

Note to employer

Do not use this form if the benefits are provided under an optional remuneration arrangement. Instead use working sheet 2b. Also, read appendix 12 in tax guide '480' for guidance on how to determine the relevant amount to be treated as earnings.

You do not have to use this form but you may find it a useful way to calculate the cash equivalent for each car made available to a director or an employee for the year 2020 to 2021 (that is 6 April 2020 to 5 April 2021).

A separate form is needed for each car provided to the director or employee during 2020 to 2021.

Read the 'P11D Guide' before you complete this form. It refers to paragraphs in tax guide '480 (2021)'.

We advise you to keep a copy of each completed working sheet as it could help you to deal with enquiries. You do not have to give a copy of the completed working sheet to the director or employee, or HM Revenue and Customs. But you must fill in forms P11D and 'P11D(b) Return of Class 1A National Insurance contributions due' whether or not you use this form to calculate car and car fuel benefits.

The term employee is used to cover both directors and employees throughout the rest of this form.

To avoid completing P11D forms, payroll car and car fuel benefit for future tax years online. For more information, go to www.gov.uk/guidance/paying-your-employees-expenses-and-benefits-through-your-payroll

 / /

Was this the only car made available to the employee? Yes No

If 'No' please make sure that working sheets are completed for each car made available to the employee in 2020 to 2021.

If more than one working sheet 2 is completed for this employee, enter the number of sheets here

1 List price of the car

Complete box A as follows:

- enter the list price of the car as published by its manufacturer, importer or distributor
- if the car had no list price when it was first registered you need to enter the notional price - that is, the price which might reasonably be expected to be its list price on that date if the car's manufacturer, importer or distributor had published a list price for an equivalent car for a single retail sale in the UK
- if the car is a classic car, enter the price that the car might reasonably be expected to fetch if you sold it on the open market on 5 April 2021
- if the car is a classic car and was unavailable to the employee on 5 April 2021 then use the last day in the tax year 2020 to 2021 that it was available to the employee - for this purpose, assume that all the qualifying accessories available on the car are included in the sale

A classic car is one which:

- is at least 15 years old on 5 April 2021
- has a market value of at least £15,000
- has a market value which is higher than the original list or notional price (including accessories)

5 Calculating the appropriate percentage

The appropriate percentage depends on when the car was first registered, the type of fuel used and whether it has an approved CO₂ emissions figure.

Approved CO₂ emissions figure if the car has one

F g/km

Enter the key letter (F, D or A) for the car's fuel or power type from table 1 below.

TABLE 1	
Key letter	Car type
F	Diesel cars which meet Euro 6d standard
D	All other diesel cars
A	All other cars

Next step

For cars registered:

- on or after 1 January 1998 with an approved CO₂ emissions figure, go to section 5a
- on or after 1 January 1998 without an approved CO₂ emissions figure, go to section 5b
- before 1 January 1998, go to section 5c

5a Cars registered on or after 1 January 1998 with an approved CO₂ emissions figure

Approved CO₂ emissions figure in box F, if this exceeds the 2020 to 2021 relevant threshold of 55g/km it should be rounded down to the next lowest 5g/km, for example 128 to 125.

G g/km

Approved zero emission mileage if box G is between 1 to 50 g/km (inclusive). This is the maximum distance in miles, for which the car can be driven in electric mode without recharging the battery.

H miles

Using table 2 below, use the date the car was first registered, the figure in box G (CO₂) and if applicable box H (zero emission mileage) to work out the percentage to enter in box I, use:

for cars registered before 6 April 2020

- column 1 for all cars in fuel type A and F
- column 2 for all cars in fuel type D

for cars registered from 6 April 2020

- column 3 for all cars in fuel type A and F
- column 4 for all cars in fuel type D
