

Notice of variation and consolidation with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

Woolley Bros. (Wholesale Meats) Limited

Rother Valley Abattoir
Rother Valley Way
Holbrook
Sheffield
South Yorkshire
S20 3RW

Variation application number

EPR/RP3935FH/V002

Permit number

EPR/RP3935FH

Rother Valley Abattoir

Permit number EPR/RP3935FH

Introductory note

This introductory note does not form a part of the notice

Under the Environmental Permitting (England & Wales) Regulations 2016 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made. All the conditions of the permit have been varied and are subject to the right of appeal.

As a result of an expansion in business, this variation authorises the following changes on site:

- An amendment to the installation boundary to accommodate an extension to the Northern part of the existing abattoir building;
- The extension will increase capacity for chilling, cutting, preparing, and dispatching of meat products;
- Addition of a new Schedule 1 Activity: Section 6.8 A(1)(d)(i) Treatment and processing, other than exclusively packaging, of animal raw materials (other than milk only), whether previously processed or unprocessed, intended for the production of food or feed (where the weight of the finished product excludes packaging) with a finished product production capacity greater than 75 tonnes per day;
- Addition of a new Emission Point (S2) for the discharge of clean roof rainwater runoff and storm overflow from the office and staff car parks.
- Additional refrigeration will be installed on site as part of the development.

No other changes to the permit have been made as a result of this variation.

The Introductory Note from the original permit notice has been reproduced, with relevant amendments, below:

The site is operated by Woolley Bros. (Wholesale Meats) Limited and is situated on Rother Valley Way, Holbrook, Sheffield on a light industrial estate. There are other industrial units directly to the north and south of the site and a railway line to the east.

The main activity that is undertaken at the site is the slaughtering of cattle. On delivery, cattle are held in the lairage prior to slaughter. They are stunned and then bled. The blood is collected and stored in a dedicated storage tank for removal off-site. The body cavity contents, hide, head and hoofs are removed. Animal by-product materials are sent off-site for rendering or to defined animal by-product markets. Hides are collected by a skin and hide merchant.

Once ready the cattle carcasses are trimmed in the slaughter house, before going to the cutting plant. Operatives will then work in process lines to cut, trim and portion the meat as per customers' requirements before it is packaged and stored in the chillers / blast freezers prior to dispatch.

Any fat collected from deboning and cutting is packaged for sale as edible fat where possible, or as an alternative, removed offsite to defined animal by-product markets. The edible offals are packed into vacuum packs for sale and dispatch. All other trimmings from the cutting process will be transferred to suitable containers prior to transfer off site for further processing.

The operational areas of the site are fully concreted, with all process effluent from the installation passing through the effluent treatment plant which screens the effluent before it is discharged to sewer. The Operator has a trade effluent consent from Yorkshire Water.

Emissions to air from the Installation consist of combustion gases from a small boiler, which is a gas fired steam boiler, with an output capacity of 600kW.

The installation is not within the relevant screening distance of European or SSSI habitat sites, however it is within 2km of a number of local wildlife sites, ancient woodland and protected species. The potential impact of the Installation on these sites has been assessed and there is no likely significant effect on these sites.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	Date	Comments
Application received EPR/RP3935FH/A001	Duly made 27/09/2011	Installation application
Additional information received	Emails received dated 19/03/2012, 16/03/2012, 27/03/2012 and 30/03/2012	In response to emails dated 15/03/2012, 26/03/2012 and 30/03/2012 requesting additional information
Permit determined EPR/RP3935FH/A001	20/04/2021	
Application EPR/RP3935FH/V002 (variation and consolidation)	Duly made 06/01/2021	Application to add a listed scheduled activity; increase the site boundary and add emission point to sewer; permit updated to modern conditions
Additional information received	07/04/2021	Updated site drainage plan
Variation determined EPR/RP3935FH Billing ref: RP3904BB	25/05/2021	Varied permit issued

