3 = Medium - Customer requirement, marginal net benefit

4 = Low - Nice to have, net cost, does not affect functionality, cosmetic change

Section 1 – details of change

Data item / rule number

Data item N00181; code set CS085

Description of change

Introduce a new code 24A – child criminal exploitation.

Reason for change (including benefits)

Recording and collating data on child criminal exploitation in the 2021 to 2022 CIN census and beyond will enable DfE to estimate the scale of this exploitation for the first time. In the longer term, it will help it to identify whether there is a decline or increase in the prevalence of child criminal exploitation.

Collecting and publishing this data will support future child criminal exploitation policy development.

Impact of not doing the change

There will be no information available to assess the scale of child criminal exploitation.

Impact assessment to be undertaken by

Children in need software suppliers

DfE internal children in need working group

Section 2 – impact analysis

Software suppliers' summary of impact assessment

Supplier 1: Impact upon supplier would be negligible and we would easily be able to meet this requirement and support our customer base to do so also.

Supplier 2: These look like simple changes.

DfE internal colleagues' summary of impact assessment

Policy confirmed data item name should be: 24A: Child criminal exploitation: concerns that services may be required or the child may be at risk of harm due to child criminal exploitation
