

30 March 2021

Year: 2021 Week: 12

## In This Issue:

- Key messages.
- Diagnostic indicators at a glance.
- Weekly report statistics.
- Total attendances.
- Respiratory.
- Gastrointestinal.
- Cardiac.
- Notes and caveats.
- Acknowledgements.

## Key messages

Data to: 28 March 2021

COVID-19-like emergency department attendances continued to decrease during week 12 (figure 3). Acute respiratory infection attendances increased during week 12, notably in children under 15 years of age (figures 5 & 5a). Bronchiolitis attendances also increased in children aged <1 and 1-4 years (figure 6a).

**Note: during the COVID-19 pandemic, patients with COVID-19 symptoms are generally advised to initially access a COVID-19 test through the national COVID-19 testing programme. This is likely to result in lower numbers of patients accessing health advice as monitored through syndromic surveillance systems. Syndromic data should therefore be interpreted with some caution and in the context of other COVID-19 monitoring data sources.**

Please see [notes and caveats](#) for information about the ED syndromic indicators including important caveats around the interpretation.

A Cold Watch System operates in England from 1 November to 31 March each year. As part of the Public Health England Cold Weather Plan for England the PHE Real-time Syndromic Surveillance Team will be monitoring the impact of cold weather on syndromic surveillance data during this period.  
Cold weather alert level (current reporting week): **Level 1 - Winter preparedness**

## Diagnostic indicators at a glance:

Further details on the syndromic indicators reported can be found on page 10.

Indicator	Current trend	Level
COVID-19-like	decreasing	-
Respiratory	increasing	below baseline
Acute Respiratory Infection	increasing	below baseline
Bronchiolitis	increasing	below baseline
Influenza-like Illness	no trend	below baseline
Pneumonia	decreasing	below baseline
Asthma	increasing	below baseline
Gastrointestinal	no trend	below baseline
Gastroenteritis	no trend	below baseline
Cardiac	no trend	above baseline
Myocardial Ischaemia	no trend	similar to baseline
Alcohol intoxication	no trend	below baseline

## EDSSS weekly report statistics

Only Type 1 EDs meeting the weekly reporting criteria are included (see page 10 for details).

\*max EDs included across full time period reported in charts, individual days may include fewer EDs.

Date	Total Attendances	Diagnoses Coded Number	Diagnoses Coded %	Type 1 EDs Included
22/03/2021	27,373	19,850	72.5%	110
23/03/2021	25,072	18,349	73.2%	110
24/03/2021	25,245	18,202	72.1%	110
25/03/2021	25,238	18,477	73.2%	110
26/03/2021	23,725	17,554	74.0%	110
27/03/2021	22,378	16,625	74.3%	110
28/03/2021	21,334	15,829	74.2%	110
<b>Total</b>	<b>170,365</b>	<b>124,886</b>	<b>73.3%</b>	<b>(max)* 110</b>

**1: Total attendances.**

Daily number of total attendances recorded, across the EDSSS network.

(see page 6 for ED inclusion criteria).

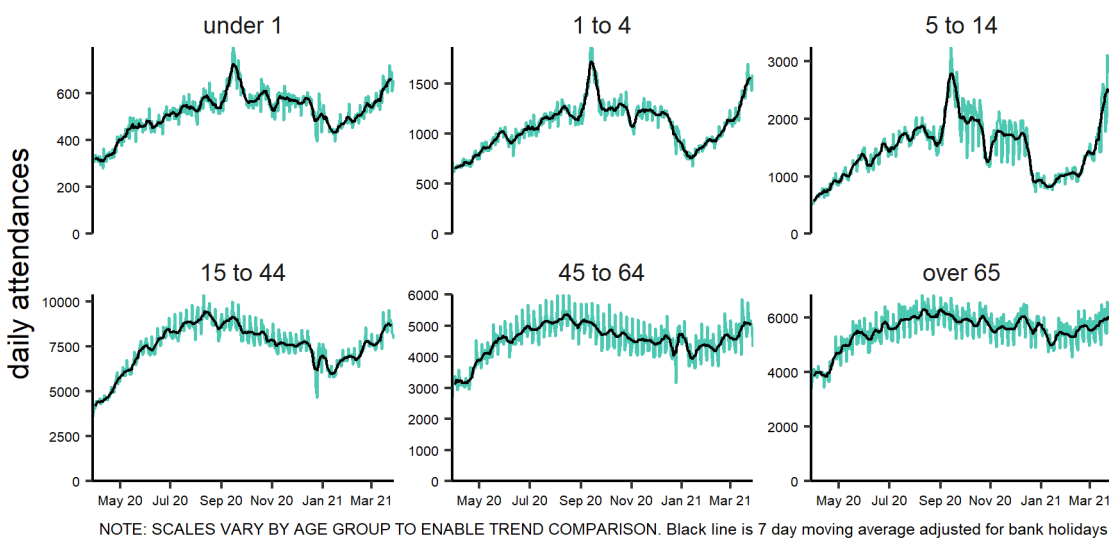

Total attendances 29/03/2020 - 28/03/2021

**2a: Daily attendances by age: numbers.**

Daily number and 7-day moving average of total attendances, by age group.

total attendances by age group (years) 29/03/2020 - 28/03/2021

**2b: Daily attendances by gender: numbers**

Daily number of total attendances by gender, recorded across the EDSSS network (shown as a 7-day moving average). Please note: indeterminate gender is not shown due to small numbers

**3: COVID-19-like.**

Daily number of attendances recorded as COVID-19-like attendances across the EDSSS network.

**3a: COVID-19-like by age group.**

Daily number and 7 day moving average of COVID-19-like attendances within each age group.

**3b: COVID-19-like by PHE Centre**

Daily attendances and 7 day moving average of COVID-19-like attendances within each PHE Centre (with the maximum number of EDs included in each time series).

Please see ['notes and caveats'](#) for information on how EDs are selected for inclusion each week.

**4: Respiratory.**

Daily number of attendances recorded as respiratory attendances across the EDSSS network.

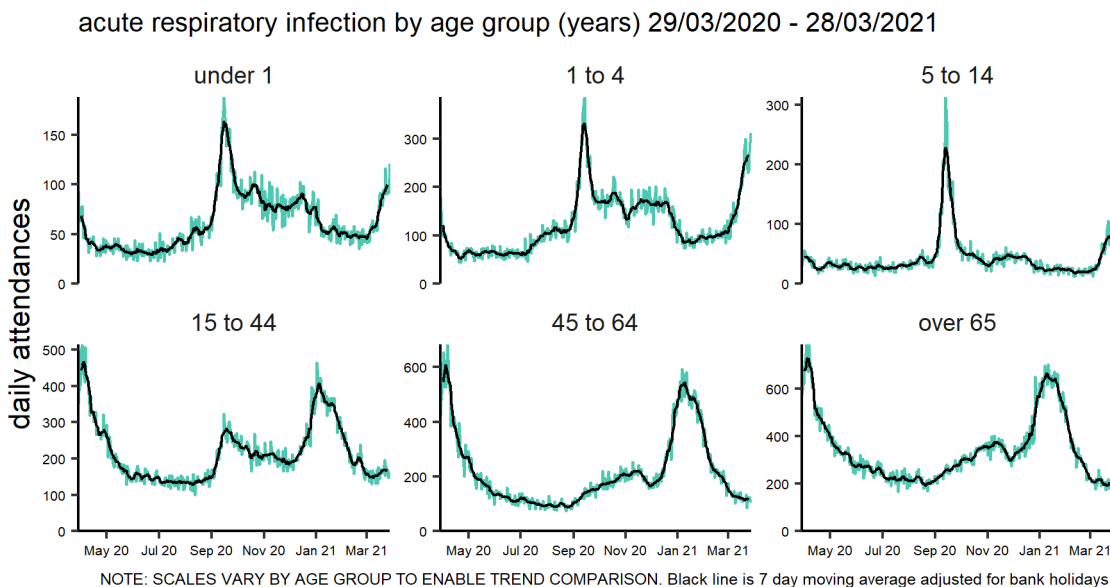

**5: Acute Respiratory Infection.**

Daily number of all attendances recorded as acute respiratory infection attendances across the EDSSS network.

