Article 19

Issue of a duplicate movement certificate EUR.1 or EUR-MED

1. In the event of theft, loss or destruction of a movement certificate EUR.1 or EUR-MED, the exporter may apply to the customs authorities which issued it for a duplicate made out on the basis of the export documents in their possession.

2. The duplicate issued in this way shall be endorsed with the following word in English:

‘DUPLICATE’

3. The endorsement referred to in paragraph 2 shall be inserted in Box 7 of the duplicate movement certificate EUR.1 or EUR-MED.

4. The duplicate, which shall bear the date of issue of the original movement certificate EUR.1 or EUR-MED, shall take effect as from that date.

Article 20

Issue of movement certificates EUR.1 or EUR-MED on the basis of a proof of origin issued or made out previously

When originating products are placed under the control of a customs office in the United Kingdom or the West Bank and the Gaza Strip, it shall be possible to replace the original proof of origin by one or more movement certificates EUR.1 or EUR-MED for the purpose of sending all or some of these products elsewhere within the United Kingdom or the West Bank and the Gaza Strip. The replacement movement certificate(s) EUR.1 or EUR-MED shall be issued by the customs office under whose control the products are placed.

Article 21

Accounting segregation

1. Where considerable cost or material difficulties arise in keeping separate stocks of originating and non-originating materials which are identical and interchangeable, the customs authorities may, at the written request of those concerned, authorise the so-called ‘accounting segregation’ method (hereinafter referred to as the ‘method’) to be used for managing such stocks.

2. The method shall ensure that, for a specific reference-period, the number of products obtained which could be considered as 'originating' is the same as that which would have been obtained had there been physical segregation of the stocks.
3. The customs authorities may make the grant of authorisation referred to in paragraph 1, subject to any conditions deemed appropriate.
4. The method shall be applied and the application thereof shall be recorded on the basis of the general accounting principles applicable in the country or territory where the product was manufactured.
5. The beneficiary of the method may make out or apply for proofs of origin, as the case may be, for the quantity of products which may be considered as originating. At the request of the customs authorities, the beneficiary shall provide a statement of how the quantities have been managed.
6. The customs authorities shall monitor the use made of the authorisation and may withdraw it whenever the beneficiary makes improper use of the authorisation in any manner whatsoever or fails to fulfil any of the other conditions laid down in this Origin Reference Document.

Article 22

Conditions for making out an origin declaration or an origin declaration EUR-MED

1. An origin declaration or an origin declaration EUR-MED as referred to in Article 16(1)(c) may be made out:
 - (a) by an approved exporter within the meaning of Article 23; or
 - (b) by any exporter for any consignment consisting of one or more packages containing originating products the total value of which does not exceed EUR 6000.
2. Without prejudice to paragraph 1, an origin declaration may be made out in the following cases:
 - (a) if the products concerned may be considered as products originating in the United Kingdom, in the West Bank and the Gaza Strip without application of cumulation with materials originating in Switzerland (including Liechtenstein), Turkey or one of the other countries or territories referred to in Articles 3(2) and 4(2), and fulfil the other requirements of this Origin Reference Document; or
 - (b) if the products concerned may be considered as products originating in one of the other countries or territories referred to in Articles 3 and 4 with which cumulation is applicable, without application of cumulation with materials originating in one of the countries or territories referred to in Articles 3 and 4, and fulfil the other requirements of this Origin Reference Document, provided a certificate EUR-MED or an invoice declaration EUR-MED has been issued in the country or territory of origin.
3. An origin declaration EUR-MED may be made out if the products concerned can be considered as products originating in the United Kingdom, in the West Bank and the Gaza Strip or in one of the other countries or territories referred to in Articles 3 and 4 with which cumulation is applicable, and fulfil the requirements of this Origin Reference Document, in the following cases:

- (a) cumulation was applied with materials originating in Switzerland (including Liechtenstein), Turkey or one of the other countries or territories referred to in Articles 3(2) and 4(2); or
- (b) the products may be used as materials in the context of cumulation for the manufacture of products for export to one of the other countries or territories referred to in Articles 3 and 4; or
- (c) the products may be re-exported from the country or territory of destination to one of the other countries or territories referred to in Articles 3 and 4.

