SECTION A: INSPECTION REPORT SUMMARY

Section 40 & 43

Inspection type:	Statutory National Inspection
System(s) inspected:	Bristol Laboratories Ltd
Site(s) of inspection:	Remote inspection
Main site contact:	
Date(s) of inspection:	09 – 10 & 14 – 15 September 2020 (remote)
Lead Inspector:	Rory Littlebury
Accompanying Inspector(s):	Dominic Nguyen-Van-Tam
Previous inspection date(s):	30 March – 01 April 2016 03 – 05 June 2014 03 – 05 May 2011 03 – 05 June & 06 August 2008 21 – 23 May 2007
Purpose of inspection:	Inspection of pharmacovigilance systems to review compliance with UK and EU requirements.
Name and location of EU QPPV:	
Global PV database (in use at the time of the inspection):	ARISg (v7.4.5.3.1) commercially available.
Key service provider(s):	APCER had been contracted as a pharmacovigilance service provider, including the QPPV.
Inspection finding summary:	1 Major finding
Date of first issue of report to MAH:	21 Oct 2020
Deadline for submission of responses by MAH:	25 Nov 2020
Date(s) of receipt of responses from MAH:	24 Nov 2020
Date of final version of report:	03 Dec 2020
Report author:	Rory Littlebury Senior GPvP Inspector

SECTION B: BACKGROUND AND SCOPE

B.1 Background information

Bristol Laboratories Ltd (hereafter "Bristol Labs") was selected for routine inspection as part of the MHRA's statutory, national pharmacovigilance inspection programme. The purpose of the inspection was to review compliance with currently applicable EU and UK pharmacovigilance regulations and guidelines. In particular, reference was made to Directive 2001/83/EC as amended, Commission Implementing Regulation (EU) No 520/2012 and the adopted good pharmacovigilance practices (GVP) Modules.

A list of reference texts is provided at Appendix I.

Bristol Labs are a global pharmaceutical company, headquartered in Berkhamsted, Hertfordshire, UK. Bristol Labs specialise in the manufacture and supply of generic medicines. The product portfolio contains over 800 licences in the EU, across MAHs Bristol Laboratories, Brillpharma Ltd, Brill Pharma S.L, Brillpharma (Ireland) Ltd and Axcount Generika GmbH. All of the MAHs listed sit under

Pharmacovigilance activities were being performed by contractor, This included provision of the EU-QPPV, case processing activities, literature searching, authoring of aggregate reports and signal management. A full list of activities and responsibilities was available in the

B.2 Scope of the inspection

The inspection included a review of the global pharmacovigilance systems and was performed remotely to the COVID-19 pandemic. Personnel from Bristol Labs and were available through videoconference facilities.

The inspection was performed using interviews and document review. The systems reviewed during the inspection are highlighted in the Pharmacovigilance Inspection Plan (attached as Appendix III).

Areas not included within the inspection plan were not reviewed in detail and it is recommended that these areas are subject to closer review during a subsequent pharmacovigilance inspection.

B.3 Documents submitted prior to the inspection

The company submitted a updated 17 August 2020) to assist with inspection planning and preparation. Specific additional documents were also requested by the inspection team and provided by the company prior to the inspection.

B.4 Conduct of the inspection

In general, the inspection was performed in accordance with the Inspection Plan. Amendments to the initially agreed plan appear in red text in Appendix III.

Pharmacovigilance Systems Inspection of Bristol Laboratories Ltd MHRA Reference No: Insp GPvP 17907/29140-0021

A closing meeting was held remotely to review the inspection findings on Tuesday 15th September 2020.

A list of the personnel who attended the closing meeting is contained in the Closing Meeting Attendance Record, which will be archived together with the inspection notes, a list of the documents requested during the inspection and the inspection report.

SECTION C: INSPECTION FINDINGS

C.1 Summary of significant changes and action taken since the last inspection

Since the previous inspection in 2016 the company had made the following changes to the pharmacovigilance system:

 Bristol Labs had acquired Brill Pharma SL En. At the time of the inspection the pharmacovigilance system was being integrated into Bristol Labs' pharmacovigilance system.

