Thank you for your email of 27 December 2020 requesting the following information:

I would like to make a freedom of information request for the AESPs as listed below:

- 2320-D-128-532
- 2320-D-128-533

I am treating your correspondence as a request for information under the Freedom of Information Act 2000 (FOIA).

A search for the information has now been completed within the Ministry of Defence, and I can confirm that information in scope of your request is held.

The information you have requested can be found at annex A and B, but some of the information falls entirely within the scope of the absolute exemption provided for at section 40 (Personal Data) and qualified exemptions provided for at section 26 (Defence) and section 38 (Health and Safety) of the FOIA and has been redacted.

Section 40(2) has been applied to some of the information in order to protect personal information as governed by the Data Protection Act 2018. Section 40 is an absolute exemption and there is therefore no requirement to consider the public interest in making a decision to withhold the information.

Sections 26 and 38 are qualified exemptions and are subject to public interest testing which means that the information requested can only be withheld if the public interest in doing so outweighs the public interest in disclosure.

Section 26(1)(a) and (b) have been applied to some of the information because it contains details which are operationally sensitive and would prejudice the capability and effectiveness of our armed forces. The balance of public interest was found to be in favour of withholding the information given that, overall, the public interest is best served in not releasing any details on the assistance we provide that would prejudice the security of UK personnel serving in the UK and abroad and which would provide tactical advantage to our enemies.

Section 38(1)(a) and (b) applies to information that if disclosed would or would likely; endanger the physical or mental health of any individual; or endanger the safety of any individual. Releasing this information would compromise the ability of UK Armed Forces to carry out operations safely by revealing information about capabilities which would assist adversaries in planning attacks against Armed Forces

personnel and equipment, thus endangering lives. Again, the balance of public interest was found to be in favour of withholding the information .

Given the arguments described above, on balance, I have sent the level of prejudice against release of this exempted information at the higher level of "would" rather than "would be likely to".

If you have any queries regarding the content of this letter, please contact this office in the first instance.

If you wish to complain about the handling of your request, or the content of this response, you can request an independent internal review by contacting the Information Rights Compliance team, Ground Floor, MOD Main Building, Whitehall, SW1A 2HB (e-mail CIO-FOI-IR@mod.gov.uk). Please note that any request for an internal review should be made within 40 working days of the date of this response.

If you remain dissatisfied following an internal review, you may raise your complaint directly to the Information Commissioner under the provisions of Section 50 of the Freedom of Information Act. Please note that the Information Commissioner will not normally investigate your case until the MOD internal review process has been completed. The Information Commissioner can be contacted at: Information Commissioner's Office, Wycliffe House, Water Lane, Wilmslow, Cheshire, SK9 5AF. Further details of the role and powers of the Information Commissioner can be found on the Commissioner's website at https://ico.org.uk/.

Yours sincerely,

INTRODUCTION

- 1 Users should forward any comments on this publication in accordance with Army Equipment Support Publication (AESP) 0100-P-011-013. All comments are only to be submitted using the electronic and interactive Form 10 which can be accessed and downloaded from the Joint Asset Management and Engineering Solutions (JAMES) Portal (via Hot Topic Forms) or from DR TDOL (F10).
- 2 All electronic Form 10s are to be completed and forwarded to the Form 10 cell using the instructions accompanying the form in its template location. Security procedures are to be observed in accordance with Joint Services Publication (JSP) 440.
- 3 The Form 10 procedure is only to be used for the purpose of commenting on the content of an individual AESP and must not be used:
 - 3.1 In place of the Equipment Failure Reporting (EFR) procedure outlined in The Land Equipment Unit Maintenance Standards (LEUMS).
 - 3.2 For subjects which are the concern of the Technical Staff Suggestions outlined in Army General and Administrative Instructions (AGAI):
- 4 AESPs are issued under United Kingdom (UK) Ministry Of Defence (MOD) authority and where AESPs specify action is to be taken, the AESP will of itself be sufficient authority for such action and also for the demanding of the necessary stores, subject to the provisions of Para 3 below.
- 5 The subject matter of this publication may be affected by Defence Instructions and Notices (DIN), Standard Operating Procedures (SOP) or by local regulations. When any such instruction, Order or Regulation contracts any portion of this publication it is to be taken as the overriding authority.

WARNINGS AND CAUTIONS

WARNING

10 The following WARNING is used in this document:

CHECK COMPRESSION TESTER NOZZLE PROTRUSION INTO SLEEVE.

