

Lebanon

Country name	Lebanon
State title	Lebanese Republic
Name of citizen	Lebanese
Official language	Arabic (<i>ara</i>)
Country name in Arabic script (PCGN Romanization)	لبنان (Lubnān) ¹
State title in Arabic script (PCGN Romanization)	الجمهورية اللبنانية (Al Jumhūrīyah al Lubnānīyah)
Script	Arabic is written in Arabic script but toponyms should be taken from official Roman-script sources
Romanization System	Romanized forms as found on official publications (see below for further details)
ISO-3166 code (alpha-2/alpha-3)	LB/LBN
Capital (Conventional English name)	Beirut ²
Capital (Local Roman-script name)	Beyrouth ²
Capital in Arabic script (PCGN Romanization in brackets)	بيروت (Bayrūt)

Introduction

Lebanon is a mountainous country, located in the part of the Middle East known as the Levant (This area was formerly described as the Near East, but this term has largely fallen out of use.) It lies on the Mediterranean Sea and has borders with Israel to the south and Syria to the north and east. The borders of contemporary Lebanon are a product of the 1920 Treaty of Sèvres. From 1516 until 1918 Lebanon was part of the Ottoman Empire. Following World War I, it became part of the French Mandate for Syria and Lebanon (1920-1943). Lebanon became independent from France in 1943.

Lebanon is a country of minorities with no single dominant group. Demographics are controversial, and there has been no population census since 1932. Lebanon has a religiously diverse population: Muslim 67.8% (31.9% Sunni, 31.2% Shia, smaller percentages of Alawites and Ismailis), Christian 32.4% (Maronite Catholics are the largest Christian group), Druze 4.5%, very small numbers of Jews, Baha'is, Buddhists, and Hindus (CIA World Factbook 2020 estimate).

¹ BGN/PCGN romanizations of Arabic-script names are provided for reference only. These are not the usual Roman-script spellings in Lebanon or for HMG use.

² On cartographic products PCGN recommends showing the local Roman-script name in primary position with the English conventional name in brackets; i.e. Beyrouth (Beirut). In English-language texts the conventional name alone can be used, or the name can be shown the same way as on cartographic products, if desired. It is sometimes useful to reference both names at the first mention of a place.

This small country, with an estimated population of 5,331,203 (2023 est.³), hosts many refugees. These include an estimated 489,292 Palestinians⁴, who arrived in 1948 after the creation of Israel. The majority of Palestinians live in the 12 official UNRWA⁵ refugee camps. In reality, these are now more like established towns, and many of their inhabitants were born and have lived their entire lives in the camps. More recently Lebanon has also become host to an estimated 879,529 Syrians and thousands of Iraqis, fleeing the wars in their home countries.⁶

It is notable that Lebanon is linguistically fairly homogenous, with most of the country's diverse population, including the large majority of the refugees, speaking Arabic as their first language.

Geographical names policy

Arabic is the official language of Lebanon. Official Lebanese mapping is produced in both Arabic script and French-style Roman script. The names found on these official Roman-script sources are the names recommended by PCGN for use on UK products. All diacritical marks on the Roman-script toponyms should be retained (see pages 5-6 for further details).

Aside from mapping, many other things, such as road signs, other signage and websites are dual-language (Arabic and Roman script, the latter is usually French but sometimes English). The prevalence and use on official sources, and elsewhere in Lebanon, of French-style names is why PCGN recommends use of these names on UK products. The French-style names are based on the French IGN⁷ romanization system for Arabic and differ from the way the same Arabic name would appear if romanized according to the [BGN/PCGN Romanization System for Arabic](#)⁸. They may contain both Arabic and French terms/words in addition to the specific name elements, e.g. Mohafazat Liban-Nord, Mohafazat Mont-Liban, Ras Beyrouth, Avenue Rafic Hariri.

While the spelling of place names in Arabic script in Lebanon is fairly consistent, there are often variations in the choice of spelling in Roman script and several spellings of a single name are likely to be encountered. To take one example, the Arabic definite article may be found spelt 'el' or 'al', or capitalised as 'Al' or 'El', and may be joined to the following word with a hyphen in some cases but not others, e.g. Nahr el Lîtâni versus Nahr El-Lîtâni or Nahr Al Lîtâni. PCGN advises following the spelling used on the most authoritative source, although this will mean, for example, treating the definite article differently in different names. The official products recommended by PCGN for use as names sources are produced by the Direction des Affaires Géographiques (Armée Libanaise). Although, even here, it should be noted that spellings may differ between one map series and another. The US [NGA Geographic Names Server \(GNS\)](#)⁹ is a good source for names over Lebanon. It has mostly been updated using the Carte du Liban 1:20,000-scale series, which is assessed to be the most reliable source. PCGN would recommend taking the names from the Carte du Liban 1:20,000 series or using the GNS. However, when using the GNS, care should be taken to avoid using names

⁷ Institut Géographique National, now renamed Institut national de l'information géographique et forestière (<http://www.ign.fr/>). Details of the IGN Romanization System can be found here: https://www.eki.ee/wgrs/rom1_ar.pdf

⁸ Examples include Beyrouth (conventional: Beirut; BGN/PCGN romanization: Bayrūt) and Er Rachīdiye (BGN/PCGN romanization: Ar Rashīdiyah).

⁹ US Board on Geographic Names Geographic Names Server: <http://earth-info.nga.mil/gns/html/index.html>

romanized using the BGN/PCGN Arabic romanization system, which may be found for some features in the GNS. These can often be recognised by the use of non-French diacritical marks (see below). For further information or assistance, please contact PCGN.

While PCGN would not recommend the creation of unnecessary competing Roman-script forms of names through application of the BGN/PCGN Romanization System for Arabic, in the absence of Roman-script sources for a name, a romanization of the Arabic name may be used.

Conventional Names

Some features have conventional English-language names, i.e. a standard spelling that is usually used in English. For places within Lebanon, on cartographic products PCGN would recommend showing the local Roman-script name in primary position with the English conventional name in brackets, e.g. Beyrouth (Beirut). In English-language texts the conventional name alone can be used or the name can be shown the same way as on cartographic products, if desired. It is sometimes useful to reference both names at the first mention of a place. For transnational features, such as rivers that flow through more than one country, or international features outside the sovereignty of any one country, PCGN recommends use of the conventional name for the feature. The conventional name is also recommended for disputed areas such as Shebaa Farms (see below).

Refugee Camps

As mentioned above Lebanon plays host to a large number of Palestinian refugees, living in several well-established refugee camps run by UNRWA¹⁰. The usual Roman-script names applied to these camps are those used by UNRWA. However, there are some cases where there are alternative names that might be encountered (often more French-style spellings of the names), which are provided in brackets for reference. For refugee camps, PCGN would usually recommend use of both the conventional names, i.e. the names used in English by the organisation operating the camp, and any locally used names, where these differ. The UNRWA camps in Lebanon are: Beddawi (Beddâoui) Camp, Burj Barajneh Camp, Burj Shemali Camp (Borj ach Chémâli), Dbayeh (Dbaiyé) Camp, Ein El Hilweh (Aïn el Hiloué) Camp, El Buss Camp, Mar Elias Camp, Mieh Mieh Camp, Nahr el-Bared Camp, Rashidieh (Er Rachîdiyé) Camp, Shatila Camp, Wavel Camp.

Other refugees hosted by Lebanon (principally those fleeing the wars in Syria and Iraq) are not housed in formal refugee camps, but live in cities, villages or spontaneously set-up tented settlements throughout the country.¹¹

Boundaries Issues

Lebanon's borders with both Syria and Israel remain unresolved.

Lebanon-Israel boundary

The line that functions as a *de facto* boundary between Israel and Lebanon is not technically an international boundary but, rather, a line of withdrawal mandated by the United Nations in 2000 following the removal of Israeli military forces from southern Lebanon. The United Nations "*Blue Line*" was supposed to follow the *de jure* boundary between Lebanon/Syria and Palestine as delimited by Britain and France in 1923. A 1949 Armistice Line came into being following the Arab-Israeli war of 1948. The 1949 line was supposed to mirror the 1923 alignment. In 1923, thirty-eight boundary markers were placed along the 82-kilometre border and a detailed textual delimitation was published.