End of introductory note

Notice of variation and consolidation

The Environmental Permitting (England and Wales) Regulations 2016

The Environment Agency in exercise of its powers under regulation 20 of the Environmental Permitting (England and Wales) Regulations 2016 varies

Permit number

EPR/RP3935FH

Issued to

Woolley Bros. (Wholesale Meats) Limited (“the operator”)

whose registered office is

Rother Valley Way

Holbrook

Sheffield

South Yorkshire

S20 3RW

company registration number 1416010.

to operate a regulated facility at

Rother Valley Abattoir

Rother Valley Way

Holbrook

Sheffield

South Yorkshire

S20 3RW

to the extent set out in the schedules.

The notice shall take effect from 25/05/2021.

Name	Date
Samantha Haddock	25/05/2021

Authorised on behalf of the Environment Agency

Schedule 1

All conditions have been varied by the consolidated permit as a result of the application made by the operator.

Schedule 2 – consolidated permit

Consolidated permit issued as a separate document.

Permit

The Environmental Permitting (England and Wales) Regulations 2016

Permit number

EPR/RP3935FH

This is the consolidated permit referred to in the variation and consolidation notice for application EPR/RP3935FH/V002 authorising,

Woolley Bros. (Wholesale Meats) Limited (“the operator”),

whose registered office is

Rother Valley Way

Holbrook

Sheffield

South Yorkshire

S20 3RW

company registration number 1416010.

to operate an installation at

Rother Valley Abattoir

Rother Valley Way

Holbrook

Sheffield

South Yorkshire

S20 3RW

to the extent authorised by and subject to the conditions of this permit.

Name	Date
Samantha Haddock	25/05/2021

Authorised on behalf of the Environment Agency

Conditions

1 Management

1.1 General management

- 1.1.1 The operator shall manage and operate the activities:
- (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and
 - (b) using sufficient competent persons and resources.
- 1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.
- 1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of it kept at or near the place where those duties are carried out.

1.2 Energy efficiency

- 1.2.1 The operator shall:
- (a) take appropriate measures to ensure that energy is used efficiently in the activities;
 - (b) review and record at least every four years whether there are suitable opportunities to improve the energy efficiency of the activities; and
 - (c) take any further appropriate measures identified by a review.

1.3 Efficient use of raw materials

- 1.3.1 The operator shall:
- (a) take appropriate measures to ensure that raw materials and water are used efficiently in the activities;
 - (b) maintain records of raw materials and water used in the activities;
 - (c) review and record at least every four years whether there are suitable alternative materials that could reduce environmental impact or opportunities to improve the efficiency of raw material and water use; and
 - (d) take any further appropriate measures identified by a review.

1.4 Avoidance, recovery and disposal of wastes produced by the activities

- 1.4.1 The operator shall take appropriate measures to ensure that:
- (a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities; and
 - (b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and
 - (c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.

- 1.4.2 The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

2 Operations

2.1 Permitted activities

- 2.1.1 The operator is only authorised to carry out the activities specified in schedule 1 table S1.1 (the “activities”).

2.2 The site

- 2.2.1 The activities shall not extend beyond the site, being the land shown edged in green on the site plan at schedule 7 to this permit.

2.3 Operating techniques

- 2.3.1 The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by the Environment Agency.
- 2.3.2 If notified by the Environment Agency that the activities are giving rise to pollution, the operator shall submit to the Environment Agency for approval within the period specified, a revision of any plan or other documentation (“plan”) specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by the Environment Agency.
- 2.3.3 Any raw materials or fuels listed in schedule 2 table S2.1 shall conform to the specifications set out in that table.
- 2.3.4 The operator shall ensure that where waste produced by the activities is sent to a relevant waste operation, that operation is provided with the following information, prior to the receipt of the waste:
- (a) the nature of the process producing the waste;
 - (b) the composition of the waste;
 - (c) the handling requirements of the waste;
 - (d) the hazardous property associated with the waste, if applicable; and
 - (e) the waste code of the waste.
- 2.3.5 The operator shall ensure that where waste produced by the activities is sent to a landfill site, it meets the waste acceptance criteria for that landfill.