4. An origin declaration EUR-MED shall contain one of the following statements in English:

- (a) if origin has been obtained by application of cumulation with materials originating in one or more of the countries or territories referred to in Articles 3 and 4:

‘CUMULATION APPLIED WITH ... (*name of the country/countries*)’

- (b) if origin has been obtained without the application of cumulation with materials originating in one or more of the countries or territories referred to in Articles 3 and 4:

‘NO CUMULATION APPLIED’

5. The exporter making out an origin declaration or an origin declaration EUR-MED shall be prepared to submit at any time, at the request of the customs authorities of the exporting Party, all appropriate documents proving the originating status of the products concerned as well as the fulfilment of the other requirements of this Origin Reference Document.

6. An origin declaration or an origin declaration EUR-MED shall be made out by the exporter by typing, stamping or printing on the invoice, the delivery note or another commercial document, the declaration, the texts of which appear in Annexes IV a and IV b, using one of the linguistic versions set out in those Annexes and in accordance with the provisions of the domestic law of the exporting country or territory. If the declaration is handwritten, it shall be written in ink in printed characters.

7. Origin declarations and origin declarations EUR-MED shall bear the original signature of the exporter in manuscript. However, an approved exporter within the meaning of Article 23 shall not be required to sign such declarations provided that he gives the customs authorities of the exporting Party a written undertaking that he or she accepts full responsibility for any origin declaration which identifies him or her as if it had been signed in manuscript by him.

8. An origin declaration or an origin declaration EUR-MED may be made out by the exporter when the products to which it relates are exported, or after exportation on condition that it is presented in the importing country or territory at the latest two years after the importation of the products to which it relates.

Article 23

Approved exporter

1. The customs authorities of the exporting Party may authorise any exporter (hereinafter referred to as ‘approved exporter’) who makes frequent shipments of products in accordance with the provisions of the United Kingdom-Palestinian Authority Agreement to make out origin declarations or origin declarations EUR-MED irrespective of the value

of the products concerned. An exporter seeking such authorisation shall offer to the satisfaction of the customs authorities all guarantees necessary to verify the originating status of the products as well as the fulfilment of the other requirements of this Origin Reference Document.

2. The customs authorities may grant the status of approved exporter subject to any conditions which they consider appropriate.
3. The customs authorities shall grant to the approved exporter a customs authorisation number which shall appear on the origin declaration or the origin declaration EUR-MED.
4. The customs authorities shall monitor the use of the authorisation by the approved exporter.
5. The customs authorities may withdraw the authorisation at any time. They shall do so where the approved exporter no longer offers the guarantees referred to in paragraph 1, no longer fulfils the conditions referred to in paragraph 2 or otherwise makes an incorrect use of the authorisation.

Article 24

Validity of proof of origin

1. A proof of origin shall be valid for four months from the date of issue in the exporting Party, and shall be submitted within that period to the customs authorities of the United Kingdom.
2. Proofs of origin which are submitted to the customs authorities of the United Kingdom after the final date for presentation specified in paragraph 1 may be accepted for the purpose of applying preferential treatment, where the failure to submit these documents by the final date set is due to exceptional circumstances.
3. In other cases of delayed presentation, the customs authorities of the United Kingdom may accept the proof of origin where the products have been submitted before the said final date.

Article 25

Submission of proof of origin

Proofs of origin shall be submitted to the customs authorities of the United Kingdom in accordance with the procedures applicable in that country or territory. The said authorities may require a translation of a proof of origin and may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the implementation of the United Kingdom-Palestinian Authority Agreement.

Article 26

Importation by instalments

Where, at the request of the importer and subject to the conditions laid down by the customs authorities of the United Kingdom, dismantled or non-assembled products within the meaning of General Rule 2(a) of Part Two, Section 1, of the Tariff of the United Kingdom falling within Sections XVI and XVII or headings 7308 and 9406 of the Goods Classification Table are imported by instalments, a single proof of origin for such products shall be submitted to the customs authorities upon importation of the first instalment.

