(Regulation 9 of the Customs (Origin of Chargeable Goods) (EU Exit) Regulations 2019)

3. For the purposes of this article, essential spare parts shall mean parts which are:
 - (a) components without which the proper operation of a piece of equipment, machine, apparatus or vehicle which have been discharged from the free circulation procedure or previously exported cannot be ensured; and

PART FOUR: PRODUCT SPECIFIC RULES

(Regulation 11 of the Customs (Origin of Chargeable Goods) (EU Exit) Regulations 2019)

A. INTRODUCTORY NOTES

1. Definitions

1.1. References to ‘manufacturing’, ‘producing’ or ‘processing’ goods include any kind of working, assembly or processing operation.

Methods of obtaining goods include manufacturing, producing, processing, raising, growing, breeding, mining, extracting, harvesting, fishing, trapping, gathering, collecting, hunting and capturing.

1.2. ‘Material’ includes ingredients, parts, components, subassemblies and goods that were physically incorporated into another good or were subject to a process in the production of another good.

‘Originating material’ means a material whose country of origin, as determined under these rules, is the same country as the country in which the material is used in production.

‘Non-originating material’ means a material whose country of origin, as determined under these rules, is not the same country as the country in which that material is used in production.

‘Product’ means the product being manufactured, even if it is intended for later use in another manufacturing operation.

1.3. Value added rule

Where a rule makes reference to value not exceeding a given percentage of the ex-works price:

(a) “Value” means the value of non-originating materials.

(b) “Ex-works price” means the price paid or to be paid for the product ready for collection at the manufacturer’s premises in whose undertaking the last working or processing is carried out; this price must reflect all costs related to the manufacturing of the product (including the cost of all the materials used), minus any internal taxes which are, or may be, repaid when the product obtained is exported.

Where the actual price paid does not reflect all costs related to the manufacturing of the product which are actually incurred, the ex-works price means the sum of all those costs, minus any internal taxes which are, or may be, repaid when the product obtained is exported.

1.4. Complete making up

The term 'complete making-up' used in the list means that all the operations following cutting of the fabric or knitting or crocheting of the fabric directly to shape have to be performed. However, making-up shall not necessarily be considered as incomplete where one or more finishing operations have not been carried out.

1.5. Where the term 'country' is used in this Part, it shall be understood to refer to 'country or territory'.

2. Application of the rules in this Part

2.1. The rules provided in this Part are to be applied to goods on the basis of their classification in the Goods Classification Table and Goods Classification Table Rules of Interpretation, as well as on further criteria which may be created specifically for the purposes of this Part. A heading or subheading which is further subdivided using such criteria is referred to in this Part as 'split heading' or 'split subheading'. 'HS' means the Goods Classification Table as set out in the Tariff of the United Kingdom established under the Customs Tariff (Establishment) Regulations 2019. ('HS 2017').

Classification of goods within headings and subheadings of the Goods Classification System is governed by the Goods Classification Table Rules of Interpretation and any relative Section, Chapter and Subheading Notes. Those rules and notes are set out in Part Two of the Tariff of the United Kingdom and form part of the Customs Tariff made under section 8 of the Taxation (Cross-border) Trade Act 2018. For the purposes of the identification of a correct split heading or subheading for certain goods in this Part, the Goods Classification Table Rules of Interpretation and any relative Section, Chapter and Subheading notes, are to apply *mutatis mutandis*, unless otherwise required in this Part.

2.2. Reference to a change in classification in the primary rules laid down below shall apply only to non-originating materials.

2.3. Materials which have acquired originating status in a country are considered to be originating materials of that country for the purpose of determining the origin of a good incorporating such materials, or of a good made from such materials by further working or processing in that country.

2.4. When it is not commercially practical to keep separate stocks of interchangeable materials or goods originating in different countries, the country of origin of commingled materials or goods that are interchangeable may be allocated on the basis of an inventory management method recognised in the country in which the materials or goods were commingled.

2.5. For the purposes of the application of primary rules based on tariff classification change, non-originating materials that do not satisfy the primary rule shall, unless otherwise specified in a certain Chapter, be disregarded, provided that the total value of such materials does not exceed 10 % of the ex-works price of the good.

2.6. Primary rules laid down at Chapter level (Chapter primary rules) have the same value as primary rules laid down at subdivision level and can be applied alternatively.

