### Key messages

During week 30, COVID-19-like and breathing problems ambulance calls remained stable (figures 2 & 3).

Please see the <u>notes for information</u> about the COVID-19-like syndromic indicator including important caveats around the interpretation of this indicator.

A Heat-Health Watch system operates in England from 1 June to 15 September each year. As part of the Heatwave Plan for England, the PHE Real-time Syndromic Surveillance team will be routinely monitoring the public health impact of hot weather using syndromic surveillance data during this period. Heat-health watch level (current reporting week): **Level 1: Summer preparedness** 

http://www.metoffice.gov.uk/weather/uk/heathealth/

### Syndromic indicators at a glance:

Indicator	Calls*	Trend <sup>†</sup>	Level <sup>‡</sup>

<sup>\*</sup> Number of syndromic calls received by PHE in the reporting week

#### Data summary:

Daily total syndromic counts and number of English ambulance trusts for which data is included in this bulletin.

Day	Trusts*	Week 30
Monday	10	13,894
Tuesday	10	13,340
Wednesday	10	13,209
Thursday	10	13,545
Friday	10	14,027
Saturday	10	13,663
Sunday	10	13,360
Total	(max) 10	95,038

<sup>\*</sup> Ambulance Trusts (England) submitting daily syndromic surveillance data included in report

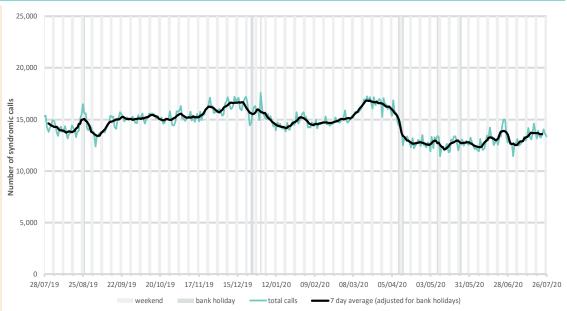

<sup>&</sup>lt;sup>†</sup> Trend is defined as the overall activity over the last few weeks

<sup>&</sup>lt;sup>‡</sup> Current activity in comparison to historical baselines, which have been constructed using data from 1 January 2018

28 July 2020 Year: 2020 Week: 30

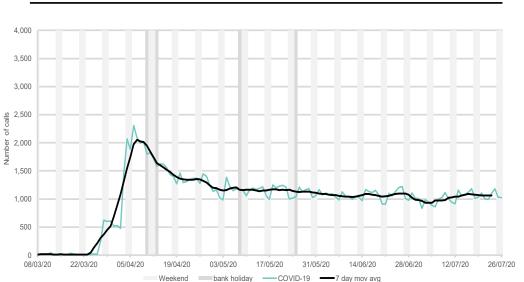

## 1: Total syndromic calls.

The total number of syndromic calls recorded each day, all ages, England.

# 2: 'COVID-19-like' calls.

Daily number of calls (and 7-day moving average\*) that use the 'pandemic/epidemic/ outbreak' chief complaint category, England. This is related to patients reporting COVID-19-like symptoms but is not a count of COVID-19 cases. Please see the notes section for further information and caveats about this indicator.

#### Intentionally left blank

<sup>\* 7-</sup>day moving average adjusted for bank holidays.

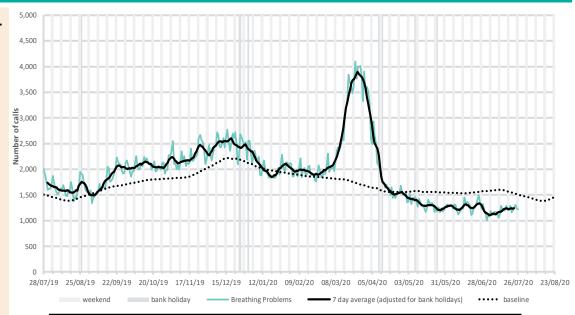

## **Ambulance**

28 July 2020 Year: 2020 Week: 30

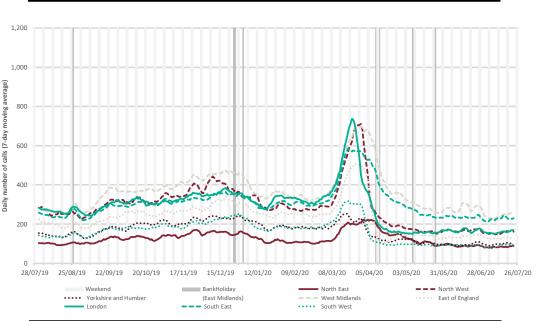

#### 3: Breathing problems.

Daily number of calls related to 'breathing problems', England.

# 3a: Breathing problems calls by PHE Centre.

Number of daily breathing problems calls by PHE Centre, shown as a 7-day moving average\*. Please note: East Midlands is not included as no breathing problems calls are received.

#### Intentionally blank

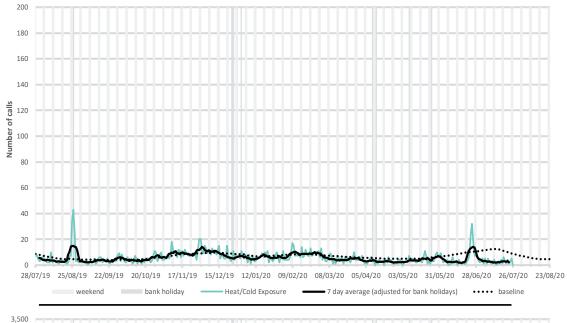

<sup>\* 7-</sup>day moving average adjusted for bank holidays.

