Subject: RE: Finasteride-Induced Suicidal and Self-Injurious Behavior Rises 33% in WHO's VigiBase

Hi

I agree with you [REDACTED] I think it might be too MHRA-heavy as it is so we probably shouldn't invite anyone else.

Thanks
Jane

Hi [REDACTED]
Thanks very much. No problem about the meeting. It has quite a few people attending already and I hadn't run it past anyone else in any case. Most of the articles I have looked at already appear to be constricted by methodological concerns. I'm not sure what the approach is going to be so I will also discuss with Jane whether she thinks someone from the epi team should be there or not. It might be the case that there are already too many of us (it may seem a bit daunting for them).
Shall I pencil in a meeting for this Thursday for you and I or is that too early?

Best
[REDACTED]
