- (a) which are registered or recorded in the United Kingdom or Switzerland;
- (b) which sail under the flag of the United Kingdom or Switzerland;
- which are owned to an extent of at least 50% by nationals of the United Kingdom, a Member State of the European Union or Switzerland, or by a company with its head office in one of these states, of which the manager or managers, Chairman of the Board of Directors or the Supervisory Board, and the majority of the members of such boards are nationals of the United Kingdom, a Member State of the European Union or Switzerland and of which, in addition, in the case of partnerships or limited companies, at least half the capital belongs to those states or to public bodies or nationals of the said states;

- (d) of which the master and officers are nationals of the United Kingdom, a Member State of the European Union or Switzerland; and
- (e) of which at least 75% of the crew are nationals of the United Kingdom, a Member State of the European Union or Switzerland.

Sufficiently worked or processed products

1. For the purposes of Article 2, products which are not wholly obtained are considered to be sufficiently worked or processed when the conditions set out in Annex II are fulfilled.

The conditions referred to in Annex II indicate, for all products covered by the United Kingdom-Switzerland Agreement, the working or processing which must be carried out on non-originating materials used in manufacturing and apply only in relation to such materials. It follows that if a product which has acquired originating status by fulfilling the conditions set out in the list is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the notation in the manufacture.

- 2. Notwithstanding paragraph 1, non-originating materials which, according to the conditions set out in Annex II, should not be used in the manufacture of a product may nevertheless be used, provided that:
- (a) their total value does not exceed 10% of the e-wc ks price of the product; and
- (b) any of the percentages given it An ex 1 for the maximum value of non-originating materials are not exceeded through the explication of this paragraph.

This paragraph shall not apply to projects falling within Chapters 50 to 63 of the Goods Classification Table made upper the Customs Tariff (Establishment) Regulations 2019 ("Goods Classification Table").

3. Paragrap's and shall apply subject to the provisions of Article 7.

Article 7 **Insufficient working or processing**

- 1. Without prejudice to paragraph 2, the following operations shall be considered as insufficient working or processing to confer the status of originating products, whether or not the requirements of Article 6 are satisfied:
- (a) preserving operations to ensure that the products remain in good condition during transport and storage;
- (b) breaking-up and assembly of packages;
- (c) washing, cleaning; removal of dust, oxide, oil, paint or other coverings;
- (d) ironing or pressing of textiles;
- (e) simple painting and polishing operations;

- (f) husking, partial or total bleaching, polishing, and glazing of cereals and rice;

- (n) mixing of sugar with any material;
- (o) simple assembly of parts of articles to constitute a round the article or disassembly of products into parts;
- (p) a combination of two or more operation spec fied in subparagraphs (a) to (n); or
- (q) slaughter of animals.
- 2. All operations carried out contributions in the United Kingdom or Switzerland on a given product shall be considered together who determining whether the working or processing undergone by that product is to be regarded as insufficient within the meaning of paragraph 1.

Article 8 **Unit of qualification**

1. The unit of qualification for the application of the provisions of this Origin Reference Document shall be the particular product which is considered as the basic unit when determining classification using the nomenclature of the Goods Classification Table.

It follows that:

- (a) when a product composed of a group or assembly of articles is classified under the terms of the Goods Classification Table in a single heading, the whole constitutes the unit of qualification;
- (b) when a consignment consists of a number of identical products classified under the same heading of the Goods Classification Table, each product must be taken individually when applying the provisions of this Origin Reference Document.
- 2. Where, under General Rule 5 of Part Two, Section 1, of the Tariff of the United Kingdom, packaging is included with the product for classification purposes, it shall be included for the purposes of determining origin.

Accessories, spare parts and tools

Accessories, spare parts and tools dispatched with a piece of equipment, machine, apparatus or vehicle, which are part of the normal equipment and included in the price thereof or which are not separately invoiced, shall be regarded as one with the piece of equipment, machine, apparatus or vehicle in question.