¹⁰ <https://www.unrwa.org/where-we-work/lebanon>

¹¹ <https://www.unhcr.org/lb/shelter#:~:text=In%20line%20with%20government%20policy,tented%20settlements%20throughout%20the%20country.>

The “*Blue Line*” differs from the 1923/1949 line in several short stretches, though never by more than 500 metres.”

Lebanon-Syria boundary

Lacking a treaty or other documentation describing the boundary, portions of the Lebanon - Syria boundary are unclear with several sections in dispute:

1. **Shebaa Farms** is a strip of land at the intersection of the Lebanon - Syria boundary, at the northern limit of Israeli-occupied Golan Heights, measuring approximately 10 km by 2 km. In the first instance this dispute is between Lebanon and Syria. However, Israel is implicated in the dispute as it considers the Shebaa Farms area to be part of Golan Heights¹², which is disputed between Israel and Syria. On UK products, the Shebaa Farms area is to be shown as being inclusive to Syrian territory currently occupied by Israel in the wider Golan Heights territory. A *de jure* boundary should be shown for the Lebanon - Syria boundary. The conventional name Shebaa Farms should be used.
2. Five villages (and their surrounding territories) are disputed between Syria and Lebanon. These are Aarsâl (34° 10' 48" N 36° 25' 12" E), Deir El Aachâyer (33° 33' 27" N, 36° 00' 39" E), Kfar Qouq (33° 32' 00" N, 35° 53' 32" E), Qasr (34° 28' 52" N, 36° 26' 24" E) and Tfaïl (33° 51' 00" N, 36° 22' 05" E). This dispute is primarily caused by the lack of any complete demarcation along the boundary. The villages are generally considered as pertaining to Lebanon (and certainly are in the de facto sense) and should be shown as part of Lebanon on UK products.

Language

Article 11 of the Lebanese constitution states: “The Arabic language is the official national language. The conditions under which the French language is to be used are determined by law.”¹³ The official language, Arabic, is the most common language spoken by the citizens of Lebanon. It is a Semitic language, written from right to left in the Arabic alphabet. Many people also speak French. The use of French is a legacy of Lebanon’s colonial history (see Introduction). It is often used as a prestige language for business, diplomacy and education.

Written Arabic differs from the spoken language. In Lebanon, Modern Standard Arabic (MSA) is used for official written purposes (often alongside French). The dialect spoken is Lebanese Arabic. As a variety of Levantine Arabic, Lebanese Arabic is most closely related to Syrian Arabic and shares similarities with Palestinian and Jordanian Arabic. A majority of the Lebanese people are bilingual or trilingual and it is not uncommon for Lebanese people to code-switch between, or mix, Lebanese Arabic, English, and French in their daily speech. English is increasingly used in science and business interactions.

Lebanese citizens of Armenian, Greek, or Assyrian descent often speak their ancestral languages with varying degrees of fluency. Armenians constitute approximately 4% of the population¹⁴.

¹² The UK government considers the Golan Heights to be part of Syria. Consequently, Syrian, Arabic-language names, romanized according to the BGN/PCGN romanization system for Arabic, should be applied to features within this area. This differs from current US foreign policy, therefore the NGA Geographic Names Server (GNS) cannot be used as a names source for this area. PCGN recommends use of the Arabic or the conventional names for this area: Murtafa’ât al Jawlân (Golan Heights).

¹³ https://www.constituteproject.org/constitution/Lebanon_2004.pdf?lang=en

¹⁴ [Lebanon - The World Factbook \(cia.gov\)](#)

Place names of Aramaic origin may be encountered in Lebanon. These often contain initial consonant clusters, such as those consisting of b plus another consonant such as l or h. The clusters bl, bh, etc., should be retained where they occur in a Lebanese Roman-script source. Some examples include: Blida (33° 08' 24" N, 035° 30' 53" E), Bsous (33° 48' 58" N, 035° 34' 42" E) and Bnâbîl (33° 53' 59" N, 035° 44' 16" E).