2.4 Improvement programme

- 2.4.1 The operator shall complete the improvements specified in schedule 1 table S1.3 by the date specified in that table unless otherwise agreed in writing by the Environment Agency.
- 2.4.2 Except in the case of an improvement which consists only of a submission to the Environment Agency, the operator shall notify the Environment Agency within 14 days of completion of each improvement.

3 Emissions and monitoring

3.1 Emissions to water, air or land

- 3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points listed in schedule 3 tables S3.1 and S3.2.
- 3.1.2 The limits given in schedule 3 shall not be exceeded.
- 3.1.3 Periodic monitoring shall be carried out at least once every 5 years for groundwater and 10 years for soil, unless such monitoring is based on a systematic appraisal of the risk of contamination.

3.2 Emissions of substances not controlled by emission limits

- 3.2.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.
- 3.2.2 The operator shall:
 - (a) if notified by the Environment Agency that the activities are giving rise to pollution, submit to the Environment Agency for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits;
 - (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.
- 3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

3.3 Odour

- 3.3.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.

3.4 Noise and vibration

- 3.4.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.
- 3.4.2 The operator shall:
 - (a) if notified by the Environment Agency that the activities are giving rise to pollution outside the site due to noise and vibration, submit to the Environment Agency for approval within the period specified, a noise and vibration management plan which identifies and minimises the risks of pollution from noise and vibration;
 - (b) implement the approved noise and vibration management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.5 Monitoring

3.5.1 The operator shall, unless otherwise agreed in writing by the Environment Agency, undertake the monitoring specified in the following tables in schedule 3 to this permit:

- (a) point source emissions specified in tables S3.1 and S3.2.

3.6 Pests

3.6.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.

3.6.2 The operator shall:

- (a) if notified by the Environment Agency, submit to the Environment Agency for approval within the period specified, a pests management plan which identifies and minimises risks of pollution from pests;
- (b) implement the pests management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

4 Information

4.1 Records

4.1.1 All records required to be made by this permit shall:

- (a) be legible;
- (b) be made as soon as reasonably practicable;
- (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and
- (d) be retained, unless otherwise agreed in writing by the Environment Agency, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:
 - (i) off-site environmental effects; and
 - (ii) matters which affect the condition of the land and groundwater.

4.1.2 The operator shall keep on site all records, plans and the management system required to be maintained by this permit, unless otherwise agreed in writing by the Environment Agency.

4.2 Reporting

4.2.1 The operator shall send all reports and notifications required by the permit to the Environment Agency using the contact details supplied in writing by the Environment Agency.

4.2.2 A report or reports on the performance of the activities over the previous year shall be submitted to the Environment Agency by 31 January (or other date agreed in writing by the Environment Agency) each year. The report(s) shall include as a minimum:

- (a) a review of the results of the monitoring and assessment carried out in accordance with the permit including an interpretive review of that data;
- (b) the annual production /treatment data set out in schedule 4 table S4.1; and

- (c) the performance parameters set out in schedule 4 table S4.2 using the forms specified in table S4.3 of that schedule.

4.2.3 The operator shall, unless notice under this condition has been served within the preceding four years, submit to the Environment Agency, within six months of receipt of a written notice, a report assessing whether there are other appropriate measures that could be taken to prevent, or where that is not practicable, to minimise pollution.

4.3 Notifications

4.3.1 In the event:

- (a) that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately—
 - (i) inform the Environment Agency,
 - (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
 - (iii) take the measures necessary to prevent further possible incidents or accidents;
- (b) of a breach of any permit condition the operator must immediately—
 - (i) inform the Environment Agency, and
 - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
- (c) of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.

4.3.2 Any information provided under condition 4.3.1 shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.

4.3.3 Where the Environment Agency has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform the Environment Agency when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to the Environment Agency at least 14 days before the date the monitoring is to be undertaken.

