Lovima® 75 microgram
film-coated tablets desogestrel

Daily contraceptive pill
to prevent pregnancy

Lovima® 75 microgram
film-coated tablets desogestrel

Lovima® 75 microgram film-coated tablets
Each tablet contains 75 microgram desogestrel. Lovima is a progestogen-only contraceptive pill (POP) used to prevent pregnancy in women of child bearing age.

Read the package leaflet before use.
For oral use. Contains lactose and soybean oil.
See leaflet for further information.
Keep out of the sight and reach of children.

How to use: It is important to take one tablet at the same time each day until the pack is empty. Then start a new pack on the next day without a break.

If you have taken Lovima before, tell your pharmacist if:

- you are taking or have been prescribed any new medicines
- there have been any changes in your health
- there have been any changes in your bleeding patterns.

DO NOT TAKE if you:

- are pregnant or may be pregnant. If you are unsure talk to your pharmacist
 - have a thrombosis (blood clot)
 - have or have had jaundice or severe liver disease
 - have or are suspected of having a sex-steroid sensitive cancer (e.g. breast cancer)
 - have any unexplained vaginal bleeding
 - are allergic to **peanuts or soya**
 - are allergic to desogestrel, lactose, or any of the ingredients in Lovima.
- Tell your pharmacist** before taking if you:
- are taking any **other medicines or herbal products** or have taken **emergency contraception** within the last 5 days
 - have ever had breast cancer
 - have ever had liver cancer or other liver disorders
 - have diabetes or high blood pressure
 - have ever had a thrombosis (blood clot).

Lovima® 75 microgram
film-coated tablets desogestrel
