Year: 2020 Week: 47

Summary.

Subscribe to the weekly syndromic surveillance email

Reporting week: 16 to 22 November 2020.

Emergency department COVID-19-like attendances have decreased during week 47 (figure 3). Attendances have decreased across adults aged 45+ years and PHE Centres mainly in the North and Midlands (figures 3a & 3b).

Note: during the COVID-19 pandemic, patients with COVID-19 symptoms are generally advised to initially access a COVID-19 test through the national COVID-19 testing programme. This is likely to result in lower numbers of patients accessing health advice as monitored through syndromic surveillance systems. Syndromic data should therefore be interpreted

Remote Health Advice:

'Potential COVID-19' calls & online assessments remained stable during week 47 (figures 8 & 17). Calls and online assessments for 'loss of taste or smell' decreased (figures 5 & 15).

Access bulletin

NHS 111 call and online respiratory syndromic indicators remained stable.

GP In Hours:

Access bulletin

During week 47, respiratory indicators remained stable, including consultations for influenza-like illness (figure 3). Please note that due to a technical problem with the reporting of COVID-19 syndromic surveillance codes from one of our data providers we have been unable to update COVID-19-like indicators in figure 1. We hope to have resolved this problem for the next report.

GP Out of Hours:

Access bulletin

During week 47, most GP out of hours respiratory indicators, including influenza-like illness, remained stable (figures 2-6). Difficult breathing/ wheeze/asthma contacts increased in children aged 1-4 and 5-14 years old (figures 5 & 5a).

Emergency Department:

Access bulletin

Emergency department COVID-19-like attendances have decreased during week 47 (figure 3). Attendances have decreased across adults aged 45+ years and PHE Centres mainly in the North and Midlands (figures 3a & 3b).

Ambulance:

During week 47, COVID-19-like ambulance calls decreased while breathing problems calls remained stable (figures 2 & 3).

Access bulletin

PHE Syndromic Surveillance Summary

25 November 2020

- Key messages are provided from each individual system.
- The different PHE syndromic surveillance systems access data from different areas of the national health care system.
- Each syndromic surveillance system is able to monitor a different selection of syndromic indicators based upon a different case mix of patients.
- Access to the full version of each syndromic surveillance bulletin is available through the PHE
 Syndromic Surveillance website found at: (https://www.gov.uk/government/collections/syndromic-surveillance-systems-and-analyses); reports are made available on Thursday afternoons.

Remote Health Advice Syndromic Surveillance System:

A remote health advice syndromic surveillance system that monitors syndromic calls from remote health advice services e.g. NHS 111 each day across England.

GP In-Hours Syndromic Surveillance System:

A large general practitioner surveillance system monitoring daily consultations for a range of clinical syndromic indicators across England.

GP Out-of-Hours Syndromic Surveillance System (GPOOHS):

A syndromic surveillance system monitoring daily GP out-of hours activity and unscheduled care across England using a range of clinical syndromic indicators.

Emergency Department Syndromic Surveillance System (EDSSS):

A national ED network across England monitoring daily attendances and presenting symptoms/diagnoses.

National Ambulance Syndromic Surveillance System (NASSS):

The national ambulance syndromic surveillance system (NASSS) monitors daily calls made by persons to an ambulance trust. All 10 ambulance trusts in England provide data.

We thank and acknowledge the contribution of all data providers including:

- NHS 111 and NHS Digital.
- QSurveillance[®]; University of Oxford; EMIS/EMIS practices; ClinRisk®.
- TPP, ResearchOne and participating SystmOne GP practices.
- Advanced Health & Care and the participating OOH service providers.
- Participating EDSSS emergency departments.
- Royal College of Emergency Medicine.
- North East, North West, Yorkshire, East Midlands, West Midlands, East of England, London, South East Coast, South Central, and South Western NHS Ambulance Trusts and The Association of Ambulance Chief Executives.
