Year: 2020 Week: 27

## Summary.

[Subscribe to the weekly syndromic surveillance email](#)

### Reporting week: 29 June to 5 July 2020.

During week 27, community-based respiratory indicators, including 'COVID-19-like' indicators, remained stable across most syndromic surveillance systems.

Please see the 'notes and caveats' sections in each individual syndromic surveillance bulletin for information about 'COVID-19-like' syndromic indicators, including important caveats around the interpretation of these indicators.

---

#### Remote Health Advice:

During week 27 NHS 111 calls and online assessments for potential COVID -19 remained stable (figures 8 & 19). Other respiratory indicators also remained stable.

[Access bulletin](#)

---

#### GP In Hours:

During week 27, COVID-19-like GP consultations increased slightly; rates continue to be highest in the 75+ years age group (figures 1 & 1a).

[Access bulletin](#)

Please note: During week 27 a reduced number of GP practices were available for inclusion so rates should be treated with some caution.

---

#### GP Out of Hours:

During week 27, GP out of hours contacts for respiratory indicators remained stable (figures 2-4).

[Access bulletin](#)

---

#### Emergency Department:

During week 27 the overall number of ED COVID-19-like attendances decreased slightly (figure 3). All other respiratory attendance indicators remained stable.

[Access bulletin](#)

Attendances for acute alcohol intoxication increased over Sat/Sun 4/5 July, at levels above those of recent weekends (figure 14).

---

#### Ambulance:

During week 27, COVID-19-like ambulance calls decreased slightly (figure 2).

08 July 2020

- Key messages are provided from each individual system.
- The different PHE syndromic surveillance systems access data from different areas of the national health care system.
- Each syndromic surveillance system is able to monitor a different selection of syndromic indicators based upon a different case mix of patients.
- Access to the full version of each syndromic surveillance bulletin is available through the PHE Syndromic Surveillance website found at: (<https://www.gov.uk/government/collections/syndromic-surveillance-systems-and-analyses>); reports are made available on Thursday afternoons.

---

## **Remote Health Advice Syndromic Surveillance System:**

*A remote health advice syndromic surveillance system that monitors syndromic calls from remote health advice services e.g. NHS 111 each day across England.*

## **GP In-Hours Syndromic Surveillance System:**

*A large general practitioner surveillance system monitoring daily consultations for a range of clinical syndromic indicators across England.*

## **GP Out-of-Hours Syndromic Surveillance System (GPOOHS):**

*A syndromic surveillance system monitoring daily GP out-of hours activity and unscheduled care across England using a range of clinical syndromic indicators.*

## **Emergency Department Syndromic Surveillance System (EDSSS):**

*A national ED network across England monitoring daily attendances and presenting symptoms/diagnoses.*

## **National Ambulance Syndromic Surveillance System (NASSS):**

*The national ambulance syndromic surveillance system (NASSS) monitors daily calls made by persons to an ambulance trust. All 10 ambulance trusts in England provide data.*