4.3.4 The Environment Agency shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:

Where the operator is a registered company:

- (a) any change in the operator's trading name, registered name or registered office address; and
- (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.

Where the operator is a corporate body other than a registered company:

- (a) any change in the operator's name or address; and
- (b) any steps taken with a view to the dissolution of the operator.

In any other case:

- (a) the death of any of the named operators (where the operator consists of more than one named individual);
- (b) any change in the operator's name(s) or address(es); and

- (c) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.

4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:

- (a) the Environment Agency shall be notified at least 14 days before making the change; and
- (b) the notification shall contain a description of the proposed change in operation.

4.3.6 The Environment Agency shall be given at least 14 days notice before implementation of any part of the site closure plan.

4.4 Interpretation

4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.

4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made "immediately", in which case it may be provided by telephone.

Schedule 1 – Operations

Table S1.1 activities			
Activity reference	Activity listed in Schedule 1 of the EP Regulations	Description of specified activity	Limits of specified activity
AR1	Section 6.8 Part A(1)(b)	Slaughtering animals at a plant with a carcass production capacity of more than 50 tonnes per day	From receipt of live animals to dispatch of carcass Storage of process waste
AR2	Section 6.8 A(1)(d)(i)	Treating and processing, other than exclusively packaging, of only animal raw materials (other than milk only) whether previously processed or unprocessed, intended for the production of food or feed with a finished product production capacity greater than 75 tonnes per day	From arrival of carcass in the cutting room to dispatch of the final product Storage of process waste
Directly Associated Activity			
AR3	Heating and hot water supply	Burning of natural gas in the onsite steam boiler	From receipt of natural gas to emission of combustible gases to the atmosphere
AR4	Effluent treatment plant	Screening of effluent prior to disposal into the foul sewer for treatment at Woodhouse Mill Sewage Treatment Works	Only effluent arising from the installation activities shall be treated and discharged off site
AR5	Refrigeration plant and storage of final product	Chilling of final product	From receipt of carcass in the cutting room to dispatch of the final product

Table S1.2 Operating techniques		
Description	Parts	Date Received
Application EPR/RP3935FH/A001	Response to the following questions of the application form: Part B2 Questions 6a, 6b, 6c and 7 Part B3 Questions 3a, 3b and 3c Application Documents: WBEI09 – Extra Information WBRA0911V2 – Environmental Risk Assessment WBAAMP0911V2 – Accident / Pollution Incident Management Plan WBEM0911V2 – Environmental Monitoring WBDP09111 – Description of Woolley Brothers Processes	27/09/2011
Application EPR/RP3935FH/V002	Response to parts C2 and C3 of the application form and all referenced supporting information	Duly made 06/01/2021
Additional information	Site Drainage Plan ref: <i>Proposed Drainage Layout 54G, Feb 2020</i>	07/04/2021