Article 27

Exemptions from proof of origin

1. Products sent as small packages from private persons to private persons or forming part of travellers' personal luggage shall be admitted as originating products without requiring the submission of a proof of origin, provided that such products are not imported by way of trade and have been declared as meeting the requirements of this Origin Reference Document and where there is no doubt as to the veracity of such a declaration. In the case of products sent by post, that declaration may be made on the customs declaration CN22 / CN23 or on a sheet of paper annexed to that document.
2. Imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.
3. Furthermore, the total value of these products shall not exceed EUR 500 in the case of small packages or EUR 1200 in the case of products forming part of travellers' personal luggage.

Article 28

Supporting documents

The documents referred to in Articles 17(3) and 22(1) used for the purpose of proving that products covered by a movement certificate EUR.1 or EUR-MED, or an origin declaration or origin declaration EUR-MED may be considered as products originating in the United Kingdom, in the West Bank and the Gaza Strip, or in one of the other countries or territories referred to in Articles 3 and 4 and fulfil the other requirements of this Origin Reference Document may consist, *inter alia*, of the following:

- (a) direct evidence of the processes carried out by the exporter or supplier to obtain the goods concerned, contained for example in his or her accounts or internal book-keeping;
- (b) documents proving the originating status of materials used, issued or made out in the United Kingdom or in the West Bank and the Gaza Strip where these documents are used in accordance with domestic law;
- (c) documents proving the working or processing of materials in the United Kingdom or in the West Bank and the Gaza Strip, issued or made out in the United Kingdom or in the West Bank and the Gaza Strip, where these documents are used in accordance with domestic law;
- (d) movement certificates EUR.1 or EUR-MED, origin declarations or origin declarations EUR-MED proving the originating status of materials used, issued or made out in the United Kingdom or the West Bank and the Gaza Strip in accordance with this Origin Reference Document, or in one of the other countries or territories referred to in Articles 3 and 4, in accordance with rules of origin which are identical to the rules in this Origin Reference Document;
- (e) appropriate evidence concerning working or processing undergone outside the United Kingdom, the West Bank and the Gaza Strip or the other countries or territories referred to in Articles 3 and 4 by application of Article 12, proving that the requirements of that Article have been satisfied.

Article 29

Preservation of proof of origin and supporting documents

1. The exporter applying for the issue of a movement certificate EUR.1 or EUR-MED shall keep for at least three years the documents referred to in Article 17(3).
2. The exporter making out an origin declaration or origin declaration EUR-MED shall keep for at least three years a copy of this origin declaration as well as the documents referred to in Article 22(5).
3. The customs authorities of the Palestinian Authority issuing a movement certificate EUR.1 or EUR-MED shall keep for at least three years the application form referred to in Article 17(2).
4. The customs authorities of the United Kingdom shall keep for at least three years the movement certificates EUR.1 and EUR-MED, the origin declarations and the origin declarations EUR-MED submitted to them.

Article 30

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not *ipso facto* render the proof of origin null and void if it is duly established that this document does correspond to the products submitted.
2. Obvious formal errors, such as typing errors, on a proof of origin shall not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

Article 31

Amounts expressed in euro

1. For the application of the provisions of Articles 22(1)(b) and 27(3), in cases where products are invoiced in a currency other than euro, amounts in the national currencies used in the countries or territories referred to in Articles 3 and 4 equivalent to the amounts expressed in euro shall be fixed annually by each of the countries or territories concerned.
2. A consignment shall benefit from the provisions of Articles 22(1)(b) or 27(3) by reference to the currency in which the invoice is drawn up, according to the amount fixed by the Party concerned.
3. The amounts to be used in any given national currency shall be the equivalent in that currency of the amounts expressed in euro as at the first working day of October and shall apply from 1 January the following year. The Parties shall notify each other of the relevant amounts.
4. A Party may round up or down the amount resulting from the conversion into the relevant national currency of an amount expressed in euro. The rounded-off amount may not differ from the amount resulting from the conversion by more than 5%. A country or territory may retain unchanged the equivalent in the relevant national currency of an amount expressed in euro if, at the time of the annual adjustment provided for in paragraph 3, the

conversion of that amount, prior to any rounding-off, results in an increase of less than 15% in the relevant national currency equivalent. The relevant national currency equivalent may be retained unchanged if the conversion would result in a decrease in that equivalent value.

