SAGE's priorities

Patrick Vallance and Chris Whitty have formulated seven key SAGE priorities to be discussed at SAGE 11. These are:

1. Detect & monitor any outbreak as effectively as possible

2. Understand effective actions to help contain a cluster

3. Understand measures to alter the shape of a UK epidemic

4. Model UK epidemic & identify key numbers for NHS planning

5. Generate Behavioural Science insights for policymakers

6. Ensure NHS trials key interventions

7. Consider emerging therapeutic, diagnostic & other opportunities
