 - Part I:** Details of the Consignment
 - Part II:** Certification
 - II** Animal Health Attestation
4. Notifiable Disease Clearance
5. Collection of Evidence
6. Consignment or Part of the Consignment Originating from Ni, EU Member States or from third country (Triangular Trade) [When applicable]
7. UK Approved Establishments to export to the EU
8. Addition of Schedules
9. Certified copies for Export Health Certificate
10. Legal Statement
11. Disclaimer

No: 8256.

Animal and public health certificate for meat preparations intended for transit to and/or storage in the European Community or Northern Ireland from third countries

NOTES FOR GUIDANCE (NFG) FOR THE CERTIFYING OFFICER AND EXPORTER

1. APPLICABLE LEGISLATION

[Commission Decision No 2008/592/EC as amended](#) and [477/2010/EC](#) (repealing 79/542/EC) or [2000/585/EC](#) where applicable.

Any EU legislation referenced in the certificate must be complied with and EU legislation can be accessed on the following link. You should ensure you use the latest version:

<https://eur-lex.europa.eu/homepage.html>

Please note that Official Control Regulations 2017/625 have repealed Regulation (EC) No 854/2004, 882/2004 and Directive No 96/23/EC. Please see link:

<https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32017R0625&from=EN>

Consolidated legislation

Consolidated texts, which integrate the basic instruments of Union legislation with their amendments and corrections in a single, non-official document, are available. Each consolidated text contains a list of all legal documents taken into account for its construction. You can search for consolidated texts by using the 'find results by document number' option on the European Commission website. Once you have selected the relevant legislation, click 'document information', and then scroll down to 'all consolidated versions' and select the most recent version.

Please note that the consolidated text may not contain the latest amendment to the legislation, as it takes several weeks for this to be updated.

Texts provided in this section are intended for information only. Please note that these texts have no legal value. For legal purposes please refer to the texts published in the 'Official Journal of the European Union'.

IMPORTANT

These notes provide guidance to Certifying Officers and exporters. The NFG should have been issued to the OV together with the relevant export certificate applicable for transit of meat preparations. The NFG should not be read as a standalone document but in conjunction with the health certificate.

We strongly suggest that exporters obtain full details of the importing country's requirements from the veterinary authorities in the country concerned, or their representatives in the UK, in advance of each consignment.

[Please note, policies are being reviewed. NFG will be further amended to provide specific guidance. Traders should look at NFGs regularly for any updates]

2. SCOPE OF THE CERTIFICATE

This export health certificate may be used for transit to and/or storage to the EU or NI of meat preparations.

3. CERTIFICATION BY AN OFFICIAL VETERINARIAN (OV)

In **England, Scotland and Wales**, this certificate must be signed by a Government Veterinary Officer or by an Official Veterinarian (OV) appointed by the Animal and Plant Health Agency on behalf of Ministers in Defra, the Scottish Government or the Welsh Government and who hold the appropriate Official Controls Qualification (Veterinary) (OCQ (V)) authorisation.

OVs must sign and stamp, with the OV stamp, the health certificate in ink of a different colour to that of the printing of the Export Health Certificate (EHC). There is no requirement to sign and stamp in a specific colour.

The OV should keep a copy of the signed certificate and any supporting documents for at least three years after signature or receipt/dispatch of the consignment, whichever is later. These can be electronic copies.

EHC in foreign language/s of the EU Member States (MSs).

EHC should be in English and the foreign language/s of the Border Control Post (BCP) of entry in the EU, as well as in the language of the EU MS of destination if this a different country from the point of entry to the EU. The required EHC must accompany the consignment.

Listing of the EU MS BCPs can be found here: https://ec.europa.eu/food/animals/vet-border-control/bip-contacts_en

The foreign language certificate as received from the APHA Centre for International Trade at Carlisle or via the Export Health Certificates on-line system (EHCO) and bearing the same unique reference number as the English certificate, should be considered an official and accurate translations of the English, as published in EU legislation.