Table S1.3 Improvement programme requirements		
Reference	Requirement	Date
IC1	<p>The Operator shall submit a written report to the Environment Agency that compares the Installations performance against the following benchmarks included in the sector guidance 'How to comply with your environmental permit – Additional guidance for: The Red Meat Processing (Cattle, Sheep and Pigs) Sector' (EPR6.12):</p> <ul style="list-style-type: none"> • Energy Benchmark (Heat and electricity - kWh/animal) and; • Water Consumption Benchmark (litres per animal) <p>Where the above benchmarks from EPR6.12 are not met, the Operator shall propose a plan including the following:</p> <ul style="list-style-type: none"> • Measures to be implemented in order to meet the benchmarks • A timetable for the implementation of the proposed measures <p>The plan shall be implemented as approved by the Environment Agency.</p>	Complete
IC2	<p>The Operator shall submit an Odour Management Plan (OMP) to the Environment Agency for approval.</p> <p>The OMP must be written in accordance with the Environment Agency's H4 Odour Guidance and take into account control measures included in the relevant guidance, including:</p> <ul style="list-style-type: none"> • 'How to comply with your Environmental Permit' (EPR1.00); • 'How to comply with your environmental permit – Additional guidance for: The Red Meat Processing (Cattle, Sheep and Pigs) Sector' (EPR6.12); and • The Environment Agency's 'Supplementary odour guidance for abattoirs and poultry processors' <p>The OMP must include a justification for any odour management measures proposed that are a deviation from the relevant guidance.</p>	Complete
IC3	<p>The Operator shall submit a written report to the Environment Agency outlining the current infrastructure and containment control measures and their condition compared to relevant guidance (EPR1.00 and EPR6.12). This shall include a justification for any control measures that are a deviation from the relevant guidance.</p> <p>Where improvements are identified, the report shall include a plan, for Environment Agency approval, outlining the proposed measures to be implemented and a timetable for their implementation.</p> <p>The plan shall be implemented as approved by the Environment Agency.</p>	Complete
IC4	<p>The Operator shall send a summary of the site Environmental management System (EMS) to the Environment Agency and make available for inspection all documents and procedures which form part of the EMS. The EMS shall be developed in line with the requirements set out in Section 1 of 'How to comply with your Environmental Permit' (EPR1.00). The documents and procedures set out in the EMS shall form the written management system referenced in condition 1.1.1(a) of the permit.</p>	Complete

Schedule 2 – Waste types, raw materials and fuels

Table S2.1 Raw materials and fuels	
Raw materials and fuel description	Specification
-	-

Schedule 3 – Emissions and monitoring

Emission point ref. & location	Source	Parameter	Limit (including unit)	Reference period	Monitoring frequency	Monitoring standard or method
A1 Boiler system emission point for the factory	Boiler Plant	No parameters set	No limits set	-	-	-

Emission point ref. & location as shown on site drainage plan ref: <i>Proposed drainage layout 54G Feb 2020</i>	Source	Parameter	Limit (incl. Unit)	Reference period	Monitoring frequency	Monitoring standard or method
S1 Abattoir effluent screen and discharge outlet to Yorkshire Water combined sewer	Process water via effluent screen and surface water from yard service areas	In accordance with trade effluent consent to discharge issued by Yorkshire Water	-	-	-	-
S2 clean roof water runoff and storm overflow to Yorkshire Water surface water sewer	Hard standing areas of office and staff car parks	In accordance with trade effluent consent to discharge issued by Yorkshire Water	-	-	-	-

Schedule 4 – Reporting

Parameters, for which reports shall be made, in accordance with conditions of this permit, are listed below.

Table S4.1: Annual production/treatment	
Parameter	Units
Carcass production	tonnes

Table S4.2 Performance parameters		
Parameter	Frequency of assessment	Units
Water usage per cattle slaughtered	Annually	Litres per animal
Energy usage per cattle slaughtered (heat and electricity)	Annually	kWh per animal

Table S4.3 Reporting forms		
Media/parameter	Reporting format	Date of form
Other performance indicators	Form performance 1 or other form as agreed in writing by the Environment Agency	20/04/2012

Schedule 5 – Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	
Name of operator	
Location of Facility	
Time and date of the detection	

(a) Notification requirements for any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution	
To be notified within 24 hours of detection	
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

(b) Notification requirements for the breach of a limit	
To be notified within 24 hours of detection unless otherwise specified below	
Emission point reference/ source	
Parameter(s)	
Limit	
Measured value and uncertainty	
Date and time of monitoring	

(b) Notification requirements for the breach of a limit	
To be notified within 24 hours of detection unless otherwise specified below	
Measures taken, or intended to be taken, to stop the emission	

Time periods for notification following detection of a breach of a limit	
Parameter	Notification period

(c) Notification requirements for the breach of permit conditions not related to limits	
To be notified within 24 hours of detection	
Condition breached	
Date, time and duration of breach	
Details of the permit breach i.e. what happened including impacts observed.	
Measures taken, or intended to be taken, to restore permit compliance.	

(d) Notification requirements for the detection of any significant adverse environmental effect	
To be notified within 24 hours of detection	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	

Part B – to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	

Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.	

