# **Emergency Department Syndromic Surveillance System Bulletin (England) 2021 Week 45**

## Key messages

### Data reported to: 14 November 2021

During week 45, ED attendances for acute respiratory infections increased, particularly in children 1-14 years and are slightly higher than seasonally expected levels. COVID-19-like attendances continued to decrease nationally.

## Syndromic indicators at a glance

**Table 1: The current trend (based on previous weeks, not only the current week) and the level (compared to the expected baseline), of each indicator included in this bulletin.**

Indicator	Trend <sup>1</sup>	Level
Total attendances ( <b>Figure 1</b> )	Increasing	No baseline
COVID-19-like ( <b>Figure 2</b> )	Decreasing	No baseline
Acute respiratory infections ( <b>Figure 3</b> )	Increasing	Above baseline
Acute bronchiolitis or bronchitis ( <b>Figure 4</b> )	No trend	Below baseline
Influenza-like illness ( <b>Figure 5</b> )	Increasing	Above baseline
Pneumonia ( <b>Figure 6</b> )	No trend	Below baseline
Asthma ( <b>Figure 7</b> )	No trend	Similar to baseline
Gastroenteritis ( <b>Figure 8</b> )	No trend	Above baseline
Cardiac ( <b>Figure 9</b> )	No trend	Below baseline
Myocardial ischaemia ( <b>Figure 10</b> )	No trend	Below baseline
Acute alcohol intoxication ( <b>Figure 11</b> )	Decreasing	Similar to baseline
Mental health ( <b>Figure 12</b> )	Increasing	No baseline

<sup>1</sup> trend reports on the trend seen over most recent and earlier weeks

# About this syndromic surveillance system

This bulletin presents data from the UK Health Security Agency (UKHSA) emergency department syndromic surveillance system.

Syndromic surveillance can be used to:

- assess current trends
- assess current trends and levels compared to historical baselines
- compare trends between age groups/areas

Syndromic surveillance should not be used to:

- estimate total burden or number of 'cases' of a condition (see **Notes and caveats**)
- compare levels between age groups/areas

Fully anonymised, daily ED data are analysed and reported here, to identify and describe trends for a variety of syndromic indicators:

- syndromic indicators include groupings such as acute respiratory tract infections, gastroenteritis and myocardial ischaemia
- syndromic indicators are based on:
  - the primary diagnosis for each attendance
  - other diagnoses may be recorded, but are not used for indicator grouping
  - diagnoses may be based on signs/symptoms and may not be laboratory confirmed
- **Key messages** describes any notable trends nationally (England), by age group and/or by geographical area (based on UKHSA Regions)
- the full list of syndromic indicators reported here, along with their current level and trend, are summarised in **Table 1**
- charts are provided for each syndromic indicator, on a national basis, by age group and by geographical area (UKHSA Region). Each chart includes a year of data with:
  - 7-day moving averages (adjusted for weekends and bank holidays) to aid in the identification of trend
  - statistical baselines (where available) to aid in the assessment of level compared to historical expectations

For further information please see the **Notes and caveats** section.

Previous weekly bulletins from this system are available [here](#).

