Met Office telephone system outage – Saturday 21st November.

Please be advised that due to essential maintenance on the Met Office Call Centre telephone system on Saturday 21st November, there will be up to 1 hour outages of the system between 10:00 – 11:00hrs and 15:00 – 16:00hrs.

The nature of the maintenance means that unfortunately Met Office will not be able to divert calls to another number or leave a recorded message during these times. Any calls to be made to the Met Office in order to contact the OPRED on-call inspector will need to wait until after each outage period. Please advise relevant offshore and on-call staff accordingly.
