

Department for
Business, Energy
& Industrial Strategy

The latest provisional monthly energy production, consumption and prices statistics produced by the Department for Business, Energy and Industrial Strategy were released on 29 July 2021.

Energy production and consumption statistics are provided in total and by fuel and provide an analysis of the latest 3 months data compared to the same period a year earlier. Energy price statistics cover domestic price indices, prices of road fuels and petroleum products and comparisons of international road fuel prices.

Energy production and consumption

Highlights for the 3-month period March 2021 to May 2021, compared to the same period a year earlier include:

- **Primary energy consumption in the UK on a fuel input basis rose by 11%, the first 3 monthly increase since the start of the Covid-19 pandemic in March 2020, with petroleum consumption up 13%. On a temperature adjusted basis consumption rose by 6.0%. ([table ET 1.2](#) and [table ET 3.13](#))**
- **Indigenous energy production fell by 18% due to maintenance activities and less favourable weather conditions for renewables technologies. ([table ET 1.1](#))**
- **Electricity generation by Major Power Producers up 11%, with coal up 8.8%, nuclear down 9.2% due to outages and renewables down 6.1% due to less favourable weather conditions, but gas up 40% to meet shortfall.* ([table ET 5.4](#))**
- **Gas provided 47.5% of electricity generation by Major Power Producers, with renewables at 34.3%, nuclear at 16.1% and coal at 1.3%.* ([table ET 5.4](#))**
- **Low carbon share of electricity generation by Major Power Producers down 9.9 percentage points to 50.4%, whilst fossil fuel share of electricity generation stood at 49.0%.* ([table ET 5.4](#))**

*Major Power Producers (MPPs) data published monthly, all generating companies data published quarterly.

Energy prices

Highlights for July 2021 compared to June 2021:

- **Petrol and diesel prices rose by 3.4 and 2.5 pence per litre respectively. ([table QEP 4.1.1](#))**

Data periods and coverage

Statistics on monthly production and consumption of coal, electricity, gas, oil and total energy include data for the UK for the period up to the end of May 2021.

Statistics on average temperatures, heating degree days, wind speeds, sun hours and rainfall include data for the UK for the period up to the end of June 2021.

Statistics on energy prices include retail price data for the UK for June 2021, and petrol & diesel data for July 2021, with EU comparative data for June 2021.

Next release

The next release of provisional monthly energy statistics will take place on Thursday 26 August 2021.