The (sub-) paragraphs / options and how they are numbered and formatted is identical in the English and foreign language editions and to the legislation published by the EU Commission. Therefore, when the same phrases/sentences in the foreign language versions/s as in the English version are struck through, both versions can and must be signed (as opposed to being initialled) by the OV as a genuine and properly authorised translation of the English.

This also applies to any instructions in the guidance notes to strike out certain paragraphs or to certify statements that the country is free of certain notifiable diseases etc.

Signing, stamping and pagination

The foreign language version/s and any schedules (if any) may be stapled to the English version but doing so and then fan stamping the multiple sheets is not enough to create one indivisible single document according to the EU Commission.

Therefore, each page (including schedules) should be individually signed and stamped and bear the reference number of the certificate. The pages comprising the complete document should be sequentially numbered so they are part of a finite sequence which covers the English, foreign language version/s and any schedule pages.

For example, if the certificate consists of four A4 pages printed back to back on two sheets of A4 paper with a schedule that is three A4 pages long, all 11 pages must be stamped and **signed** (as above) and numbered 1/11 to 11/11.

COs will have to make handwritten corrections to page numbering as may be required. E.g. 1/4 to 4/4 (if present) on the foreign language parts in the example given above will need to be crossed out and the 1/11 to 11/11 entered.

The EHC accompanying the consignment will then comprise the original English EHC and any required additional foreign language/s. These should be arranged in order with the English version on the top, followed by the foreign language/s version/s, and finally the page(s) of the schedule (if any) at the bottom.

As per general guidance for certifiers on APHA's Vet Gateway, any hand written corrections or permitted deletions to a certificate should be stamped and **initialled**. This includes the deletion of optional statements in Part II of the certificate and alterations to content in Part 1. The same applies if a pre-populated text in a box in part I of the EHC needs to be amended. (E.g. if box I.7 which is pre-populated as 'United Kingdom' 'GB', needs to be amended for triangular trade where third country origin 'Products Of Animal Origin' are being certified in the original third country packaging with the original third country Identification Marks, in which case the country of origin will be the third country in question and not the United Kingdom). Please follow the guidance on corrections in the link below.

http://apha.defra.gov.uk/External_OV_Instructions/Export_Instructions/Certification_Procedures/index.htm

We advise that individual stamping and initialling of diagonal lines drawn through blank boxes in Part 1 is not necessary. This is to reduce excessive stamping on the certificate. However we are aware that some BCPs advise otherwise and request stamping and initialling of manually crossed out blank boxes in Part 1 of the certificate. In such cases OV should conform to the BCPs request to facilitate the clearance of the goods.

You can find further information on Export Health Certificates (EHC) Online Guidance for Certifiers in the link below.

<http://apha.defra.gov.uk/documents/exports/guidance-ehc-certifiers.pdf>

UK approved establishments will be uploaded to [Europa](#) website in due course, until the establishments are in Europa website you can find the list of UK approved establishments in the link below.

<https://www.gov.uk/government/publications/businesses-approved-to-export-to-the-eu>

Please check the guidance on completion of part I of the EHC at the bottom of the EHC and in the links provided in the NFG. For completion of box I.8-Region of Origin Code, if applicable; the territory code should be as listed in the relevant legislation that is provided under the notes at the bottom of the EHC. This is only for species or products affected by regionalisation measures or by the setting up of approved zones in accordance with a European Community Decision. The approved regions or zones must be indicated as described in the Official Journal of the European Union.

PART I: DETAILS OF THE CONSIGNMENT

All boxes in Part I of the certificate must be completed. When a box is not applicable/optional, and not filled, please score it through.

Please use schedule to be attached to the certificate if there is not enough space to fill the information. See Section 'Addition of Schedules' below.