Article 10 **Sets**

Sets, as defined in General Rule 3 of Part Two, Section 1, of the Tariff of the United Kingdom, shall be regarded as originating when all component products are originating. Nevertheless, when a set is composed of originating and non-originating products, the set as a whole shall be regarded as originating, provided that the value of the non-originating products does not exceed 15% of the exworks price of the set.

Article 11 **Neutral elements**

In order to determine whether a product is an origining pulluct, it shall not be necessary to determine the origin of the following which might be used its manufacture:

- (a) energy and fuel;
- (b) plant and equipment;
- (c) machines and tools or
- (d) goods which with tent into the final composition of the product nor are intended to do so.

TITLE III

- 4. The duplicate, which must bear the date of issue of the original movement certificate EUR.1 or EUR-MED, shall take effect as from that date.

Article 20

Issue of movement Certificates EUR.1 or EUR-MED on the basis of a proof of origin previously issued or completed

When originating products are placed under the control of a customs office in the United Kingdom or Switzerland, it shall be possible to replace the original proof of origin by one or more movement certificates EUR.1 or EUR-MED for the purpose of sending all or some of these products elsewhere within the United Kingdom or Switzerland. The replacement movement certificate(s) EUR.1 or EUR-MED shall be issued by the customs office under whose control the products are placed.

Article 21

Accounting segregation

- 1. Where considerable cost or material difficulties arise in keeping separate stocks of originating and non-originating materials which are identical and interchangeable, the customs authorities, at the written request of those concerned, may authorise the so-called "accounting segregation" method to be used for managing such stocks.
- 2. This method must be able to ensure that, for a specific reference-period, the number of products obtained which could be considered as originating is the same as that which would have been obtained if there had been physical segregation of the stocks.
- 3. The customs authorities may grant such authorisation, subject to any conditions deemed appropriate.
- 4. This method is recorded and applied on the sis of the general accounting principles applicable in the Party where the product was manufacture.
- 5. The beneficiary of this facilitation by is the or apply for proofs of origin, as the case may be, for the quantity of products which may be considered as originating. At the request of the customs authorities, the beneficiary chan provide a statement of how the quantities have been managed.
- 6. The customs who ities hall monitor the use made of the authorisation and may withdraw it at any time wheneve, the coneticiary makes improper use of the authorisation in any manner whatsoever or falls of this land of the other conditions laid down in this Origin Reference Document.

Article 22

Conditions for making out an origin declaration or an origin declaration EUR-MED

- 1. An origin declaration or an origin declaration EUR-MED as referred to in subparagraph 1(c) of Article 16 may be made out:
- (a) by an approved exporter within the meaning of Article 23; or
- (b) by any exporter for any consignment consisting of one or more packages containing originating products whose total value does not exceed EUR 6,000.
- 2. Without prejudice to paragraph 3, an origin declaration may be made out in the following cases:
- (a) if the products concerned can be considered as products originating in the United Kingdom, in Switzerland or in one of the other countries referred to in paragraph 1 of Articles 3 and

- 4 with which cumulation is applicable, without application of cumulation with materials originating in one of the countries referred to in paragraph 2 of Articles 3 and 4 and fulfil the other requirements of this Origin Reference Document; or
- (b) if the products concerned can be considered as products originating in one of the countries referred to in paragraphs 2 of Articles 3 and 4 with which cumulation is applicable, without application of cumulation with materials originating in one of the countries referred to in Articles 3 and 4 and fulfil the other requirements of this Origin Reference Document, provided a certificate EUR-MED or an origin declaration EUR-MED has been issued in the country of origin.
- 3. An origin declaration EUR-MED shall be made out if the products concerned can be considered as products originating in the United Kingdom, in Switzerland or in one of the other countries referred to in Articles 3 and 4 with which cumulation is applicable, fulfil the requirements of this Origin Reference Document and:
- (a) cumulation was applied with materials originating in one countries referred to in paragraph 2 of Articles 3 and 4, or
- (b) the products may be used as materials in the context of products for export to one of the countries referred to a paragraph 2 of Articles 3 and 4, or
- the products may be re-exported from the country of destination to one of the countries referred to in paragraph 2 of Articles 3 and 4.
- 4. An origin declaration EUR-ME shall ontain one of the following statements in English:
- (a) if origin has been obtain by a plication of cumulation with one or more of the countries referred to in Article 2 and 4:
 - "CUMULATICN APLIED WITH ... (name of the country/countries)"
- (b) if cogin has been extained without the application of cumulation with one or more of the countries reported to in Articles 3 and 4:

"NO CUMULATION APPLIED"

- 5. The exporter making out an origin declaration or an origin declaration EUR-MED shall be prepared to submit at any time, at the request of the customs authorities of the exporting Party, all appropriate documents proving the originating status of the products concerned as well as the fulfilment of the other requirements of this Origin Reference Document.
- 6. An origin declaration or an origin declaration EUR-MED shall be made out by the exporter by typing, stamping or printing on the invoice, the delivery note or another commercial document, the declaration, the text of which appears in Annexes IVa and IVb, using one of the linguistic versions set out in these Annexes and in accordance with the provisions of the domestic law of the exporting Party. If the declaration is handwritten, it shall be written in ink in printed characters.
- 7. Origin declarations and origin declarations EUR-MED shall bear the original signature of the exporter in manuscript. However, an approved exporter within the meaning of Article 23 shall

not be required to sign such declarations provided that he gives the customs authorities of the exporting Party a written undertaking that he accepts full responsibility for any origin declaration which identifies him as if it had been signed in manuscript by him.

8. An origin declaration or an origin declaration EUR-MED may be made out by the exporter when the products to which it relates are exported, or after exportation on condition that it is presented in the United Kingdom no longer than two years after the importation of the products to which it relates.

Article 23

Approved exporter

- 1. The customs authorities of the exporting Party may authorise any exporter (hereinafter referred to as "approved exporter") who makes frequent shipments of products under the United Kingdom-Switzerland Agreement to make out origin declarations or origin declarations EUR-MED irrespective of the value of the products concerned. An exporter seeking such authorisation must offer to the satisfaction of the customs authorities all guarantees necessary to verify the originating status of the products as well as the fulfilment of the other requirements of this Origin Reference Document.
- 2. The customs authorities may grant the status of approved exporter subject to any conditions which they consider appropriate.
- 3. The customs authorities shall grant of the proved exporter a customs authorisation number which shall appear on the origin decoration or the origin declaration EUR-MED.
- 4. The customs authorities shall mone for the use of the authorisation by the approved exporter.
- 5. The customs author, s ma, withdraw the authorisation at any time. They shall do so where the approved exporter to length offers the guarantees referred to in paragraph 1, no longer fulfils the conditions referred to in paragraph 2 or otherwise makes an incorrect use of the authorisation.

Article 24

Validity of proof of origin

- 1. A proof of origin shall be valid for four months from the date of issue in the exporting Party, and must be submitted within the said period to the customs authorities of the United Kingdom.
- 2. Proofs of origin which are submitted to the customs authorities of the United Kingdom after the final date for presentation specified in paragraph 1 may be accepted for the purpose of applying preferential treatment, where the failure to submit these documents by the final date set is due to exceptional circumstances.
- 3. In other cases of belated presentation, the customs authorities of the United Kingdom may accept the proofs of origin where the products have been submitted before the said final date.

Submission of proofs of origin

Proofs of origin shall be submitted to the customs authorities of the United Kingdom in accordance with the procedures applicable in that Party. The said authorities may require a translation of a proof of origin and may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the implementation of the Agreement.

Article 26 **Importation by instalments**

Where, at the request of the importer and on the conditions laid down by the customs authorities of the United Kingdom, dismantled or non-assembled products within the meaning of General Rule 2(a) of Part Two, Section 1, of the Tariff of the United Kingdom, falling within Sections XVI and XVII or headings 7308 and 9406 of the Goods Classification Table are imported by instalments, a single proof of origin for such products shall be submitted to the justoms authorities upon importation of the first instalment.