Inventory of characters (and their Unicode¹⁵ encodings)¹⁶:

French contains the following letter-diacritic combinations in addition to the unmodified letters of the basic Roman script. These may be encountered in Lebanese Roman-script spellings of geographical names:

Upper-case character	Unicode encoding	Lower-case character	Unicode encoding
À	00C0	à	00E0
Â	00C2	â	00E2
Ç	00C7	ç	00E7
È	00C8	è	00E8
É	00C9	é	00E9
Ê	00CA	ê	00EA
Ë	00CB	ë	00EB
Î	00CE	î	00EE
Ï	00CF	ï	00EF
Ô	00D4	ô	00F4
Œ	0152	œ	0153
Ù	00D9	ù	00F9
Û	00DB	û	00FB
Ü	00DC	ü	00FC
ÿ *	0178	ÿ *	00FF

* rarely encountered

¹⁵ See www.unicode.org

¹⁶ Characters can be manually input into Microsoft Word documents by typing in these character codes and then holding down the ALT key and pressing /x/. The code will change to the required character. The letter can be copied and pasted into other programmes if required. Alternatively, the 'Insert – Symbol' command can be used; the code can be entered into the 'Character code' box which will show the corresponding letter.

A GeoNames Soft-Copy Keyboard can be downloaded from the NGA website and used to enter the required letter-diacritic combinations for a particular region:

<https://geonames.nga.mil/geonames/GNSHome/services.html>.

The BGN/PCGN Romanization System for Arabic contains the following letter-diacritic combinations in addition to the unmodified letters of the basic Roman script:

Upper-case character	Unicode encoding	Lower-case character	Unicode encoding
‘	2018 or 02BB	’	2019 or 02BC
Á	00C1	á	00E1
Ā	0100	ā	0101
Ḍ	1E10	ḍ	1E11
Ḥ	1E28	ḥ	1E29
Ī	012A	ī	012B
Ş	015E	ş	015F
Ṭ	0162	ṭ	0163
Ū	016A	ū	016B
Ẓ	005A+0327*	ẓ	007A+0327*

*Note, the z + cedilla is not available as a single encoding.

Administrative structure

Lebanon is currently divided into eight first-order administrative divisions (ADM1), known as governorates or provinces (*mohafazat* in Arabic). These are sub-divided into *cazas* (districts) at second-order (ADM2) level, which are further sub-divided into municipalities (Arabic: *baladia*; French: *municipalité*) at ADM3 level.

Law 522/2003 set the ground to create two new *mohafazats*, namely Baalbek-Hermel and Aakkâr. Nevertheless, various public administrations (including the Lebanese Central Administration of Statistics) still adopt the six *mohafazats* division.¹⁷ PCGN recommends showing the eight *mohafazats*, as listed below.

Another law of 2017 created a ninth *mohafazat*, formed of the two districts of Kesrouane and Jbeil (formerly part of *Mohafazat Mont-Liban*). However, once again there has been an absence of evidence of the implementation of *Mohafazat Kesrouane-Jbeil*¹⁸, despite reports of the appointment of a governor in 2020. Jounieh is reportedly the administrative centre of the new *mohafazat*. PCGN does not recommend showing this latest reported *mohafazat* until such time as there is more evidence of its *de facto* existence. See page 10 for location of *Mohafazat Kesrouane-Jbeil*.

¹⁷ <http://www.cas.gov.lb/index.php/about-lebanon-en>

¹⁸ The Arabic name for the new *mohafazat* is كسروان-جبيل (BGN/PCGN romanization: Kasarwān-Jubayl). It is also sometimes known as Keserwan al Fatouh wa Jbeil.