Please complete all the boxes in Part I of the certificate in accordance with the guidance lay down on Commission Decision 2007/240/EC that can be accessed via this link:

<https://eur-lex.europa.eu/legal-content/EN/ALL/?uri=CELEX:32007D0240>

The Harmonised System (HS) Code is a commodity classification system used as a basis for customs tariffs and for international trade statistics.

It is the exporter's responsibility to ensure that the HS code is entered correctly and accurately reflects the product(s) being consigned.

Further information on HS Codes can be found online at:

<https://www.gov.uk/trade-tariff/sections> and

<http://madb.europa.eu/madb/euTariffs.htm>

PART II: CERTIFICATION

II Animal Health attestation

The Official Veterinarian signing the export health certificate must ensure that the animal health attestations set out in Part II of the health certificate have been complied with.

The certificate refers to Decision 79/542/EEC which is no longer in force, instead the OV must refer to Regulation 206/2010. Similarly Decision 2006/696/EC is no longer in force and Regulation 798/2008/EC should be referred to. In addition where Decision 2000/585/EC is referred to the OV should refer to Regulation 119/2009/EC. These updated pieces of legislation contain the list of countries and regions authorised for imports and the animal health conditions.

Please always ensure you are looking at the most up to date version of any legislation.

II.1 – The UK is listed in Part I of Annex II to Regulation 206/2010 for imports into the European Community of the following: fresh meat, including minced meat, of domestic bovine animals (including *Bison* and *Bubalus* species and their cross-breeds), of domestic ovine animals (*Ovis aries*) and domestic caprine animals (*Capra hircus*), of domestic porcine animals (*Sus scrofa*); fresh meat, excluding minced meat, of domestic solipeds (*Equus caballus*, *Equus asinus* and their cross-breeds); fresh meat, excluding offal and minced meat, of farmed non-domestic animals of the order Artiodactyla (excluding bovine animals (including *Bison* and *Bubalus* species and their cross-breeds), *Ovis aries*, *Capra hircus*, Suidae and Tayassuidae), and of the families Rhinocerotidae and Elephantidae, wild non-domestic animals of the order Artiodactyla (excluding bovine animals (including *Bison* and *Bubalus* species and their cross-breeds), *Ovis aries*, *Capra hircus*, Suidae and Tayassuidae), and of the families Rhinocerotidae and Elephantidae, farmed non-domestic animals belonging to the Suidae, Tayassuidae, or Tapiridae families, farmed non-domestic animals belonging to the Suidae, Tayassuidae, or Tapiridae families, and wild non-domestic animals belonging to the Suidae, Tayassuidae, or Tapiridae families.

The UK is listed in Part I of Annex I to Regulation 798/2008 for imports into the European Community or NI of the following: meat of poultry, meat of wild game birds and meat of farmed ratites.

The UK is listed in Part I of Annex I to Regulation 119/2009 for imports into the European Community or NI of the following: meat of wild leporidae, meat of wild land mammals other than ungulates and leporidae, and meat of farmed rabbits.

For information on meat from other species check the list in the legislation.

Depending on the type of meat in the meat product the relevant piece of legislation should be kept and the rest deleted. As explained above, Regulation 206/2010 should replace Decision 79/542/EEC, Regulation 798/2008 should replace 2006/696/EC and Regulation 119/2009 should replace Decision 2000/585/EC,

II.2 - The relevant certificate(s) which corresponds to the meat in the meat preparations should be kept and the others should be deleted..

This may be certified after checking compliance with the relevant animal health conditions as laid down in the animal health attestation in the relevant certificates: BOV, OVI, POR, EQU, RUF, RUW, SUF, EQW. The certifying OVs should also familiarise themselves with the respective NFG corresponding to the relevant document e.g. meat of domestic bovine Model BOV 8261EHC and NFG.