Name*	
Post	
Signature	
Date	

* authorised to sign on behalf of the operator

Schedule 6 – Interpretation

“accident” means an accident that may result in pollution.

“application” means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

“authorised officer” means any person authorised by the Environment Agency under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“EP Regulations” means The Environmental Permitting (England and Wales) Regulations SI 2016 No.1154 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“emissions of substances not controlled by emission limits” means emissions of substances to air, water or land from the activities, either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission limit.

“groundwater” means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

“Industrial Emissions Directive” means DIRECTIVE 2010/75/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 November 2010 on industrial emissions, as read in accordance with Schedule 1A to the Environmental Permitting (England and Wales) Regulations 2016.

“Pests” means Birds, Vermin and Insects.

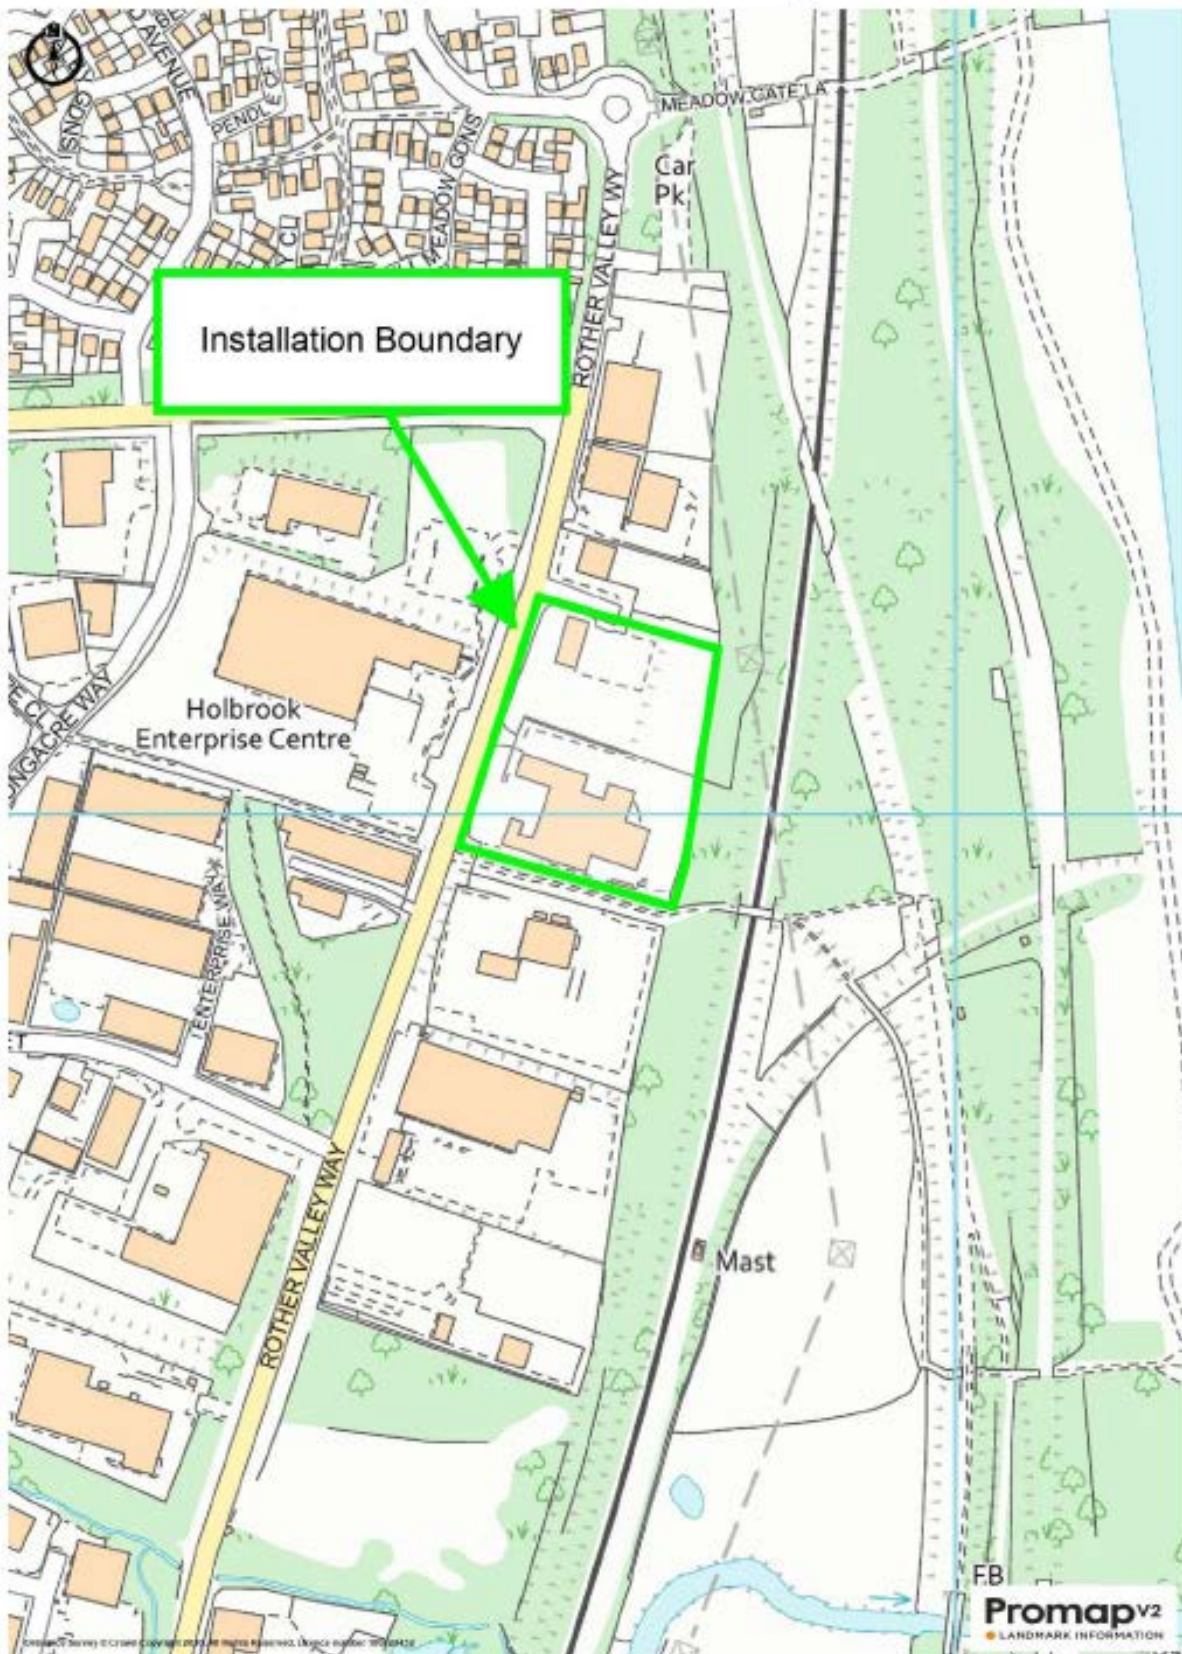

Where a minimum limit is set for any emission parameter, for example pH, reference to exceeding the limit shall mean that the parameter shall not be less than that limit.

Unless otherwise stated, any references in this permit to concentrations of substances in emissions into air means:

- in relation to emissions from combustion processes, the concentration in dry air at a temperature of 273K, at a pressure of 101.3 kPa and with an oxygen content of 3% dry for liquid and gaseous fuels, 6% dry for solid fuels; and/or

in relation to emissions from non-combustion sources, the concentration at a temperature of 273K and at a pressure of 101.3 kPa, with no correction for water vapour content “year” means calendar year ending 31 December.

Schedule 7 – Site plan

END OF PERMIT
