Help to Buy: ISA

The Help to Buy: ISA scheme was launched on 1 December 2015 with accounts available through banks, building societies and credit unions. The scheme enables people saving for their first home to receive a 25% boost to their savings from the Government when they buy a property of £250,000 or less (with a higher price limit of £450,000 in London). This means that for every £200 saved, first-time buyers can receive a government bonus of £50. The maximum government bonus is £3,000.

The scheme closed to new accounts on 30 November 2019. Help to Buy: ISA account holders can, however, continue saving into their account until 30 November 2029 when accounts will close to additional contributions. The Help to Buy: ISA government bonus must be claimed by 1 December 2030.

Monthly figures

Table 1 below shows the number of Help to Buy: ISA bonuses paid through the scheme alongside the number of property completions, the total value of bonuses paid and the total value of the properties purchased. There were 443,678 bonuses paid through the scheme to end of June 2020, which supported 336,884 property completions. The total value of the bonuses paid in this period was £447.92 million which were used to finance properties worth £58.6 billion in total.

Property value

Table 2 below shows the number of property completions supported by the scheme broken down by property value. The mean value of a property completion in the Help to Buy: ISA scheme to the end of June 2020 was £173,988, compared to the average first-time buyer price of £200,028 and the average UK house price of £237,834⁵. 72% of completions were in the lower value bands of £200,000 or less. 21% of completions were on properties valued at between £200,000 and £250,000. This reflects the fact that most completions in the scheme have been on properties outside London, in regions where prices are typically lower.

Age breakdown

Table 3 shows the number of bonuses paid, broken down by age of first-time buyer.

66.0% of first-time buyers that have been supported by the scheme were between the ages of 25 to 34. The median age of a first-time buyer in the scheme is 28 compared to a median first-time buyer age across the market in the same period of 30⁴.

Country and regional breakdowns

Table 4 shows the country and regional distribution of the number of bonuses paid and property completions through the scheme in each region of England⁷ as well as in the devolved administrations. It also shows a country and regional breakdown of the mean property value.

Scotland accounted for 8% of property completions, Wales accounted for 4% of property completions and Northern Ireland accounted for 2% of property completions.

65% of bonuses paid were in England and this supported 64% of total property completions through the scheme. London and the South East received 13% of total bonuses paid and made up 13% of total property completions. At a regional level a higher number of property completions were supported by the scheme in the North West, Yorkshire and The Humber.

Background notes

Data collection

National Savings and Investments (NS&I), who administer the scheme on behalf of HM Treasury, collect data from providers participating in the scheme in accordance with monitoring and reporting requirements set by HM Treasury.

Data quality

Both NS&I and HM Treasury quality assure the data, using IT solutions and manual processes.

Audit and financial reporting

The scheme requires a rigorous audit regime to monitor and enforce compliance with the eligibility criteria and scheme rules. Providers are required to conduct internal audits, in addition to administrator audits carried out by NS&I to seek assurance as to the provider's compliance with the scheme rules.

Mean and median

The following explanation uses property value as an example, but the median and mean are used in the same way throughout the publication. The median property value is the midway point of all the properties values included in the analysis. That is, if there were 101 property completions during a time period and they were ranked by value, the median property value would be the value in the middle i.e., that has 50 house prices above it and 50 house prices below it.

This differs to the arithmetic mean value, which equates to the average price – adding the property values together and then dividing this by the number of completions included in the analysis.

It can be useful to look at both the mean and median with property values. Extreme values at either end of the scale can skew the mean. Therefore, the median can give users an additional way of interpreting the data.

Revisions policy

This policy has been developed in accordance with the UK Statistics Authority Code of Practice for Official Statistics and the Treasury Revisions policy:

www.gov.uk/government/uploads/system/uploads/attachment_data/file/191042/statistics_revisions_policy.pdf

There are two types of revision covered by the policy above, unscheduled revisions and scheduled revisions.

In line with the policy above, if a significant unscheduled revision is needed (for example from an error in the result of the compilation, imputation or dissemination process), the statistical release and accompanying tables would be updated with a correction notice as soon as is practical.

There should be relatively few scheduled revisions as the data is compiled from established administrative systems. Where there are scheduled revisions these will be indicated in the time series and highlighted in the release.

Users of the data

The data is used for monitoring the delivery of the Help to Buy: ISA scheme by users including the public, Parliament, financial and housing companies and markets. They are also used to inform wider government policy on housing.

Data sources

The publications of this scheme use the official UK House Price Index (UK HPI) which replaces the existing, and

previously used, house price indices published by the Office for National Statistics (ONS) and Land Registry for England and Wales.

An explanation of the change in House Price Index by the ONS is published here:

www.ons.gov.uk/economy/inflationandpriceindices/articles/introducingthesingleofficialhousepriceindex/2016-03-30

User engagement

Users are encouraged to provide feedback on how these statistics are used and how well they meet user needs. Comments on any issues relating to this statistical release are welcomed and encouraged. Responses should be addressed to the "Public enquiries" contact given in the "Enquiries" section below.

The department's engagement strategy to meet the needs of statistics users is published here:
