Key:**100%** Excellent**>97% - 100%** Excellent, but some targets missed**92% - 97%** Effective**< 91%** Ineffective**Additional information**

The VMD continuously monitors all targets and puts in place countermeasures, where possible, to ensure targets are met.

However, sometimes a performance standard may fall into the effective or ineffective category and there are a number of reasons why this may happen, e.g. high volume of applications, staff resource, complexity of applications requiring additional input, etc.