28 July 2020 Year: 2020 Week: 30

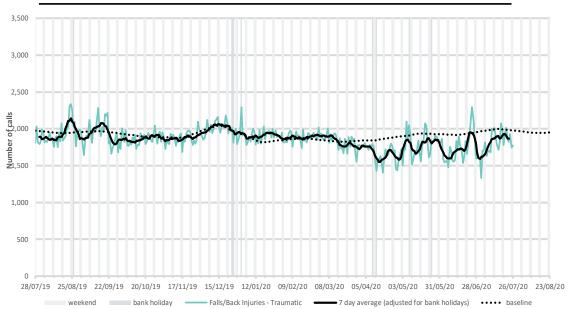

#### 4: Heat/cold exposure.

Daily number of calls related to 'heat/ cold exposure, England.

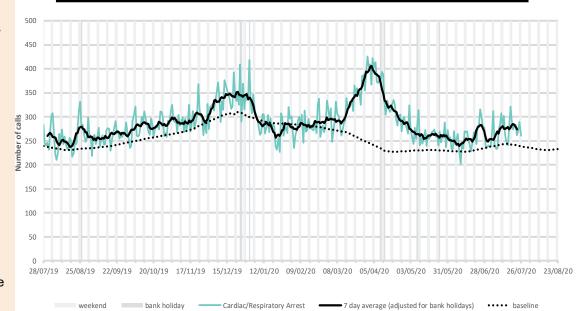

## 5: Falls/ back injury - traumatic.

Daily number of calls related to 'falls/ back injury - traumatic', England.

# 6: Cardiac/respiratory arrest.

Daily number of calls related to 'cardiac/ respiratory arrest', England.

\* 7-day moving average adjusted for bank holidays.

holidays.

28 July 2020 Year: 2020 Week: 30 7: Chest pain. Daily number of calls 2,000 related to 'chest pain', England. Number of calls 1,000 28/07/19 25/08/19 22/09/19 20/10/19 17/11/19 15/12/19 12/01/20 09/02/20 08/03/20 05/04/20 03/05/20 31/05/20 28/06/20 26/07/20 23/08/20 weekend bank holiday Chest Pain 7 day average (adjusted for bank holidays) 1000 8: Overdose/ingestion/ 900 poisoning. 800 Daily number of calls 700 related to 'overdose/ Number of calls ingestion/poisoning', 600 England. 400 300 28/07/19 25/08/19 22/09/19 20/10/19 17/11/19 15/12/19 12/01/20 09/02/20 08/03/20 05/04/20 03/05/20 31/05/20 28/06/20 26/07/20 23/08/20 Overdose/Ingestion/Poisoning → 7 day average (adjusted for bank holidays) ••••• baseline 2,500 9: Unconscious/ passing out. 2.000 Daily number of calls related to 'unconscious', England. ## COVID-19-like ambulance calls:

- During March 2020 ambulance trusts started using a 'Pandemic/Epidemic/Outbreak' triage card to assess potential COVID-19 patients. Calls using this 'Pandemic' triage are now presented in this bulletin as 'COVID-19-like' calls.
- When the Pandemic triage was introduced the number of syndromic indicator calls e.g. breathing problems decreased, reflecting the increased use of the pandemic triage.
- Please note that these ambulance calls are not an absolute count of COVID-19 cases assessed by ambulance trusts: not all ambulance trusts use the Pandemic triage card; other chief complaint categories and local codes are also used to triage potential COVID-19 patients.
- The 'COVID-19-like' call data presented in this bulletin should therefore be used to monitor trends in calls and not numbers.

#### Introduction to charts:

- A 7-day moving average (adjusted for bank holidays) is overlaid on the daily data reported in each chart, unless specified.
- Baselines have been constructed using historical data since 1 January 2018.
- National ambulance syndromic surveillance (NASS) call data are analysed by the Real-time Syndromic Surveillance Team (ReSST) on a daily basis to identify national and regional trends. A statistical algorithm underpins each syndromic surveillance system, routinely identifying activity that has increased significantly or is statistically significantly high for the time of year. Results from these daily analyses are assessed by the ReSST, along with analysis by age group, and anything deemed of public health importance is alerted by the team.

## Notes and further information:

#### Coverage:

- Total syndromic calls includes all calls where the chief presenting complaint can be mapped to one of the syndromic indicators monitored by Public Health England.
- Some indicators are not routinely presented in this report.
- Total syndromic calls is lower than the total number of calls received by ambulance trusts.

#### **Description of included NASS indicators:**

- Breathing Problems: persons finding it difficult to breathe.
- Heat/Cold Exposure: heat or cold exposure.
- Falls/Back Injuries traumatic: persons falling or having a back injury.
- Cardiac/Respiratory Arrest: persons who have stopped or have ineffective breathing or/and no pulse.
- Chest Pain: persons experiencing chest pain or chest discomfort.
- Overdose/Ingestion/Poisoning: overdoses, ingestion of a substance or poisoning.
- Unconscious/Passing out: persons who are unconscious, not alert or fainting.

#### **Acknowledgements:**

#### We would like to thank:

- North East, North West, Yorkshire, East Midlands, West Midlands, East of England, London, South East Coast, South Central, and South Western NHS Ambulance Trusts for submitting anonymised, daily data to the National Ambulance Syndromic Surveillance system.
- The Association of Ambulance Chief Executives for their support in establishing this system.
