		be disfavoured in place of specific, directive communication.	Older students may vary in their attitude to returning to prepare for public exams based on their views about how important these are to their futures, which may vary by SES, gender and ethnicity.					attendance or serving their need.	
Is the implementation or likely impact on transmission of this model predicated on or potentially affecting other aspects of policy?		There have been suggestions that vulnerable children should be compelled to attend schools. This would be unwise firstly because these are a diverse group only some of whom may be at increased risk of harm at home, and secondly because in all but a minority of cases the harms in terms of alienating parents and stigmatising children would outweigh any benefits.  SEND children could need intimate/close care from					associated with increased attendance if employers give staff flexibility in shift working /	This option is more difficult to align with parental work patterns and so may have lower attendance.	

	Stay Shut	More vulnerable children and key worker kids	Transition years 5/6/10/12, this side of summer holiday	Early year settings	All primary	All secondary	Half time A (Full class, 2 weeks on/ 2 off – full attendance)	Half time B – Half classes, alternating two weeks	Fully reopen
		teachers/staff which							
		makes social							
		distancing difficult or							
		impossible.							
* How does the status of other household		Households with							
members interplay with a child's		BAME & adolescent or							
susceptibility of the virus?		young adult members							
		may create greater							
		susceptibility among							
		children to the virus							
		for different reasons.							
		BAME because of the							
		greater prevalence of							
		frontline medical and							
		care work.							
		Adolescents because							
		they may not comply							
		to regulations on							
		social distancing and							
		hygiene due to							
		distrust of							
		authority. Young							
		adult family members							
		will be likely to be							
		working in frontline							
		logistics sectors such							
		as warehousing and							
		be exposed more in							
		their workplaces to							
		risky environments.							
* How does a school's structure interplay		,							
with levels of mixing? i.e. modern schools									
vs. older buildings

		teachers' attendance as long as this was negotiated rather than imposed. Other staff could remain at home and facilitate distance learning.  If SEND children are to be included here then we have a smaller population of skilled and experienced teachers to draw upon, so it may be difficult to prioritise a certain age profile of	possible to prioritise younger teachers' attendance as long as this was negotiated rather than imposed. Other staff could	open.	the school would be fully open.	school would be fully open.	to prioritise younger teachers' attendance as long as this was negotiated rather than imposed. Other staff could remain at home and facilitate distance learning.	school then it would be possible to prioritise younger teachers' attendance as long as this was negotiated rather than imposed. Other staff could remain at home and facilitate distance learning.	the school would be fully open.
* How can testing be maximised each scenario to understand the intervention effectiveness? (assumed to be testing linked with school settings).		For this and for other partial opening strategies—drawing lessons from school-based health programmes, a successful testing programme will require strong intersectoral partnership, local champions and coordinators of testing, and clear school policies <sup>7</sup> , as well as a credible test							

Stay Shut	More vulnerable	Transition years 5/6/10/12, this side of summer holiday	Early year settings	All primary	All secondary	Half time A (Full class, 2 weeks on/ 2 off – full attendance)	Half classes	
	and appropriate beliefs about the severity of coronavirus even in school populations <sup>8</sup> .							

<sup>\*</sup>Wider contextual questions to consider around each scenario, please answer where possible
