T LEVEL IN DIGITAL PRODUCTION, DESIGN & DEVELOPMENT

↑ ABOUT T LEVELS

T Levels are new courses that follow GCSEs and are equivalent to 3 A Levels. They've been co-created by the industry you want to be a part of, so you can gain the knowledge and skills you need to leap ahead of the crowd and into your desired career.

↑ ABOUT THE COURSE

The core element of a T Level in Digital Production, Design and Development will boost your knowledge in a range of topics such as programming, coding, the use of data, and the different platforms of delivery in the digital industry. It's a cutting-edge subject, so you'll also learn about the potential security risks that organisations can face and how to analyse problems and identify solutions through computer programs.

You'll then move on to the subject specialism, so you can get deeper into the specifics and build up the skills you need for your future job. You'll work on problem solving, developing solutions within a collaborative environment and learn how to change, maintain and support software.

Then you'll be able to put everything you learn into practice, with a substantial industry placement of around 45 days. Giving you an amazing opportunity to work with an employer while you study, such as a software or IT company, and gain invaluable experience as well as key skills that employers are looking for.

↑ WHERE COULD THE COURSE TAKE ME?

Following a T Level, you could progress straight into a skilled profession or continue your studies with a degree or higher apprenticeship. Career options might include software, web or games development – speak to your careers adviser to find out more.
