

Defence Safety Authority

DSA 03.OME Part 2 (JSP 482) -Defence Code of Practice (DCOP) and Guidance Notes for In-Service and Operational Safety Management of OME

Defence OME Safety Regulator

DSA VISION

Protecting Defence personnel and operational capability through effective and independent HS&EP regulation, assurance, enforcement and investigation.

PREFACE

AUTHORITY

1. This document is crown copyright and the intellectual property rights of this publication belong exclusively to the Ministry of Defence (MOD). However, material or information contained in this publication may be reproduced, stored in a retrieval system or transmitted in any form provided it is used for the purposes of furthering safety and environmental management.

STATUS

- 2. This document:
 - a. Is uncontrolled when printed.

b. Will be updated as part of a continuous improvement programme but at least 12monthly from the period of document issue date.

REQUESTS FOR CHANGE

3. Proposed changes, recommendations or amendments to DOSR Regulations and Guidance publications can be submitted by anyone using the DOME Request for Change Function (RFC) available for every Dome publication in the DOME library located <u>here</u> or by completing the Word version of the Change Proposal Form available from the DOME Library, see figure 1 below for the location.

Figure 1. Change Proposal Form (Word version) Location

4. Any post and grammar change proposals can be approved or rejected by the DOSR PRG Authors without involvement of the associated Working Group.

5. Technical change proposals will need to be submitted to the associated Working Group for review and approval or rejection.

6. When incorporating changes care is to be taken to maintain coherence across regulations.

- 7. Changes effecting Risk to Life will be published immediately.
- 8. Other changes will be incorporated as part of routine reviews.

REVIEW PROCESS

9. The DOSR PRG team will ensure these OME Regulations remain fit for purpose by conducting reviews through the DOSR Governance Committees, involving all Stakeholders.

FURTHER ADVICE AND FEEDBACK

10. The document owner is the DOSR. For further information about any aspect of this document, or questions not answered within the subsequent sections, or to provide feedback on the content, contact:

CHAPTER 21

JOINT SERVICE MUNITIONS CONTROL REGISTER (JSMCR)

CONTENTS

Paragraph

- 1 MUNITIONS CONTROLS AND LIMITATIONS
- 1.1 Introduction
- 1.2 Definitions
- 2 **RESPONSIBILITIES**
- 2.1 MID Cell
- 2.2 PTs
- 2.3 Defence Munitions and Ammunition Compounds
- 2.4 Munitions User Units
- 3 JSP 762
- 3.1 Introduction
- 3.2 Procedure for altering the JSMCR

1 MUNITIONS CONTROLS AND LIMITATIONS

1.1. Introduction

1.1.1.Ordnance, Munitions and Explosive (OME) for use by MoD personnel are designed and constructed, so far as is reasonably practical, to be safe and without risks to health to the user and others who are not the intended target of their effects.

1.1.2. Where hazard or risk exists there is legal requirement for the Duty Holder to ensure the timely dissemination of information regarding munitions controls and limitations for use by munition technical personnel and the end user.

1.1.3. The Duty Holder is the Team Leader (TL) of the Project or Delivery Team responsible for the munition. The TL may delegate the requirement for communication of safety information to Suitably Qualified and Experienced Personnel.

1.1.4. This safety information will be published within the Joint Service Munitions Control Register (JSMCR).

1.1.5. As end users are required to consult the JSMCR regularly it is convenient for certain administrative data to be communicated by the same means – this is detailed below.

1.2. **Definitions**

1.2.1.Controls and limitations that may be imposed to mitigate hazards associated with handling and use of munitions are defined as follows:

(1) **Ban.** A Ban is a temporary or permanent instruction ordering the immediate prohibition of use of a munition, which may also extend to the processing, transportation, carriage (e.g. in/on platforms) or disposal of that munition.

There are three types of Ban:

(a) <u>Technical</u> - initiated by the Munitions Capability Manager to halt issues or movement of a total stock item or partial stock (i.e. specific lot number(s)/serial no(s)) worldwide pending the outcome of a technical investigation or as the result of technical information received.

(b) <u>Clerical</u> - initiated by the Munitions Capability Manager or Depot Technical Staff to prevent stock movement/selection within Defence Munitions (DM) AMANDA depots for logistic and stock control purposes.

(c) <u>Local</u> - initiated by competent personnel at unit level including training areas, operational and exercise locations, resulting from incident or a concern that requires investigation/advice by the local technical authority, normally an Ammunition Technical Officer (ATO), Ammunition Technician (AT) or RN, RAF or civilian equivalent.

(2) **Constraint.** A Constraint is the imposition of a specific limitation or restriction within the whole life of the munition.

