Department for Business, Energy & Industrial Strategy

Monthly Statistics of Building Materials and Components

August 2020

No. 546

The Office for National Statistics has released a statement on COVID-19 and the production of statistics

NOTES

In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Symbols

The following standard Government Statistical Service symbols have been used throughout:

Not available	:
Provisional	p
Revised	r
Confidential	c

Revisions

Data can be revised for a number of reasons, including:

- receipt of more data
- methodology changes
- corrections

Changes to published data occur either when BEIS receives either:

- more accurate information
- complete data for a reference period following more detailed validation of source data as planned

Data subject to scheduled revisions are published as provisional, indicated by a 'p' marker. At a later scheduled date, provisional data are finalised and 'p' markers are removed. For scheduled revisions, no 'r' marker is added even if the value has changed. When a value changes due to an unscheduled revision, an 'r' marker is used.

For more information on BEIS' revisions policy, see
https://www.gov.uk/government/publications/building-materials-statistics-revisions-policy

National Statistics status means that our statistics meet the highest standards of trustworthiness, quality and public value, and it is our responsibility to maintain compliance with these standards.

These statistics last underwent a full assessment against the Code of Practice for Statistics in 2011.

Since the latest review by the Office for Statistics Regulation, we have continued to comply with the Code of Practice for Statistics, and have made the following improvements:

- carried out a public consultation and introduced publication of seasonally adjusted data on deliveries of sand and gravel, concrete blocks, bricks, and ready-mixed concrete
- in response to the cessation of MHCLG's Annual Minerals Raised Inquiry, which previously supplied the sampling frame for the land-won sand and gravel survey, we have:
    - changed the survey from sample survey to a census, increasing the panel from 200 sites to around 500 sites
    - refreshed the panel of sites annually using information from the British Geological Survey
    - made the survey statutory under the Statistics of Trade Act 1947, bringing it into line with the marine-dredged sand and gravel survey
- improved the design of the blocks survey, making it fully monthly instead of a mixture of monthly and quarterly data collection
- introduced the publication of the tables in an OpenDocument (ODS) spreadsheet, in addition to Microsoft Excel and PDF

Unless otherwise stated, the statistics published in this volume have been collected by the Office for National Statistics on behalf of the Department for Business, Energy and Industrial Strategy.

Lead Statistician: Frances Pottier

Notes:

1. Most of these indices, which are compiled by the Office for National Statistics, are a selection of producer price indices. Complete list available online at: https://www.ons.gov.uk/economy/inflationandpriceindices/datalist?query. Search for reference MM22.

2. We have recently identified a potential production issue with the sand and gravel indices (both including and excluding aggregates levy) which ONS produce for us at special request, and are working with ONS to resolve it. We will also look at the other indices which ONS produce for us at special request, which are: crushed rock (both including and excluding aggregates levy), coated roadstone (excluding aggregates levy) imported sawn or planed wood and imported plywood. Users may like to consider the use of related ONS standard indices for Gravel, Sands, Clays and Kaolin (JTV8 and JTV9), available from https://www.ons.gov.uk/timeseriestool?topic=/economy/inflationandpriceindices which are unaffected by the issue.

* The Office for National Statistics state that these Indices are based on relatively few quotes and in the long term should not be relied upon for contractual purposes.

** These index values are considered less reliable mainly due to lack of market coverage.

*** Index K2WY (Wood, sawn or chipped lengthwise, sliced or peeled, of a thickness > 6mm; railway or tramway sleepers of wood not impregnated) is no longer a live index. Index is retained in Tables 2 and 3 as it may be reinstated in future.

4. From May 2014, values for each quarter will no longer be adjusted to ensure that rounded values sum to the total value. Thus, in any given quarter, the sum of all sub-categories of sand and gravel may not exactly match that shown in the total column. Please see the 'Pre-Announcements and Summary of Revisions to Monthly Statistics of Building Materials and Components Publication' document on our website for further details.

[1] Refers to stocks at the end of the period.

[2] Consists of all slate tiles which could be used as roofing tiles.

Note: Response for Q1 2020 was lower than normal due to sites and/or site offices being closed due to Covid-19 restrictions, meaning that the majority of figures required suppression.

Notes:

1. Arrangements for publication of the cementitious data have been revised following discussion and agreement by the Mineral Products Association (MPA) Cement members. Data are now provided on an annual basis. For quarterly and monthly data up to September 2013, please refer to earlier editions of this publication.

2. Where the coverage is for Great Britain, the figures for imports & exports are defined accordingly and have been estimated. Cementitious material covers cement itself, fly ash to EN 450 Part 1 where used as part of the cement in concrete (previously known as pulverised fuel ash (pfa) to BS 3892 Part 1) and ground granulated blast furnace slag (ggbs) to EN 15167 Part 1 (previously BS 6699)

* Refers to stocks at end of period

Notes:

1. From March 2015, seasonally adjusted figures for deliveries of bricks have been included in this table. In the production of these figures, brick deliveries data back to January 1983 have been seasonally adjusted. This long run data series is available on request.

2. The current unusual circumstances are affecting the seasonal adjustment of deliveries, therefore we will not be publishing revisions as normal until we can carry out further analysis.

* Refers to stocks at end of period.

Notes:

1. From March 2015, seasonally adjusted figures for deliveries of concrete blocks have been included in this table. In the production of these figures, blocks deliveries data back to January 1983 have been seasonally adjusted. This long run data series is available on request.

2. The current unusual circumstances are affecting the seasonal adjustment of deliveries, therefore we will not be publishing revisions as normal until we can carry out further analysis

Notes: 1. Regions refer to Government Office Regions

2. Concrete blocks in this table have an average depth of 10cm. Dividing the figures in this table by 10 hence gives the amount of concrete blocks in thousands of cubic metres.

* Refers to stocks at the end of the period.

In April 2012, the Mineral Products Association (who provide these figures), estimated that data understates UK deliveries by around 20-25%. Previously, they had estimated that figures understate UK deliveries by 14-18%.

Notes:

1. From March 2015, seasonally adjusted figures for deliveries of ready-mixed concrete have been included in this table. In the production of these figures, ready-mixed concrete deliveries data back to Q1 1983 have been seasonally adjusted. This long run data series is available on request. Data has been revised and estimates are sourced from the mpa.
2. The current unusual circumstances are affecting the seasonal adjustment of deliveries, therefore we will not be publishing revisions as normal until we can carry out further analysis.