Article 27

Exemptions from proof or, in

- 1. Products sent as small packages from priva er risc to private persons or forming part of travellers' personal luggage shall be admitted as coordating products without requiring the submission of a proof of origin, provided the succorducts are not imported by way of trade and have been declared as meeting the requirements of this Origin Reference Document and where there is no doubt as to the veracity of such a declaration. In the case of products sent by post, this declaration can be made on the coordinate of that document.
- 2. Imports which re o casional and consist solely of products for the personal use of the recipients or travelle, or heir tamilies shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.
- 3. Furthermore, the total value of these products shall not exceed EUR 500 in the case of small packages or EUR 1,200 in the case of products forming part of travellers' personal luggage.

Article 28

Supporting documents

The documents referred to in paragraph 3 of Article 17 and paragraph 5 of Article 22 used for the purpose of proving that products covered by a movement certificate EUR.1, a movement certificate EUR-MED, an origin declaration or an origin declaration EUR-MED can be considered as products originating in the United Kingdom, in Switzerland or in one of the other countries referred to in Articles 3 and 4 and fulfil the other requirements of this Origin Reference Document may consist, *inter alia*, of the following:

(a) direct evidence of the processes carried out by the exporter or supplier to obtain the goods concerned, contained for example in his accounts or internal book-keeping;

- (b) documents proving the originating status of materials used, issued or made out in the United Kingdom or in Switzerland where these documents are used in accordance with domestic law:
- (c) documents proving the working or processing of materials in the United Kingdom or in Switzerland, issued or made out in the United Kingdom or in Switzerland, where these documents are used in accordance with domestic law:
- (d) movement certificates EUR.1, movement certificates EUR-MED, origin declarations or origin declarations EUR-MED proving the originating status of materials used, issued or made out in the United Kingdom or Switzerland in accordance with this Origin Reference Document, or in one of the other countries referred to in Articles 3 and 4, in accordance with rules of origin which are identical to the rules in this Origin Reference Document;
- (e) appropriate evidence concerning working and processing undergone outside the United Kingdom, Switzerland or the other countries referred to in article 3 and 4 by application of Article 12, proving that the requirements of that Article have been satisfied.

Discrepancies and from lerrors

- 1. The discovery of slight discreparcies is tweeth statements made in the proof of origin and those made in the documents submitted, the ustoms office for the purpose of carrying out the formalities for importing the products shall not projector render the proof of origin null and void if it is duly established that this document does correspond to the products submitted.
- 2. Obvious formal errors such as typing errors, on a proof of origin should not cause this document to be rejected if these error are not such as to create doubts concerning the correctness of the statements made in the document.

Article 30

Amounts expressed in euro

- 1. For the pure ses of paragraph 1(b) of Article 22 and paragraph 3 of Article 27, in cases where products are invoiced in a currency other than euro, amounts in the national currencies of the countries referred to in Articles 3 and 4, equivalent to the amounts expressed in euro shall be fixed annually by each of the countries concerned.
- 2. A consignment shall benefit from the provisions of paragraph 1(b) of Article 22 or paragraph 3 of Article 27 by reference to the currency in which the invoice is drawn up, according to the amount fixed by the Party concerned.
- 3. The amounts to be used in any given national currency shall be the equivalent in that currency of the amounts expressed in euro as at the first working day of October and shall apply from 1 January the following year. The Parties shall notify each other of the relevant amounts.
- 4. A Party may round up or down the amount resulting from the conversion into its national currency of an amount expressed in euro. The rounded-off amount may not differ from the amount resulting from the conversion by more than 5%. A country may retain unchanged its national currency equivalent of an amount expressed in euro if, at the time of the annual adjustment provided for in paragraph 3, the conversion of that amount, prior to any rounding-off, results in an increase

of less than 15% in the national currency equivalent. The national currency equivalent may be retained unchanged if the conversion would result in a decrease in that equivalent value.

5. The amounts expressed in euro shall be reviewed by the Joint Committee at the request of any of the Parties. When carrying out this review, the Joint Committee shall consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in euro.