5. The amounts expressed in euro shall be reviewed by the Joint Committee at the request of any of the Parties. When carrying out this review, the Joint Committee shall consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in euro.

TITLE VI

ARRANGEMENTS FOR ADMINISTRATIVE COOPERATION

Article 32

Mutual assistance

1. The customs authorities of the United Kingdom and the Palestinian Authority shall provide each other with specimen impressions of stamps used in their customs offices for the issue of movement certificates EUR.1 and EUR-MED and with the addresses of the customs authorities responsible for verifying those certificates, origin declarations and origin declarations EUR-MED.

2. In order to ensure the proper application of this Origin Reference Document, the United Kingdom and the Palestinian Authority shall assist each other, through the competent customs administrations, in checking the authenticity of the movement certificates EUR.1 and EUR-MED, the origin declarations and the origin declarations EUR-MED, and the correctness of the information given in these documents.

Article 33

Verification of proofs of origin

1. Subsequent verifications of proofs of origin shall be carried out at random or whenever the customs authorities of the United Kingdom have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Origin Reference Document.

2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the United Kingdom shall return the movement certificate EUR.1 or EUR-MED and the invoice, if it has been submitted, the origin declaration or the origin declaration EUR-MED, or a copy of these documents, to the customs authorities of the exporting Party giving, where appropriate, the reasons for the request for verification. Any documents and information obtained suggesting that the information given on the proof of origin is incorrect shall be forwarded in support of the request for verification.

3. The verification shall be carried out by the customs authorities of the exporting Party. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.

4. If the customs authorities of the United Kingdom decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.

5. The customs authorities requesting the verification shall be informed of the results of this verification as soon as possible. These results shall indicate clearly whether the documents are authentic and whether the products concerned may be considered as products originating in the United Kingdom, in the West Bank and the Gaza Strip or in one of the other countries or territories referred to in Articles 3 and 4 and fulfil the other requirements of this Origin Reference Document.

6. If, in cases of reasonable doubt, there is no reply within ten months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.

TITLE VII

CEUTA AND MELILLA

Article 34

Application of the Origin Reference Document

The term ‘European Union’ used in this Origin Reference Document does not cover Ceuta and Melilla. Products originating in Ceuta and Melilla are not considered to be products originating in the European Union for the purposes of this Origin Reference Document.

TITLE VIII

FINAL PROVISIONS

Article 35

Transitional Provision for Goods in Transit or Storage

ANNEX I

Introductory notes to the list in Annex II

Note 1:

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 6 of this Protocol.

Note 2:

- 2.1. The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Commodity Code and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns, a rule is specified in column 3 or 4. Where, in some cases, the entry in the first column is preceded by an 'ex', this signifies that the rules in column 3 or 4 apply only to the part of that heading as described in column 2.
- 2.2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in column 3 or 4 apply to all products which, under the Commodity Code, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 2.3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in column 3 or 4.
- 2.4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 is to be applied.

Note 3:

- 3.1. The provisions of Article 6 of this Protocol, concerning products having acquired originating status which are used in the manufacture of other products, shall apply regardless of whether this status has been acquired inside the factory where these products are used or in another factory in any of the other countries referred to in Articles 3 and 4 of this Protocol with which cumulation is applicable.

Example:

An engine of heading 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 % of the ex-works price, is made from 'other alloy steel roughly shaped by forging' of heading ex 7224.

If this forging has been forged in the European Union from a non-originating ingot, it has already acquired originating status by virtue of the rule for heading ex 7224 in the list. The forging can then count as originating in the value-calculation for the engine, regardless of

whether it was produced in the same factory or in another factory in the European Union. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

3.2. The rule in the list represents the minimum amount of working or processing required, and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at a later stage is not.

3.3. Without prejudice to Note 3.2, where a rule uses the expression ‘Manufacture from materials of any heading’, then materials of any heading(s) (even materials of the same description and heading as the product) may be used, subject, however, to any specific limitations which may also be contained in the rule.