CAUTION

11 The following CAUTION is used in this document:

ROLLER BRAKE TESTER. Before testing the four wheel drive vehicles on a roller brake tester, the centre differential MUST BE DISENGAGED, the transfer box MUST BE IN NEUTRAL, and with one axle stationary, the axle being tested MUST NOT BE REVOLVED IN EXCESS OF 3 mph (5 km/h) approx.

EQUIPMENT IDENTITY

- 1 The equipment included are:
 - 1.1 Truck Utility Light (TUL) High Specification (HS), Truck Utility Medium (TUM) HS and Battlefield Ambulance (HS).

INTRODUCTION

- 2 This publication details the Acceptable Quality Levels (AQL) for the complete equipment to meet the quality standard at levels 2 and 3.
- 3 It is to be applied in conjunction with the general principles contained in Chapter 150 of EMER T & M A 028.
- 4 The following abbreviations are used: H = High L = Low

INDEX TO SCHEDULES

- 5 Main breakdown of inspection and testing of complete equipment is as follows:
 - 5.1 Serial:
 - 5.1.1 Engine (WARNING)
 - 5.1.2 Clutch
 - 5.1.3 Gearbox
 - 5.1.4 Transfer box
 - 5.1.5 Axles
 - 5.1.6 Steering
 - 5.1.7 Brakes
 - 5.1.8 Suspension
 - 5.1.9 Road test
 - 5.1.10 Static roller brake test equipment (CAUTION)
 - 5.1.11 Commanders IK

INTRODUCTION

- 1 Users should forward any comments on this publication in accordance with Army Equipment Support Publication (AESP) 0100-P-011-013. All comments are only to be submitted using the electronic and interactive Form 10 which can be accessed and downloaded from the Joint Asset Management and Engineering Solutions (JAMES) Portal (via Hot Topic Forms) or from DR TDOL (F10).
- 2 All electronic Form 10s are to be completed and forwarded to the Form 10 cell using the instructions accompanying the form in its template location. Security procedures are to be observed in accordance with Joint Services Publication (JSP) 440.
- 3 The Form 10 procedure is only to be used for the purpose of commenting on the content of an individual AESP and must not be used:
 - 3.1 In place of the Equipment Failure Reporting (EFR) procedure outlined in The Land Equipment Unit Maintenance Standards (LEUMS).
 - 3.2 For subjects which are the concern of the Technical Staff Suggestions outlined in Army General and Administrative Instructions (AGAI):
- 4 AESPs are issued under United Kingdom (UK) Ministry of Defence (MOD) authority and where AESPs specify action is to be taken, the AESP will of itself be sufficient authority for such action and also for the demanding of the necessary stores, subject to the provisions of Para 3 below.
- 5 The subject matter of this publication may be affected by Defence Instructions and Notices (DIN), Standard Operating Procedures (SOP) or by local regulations. When any such instruction, Order or Regulation contracts any portion of this publication it is to be taken as the overriding authority.

WARNINGS AND CAUTIONS

WARNINGS

- 9 The following WARNINGS are used in this document:
 - (1) HAZARDOUS SUBSTANCES. BEFORE USING ANY HAZARDOUS SUBSTANCE OR MATERIAL, THE USER MUST BE CONVERSANT WITH THE SAFETY PRECAUTIONS AND FIRST AID INSTRUCTIONS DETAILED ON ITS CONTAINER, THE RELEVANT SAFETY DATA SHEET AND IN LOCAL SAFETY ORDERS AND REGULATIONS.
 - (2) PERSONAL INJURY. EXHAUST FUMES ARE HIGHLY TOXIC. WHEN UNDERTAKING REPAIR OPERATIONS THAT REQUIRE THE ENGINE TO BE RUN, ALWAYS ENSURE THAT EXHAUST EXTRACTION EQUIPMENT IS USED, OR THAT THE WORK AREA HAS ADEQUATE VENTILATION.
 - (3) PERSONAL INJURY. WHEN WORKING ON A VEHICLE THAT IS JACKED UP, ALWAYS ENSURE THAT IT IS ADEQUATELY SUPPORTED BY AXLE STANDS OR BLOCKS. NEVER VENTURE UNDER A VEHICLE THAT IS SOLEY SUPPORTED BY JACKS.