TITLE VI

ARRANGEMENTS FOR ADMINISTRATIVE CO-OPERATION

Article 31

Verification of proofs of origin

- 1. Subsequent verifications of proofs of origin shall be carried out at random or whenever the customs authorities of the United Kingdom have reasonable doubts as the authenticity of such documents, the originating status of the products concerned to the fulfillment of the other requirements of this Origin Reference Document.
- 2. For the purposes of paragraph 1, the customs authorities of the United Kingdom shall return the movement certificate EUR.1 or EUR-MED and the revoice, it has been submitted, the origin declaration or the origin declaration EUR-MED (a column of the exporting Party giving where appropriate, the reasons for the enquiry. Any documents and information obtained suggesting and the information given on the proof of origin is incorrect shall be forwarded in support of the industry for verification.
- 3. The verification shall a carrie out by the customs authorities of the exporting Party. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.
- 4. If the creatoms outhouties of the United Kingdom decide to suspend the granting of preferential treatment, the products concerned while awaiting the results of the verification, release of the product shall be oncred to the importer subject to any precautionary measures considered necessary.
- 5. The customs authorities requesting the verification shall be informed of the results of this verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as products originating in Switzerland or in one of the other countries referred to in Articles 3 and 4 and fulfil the other requirements of this Origin Reference Document.
- 6. If, in cases of reasonable doubt, there is no reply within ten months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.

TITLE VII

FINAL PROVISIONS

Article 32 **Ceuta and Melilla**

The term 'European Union' used in this Origin Reference Document does not cover Ceuta and Melilla. Products originating in Ceuta and Melilla are not considered to be products originating in the European Union for the purposes of this Origin Reference Document.

Article 33 **Transitional Provision for Goods in Transit or Storage**

The provisions of this Agreement may be applied to goods which comply with the provisions of this Origin Reference Document and which, on the date of entry into force of this Agreement, are either in transit or are in the United Kingdom or in Switzerland in temporary storage in customs warehouses or in free zones, subject to the submission to the customs authorities of the importing country, within twelve months of the said date, of a movement certificate EUR.1 or EUR-MED issued retrospectively by the customs authorities of the experting country together with the documents showing that the goods have been transported directly in accordance with the provisions of Article 13.

Article 34
Annex

The Annexes to this Origin Reference Doc men are an integral part thereof.

Art. 12 35

The Propin aity of Andorra

- 1. Products originating in the Pacipa ity of Andorra falling within Chapters 25 to 97 of the Goods Classification Table, and meeting the conditions of subparagraph 7(b) of Article 3 and subparagraph 5(b) of Article 4, shall be accepted by the Paragraph 3 as originating in the European Union.
- 2. This Origin Reference Legiment shall apply mutatis mutandis for the purpose of defining the originating status of the Lov mentioned products.

Article 36

The Republic of San Marino

- 1. Products originating in the Republic of San Marino, meeting the conditions of subparagraph 7(b) of Article 3 and subparagraph 5(b) of Article 4, shall be accepted by the Parties as originating in the European Union.
- 2. This Origin Reference Document shall apply mutatis mutandis for the purpose of defining the originating status of the abovementioned products.

ANNEX I

Introductory notes to the list in Annex II

Note 1:

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 6 of this Origin Reference Document.

Note 2:

- 2.1.The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Goods Classification Table
- 2.2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in column 3 or 4 apply to all products which, under the Goods Classification Table, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 2.3. Where there are different rules in the list applying to different poduc within a heading, each indent contains the description of that part of the heading covered by the a light rules in column 3 or 4.
- 2.4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt to apply either the rule set out in column 3 that that it at in column 4. If no origin rule is given in column 4, the rule set out in column 3 is to be applied.

Note 3:

3.1.The provisions of Article 6 of the Original Reference Document, concerning products having acquired originating status which are used in the manufacture of other products, shall apply regardless of whether this status has been acquired uside the factory where these products are used or in another factory in any of the other countries referred to in Articles 3 and 4 of this Origin Reference Document with which cumulation is applicable.