Mohafazats of Lebanon

1. Aakkār (33° 40' 00" N 35° 50' 00" E)

Name in Arabic Script	عكار
Long form name	Mohafazat Aakkār
Long form name in Arabic Script	محافظة عكار
Variant Name(s)	Muḥāfazat 'Akār, 'Akār, Aakar, 'Akkār
ISO 3166-2 subdivision code	LB-AK
Centre	Halba (34° 32' 34" N 36° 04' 47" E)
Centre in Arabic Script	حلبا
Variant Name(s) of Centre	Aakar, 'Akkār, Ḥalbā, Halbe
Consists of 1 ADM2	Aakkār

2. Baalbek-Hermel (33° 12' 30" N 36° 18' 00" E)

Name in Arabic Script	بعلبك - الهرمل
Long form name	Mohafazat Baalbek-Hermel
Long form name in Arabic Script	محافظة بعلبك - الهرمل
Variant Name(s)	Muḥāfazat Ba'albak-Al Hirmil, Ba'albak-Al Hirmil
ISO 3166-2 subdivision code	LB-BH
Centre	Baalbek (34° 00' 21" N 36° 13' 05" E)
Centre in Arabic Script	بعلبك
Variant Name(s) of Centre	Héliopolis, Ba'albak, Baalbeck, Ba'labak, Ba'labakk, بعلبك
Consists of 2 ADM2s	Baalbek, Hermel

3. Béqaa (33° 40' 00" N 35° 50' 00" E)

Name in Arabic Script	البقاع
Long form name	Mohafazat Béqaa
Long form name in Arabic Script	محافظة البقاع
Variant Name(s)	Beqaa, Bekaa, Muḥāfazat al Biqā', El-Beqaa, La Beqâa
ISO 3166-2 subdivision code	LB-BI
Centre	Zahlé (33° 50' 59" N 35° 54' 15" E)
Centre in Arabic Script	زحلة
Variant Name(s) of Centre	Zaḥlah
Consists of 3 ADM2s	La Béqaa-Ouest (West Bekaa), Râchaïya, Zahlé (Zahleh)

4. Beyrouth (33° 53' 00" N 35° 30' 00" E)

Name in Arabic Script	بيروت
Long form name	Mohafazat Beyrouth
Long form name in Native Script	محافظة بيروت
Variant Name(s)	Beirut, Muḥāfazat Bayrūt, Bayrūt
ISO 3166-2 subdivision code	LB-BA
Centre	Beyrouth (Beirut) (33° 52' 19" N 35° 30' 35" E)
Centre in Native Script	بيروت
Variant Name(s) of Centre	Bayrūt, Beirōūt
Not sub-divided	

TOPONYMIC FACTFILE

5. Liban-Nord (34° 20' 00" N 35° 55' 00" E)

Name in Arabic Script	لبنان الشمالي
Long form name	Mohafazat Liban-Nord
Long form name in Native Script	محافظة لبنان الشمالي
Variant Name(s)	Mohafazat ech Chimâl, Muḥāfazat Lubnān ash Shamālī, Muḥāfazat ash Shamāl, North Lebanon, Lubnān ash Shamālī
ISO 3166-2 subdivision code	LB-AS
Centre	Trâblous (Tripoli) (34° 26' 12" N 35° 50' 59" E)
Centre in Arabic Script	طرابلس
Variant Name(s) of Centre	Ṭarābulus
Consists of 6 ADM2s	Batroûn, Bcharré (Bécharré), Koura, Miniyé-Danniyé (Miniyeh-Danniyeh), Trâblous (Tripoli), Zgharta

6. Liban-Sud (33° 25' 00" N 35° 20' 00" E)

Name in Arabic Script	لبنان الجنوبي
Long form name	Mohafazat Liban-Sud
Long form name in Arabic Script	محافظة لبنان الجنوبي
Variant Name(s)	Aj Jeanoub, Mohafazat ej Jnoub, Muḥāfazat Lubnān al Janūbī, South Lebanon, Lubnān al Janūbī, Lubnan al Jonoubi
ISO 3166-2 subdivision code	LB-JA
Centre	Saïda (Sidon) (33° 33' 47" N 35° 22' 08" E)
Centre in Arabic Script	صيدا
Variant Name(s) of Centre	Şaydā, Şaydūn, Saaïdé, Saïda
Consists of 3 ADM2s	Jezzîne, Saïda (Sidon), Soûr (Tyre)