C.2 Definitions of inspection finding gradings

Critical (CR): a deficiency in pharmacovigilance systems, practices or processes that adversely affects the rights, safety or well-being of patients or that poses a potential risk to public health or that represents a serious violation of applicable legislation and guidelines.

Major (MA): a deficiency in pharmacovigilance systems, practices or processes that could potentially adversely affect the rights, safety or well-being of patients or that could potentially pose a risk to public health or that represents a violation of applicable legislation and guidelines.

Minor (MI): a deficiency in pharmacovigilance systems, practices or processes that would not be expected to adversely affect the rights, safety or well-being of patients.

Comment: the observations might lead to suggestions on how to improve quality or reduce the potential for a deviation to occur in the future.

The factual matter contained in the Inspection Report relates only to those things that the inspection team saw and heard during the inspection process. The inspection report is not to be taken as implying a satisfactory state of affairs in documentation, premises, equipment, personnel or procedures not examined during the inspection.

Findings from any inspection which are graded as critical or major will be shared with the EMA, other EU competent authorities and the European Commission.

C.3 Guidance for responding to inspection findings

Responses to inspection findings should be clear, concise and include proposed actions to address both the identified deficiency and the root cause of the deficiency. Consideration should also be given to identifying and preventing other potential similar deficiencies within the pharmacovigilance system.

Responses should be entered directly into the table(s) in section C.4. The following text is intended as guidance when considering the information that should be entered into each of the fields within the table(s). 'Not applicable' should be entered into the relevant field if the requested information is not appropriate for the finding in question.

Root Cause Analysis

Identify the root cause(s) which, if adequately addressed, will prevent recurrence of the deficiency. There may be more than one root cause for any given deficiency.

Further Assessment

Assess the extent to which the deficiency exists within the pharmacovigilance system and what impact it may have for all products. Where applicable, describe what further assessment has been performed or may be required to fully evaluate the impact of the deficiency e.g. retrospective analysis of data may be required to fully assess the impact.

Corrective Action(s)

Detail the action(s) taken / proposed to correct the identified deficiency.

Preventative Action(s)

Detail the action(s) taken / proposed to eliminate the root cause of the deficiency, in order to prevent recurrence. Action(s) to identify and prevent other potential similar deficiencies should also be considered.

Deliverable(s)

Detail the specific <u>outputs</u> from the proposed / completed corrective and preventative action(s). For example, updated procedure/work instruction, record of re-training, IT solution.

Due Date(s)

Specify the actual / proposed date(s) for completion of each action. Indicate when an action is completed.

Further information relating to inspection responses can be found under 'Inspection outcomes' at: https://www.gov.uk/guidance/good-pharmacovigilance-practice-gpvp

C.4 Inspection findings

C.4.1 Critical findings

No critical findings were identified from the review of pharmacovigilance processes, procedures and documents performed during this inspection.

C.4.2 Major findings

MA.1 Reference Safety Information

Requirements:

Directive 2001/83/EC (as amended) Paragraph 40

'The provisions governing the information supplied to users should provide a high degree of consumer protection, in order that medicinal products may be used correctly on the basis of full and comprehensible information.'

Article 23(3) "The marketing authorisation holder shall ensure that the product information is kept up to date with the current scientific knowledge, including the conclusions of the assessment and recommendations made public by means of the European medicines webportal established in accordance with Article 26 of Regulation (EC) No 726/2004."

The Human Medicines Regulations 2012 (Statutory Instrument 2012 No. 1916), Part 5 Pharmacovigilance, Regulation 76(1)

'The holder of a UK marketing authorisation or parallel import licence for a medicinal product must ensure that the product information relating to the product is kept up to date with current scientific knowledge'

Section 43

Finding MA.1 a)

There were examples identified of superseded PILs being released into the market over six months since the approval of a new PIL.

Variations for licences

were approved by the MHRA on the 11 March 2019, these variations were to align Bristol's product information with the innovator. Changes impacted sections 4.2, 4.4, 4.6, 4.7, 4.8, 4.9, 5.1 and 5.3 of the SmPC. There were consequential changes to the PIL limited to removal of repeated information, rewording of safety concerns already present in the PIL and some additional wording regarding the prescribing of the product.

The six-month deadline for the introduction of changes to the PIL described above was September 2019.

