& Industrial Strategy

# Monthly Statistics of Building Materials and Components

February 2021

No. 552

## **Withdrawal of bulletin**

The production team intend to discontinue publication of the PDF bulletin section following this month's release. All data included in the bulletin is also published in Excel and ODS tables.

Consequently, withdrawal of the PDF bulletin will not result in any loss of information in the publication.

Please direct any comments to [materialstat@beis.gov.uk](mailto:materialstat@beis.gov.uk)

## **NOTES**

In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

## **Symbols**

The following standard Government Statistical Service symbols have been used throughout:

Not available	:
Provisional	p
Revised	r
Confidential	c

## **Revisions**

Data can be revised for a number of reasons, including:

- receipt of more data
- methodology changes
- corrections

Changes to published data occur either when BEIS receives either:

- more accurate information
- complete data for a reference period following more detailed validation of source data as planned

Data subject to scheduled revisions are published as provisional, indicated by a 'p' marker. At a later scheduled date, provisional data are finalised and 'p' markers are removed. For scheduled revisions, no 'r' marker is added even if the value has changed. When a value changes due to an unscheduled revision, an 'r' marker is used.

For more information on BEIS' revisions policy, see

<https://www.gov.uk/government/publications/building-materials-statistics-revisions-policy>

National Statistics status means that our statistics meet the highest standards of trustworthiness, quality and public value, and it is our responsibility to maintain compliance with these standards.

These statistics last underwent a full [assessment](#) against the [Code of Practice for Statistics](#) in 2011.

Since the latest review by the Office for Statistics Regulation, we have continued to comply with the Code of Practice for Statistics, and have made the following improvements:

- carried out a public consultation and introduced publication of [seasonally adjusted](#) data on deliveries of sand and gravel, concrete blocks, bricks, and ready-mixed concrete
- in response to the cessation of MHCLG's Annual Minerals Raised Inquiry, which previously supplied the sampling frame for the land-won sand and gravel survey, we have:
  - changed the survey from sample survey to a census, increasing the panel from 200 sites to around 500 sites
  - refreshed the panel of sites annually using information from the British Geological Survey
  - made the survey statutory under the [Statistics of Trade Act 1947](#), bringing it into line with the marine-dredged sand and gravel survey
- improved the design of the [blocks survey](#), making it fully monthly instead of a mixture of monthly and quarterly data collection
- introduced the publication of the tables in an OpenDocument (ODS) spreadsheet, in addition to Microsoft Excel and PDF
- all prices indices series were rebased to 2015 = 100 for the November 2020 release of the publication (published 4<sup>th</sup> December 2020)

Unless otherwise stated, the statistics published in this volume have been collected by the Office for National Statistics on behalf of the Department for Business, Energy and Industrial Strategy.

Lead Statistician: Amy Symes-Thompson

**Notes:**

- Most of these indices, which are compiled by the Office for National Statistics, are a selection of producer price indices. Complete list available online at: <https://www.ons.gov.uk/economy/inflationandpriceindices/datalist?query>. Search for reference MM22.
- The latest release of Tables 2 and 3 incorporates changes in the methodology used to calculate the indices. For more details see; <https://www.ons.gov.uk/economy/inflationandpriceindices/articles/impactofmethodologicalimprovementsonproducerpriceinflation/2020-11-11>
- All series were rebased to 2015 = 100 in the November 2020 release of this publication (published 4th December 2020).
- ONS made the following changes to the indices in the November 2020 release of this publication; EVNU (Gravel, sand, clays & kaolin excluding aggregate levy replaces both KFH7 (Sand & gravel excluding levy) and KFH9 (Crushed rock excluding levy), EVNT (Gravel, Sand, Clays & Kaolin including Aggregate Levy) replaces both KFH8 (Sand & gravel including levy) and KFI2 (Crushed rock including levy), HMRU (Bituminous mixtures based on natural & Artificial stone replaces KNT6 Bituminous materials.

\* The Office for National Statistics state that these Indices are based on relatively few quotes and in the long term should not be relied upon for contractual purposes.

\*\* These index values are considered less reliable mainly due to lack of market coverage.

\*\*\* Index K2WY (Wood, sawn or chipped lengthwise, sliced or peeled, of a thickness > 6mm; railway or tramway sleepers of wood not impregnated) is no longer a live index. Index is retained in Tables 2 and 3 as it may be reinstated in future.

5. A back series of both the previous and replacement indices was published alongside the November 2020 release of this publication, on 4th December 2020.

**Notes:**

1. These indices, which are compiled by the Office for National Statistics, are a selection of producer price indices. The complete list is published monthly by the ONS in the Business Monitor MM22.

2. See notes 2 to 5 in Table 2 for details of rebasing, changes in the methodology used to calculate these indices and changes in the indices included in this table.

4. From May 2014, values for each quarter will no longer be adjusted to ensure that rounded values sum to the total value. Thus, in any given quarter, the sum of all sub-categories of sand and gravel may not exactly match that shown in the total column. Please see the 'Pre-Announcements and Summary of Revisions to Monthly Statistics of Building Materials and Components Publication' document on our website for further details.

<sup>1</sup> Refers to stocks at the end of the period.

<sup>2</sup> Consists of all slate tiles which could be used as roofing tiles.

Note: Response for 2020 are lower than normal due to sites and/or site offices being closed due to Covid-19 restrictions, meaning that the majority of figures required suppression.

**Notes:**

1. Arrangements for publication of the cementitious data have been revised following discussion and agreement by the Mineral Products Association (MPA) Cement members. Data are now provided on an annual basis. For quarterly and monthly data up to September 2013, please refer to earlier editions of this publication.

2. Where the coverage is for Great Britain, the figures for imports & exports are defined accordingly and have been estimated. Cementitious material covers cement itself, fly ash to EN 450 Part 1 where used as part of the cement in concrete (previously known as pulverised fuel ash (pfa) to BS 3892 Part 1) and ground granulated blast furnace slag (ggbs) to EN 15167 Part 1 (previously BS 6699)

Notes:

1. From March 2015, seasonally adjusted figures for deliveries of bricks have been included in this table. In the production of these figures, brick deliveries data back to January 1983 have been seasonally adjusted. This long run data series is available on request.

2. The current unusual circumstances are affecting the seasonal adjustment of deliveries, therefore we will not be publishing revisions as normal until we can carry out further analysis

\* Refers to stocks at end of period.

Notes:

1. From March 2015, seasonally adjusted figures for deliveries of concrete blocks have been included in this table. In the production of these figures, blocks deliveries data back to January 1983 have been seasonally adjusted. This long run data series is available on request.

2. The current unusual circumstances are affecting the seasonal adjustment of deliveries, therefore we will not be publishing revisions as normal until we

out further analysis

\* Refers to stocks at end of period.

Notes: 1. Regions refer to Government Office Regions

2. Concrete blocks in this table have an average depth of 10cm. Dividing the figures in this table by 10 hence gives the amount of concrete blocks in thousands of cubic metres.

\* Refers to stocks at the end of the period.

# In April 2012, the Mineral Products Association (who provide these figures), estimated that data understates UK deliveries by around 20-25%.

Previously, they had estimated that figures understate UK deliveries by 14-18%.

Notes:

1. From March 2015, seasonally adjusted figures for deliveries of ready-mixed concrete have been included in this table. In the production of these figures, ready-mixed concrete deliveries data back to Q1 1983 have been seasonally adjusted. This long run data series is available on request. Data has been
