

FOI Release
Information released under the Freedom of Information Act

Title: CBD trade marks

Date of release: 6 August 2019

Information request:

The number of trade marks filed which contain "CBD" either in the trade mark or somewhere in their specification. Separated by month, over the last 2 years.

Information released:

Please find attached a breakdown of all applications which feature the letters CBD either as part of an element of the mark or as part of any specification.

There is a caveat in that while looking for mark text featuring CBD we may have retrieved some marks such as CBDC which we cannot easily exclude and which may affect the accuracy of the count. For that reason we've listed counts and added the raw data page so you can review the marks and decide which you might want to include.