Model certificates can be found in the following legislation:

BOV, POR, OVI, EQU, RUF, RUW, SUF, SUW, EQW: Regulation 206/2010: <https://eur-lex.europa.eu/legal-content/EN/TXT/?qid=1563962980940&uri=CELEX:32010R0206>

POU, RAT, WGM: Regulation 798/2008, Part 2 of Annex I:

<https://eur-lex.europa.eu/legal-content/EN/TXT/?qid=1563963056173&uri=CELEX:02008R0798-20190224>

C, E and H correspond to WL, WM and RM in Part 1 of Annex I of 119/2009:

<https://eur-lex.europa.eu/legal-content/EN/TXT/?qid=1563975211475&uri=CELEX:02009R0119-20130326>

If further guidance on these attestations is needed please consult the corresponding Notes For Guidance for the specific certificate.

II.3 – Insert the range of dates for the slaughter and processing of the animals here.

In the case of the meat included in the meat preparations being of UK-only origin, this statement may be certified on the basis of commercial documents from the exporter stating the slaughter and processing dates. For meat of non-UK origin, the statement should be certified on the basis of import certificates or commercial documents and any other attestation that the certifying OV considers necessary..

The certifying OV must verify with APHA when the UK was listed to be authorised for exporting to the EU (as per footnote 4).

3. NOTIFIABLE DISEASE CLEARANCE

Commodities of meat products containing poultry meat can be exported into the EU from the territory code listed in column 2 of the table in Part 1 of annex XIV [to Regulation \(EC\) No 404/2021](#). Ensure you are looking at the most up to date version of the Regulation. If the latest consolidated version does not include the latest amendment, this amendment needs to be looked at separately.

If the commodity to be exported is listed against GB-0, it can be exported to the EU from the whole territory of the UK. You will have to insert “GB-0” into the “territory code” box on the EHC.

If the commodity to be exported is listed against GB-1, it means that the UK is being regionalised because of a disease outbreak. All premises of origin (e.g. Flocks of origin, slaughterhouse, processing or storage premises as applicable) have to be located in GB-1. The OV has to ensure that this information is correct. For up to date GB-1 and GB-2 areas please refer to the online map where you have to check whether the premises of origin are all within the GB-1 area using the premises post codes.

<http://apha.defra.gov.uk/official-vets/Guidance/exports/ehc-online.htm>

Areas listed under GB-2 (and detailed as GB-2.1, GB-2.2 etc.) are restricted from exports between the “closing” and “opening” dates listed against those areas.

Some export certificates for animals and animal products will include statements that will require the OV to certify that specified areas or the entire country of origin are free from certain diseases.

Where it is possible for the Certifying Officer (CO) (Official Veterinarian (OV) or Environmental Health Officer (EHO)) in Great Britain to obtain disease clearance

themselves, the Centre for international Trade – Carlisle (CITC) will not issue a 618NDC notifiable disease clearance.

COs must check the following sources of disease information for the United Kingdom immediately prior to certification, to ensure disease freedom statements can be certified:

- the Notifiable Disease Occurrence List for Great Britain (ET171) available on the [Exports > Certification Procedures](#) page of the APHA Vet Gateway
- the UK Status for Non-Notifiable Diseases Relevant to Export Certification (ET152) available on the [Exports > Certification Procedures](#) page of the APHA Vet Gateway.

For Great Britain:

In the absence of a specific Notifiable Disease Clearance (618NDC) from CITC: COs may certify that the UK has disease free status or region free status for those diseases mentioned in the health certificate, once they have checked the disease list(s) for the last occurrence of the disease, and have ensured it complies with the time frames in the certificate.

In the event of a disease outbreak that affects a CO being able to obtain their own disease clearance, CITC will notify COs to make it clear which disease freedom statements should not be certified and where necessary, will issue a 618NDC notifiable disease clearance if the EHC can continue to be issued for certain regions that retain free status.