GENERAL

1 This section details the examination of the engine components.

INDEX TO SCHEDULES

2 The examination of components is broken down as follows:

Serial	Details
1-5	Cylinder block
6-10	Pistons
11-13	Piston rings
14	Gudgeon pin
15	Connecting rod
16	Small end bush
17-29	Crankshaft
30-32	Cylinder head
33	Valve guides
34	Inlet valves
35	Exhaust valves
36	Valve springs
37	Rocker shaft and rocker arms
38-41	Camshaft
42-43	Camshaft bushes
44-46	Tappet guide
47-48	Tappet slide
49	Roller follower
50	Camshaft and fuel injection pump drive belt
51	Flywheel

EXAMINATION OF COMPONENTS

3 Table 1 details the acceptable quality levels for the examination of components.

TABLE 1 EXAMINATION OF COMPONENTS

Serial	Detail	Acceptable (Quality Level	Remarks
(1)	(2)	Level 3 (3)	Level 4 (4)	(5)
1	CYLINDER BLOCK Height, centre line of crankshaft to top face of block	H = 278.613 mm (10.969 in.) L = 278.511 mm (10.965 in.)		Cylinder block to be examined for cracks, machined surfaces to be free from burrs or other damage, coolant passages to be clear, oilways to be free from metal swarf deposits.
2	ID bore for tappet guides	H = 34.95 mm (1.376 in.) L = 34.925 mm (1.375 in.)		mistal small deposits.
3	ID bore for camshaft bushes	H = 50.013 mm (1.9690 in.) L = 49.987 mm (1.9680 in.)		
4	ID bore for main bearing shells	H = 67.721 mm (2.6662 in.) L = 67.704 mm (2.6655 in.)		
5	ID cylinder bore	,	·	Surface finish cross hatch 38° to 42°
	5.1 Standard	H = 90.4875 mm (3.5625 in) L = 90.475 mm (3.5620 in.)		(1) All bores to exhibit a uniform cross hatch pattern.
				(2) All bores to exhibit a uniform cut in both directions down the bore.
				(3) No metallurgical defects to be present, i.e blow hole, and surface porosity.
And the state of t				(4) No evidence of plucking out of carbon flakes.

28	Maximum ovality main journals and crankpins		9 mm 15 in.)	Profile of re-ground journals to be within 0.007 mm (0.0003 in.) of a true circle.
29	Maximum taper main journals and crankpins		5 mm 11 in.)	
30	Maximum crankshaft bow	0.076 mm (0.003 in.)		Measured at centre journal with end journals supported in vee blocks.
31	Crankshaft end float	H = 0.152 mm (0.006 in.) L = 0.05 mm (0.002 in.)		Centre main bearing thrust faces may be reground to a maximum of 0.25 mm (0.010 in.) each side to accept oversize thrust washers. Variation in thrust washer thickness each side not to exceed 0.08 mm (0.003 in.).
32	OD of flange for flywheel	H = 99.517 mm location (3.917 in.) L = 99.390 mm (3.912 in.)		
	CYLINDER HEAD			
33	Minimum thickness rocker face to flame face (new head)	H = 128.13 mm (5.044 in.). L = 127.87 mm (25.034 in.)		Cylinder head may be refaced, see Cat 522. Surface finish on flame face 75 micro-inches maximum.
34	Maximum flame face distortion over total length	0.127 mm (0.005 in.)	0.05 mm (0.002 in.)	Maximum face distortion over any 25 mm (1.0 in.) length 0.10 mm (0.0004 in).

RUNNING IN AND TESTING OF EQUIPMENT

General

4 This section details the running in and testing procedures for overhauled components and assemblies.

Engine testing

- 5 Overhauled engines are to be run in according to Table 2 and EMER T and M A 028 Chap 100.
- 6 Overhauled engines are to be power tested according to EMER T & M A 028 Chap 100. Rover instruction sheet No. 12.930.

Fuel injection pump testing

7 Fuel injection pump testing is detailed in Category 522 Chap 11-1.

Pump specification

8 Pump type - Bosch VE pump R509-2-24V non-EEGR R509-4-24V EEGR

- 8.1 Rotation (Looking on drive end): Clockwise.
- 8.2 Governor type: Two speed mechanical.
- 8.3 Advance type: Automatic speed.
- 8.4 Solenoid shut-off device: 24Volts.
- 8.5 Delivery valves in HP outlet connections.
- 8.6 Automatic high pressure venting system.