There are two types of Constraint:

(a) Type 1 - Used as a management tool to impose a limitation or restriction on In-Service stocks. Known as the 1000 series for munitions managed on ASTRID.

(b) Type 2 - Used as a management tool to identify munitions that have been withdrawn from service or are surplus to requirements. Items in this category can be unserviceable requiring authorised disposal or offered for sale through the Defence Sales Agency (DSA). Known as the 9000/10,000 series for munitions managed on ASTRID.

(3) **Lifed' Items Register (LIR).** This details 'Lifing' parameters in addition to calendar 'Lifing' for many munitions. The LIR is required by certain munitions Project Teams (PTs) to manage and control their stock when in the hands of the user. A common application is to publish the 'Air Carriage Hours' or 'Beam' life for a complex munition, when carried under an aircraft or on the rail of a launcher. Information of this type needs to be logged by the user and is often exceeded before the calendar life ends. The 'Lifed Items Register' is the appropriate section of the JSMCR to publish this information.

(4) **Air Drop Codes.** Air Drop Codes is the common term for Logistic Parachute delivery of munitions. The JSMCR provides details of those munitions which can be air dropped and any restrictions which apply.

(5) **Limitations.** Limitations provide information to ensure that all users are fully aware of the limitations applicable to munitions during training.

2 **RESPONSIBILITIES**

2.1 MID Cell

2.1.1 The MID Cell is responsible for policy regarding the imposition of Bans, Constraints, Air Drop Codes, LIR and Limitations.

2.1.2 The MID Cell will facilitate and host the JSMCR on the DE&S Intranet. Bans and Constraint information will be derived directly from the Ammunition System Two Revised Interactive Development (ASTRID). Enquiries regarding policy matters, the availability and design of JSMCR website should be addressed to the MID Cell.

2.2 **PTs**

2.2.1 Duty Holders/PTLs through the Munitions Capability Managers are responsible for the production of timely and accurate munitions control information with the issue of Bans, Constraints, Air Drop Codes and the LIR and Limitations. The Munitions Capability Managers are responsible for the quality and accuracy of the control and limitation information displayed on the JSMCR and any enquiries regarding the content should be addressed to them. Control and limitation information should be entered onto ASTRID. This will ensure that user information remains consistent with whatever the transmission route by which it is disseminated. All safety information must be from an auditable source i.e. An ASTRID change from the relevant Munitions Capability Manager and agreed by them.

2.3 Defence Munitions (DM) and Ammunition Compounds

2.3.1 The DM Munition Depots, Ammunition Compounds and Overseas Compounds are the major suppliers of serviceable <u>stock</u> to the user. They are responsible for implementing Bans and Constraints instructions upon receipt, whether it is via the JSMCR or via the ASTRID/Ammunition Management Area Network Depot Assistance (AMANDA) link.

2.4 Munitions User Units

2.4.1 **Bans.** When a Unit becomes aware of a munition ban the following action is to be taken:

(1) Stop affected stock that has been issued for training or operations from being fired. This action should be pursued with the utmost urgency.

(2) The banned munition is to be segregated and containers clearly marked with the following information:

- (a) "NOT FOR ISSUE OR USE".
- (b) The ban serial number.
- (c) Any special instructions.

(3) The unit accounting officer is to maintain a Bans Register. When a ban has been lifted the register is to be annotated with the ban serial number and the date lifted.

2.4.2 **Constraints.** Constraints can remain in force for the life of ammunition. Constraints are printed on depot ammunition issue vouchers; a note should be made on the ammunition account sheet of any constraints. Advice is to be obtained from the unit's Ammunition Technical Adviser if it appears that a constraint may apply to the planned use, movement or storage of any explosive or ammunition held by a unit. Examples of constraints include:

- (1) Storage temperatures.
- (2) Special handling.
- (3) Training use only.
- (4) Change of Life parameters

2.4.3 **'Lifed' Items.** It is the responsibility of the officer in charge of firing any munitions to be aware of and apply any relevant 'lifed' items limitations.

2.4.4 **Limitations.** It is the responsibility of the officer in charge of firing any munitions to be aware of and apply any relevant limitations. To this end the on line JSMCR should be checked in the 24 hours before firing commences. Units deploying firing parties to remote locations must ensure that the base unit knows what munitions are in use by the firing party and that adequate communications exist to transmit any Ban / Constraint imposed during the deployment.

3 JSP 762

3.1 Introduction

3.1.1 JSP 762 is the publication issuing full instructions for "Through Life Management" of explosives stores.

3.2 **Procedure for Altering the JSMCR**

3.2.1 Procedures for altering details contained in the JSMCR are contained in JSP 762 Chapter 7 – Through Life Munitions Management. This will normally be actioned by a munitions Project / Delivery Team.