In the event of a disease outbreak after the EHC has been issued that affects the disease clearance, COs must not certify the EHC and must contact CITC immediately for advice on whether certification can still take place. If a disease outbreak affects the CO disease clearance procedures for this EHC, a 618NDC will be reinstated by CITC which will be issued with the EHC until a time when CO disease clearance can be reinstated.

NOTE: This does not apply to Transmissible Spongiform Encephalopathies (TSEs) or Bovine Tuberculosis (TB) freedom statements.

4. COLLECTION OF EVIDENCE

Personnel may be authorised to collect evidence which may be used to support veterinary certification. In GB, the Certification Support Officer (CSO) role has been developed by APHA.

- In **England, Scotland and Wales**, CSOs can be utilised by OV's for gathering evidence relating to this certificate. The CSOs must be authorised by APHA and they must hold the appropriate Official Controls Qualification (Animal Health Professional) (OCQ (AHP)-CSO) qualification.

The OV must direct the CSO as to how and where any necessary evidence relevant to the requirements of the Export Health Certificate (EHC) should be obtained. CSOs may

not carry out any functions that require the exercise of veterinary judgement, and are restricted to the execution of administrative checks.

They may only carry out such inspections, factual verification and evidence collection as specified by the directing OV, who remains responsible for the certification of the product. CSOs are not authorised to sign an EHC in their own right or on behalf of an OV.

Any documentary evidence collected by the CSO must be stamped, signed and dated by the CSO, before being submitted by them as supporting evidence to the OV. It is required that the OV is familiar with the product process and evidence required to start with, before directing the CSO to provide future evidence on an ongoing basis.

Additional guidance and principles of implementation are provided in the [OV Instructions Exports section](#) of the APHA Vet Gateway.

Groupage Export Facilitation Scheme (GEFS)

For groupage exports from Great Britain, where certain types of products are produced from a stable supply chain and are fully packaged for the final consumer, exporters who are GEFS members may use 30 day support attestations to provide information to OVs to facilitate completion of this certificate.

For further information including the definition of groupage exports, the template 30 day support attestation which must be used and requirements for exporters, suppliers and vets to use the scheme see:

http://apha.defra.gov.uk/External_OV_Instructions/Export_Instructions/Certification_Procedures/Products_Exports.html

You can check that exporters are GEFS members by emailing the exporter's name, GEFS membership number and the address of the exporting premises to GEFS@defra.gov.uk

6. CONSIGNMENTS OR PARTS OF THE CONSIGNMENT ORIGINATING FROM NI, EU MEMBER STATE OR FROM THIRD COUNTRIES (TRIANGULAR TRADE) [WHEN APPLICABLE]

NI origin:

Consignment could potentially contain animals or animal products which have originated in Northern Ireland. For raw materials which have then been processed into a final product in GB, or are presented in their original state and bearing a UK(NI) identification mark, the CO can certify certain matters relating to EU compliance at a national level.

Where the EHC refers to matters of compliance indicated by EU approval status of the premises of origin or manufacture in NI, compliance can be certified on the basis that from 1st January 2021, under the terms of the Withdrawal Agreement between the EU and UK and the Ireland / Northern Ireland Protocol, approved and registered premises in Northern Ireland will implement the full requirements of Regulation (EC) Nos. 852/2004, 853/2004,

2017/625 and all relevant supporting EU legislation as set out in Annex 2 to the Protocol. This compliance is indicated by the presence of the EU oval health and identification marks applied to the products in the required EU format, for products placed on the market in NI. Some examples, but not a complete list, of how assurance can be established at national level are listed below.

Compliance with the microbiological criteria set out in Regulation (EC) No. 2073/2005 can be certified if the products originate in an EU approved premises in NI, and bearing the EU oval ID mark.

Public health statements referring to compliance with EU requirements for testing for residues as set out in Directive 96/23/EC, (repealed by OCR Regulation 2017/625) 96/22 (EC) and 470/2009 (EC) can be certified by the CO on the basis of a national residue surveillance programme implemented in NI under The Animals and Animal Products (Examination for residues and maximum Residues Limits) Regulation (NI) 2016. This forms part of the UK national surveillance programme.