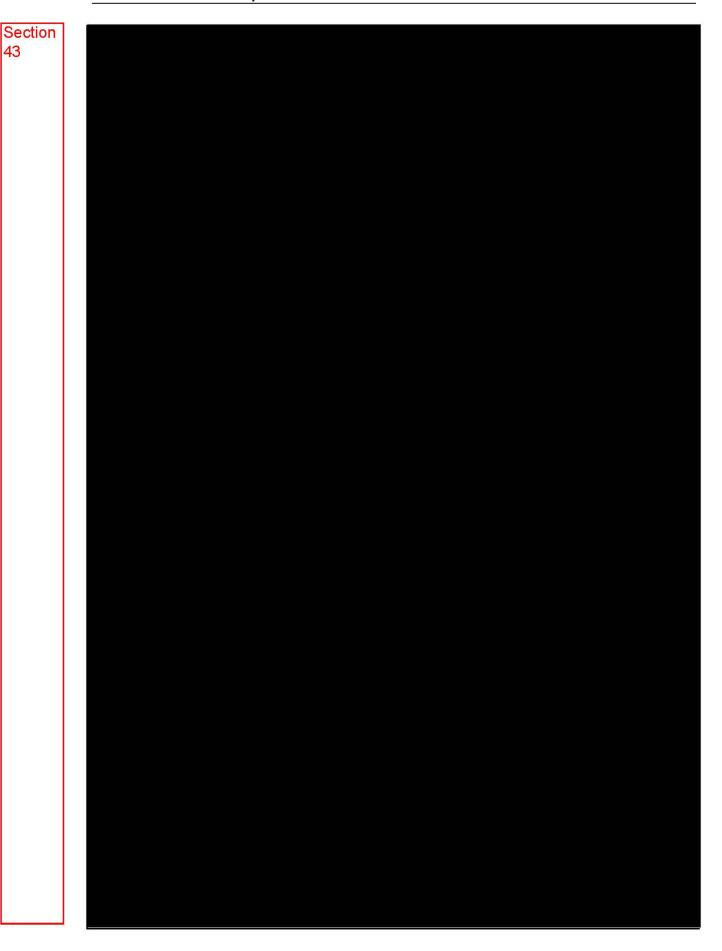

Batches were QP-certified for release on the 20 January 2020 with a previous version of the PIL, four months after the sixmonth deadline.