2.7 Unless otherwise specified in the Customs (Origin of Chargeable Goods) (EU Exit) Regulations 2019, the rules are to be applied in the following order until a place of origin is determined:

- i. Primary rules, subject to a relevant Chapter Note; followed by
- ii. Chapter residual rules, subject to a relevant Chapter residual rule applicable to mixtures.

2.8 Where Primary rules determine origin by reference to processing, that processing must be economically justified in accordance with regulation 4 of the Customs (Origin of Chargeable Goods) (EU Exit) Regulations 2019. Where the processing is not economically justified, the origin of the goods is to be determined in accordance with regulation 7 of the Customs (Origin of Chargeable Goods) (EU Exit) Regulations 2019.

2.9 Where the rules in this Part is a value added rule in accordance with paragraph 1.3 of Part Four of this document above, regulation 6 of the Customs (Origin of Chargeable Goods) (EU Exit) Regulations 2019 does not apply to those goods so that the origin of cases and containers of rule 5 goods is not disregarded for the purpose of determining origin.

3. Glossary

The primary rules at subdivision level, when they are based on a change in tariff classification, can be expressed using the following abbreviations.

<i>CC</i>	:	<i>change to the chapter in question from any other chapter</i>
<i>CTH</i>	:	<i>change to the heading in question from any other heading</i>

CHAPTER 72

Iron and steel

Definition

For the purposes of this Chapter, the expressions 'cold-rolled (cold-reduced)' and 'cold-formed' mean cold reduction resulting in changes to the crystalline structure of the workpiece. The expressions do not include very light cold-rolling and cold-forming processes (skin pass or pinch pass) which act only on the surface of the material and do not result in change to its crystalline structure.

Chapter Note

For the purposes of this Chapter, a change of classification resulting only from cutting is not to be considered as origin-conferring.

Chapter residual rule:

CHAPTER 84

Nuclear reactors, boilers, machinery and mechanical appliances; parts thereof

Primary Rule: Parts and accessories produced from blanks:

1. The country of origin of goods that are produced from blanks which by application of the Goods Classification Table Rule or Interpretation Rule 2(a), are classified in the same heading, subheading or subdivision as the complete or finished goods, shall be the country in which the blank was finished provided finishing included configuring to final shape by the removal of material (other than merely by honing or polishing or both), or by forming processes such as bending, hammering, pressing or stamping.
2. Paragraph 1 above applies to goods classifiable in provisions for parts or parts and accessories, including goods specifically named under such provisions.

Definition of 'Assembly of semi-conductor products'

The primary rule 'Assembly of semi-conductor products', used in the table below, means a change from chips, dice or other semi-conductor products to chips, dice or other semi-conductor products that are packaged or mounted onto a common medium for connection or connected and then mounted. The assembly of semi-conductor products shall not be considered a minimal operation.

Chapter Notes

Note 1: Collection of parts:

Where a change in classification results from the application of Goods Classification Table Rules of Interpretation Rule 2(a) with respect to collections of parts that are presented as unassembled articles of another heading or subheading the individual parts shall retain their origin prior to such collection

Note 2: Assembly of the collection of parts:

Goods assembled from a collection of parts classified as the assembled good by application of Goods Classification Table Rules of Interpretation Rule 2 shall have origin in the country of assembly, provided the assembly would have satisfied the primary rule for the good had each of the parts been presented separately and not as a collection

Note 3: Disassembly of goods:

A change of classification which results from the disassembly of goods shall not be considered as the change required by the rule set forth in the table of 'list rules'. The country of origin of the parts recovered from the goods shall be the country where the parts are recovered, unless the importer, exporter or any person with a justifiable cause to determine the origin of parts demonstrates another country of origin on the basis of verifiable evidence.

Chapter residual rule:

Where the country of origin cannot be determined by application of the primary rules, the country of origin of the goods shall be the country in which the major portion of the materials originated, as determined on the basis of the value of the materials.

CHAPTER 90

Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical instruments and apparatus; parts and accessories thereof

Definition of 'Assembly of semi-conductor products'

The primary rule 'Assembly of semi-conductor products', used in the table below, means a change from chips, dice or other semi-conductor products to chips, dice or other semi-conductor products that are packaged or mounted onto a common medium for connection or connected and then mounted. The assembly of semi-conductor products shall not be considered a minimal operation.

Chapter residual rule:

Where the country of origin cannot be determined by application of the primary rules, the country of origin of the goods shall be the country in which the major portion of the materials originated, as determined on the basis of the value of the materials.