With regards to controls for Transmissible Spongiform Encephalopathies, guidance provided in this document relating to statements about the method of slaughter of animals in GB also applies to animals slaughtered in NI and can be certified by the CO on that basis.

Disease clearance for animals or products originating in NI can be completed using auto-clearance NDC found here:

<https://www.daera-ni.gov.uk/articles/notifiable-diseases-northern-ireland>

Where regional or local level disease clearance is required, this can be certified upon request on the basis of information from NI in the form of a declaration or a supporting health attestation.

Animal health statements which refer to the prohibition of certain vaccination programmes e.g. against FMD or CSF or ASF can be certified at a national level by the CO on the basis that NI also enforces a ban on such vaccinations in accord with EU regulations.

Statements relating to implementation of a national system for identification and registration of bovine animals can be certified on the basis of the requirement to register all bovine animal births, moves and deaths on the DAERA database.

Animal welfare statements can be certified by the CO on the basis that relevant inspections, monitoring and controls are implemented in NI through The Welfare of Animals at the Time of Killing Regulations (NI) 2014 as amended, in compliance with Regulation (EC) No. 1099/2009.

Animal By Products are handled in accordance with EU Control Regulation 1069/2009, which is implemented by the EU Implementing Regulation 142/2011, and ABP statements for materials originating in NI, can be certified on that basis.

When the certificate requires specific information to be included, such as the date of slaughter or the date of introduction into NI, the exporter must also request this information from the exporter in NI. The NI exporter may forward the request to the relevant NI CO to provide the necessary information requested by the UK exporter/ CO. This supporting information must be in writing and kept by the UK CO. The CO is not required to attach it as a supporting document to the EHC, unless requested by the EU Border Control Post or told otherwise.

EU origin:

It is possible that some consignments may contain animal products that are of EU origin and were exported to the UK on a Commercial Document or Intra-Trade Animal Health

Certificate (ITAHC). The Commercial Document may not contain enough information to allow the Certifying Officer (CO) to sign an EHC.

In such cases, the CO will need further information from the EU member state regarding particular attestations on the EHC that cannot be signed by the CO without further information. Thus, the UK exporter must request from the EU exporter a written declaration or a replica 'Third Country to EU' certificate completed to the extent possible that will provide the required information to the CO to certify the relevant attestations on the EHC. The exporter may wish to obtain these directly from the EU CO who has inspected the animal products before export from the EU.

When the certificate requires specific information to be included, such as the date of slaughter or the date of introduction into the EU member state, the exporter must also request this information from the EU member state exporter. The EU exporter may forward the request to the relevant EU CO to provide the necessary information requested by the UK exporter. This supporting information must be in writing and kept by the UK CO. The CO is not required to attach it as a supporting document to the EHC, unless requested by the EU Border Control Post or told otherwise. Exporters/COs must be aware that in some cases, the certificate does not provide an option to re-export EU origin products eg EU origin meat being re-exported as meat.

Third country origin:

It is also possible that some consignments may contain animal products that are of non-EU (Third Country) origin, which UK exporters intent to export to EU (known as Triangular Trade). In these cases Certifying Officers may obtain the necessary supporting information from a copy of the original EHC used for import of these products into the UK.

The CO in the UK is not required to attach a copy of the Third Country EHC as a supporting document to the UK-EU EHC, unless requested by the EU Border Control Post or told otherwise.

It is the UK exporter's responsibility to ensure timely request of information from the EU member state exporter/Third Country exporter, to allow the EHC to be signed and stamped in good time before export to the EU.