Bristol Labs had identified these batches and several others for

Se	ct	io	n
43			

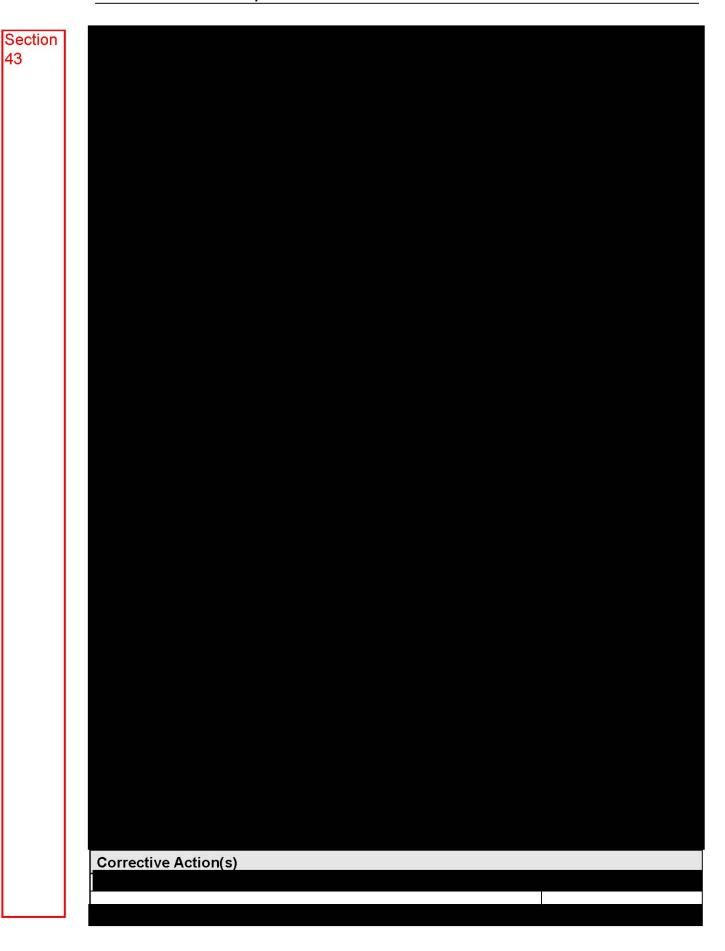

in preparation for the inspection. Deviation record had been raised on the 31 August 2020 covering the concerned batches. The accompanying investigation indicated no substantial safety information had been missing from superseded PILs which had been released. Bristol Labs were instructed to contact DMRC at the end of the inspection with details of the batches which had been released with out of date PILs. This action was completed on the 16 September 2020. **Root Cause Analysis**

SECTION D: CONCLUSIONS AND RECOMMENDATIONS

D.1 Conclusions

The factual matter contained in the Inspection Report relates only to those things that the inspection team saw and heard during the inspection process. The Inspection Report is not to be taken as implying a satisfactory state of affairs in documentation, premises, equipment, personnel or procedures not examined during the inspection. It is recommended that you review whether the inspection findings also apply to areas not examined during the inspection and take appropriate action, as necessary.

The responses to the inspection findings, which include proposed corrective and preventative actions, do appear to adequately address the issues identified. No additional responses are required at this time. When the company has adequately implemented the proposed corrective and preventative actions, the pharmacovigilance system will be considered to be in general compliance with applicable legislation.

D.2 Recommendations

The Lead Inspector has recommended that the next MHRA inspection is performed as part of the routine risk-based national inspection programme.

APPENDIX I REFERENCE TEXTS

- Directive 2001/83/EC, as amended.
- Commission Implementing Regulation (EU) No 520/2012.
- Guideline on good pharmacovigilance practices (GVP).
- The Human Medicines Regulations 2012 (Statutory Instrument 2012 No. 1916).

APPENDIX III PHARMACOVIGILANCE INSPECTION PLAN

MHRA INSPECTION NUMBER	TBC	INSPECTION TEAM	Rory Littlebury (lead inspector) Dominic Nguyen-Van-Tam
PHARMACOVIGILANCE INSPECTION OF	Bristol Laboratories	DATES	09 - 10 August 2020 14 - 16 September 2020
LOCATION	Remote inspection	START TIME	09:00 on all days

Inspection plan (N.B. the plan may be subject to change in the lead-up to, or during, the inspection)

The scope of the inspection will include the following topics:

- Reference Safety Information
 - o To include signal detection, validation, evaluation and tracking
- Additional Risk Minimisation Measures (aRMMs), including Post-authorisation Safety Studies
 - o Management, oversight and implementation of UK educational materials
 - Management and oversight of Post-authorisation Safety Studies
- Periodic Safety Update Reports
 - Scheduling, accuracy and submission of reports

Wednesday 09 September 2020 - Thursday 10 September 2020 (Days 1 - 2):

An opening meeting will be held by videoconference on Wednesday 09 September at 9.00am (BST), which will be led by the lead inspector. The agenda will be as follows:

- Review of the scope and arrangements for the inspection
- Company presentation by Bristol Labs to provide an overview of the company, pharmacovigilance system and quality system. The presentation should last no longer than 20 minutes.

The remainder of the inspection will consist of remote document review, written requests and ad hoc video/telephone clarifications with subject matter experts as required. Please provide a designated contact point who can assist with any ad hoc questions from the inspectors or arrange calls between inspectors and subject matter experts if required.

Monday 14 September 2020 – Wednesday 16 September 2020 (Days 3 – 5) (Inspection did not extend into Wednesday 16 September)

Remote document review, written requests and ad hoc queries from inspectors where necessary.

A closing meeting will be held via videoconference on Wednesday 16 September (timing to be confirmed) during which feedback on the inspection will be provided to the company. The closing meeting was held on Tuesday 15th September.

Bristol Laboratories are requested to complete the below with the names and job titles of the designated contact point and those staff who will be dialling in to the opening meeting.

Designated contact point:
