South West: lower tier local authority watchlist – epidemiological charts

Produced 07 December 2020

NOTES

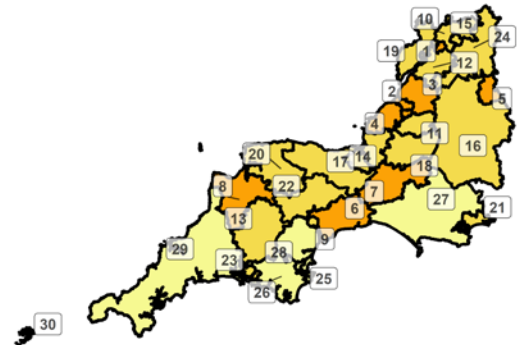

- This data is provided by Public Health England for the purpose of monitoring and supporting the management of Covid-19 infections in Local Authorities.
- The reports are produced using 2019 ONS population data
- If you would like to know the weekly trend for the case rate charts and persons tested chart please see Lower-tier local authority watchlist.
- The age pyramid charts have been replaced by age heatmaps to provide a clearer understanding of the cases by age over time.
- The age heatmap range is now 0-500+ due to the decrease in case rates across England.