7.UK APPROVED ESTABLISHMENTS ELIGIBLE TO EXPORT TO THE EU

The exporting establishment must be listed as a 'UK approved establishment' and a list of UK approved establishments for import of products of animal origin (POAO) to the EU, can be found on the European Commission's list of approved establishments' link below:

https://ec.europa.eu/food/safety/international_affairs/trade/non-eu-countries_en

Please note that the list is updated regularly and ONLY establishments on the list are approved to export to the EU, and this does not include establishments with pending applications for approval.

If the final product contains POAO from other establishments, or products were previously processed in different establishments in the production chain, then these establishments should also be listed as UK approved establishments.

If the POAO ingredients originated or were processed in a country other than the UK, it may be necessary to obtain an official certificate from the countries of origin for the ingredients in question to enable the certificate to be signed.

8. ADDITION OF SCHEDULES

When the space in Part I or Part II of the certificate is insufficient to accommodate full details of the consignment a schedule may be used. In the relevant section of the certificate the certifying officer should annotate the certificate 'see attached schedule'. A new schedule should be created (typed or clearly written) containing the same information as that required in the certificate. The schedule must include the certificate reference number on each page and must be signed, dated and stamped by the certifying officer in a colour other than black on each page and under the last entry. Any blank spaces in the schedule or the certificate should be struck through with diagonal lines. The schedule must be firmly stapled to the EHC, the pages of the certificate including the schedule should be numbered and the complete document (EHC and schedule) should be “fan stamped” as a precaution against tampering.

Further guidance is available here:

http://apha.defra.gov.uk/External_OV_Instructions/Export_Instructions/Certification_Procedures/index.htm

9. CERTIFIED COPIES OF EXPORT HEALTH CERTIFICATES

When completing export certification Certifying Officers (CO) (Official Veterinarians (OV) and Environmental Health Officers (EHO)) must make photocopies of, or scan and save all documents they certify. This includes all documents that:

- are certified with the COs signature and stamp
- form part of any export documentation
- will accompany the consignment, or
- any support documentation (documentation provided by the CO at the premises of origin to enable the CO at the premises of loading to certify the final export certificate).

Examples of export documents required to be saved are:

- Export Health Certificates (EHC)
- Supplementary certificates
- Schedules to EHCs.

Where it is impossible to copy documents at the premises immediately after certification then a photocopy of the certificate could be made before travelling to the place of certification, and the certification details transposed onto the copy at the same time as

completing the certificate. When a paper copy is made, mark the photocopy as 'Certified Copy' and initial.

COs must retain copies of all export documentation for a period of two years.

Return of export documents to the Centre for International Trade - Carlisle (CITC) are only required for the following live animal export commodities:

- cattle
- pigs
- sheep
- goats
- camelids.

This should be done by scanning and emailing the documents on the same day as certification.

These certified copies are required to enable APHA to provide information to other Competent Authorities on Brucellosis, Tuberculosis or Bovine Spongiform Encephalopathy cases found in herds subsequent to export, to enable the country of destination to take the appropriate notifiable disease action.

For the purposes of completing routine Quality Assurance checks on export certification, CITC may request certified copies of certification from COs.

Further information:

Please visit APHA Vet Gateway for further information in certification procedures:
http://apha.defra.gov.uk/External_OV_Instructions/Export_Instructions/Certification_Procedures/index.htm

10. LEGAL STATEMENT

The existing EU legislation that the UK already complies with will be incorporated into our domestic law as “retained EU law” under the European Union (Withdrawal) Act 2018. References in our guidance and certification to such EU instruments should be taken to be references to this “retained EU law”. Under the Withdrawal Act we will ensure that current EU standards remain in force, without amendment, in the immediate months after our EU exit as part of UK domestic law (apart from corrections to make the EU legislation fully operable).

11. DISCLAIMER

This certificate and NFG are provided on the basis of information available at the time and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the Animal and Plant Health Agency (APHA) in Carlisle, via the link below:

<https://www.gov.uk/government/organisations/animal-and-plant-health-agency>
