Schedule Reasons for Refusal

- The applicant has not demonstrated that appropriate steps have been taken to avoid pollution risks to soil and groundwater. The environmental site condition report provided in support of the application reported the identification of localised impacts on soil and wider impacts in groundwater and associated Light Non-Aqueous Phase Liquid (LNAPL) compared to a site-defined background or a more conservative 'zero' baseline.

We have other significant concerns with the permit application. These are outlined below:

- Discrepancies in the installation boundary.
- Aspects in relation to site soil and groundwater data have not been adequately addressed in the response to the Schedule 5 Notice.

Details which further explain our reason for the refusal of this surrender application is presented in the accompanying refusal decision document.