Example:

An engine of heading 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 % of the ex-works price, is made from 'other alloy steel roughly shaped by forging' of heading ex 7224.

If this forging has been forged in the European Union from a non-originating ingot, it has already acquired originating status by virtue of the rule for heading ex 7224 in the list. The forging can then count as originating in the value-calculation for the engine, regardless of whether it was produced in the same factory or in another factory in the European Union. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

3.2. The rule in the list represents the minimum amount of working or processing required, and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at a later stage is not.

3.3. Without prejudice to Note 3.2, where a rule uses the expression 'Manufacture from materials of any heading', then materials of any heading(s) (even materials of the same description and heading as the product) may be used, subject, however, to any specific limitations which may also be contained in the rule.

However, the expression 'Manufacture from materials of any heading, including other materials of heading ...' or 'Manufacture from materials of any heading, including other materials of the same heading as the product' means that materials of any heading(s) may be used, except those of the same description as the product as given in column 2 of the list.

3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of headings 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other, or both.

3.5. Where a rule in the list specifies that a product must be manufacture from a particular material, the condition does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles,

Example:

The rule for prepared foods of heading 1904, which spectically excludes the use of cereals and their derivatives, does not prevent the use of mine all satisfications, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an sticle of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is all wed for this class of article, it is not possible to start from non-woven cloth – even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn – that is, the fibre stage.

3.6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. Furthermore, the individual percentages must not be exceeded, in relation to the particular materials to which they apply.

Note 4:

4.1.The term 'natural fibres' is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres which have been carded, combed or otherwise processed, but not spun.

- 4.2. The term 'natural fibres' includes horsehair of heading 0511, silk of headings 5002 and 5003, as well as wool fibres and fine or coarse animal hair of headings 5101 to 5105, cotton fibres of headings 5201 to 5203, and other vegetable fibres of headings 5301 to 5305.
- 4.3. The terms 'textile pulp', 'chemical materials' and 'paper-making materials' are used in the list to describe the materials, not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
- 4.4.The term 'man-made staple fibres' is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings 5501 to 5507.

Note 5:

- 5.1. Where, for a given product in the list, reference is made to this Note, the conditions set out in column 3 shall not be applied to any basic textile materials used in the manufacture of this product and which, taken together, represent 10 % or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4).
- 5.2. However, the tolerance mentioned in Note 5.1 may be applied on ... n xed products which have been made from two or more basic textile materials.

Siik,
— wool,
— coarse animal hair,
— fine animal hair,
— horsehair,
— cotton,
— paper-making materials 1 paper,
— flax,
— true hemp,
— jute and othe terrile ast fibres,
— sisal and other extile res of the genus Agave,
— coconut, ab. 19, pmie and other vegetable textile fibres,
— synthetic man-ne filaments,
— artificial man-made filaments,
 current-conducting filaments,
 synthetic man-made staple fibres of polypropylene,
 synthetic man-made staple fibres of polyester,
— synthetic man-made staple fibres of polyamide,

The following are the basic textile materials:

___ cill

— synthetic man-made staple fibres of polyimide,

— synthetic man-made staple fibres of polyacrylonitrile,

- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of poly(phenylene sulphide),
- synthetic man-made staple fibres of poly(vinyl chloride),
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether, whether or not
- yarn made of polyurethane segmented with flexible segments of polyester, whether or not gimped,

- products of heading 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading 5605.

Example:

A yarn, of heading 5205, made from cotton fibres of heading 5203 and synthetic staple fibres of heading 5506, is a mixed yarn. Therefore, non-originating synthetic staple fibres which do not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp) may be used, provided that their total weight does not exceed 10 % of the weight of the yarn.

Example:

A woollen fabric, of heading 5112, made from woollen yarn of heading 5107 and synthetic yarn of staple fibres of heading 5509, is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp), or woollen yarn which does not satisfy the origin-rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning), or a combination of the two, may be used, provided that their total weight does not exceed 10 % of the weight of the fabric.