However, the expression ‘Manufacture from materials of any heading, including other materials of heading ...’ or ‘Manufacture from materials of any heading, including other materials of the same heading as the product’ means that materials of any heading(s) may be used, except those of the same description as the product as given in column 2 of the list.

3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of headings 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other, or both.

3.5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).

Example:

The rule for prepared foods of heading 1904, which specifically excludes the use of cereals and their derivatives, does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth – even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn – that is, the fibre stage.

3.6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. Furthermore, the individual percentages must not be exceeded, in relation to the particular materials to which they apply.

Note 4:

4.1. The term 'natural fibres' is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres which have been carded, combed or otherwise processed, but not spun.

4.2. The term 'natural fibres' includes horsehair of heading 0511, silk of headings 5002 and 5003, as well as wool fibres and fine or coarse animal hair of headings 5101 to 5105, cotton fibres of headings 5201 to 5203, and other vegetable fibres of headings 5301 to 5305.

4.3. The terms 'textile pulp', 'chemical materials' and 'paper-making materials' are used in the list to describe the materials, not classified in Chapters 40 to 60 which can be used to manufacture artificial, synthetic or paper fibres or yarns.

4.4. The term 'man-made staple fibres' is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings 5501 to 5507.

Note 5:

5.1. Where, for a given product in the list, reference is made to this Note, the conditions set out in column 3 shall not be applied to any basic textile materials used in the manufacture of this product and which, taken together, represent 10 % or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4).

5.2. However, the tolerance mentioned in Note 5.1 may be applied only to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,

- jute and other textile bast fibres,
- sisal and other textile fibres of the genus Agave,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- current-conducting filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of poly(phenylene sulphide),
- synthetic man-made staple fibres of poly(vinyl chloride),
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester, whether or not gimped,
- products of heading 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film (whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading 5605.

Example:

A yarn, of heading 5205, made from cotton fibres of heading 5203 and synthetic staple fibres of heading 5506, is a mixed yarn. Therefore, non-originating synthetic staple fibres which do not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp) may be used, provided that their total weight does not exceed 10 % of the weight of the yarn.

Example:

A woollen fabric, of heading 5112, made from woollen yarn of heading 5107 and synthetic yarn of staple fibres of heading 5509, is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp), or woollen yarn which does not satisfy the origin-rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning), or a combination of the two, may be used, provided that their total weight does not exceed 10 % of the weight of the fabric.

Example:

Tufted textile fabric, of heading 5802, made from cotton yarn of heading 5205 and cotton fabric of heading 5210, is a only mixed product if the cotton fabric is itself a mixed fabric made from yarns classified in two separate headings, or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading 5205 and synthetic fabric of heading 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is, accordingly, a mixed product.

5.3. In the case of products incorporating ‘yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped’, this tolerance is 20 % in respect of this yarn.

5.4. In the case of products incorporating ‘strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film’, this tolerance is 30 % in respect of this strip.

Note 6:

6.1. Where, in the list, reference is made to this Note, textile materials (with the exception of linings and interlinings), which do not satisfy the rule set out in the list in column 3 for the made-up product concerned, may be used, provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-work price of the product.

6.2. Without prejudice to Note 6.3, materials, which are not classified within Chapters 50 to 63, may be used freely in the manufacture of textile products, whether or not they contain textiles.

Example:

If a rule in the list provides that, for a particular textile item (such as trousers), yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

6.3. Where a percentage rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

7.1. For the purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the ‘specific processes’ are the following:

- (a) vacuum-distillation;
- (b) redistillation by a very thorough fractionation process;
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (i) isomerisation.

7.2. For the purposes of headings 2710, 2711 and 2712, the 'specific processes' are the following:

- (a) vacuum-distillation;
- (b) redistillation by a very thorough fractionation process;
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (i) isomerisation;
- (j) in respect of heavy oils of heading ex 2710 only, desulphurisation with hydrogen, resulting in a reduction of at least 85 % of the sulphur content of the products processed (ASTM D 1266-59 T method);
- (k) in respect of products of heading 2710 only, deparaffining by a process other than filtering;
