IV. HEALTH INFORMATION

I, the undersigned, certify that:

1) the semen described in Paragraph I was derived from animal(s) standing at a Semen Collection Centre, which is approved by the competent veterinary authorities of the United Kingdom and listed by the European Union and is under official veterinary control;

*2) the semen was collected, *processed and *stored in accordance with Regulation (EU) 2016/429 and Delegated Regulation (EU) 2020/692 after 20 April 2021 and relevant conditions at least as strict as described in the relevant model health certificate in Regulation (EU) 2021/403:

.....⁽⁶⁾;

*3) the semen was collected, *processed and *stored before 21 April 2021 in accordance with EU legislation(s)⁽⁵⁾ and relevant conditions at least as strict as described in the relevant model health certificate in Regulation (EU) 2021/403:

.....⁽⁶⁾;

4) the semen has been *stored and *transported in a container which:

(a) has been cleaned and either disinfected or sterilised before use, or is a single-use container;

* (b) has been filled with cryogenic agent which has not been previously used for other products of lesser health status;

* (c) was sealed under veterinary supervision prior to dispatch with a tamper-evident seal, which bears the number as recorded in paragraph III.4 above. OR

* (c) was transported directly to the destination establishment in air tube or under the supervision by the centre veterinarian or delegated staff member.

*** Delete as appropriate**

Notes