Example:

Tufted textile fabric, of heading 5802, made from cotton yarn on a ring 5205 and cotton fabric of heading 5210, is a only mixed product if the cotton fabric is itself a mixed fabric made from yarns classified in two separate headings, or if the cotton yarns are the inselves mixtures.

Example:

If the tufted textile fabric concerned had been nade from cotton yarn of heading 5205 and synthetic fabric of heading 5407, then, obviously, the yarns used re two separate basic textile materials and the tufted textile fabric is, accordingly, a mixed poduct.

- 5.3.In the case of products incorporating 'you made of polyurethane segmented with flexible segments of polyether, whether or not gimped', has tole ance is 20 % in respect of this yarn.
- 5.4.In the case of products incompositing 'strip consisting of a core of aluminium foil or of a core of plastic film whether or it could will aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or oloured adhesive between two layers of plastic film', this tolerance is 30 % in respect of this strip.

Note 6:

- 6.1. Where, in the list, reference is made to this Note, textile materials (with the exception of linings and interlinings), which do not satisfy the rule set out in the list in column 3 for the made-up product concerned, may be used, provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.
- 6.2. Without prejudice to Note 6.3, materials, which are not classified within Chapters 50 to 63, may be used freely in the manufacture of textile products, whether or not they contain textiles.

Example:

If a rule in the list provides that, for a particular textile item (such as trousers), yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within

Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

6.3. Where a percentage rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

- 7.1. For the purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the 'specific processes' are the following:
 - (a) vacuum-distillation;
 - (b) redistillation by a very thorough fractionation process;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxie;
 - (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation.
- 7.2. For the purposes of headings 2710, 2711 and 2712, the 'per it processes' are the following:
 - (a) vacuum-distillation;
 - (b) redistillation by a very thorough fractionation process:
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvers;
 - (f) the process comprising all of the processing with concentrated sulphuric acid, oleum or sulphuric anhydride, put disation with alkaline agents; decolourisation and purification with naturally active earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation;
 - (j) in respect of avy ils of leading ex 2710 only, desulphurisation with hydrogen, resulting in a reduction of at leas 8. % of the sulphur content of the products processed (ASTM D 1266-59 T method):
 - (k) in respect of products of heading 2710 only, deparaffining by a process other than filtering;
 - (1) in respect of heavy oils of heading ex 2710 only, treatment with hydrogen, at a pressure of more than 20 bar and a temperature of more than 250 °C, with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment, with hydrogen, of lubricating oils of heading ex 2710 (e.g. hydrofinishing or decolourisation), in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
 - (m) in respect of fuel oils of heading ex 2710 only, atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 $^{\circ}$ C, by the ASTM D 86 method;
 - (n) in respect of heavy oils other than gas oils and fuel oils of heading ex 2710 only, treatment by means of a high-frequency electrical brush discharge;
 - (o) in respect of crude products (other than petroleum jelly, ozokerite, lignite wax or peat wax, paraffin wax containing by weight less than 0.75 % of oil) of heading ex 2712 only, de-oiling by fractional crystallisation.

7.3.For the purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations, such as cleaning, decanting, desalting, water separation, filtering, colouring, marking, obtaining a sulphur content as a result of mixing products with different sulphur contents, or any combination of these operations or like operations, do not confer origin.

ANNEX II

List of working or processing required to be carried out on non-originating materials in order for the product manufactured to obtain originating status

Commodity Code heading	Description of product	Working or processing, carried out on non- originating materials, which confers originating status	g
(1)	(2)	(3) or (4)	
Chapter 1	Live animals	All the animals of Chapter 1 shall be wholly obtained	
Chapter 2	Meat and edible meat offal	Manufacture in which all the materials of Chapters 1 and 2 used are wholly obtained	
Chapter 3	Fish and crustaceans, molluscs and other aquatic invertebrates	Manufacture in which all the materials of Chapter 3 used are wholly obtained	
ex Chapter 4	Dairy produce; birds' eggs; natural honey; edible products of animal origin, not elsewhere specified or included; except for:	Manufacture in which all the materials of Chapter 4 used are wholly obtained
