ambulance trust. All 10 ambulance trusts in England provide data.

We thank and acknowledge the contribution of all data providers including:

- NHS 111 and NHS Digital.
- QSurveillance[®]; University of Oxford; EMIS/EMIS practices; ClinRisk®.
- TPP, ResearchOne and participating SystmOne GP practices.
- Advanced Health & Care and the participating OOH service providers.
- Participating EDSSS emergency departments.
- Royal College of Emergency Medicine.
- North East, North West, Yorkshire, East Midlands, West Midlands, East of England, London, South East Coast, South Central, and South Western NHS Ambulance Trusts and The Association of Ambulance Chief Executives.