**5a: Acute Respiratory Infection by age group.**

7 day moving average of ARI attendances within each age group.

**6: Bronchiolitis/bronchitis.**

Daily number of attendances recorded as bronchiolitis/ acute bronchitis attendances across the EDSSS network.

**6a: Bronchiolitis/bronchitis by age group**

7 day moving average of bronchiolitis/ bronchitis attendances within each age group.

**7: Influenza-like illness.**

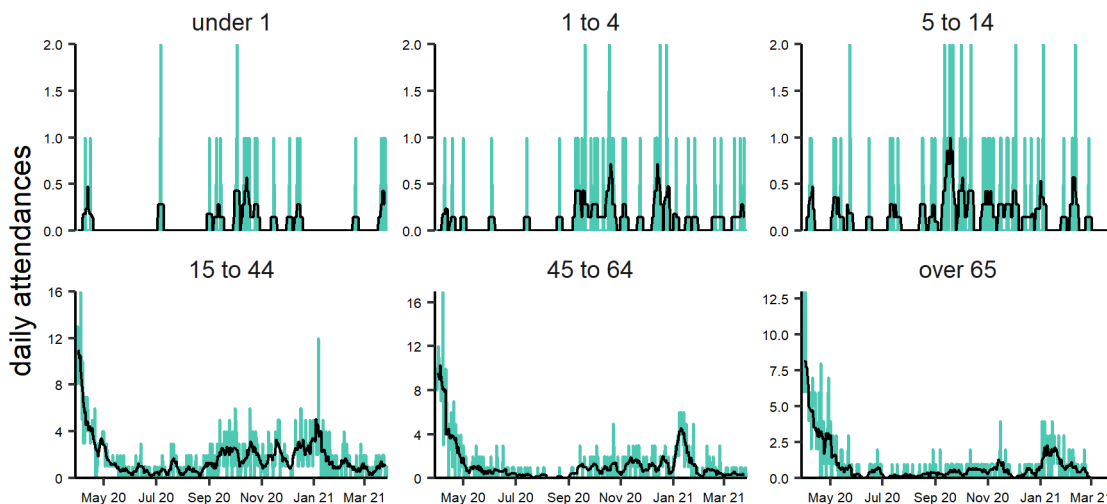

Daily number of attendances recorded as influenza-like illness attendances across the EDSSS network.

**7a: Influenza-like illness by age group**

7 day moving average of ILI attendances within each age group.

influenza-like illness by age group (years) 29/03/2020 - 28/03/2021

NOTE: SCALES VARY BY AGE GROUP TO ENABLE TREND COMPARISON. Black line is 7 day moving average adjusted for bank holidays.

**8: Pneumonia.**

Daily number of attendances recorded as pneumonia attendances across the EDSSS network.

pneumonia 29/03/2020 - 28/03/2021

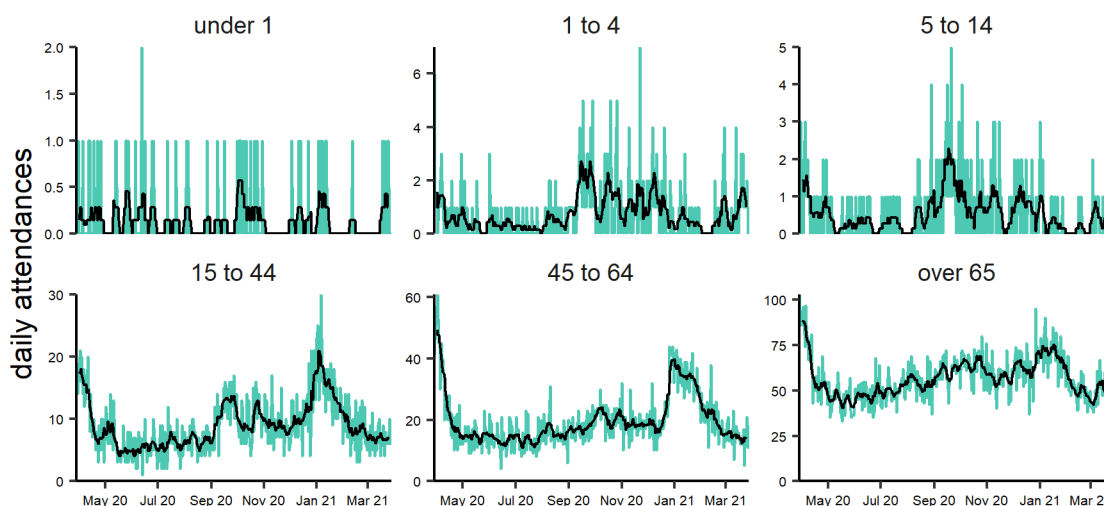

Black line is 7 day moving average adjusted for bank holidays, dotted line is baseline. Grey columns show weekends and bank holidays.

**8a: Pneumonia by age group.**

7 day moving average of pneumonia attendances within each age group.

pneumonia by age group (years) 29/03/2020 - 28/03/2021

NOTE: SCALES VARY BY AGE GROUP TO ENABLE TREND COMPARISON. Black line is 7 day moving average adjusted for bank holidays.

**9: Asthma.**

Daily number of attendances recorded as asthma/wheeze/difficulty breathing attendances across the EDSSS network.

**9a: Asthma by age group.**

7 day moving average of asthma attendances within each age group.

Intentionally left blank

**10: Gastrointestinal.**

Daily number of attendances recorded as gastrointestinal across the EDSSS network.

gastrointestinal conditions 29/03/2020 - 28/03/2021

**11: Gastroenteritis**

Daily number of attendances recorded as gastroenteritis across the EDSSS network.

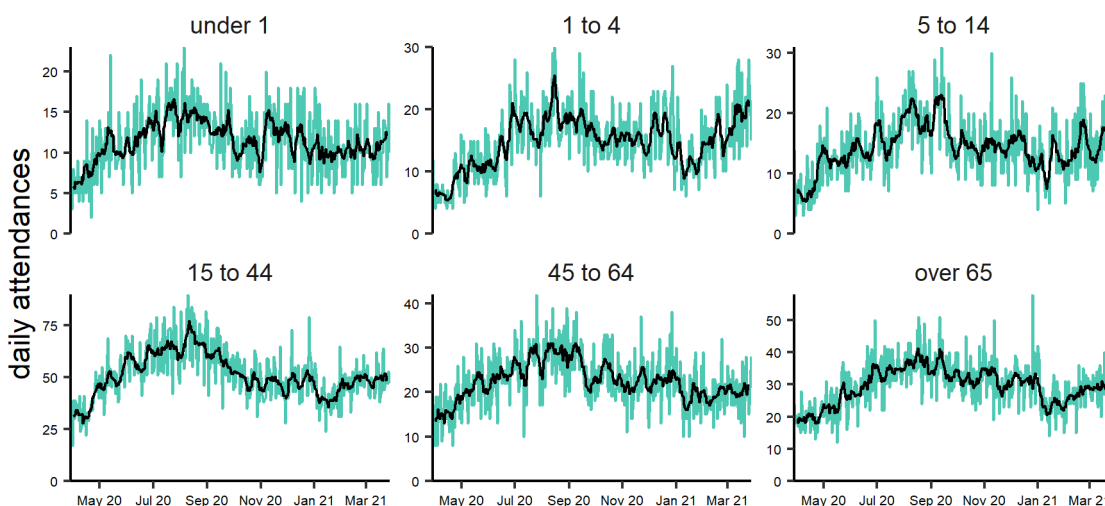

gastroenteritis 29/03/2020 - 28/03/2021

**11a: Gastroenteritis by age group.**

7 day moving average of gastroenteritis attendances within each age group.

gastroenteritis by age group (years) 29/03/2020 - 28/03/2021

NOTE: SCALES VARY BY AGE GROUP TO ENABLE TREND COMPARISON. Black line is 7 day moving average adjusted for bank holidays.

**12: Cardiac.**

Daily number of attendances recorded as cardiac attendances across the EDSSS network.

cardiac conditions 29/03/2020 - 28/03/2021

**13: Myocardial Ischaemia.**

Daily number of attendances recorded as myocardial ischaemia attendances across the EDSSS network.

myocardial ischaemia 29/03/2020 - 28/03/2021

**14. Acute alcohol intoxication**

Daily number of attendances recorded as acute alcohol intoxication attendances across the EDSSS network.

acute alcohol intoxication 29/03/2020 - 28/03/2021

**Notes and caveats:**

- ▶ **National EDSSS** began operating in April 2018. Following the introduction of the Emergency Care Data Set (ECDS) the: <https://www.england.nhs.uk/ourwork/tsd/ec-data-set/>
- ▶ EDSSS receives an automated daily transfer of anonymised ED data from NHS Digital
- ▶ **Not all EDs currently provide data through ECDS on a daily basis**
- ▶ EDs are eligible for inclusion in this report only where the EDSSS reporting criteria have been met during the surveillance week reported:
  - Data relates to attendances at a type 1 ED
  - Data for 7 of the 7 most recent days was received by PHE
  - Data for those days was received within 2 calendar days of the patient arrival
- ▶ Where an ED meets these criteria, all data received from that ED previous to the current surveillance week is included. EDs eligible for inclusion is likely to change each week, which will in turn affect the historical data inclusion
- ▶ Individual EDs will not be identified in syndromic surveillance reporting in these bulletins
- ▶ **All EDs report diagnoses to EDSSS using SnomedCT codes**
- ▶ Not all diagnoses are confirmed
- ▶ The syndromic indicators presented in this bulletin are based on the **primary diagnosis of each attendance** as reported by EDs using SnomedCT codes:
  - Respiratory:** All respiratory diseases and conditions (infectious and non infectious).
  - Asthma:** As indicated by title.
  - Acute Respiratory Infections (ARI):** All acute infectious respiratory diseases.
  - Bronchiolitis/ bronchitis:** As indicated by title (excluding 'chronic').
  - Influenza-like Illness (ILI):** As indicated by title.
  - Pneumonia:** As indicated by title.
  - COVID-19-like:** Coronavirus\* or Severe Acute Respiratory Syndrome (SARS).
  - \*Please note: not all EDs have reported a coronavirus diagnosis code.
  - Gastrointestinal:** All gastrointestinal diseases and conditions (infectious and non infectious).
  - Gastroenteritis:** All infectious gastrointestinal diseases.
  - Cardiac:** All cardiac conditions.
  - Myocardial Ischaemia:** All ischaemic heart disease.
  - Acute alcohol intoxication:** As indicated by title (excluding 'chronic')
- ▶ **EDSSS indicators are likely to be an underestimation of number attendances as they are based on primary diagnosis only.**
- ▶ **The EDSSS should therefore be used to monitor trends in ED attendances and not numbers of 'cases'.**
- ▶ Baselines: Last refreshed: 1 February 2021
  - Represent seasonally expected levels of activity
  - Constructed from historical data, taking into account:
    - change from sentinel to National EDSSS
    - coverage (numbers of attendances and the individual type 1 EDs included)**
  - Gastroenteritis baseline accounts for rotavirus vaccine introduction (July 2013)
  - Exclude data from 2020 due to the impact of the COVID-19 pandemic on ED services and patient healthcare seeking behaviour
- ▶ **Sentinel EDSSS** ran from July 2010 to March 2018, collected data through a bespoke, voluntary network of EDs across England and Northern Ireland:  
<https://www.gov.uk/government/collections/syndromic-surveillance-systems-and-analyses>

**Acknowledgements:**

We are grateful to the clinicians in each ED and other staff within each Trust for their continued involvement in the EDSSS.

We thank the Royal College of Emergency Medicine, NHS Digital and NHS England for their support in the development of national EDSSS, using anonymised data collection from ECDS.
