## Data from the 31 March 2021 to 23 April 2021

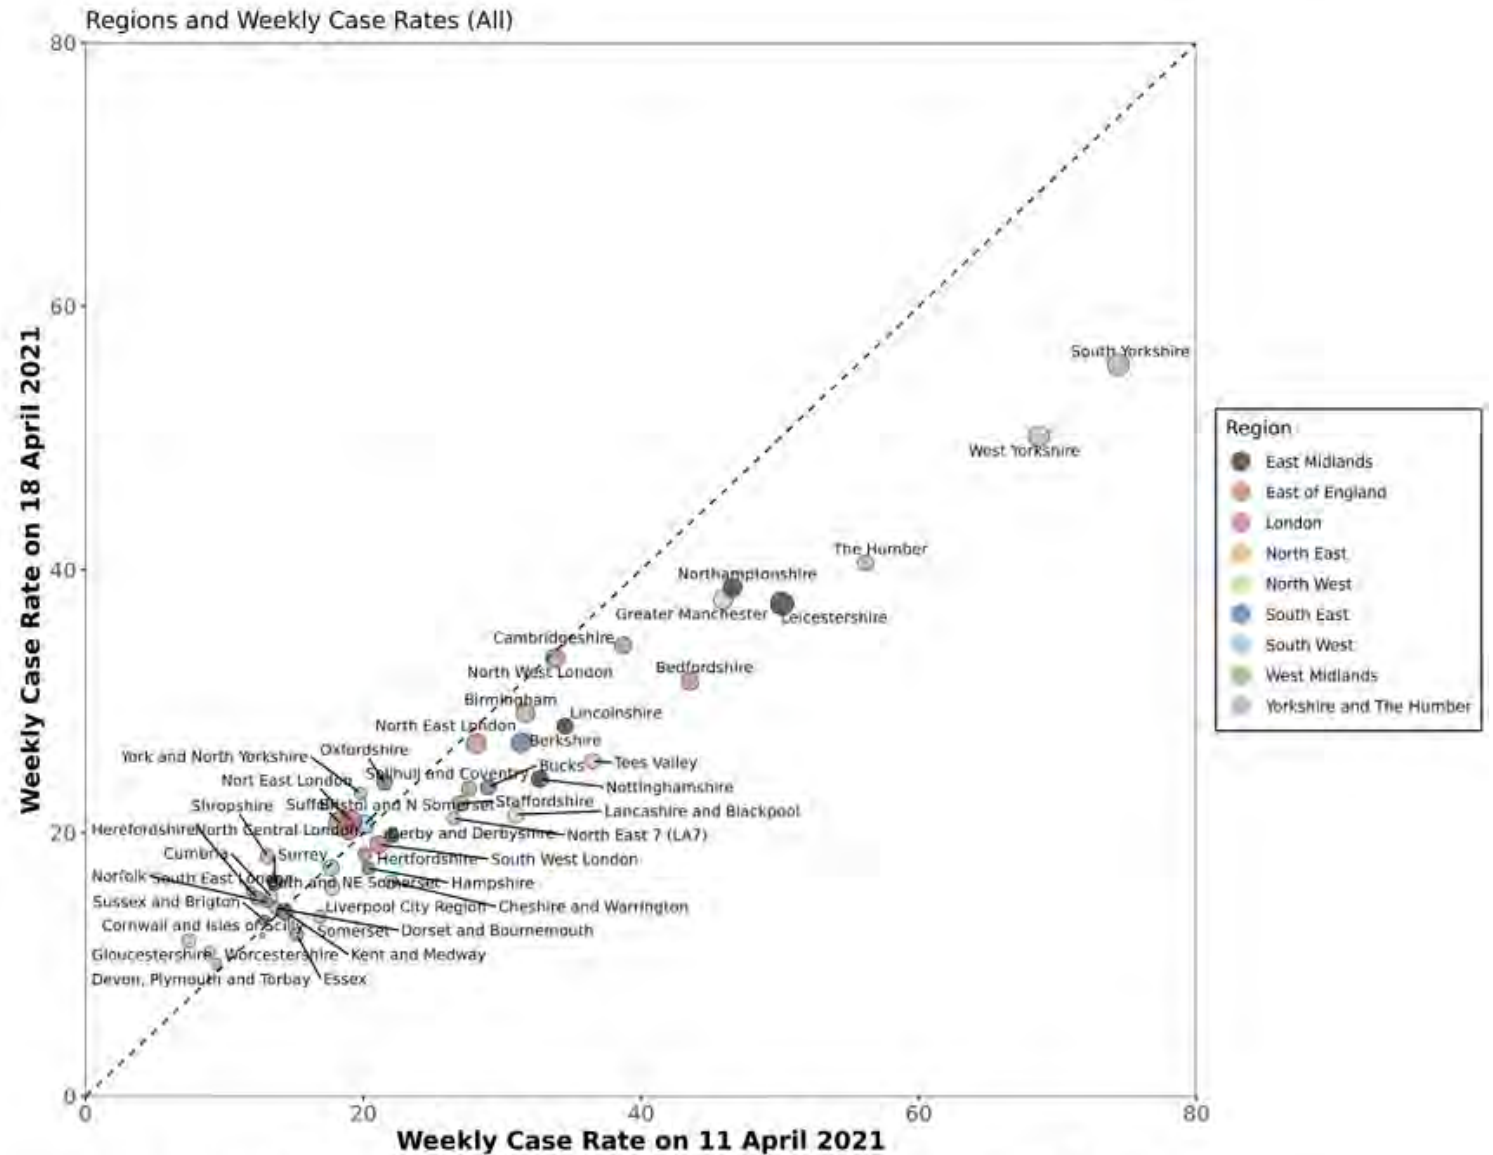

Red dotted line denotes when "Step 2 of COVID roadmap" came into effect - 12th of April

**Note:** Due to the decrease in case rates the range has been changed to now show 500+ cases/100,000 as the top scale point rather than 800+ cases /100,000

# Weekly case rates by area (18 April vs 11 April comparison)

- The chart shows weekly case rates by area as on 18 April 2021 compared to weekly case rates by area as on 11 April.
- The vertical axis plots the most recent weekly case rate per 100k people (up to the 18 April), and the horizontal axis plots the equivalent case rate from the week before. The higher the bubble, the worse the current case rate picture.
- The size of each bubble is proportional to the most recent case rate per 100k people in those aged over 60 years.
- The colour of each bubble indicates which region the area is in.

Sources: Data from Public Health England, Outbreak Surveillance Team. Weekly case rate is defined as the number of cases per 100,000 reported in the seven day period preceding the stated date. Some names have been shortened for legibility.

Daily average individuals tested per 100,000

Due to the reporting delays for comparison between Local Authorities the most recent 4 days are excluded from the calculations of rates and moving averages. Data for specimens taken/outbreaks reported is between April 15 2021 and April 21 2021 (7 day) and the change with the previous 7-day period demonstrate how figures compare to the equivalent figure as of April 14 2021.
