

The number of people in hospital with COVID-19 in the UK

Number of people in hospital each day, up to 4 Feb

First peak on
12 April 2020

Statistical notes

Patients in hospital with COVID-19, UK:

Total number of people in hospital with COVID-19 in the UK. Definitions are not always consistent between the four nations. England data now covers all Acute Trusts, Mental Health Trusts and the Independent Sector and are reported daily by trusts to NHS England and NHS Improvement. Welsh data include confirmed COVID-19 patients in acute hospitals only, including those recovering. The first peak was 21,686 on 12 April 2020.