7. Mont-Liban (33° 55' 00" N 35° 40' 00" E)

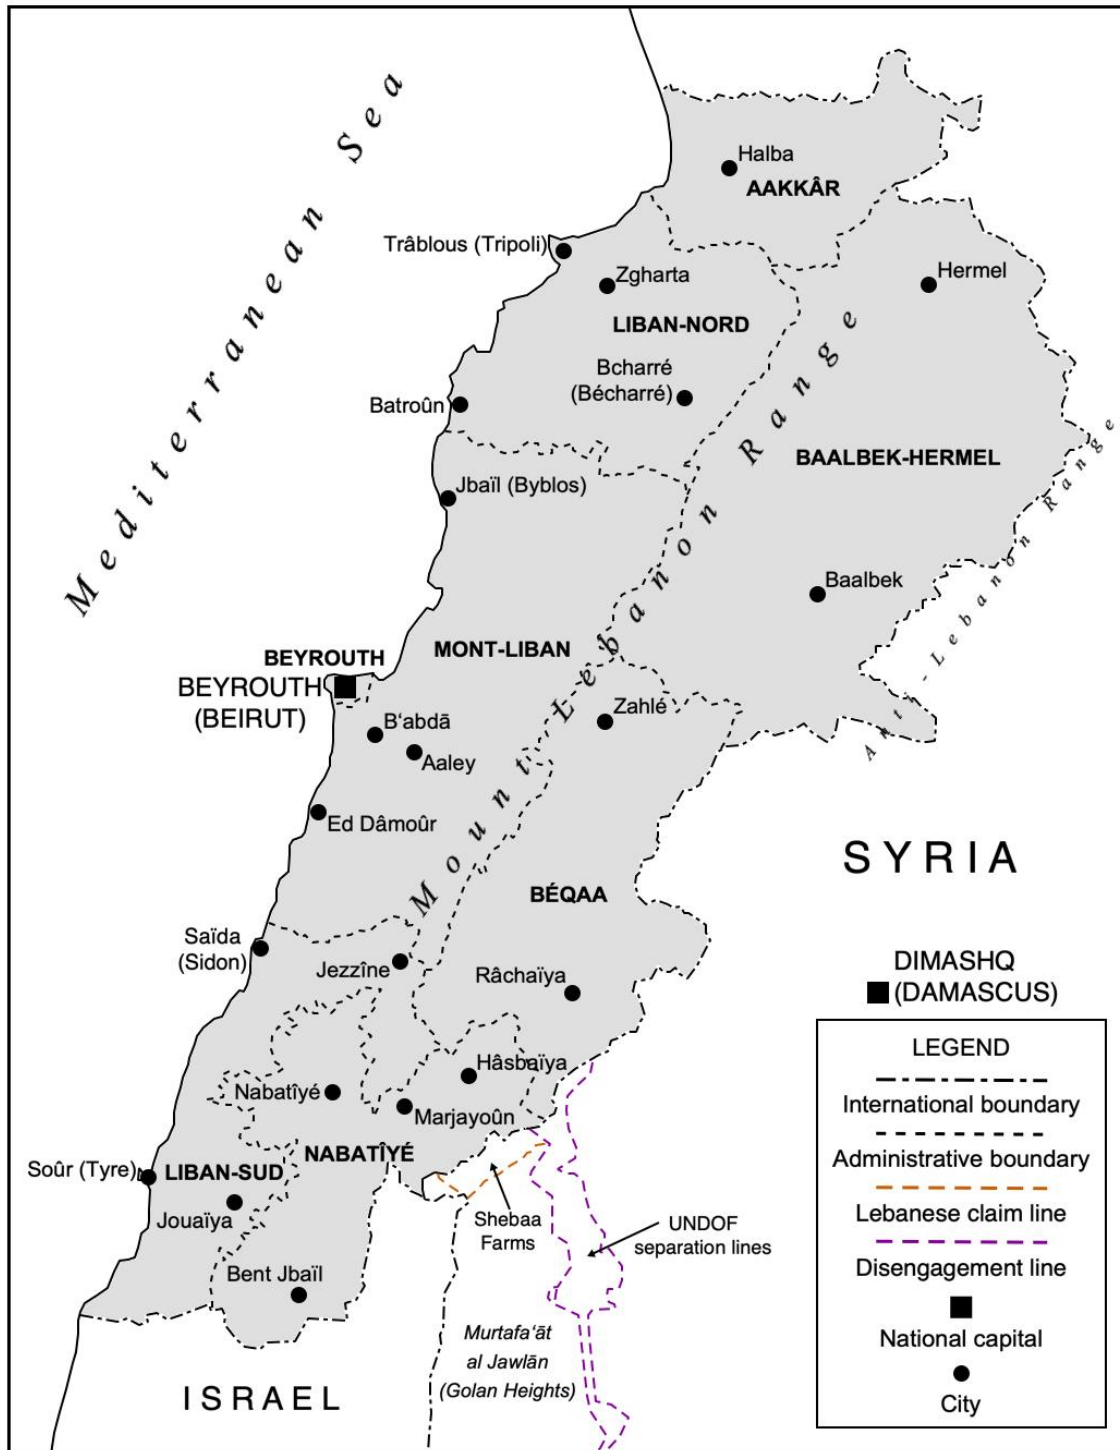

Name in Arabic Script	جبل لبنان
Long form name	Mohafazat Mont-Liban
Long form name in Arabic Script	محافظة جبل لبنان
Variant Name(s)	Mohafazat Jabal Loubnane, Muḥāfazat Jabal Lubnān, Mount Lebanon, Jabal Lubnān
ISO 3166-2 subdivision code	LB-JL
Centre	Baabda (33° 50' 02" N 35° 32' 397" E)
Centre in Arabic Script	بعيدا
Variant Name(s) of Centre	B'abdā
Consists of 6 ADM2s	Aaley, Baabda, Chouf, Jbaïl (Byblos), Kesrouane, Matn ¹⁹

8. Nabatiyé (33° 15' 00" N 35° 30' 00" E)

Name in Arabic Script	النبطية
Long form name	Mohafazat Nabatiyé
Long form name in Arabic Script	محافظة النبطية
Variant Name(s)	Muḥāfazat an Nabaṭīyah, An Nabaṭīyah
ISO 3166-2 subdivision code	LB-NA
Centre	Nabatiyé (33° 22' 43" N 35° 28' 59" E)
Centre in Arabic Script	النبطية
Variant Name(s) of Centre	An Nabaṭīyah, En Nabaṭīye, Nabatiyah, Nabatiyeh
Consists of 4 ADM2s	Bent Jbaïl, Hâsbaïya, Marjayoûn, Nabatiyé

¹⁹ The districts of Jbaïl and Kesrouane have reportedly been removed from Mont-Liban to create a new mohafazat called Kesrouane-Jbeil (with Jbeil being the usual spelling for the mohafazat), however there is limited evidence of the implementation of this mohafazat.

Map of Lebanon

Map produced by PCGN for illustrative purposes only, and is not to be taken necessarily as representing the views of the UK government on boundaries or political status.

Location of Mohafazat Kesrouane-Jbeil²⁰

Map produced by PCGN for illustrative purposes only, and is not to be taken necessarily as representing the views of the UK government on boundaries or political status.

²⁰ A law of 2017 created Kesrouane-Jbeil as the 9th Mohafazat of Lebanon, but there is so far little evidence of its existence in practice. The districts of Jbail and Kesrouane have reportedly been removed from Mont-Liban to create the new mohafazat.

Other Significant Locations

PCGN Recommended Name ²¹	Name in Arabic Script (BGN/PCGN Romanization) ²²	Conventional Name	Variant Names/Spellings	Location	Feature Type
Nahr el Aassi [LB] Nahr al 'Āṣī [SY] Asi Nehri [TR]	نهر العاصي (Nahr al 'Āṣī)	Orontes	Nehir Oronte; Nahr el Assi; Nahr al 'Āṣ; Nahr el Aâssi; El Asi	36° 02' 52" N, 035° 58' 01" E	river