## Data quality issues of note this week

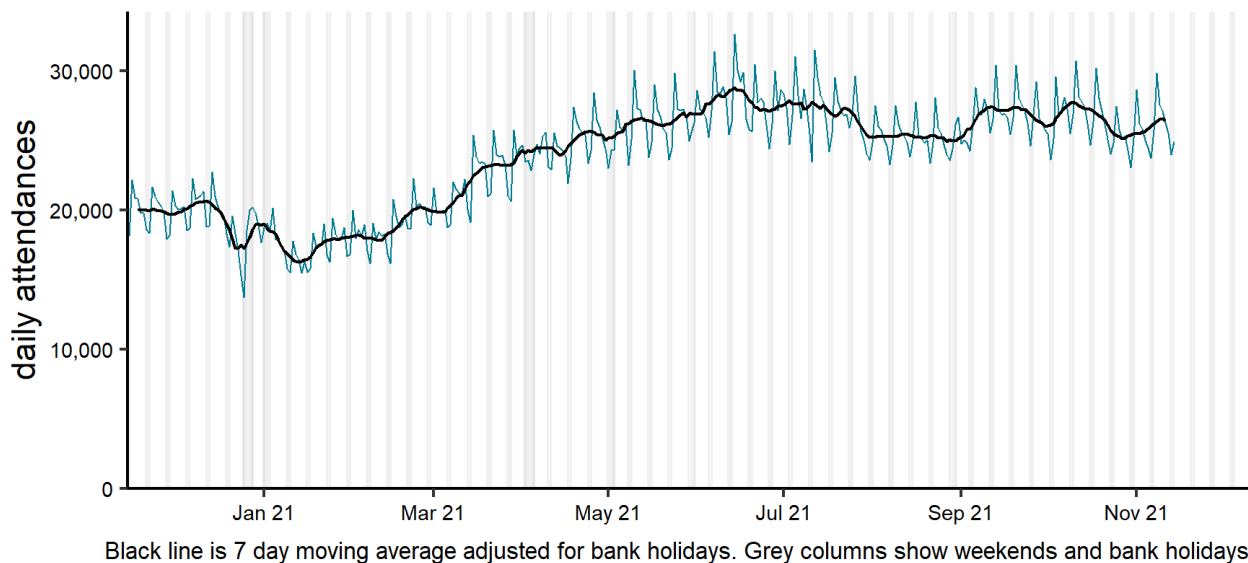

No issues identified.

See **Table 2** and **Table 3** for the numbers of EDs included this week.

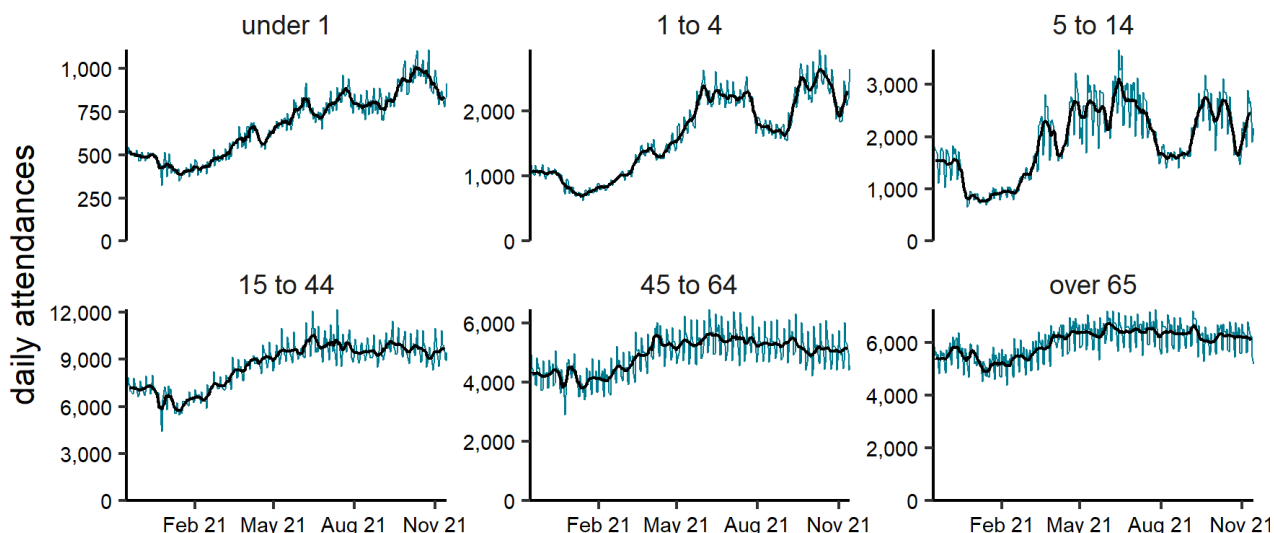

# Total attendances

**Figure 1: Daily number of ED attendances (and 7-day moving average adjusted for bank holidays) recorded in this sentinel syndromic surveillance system in England (a) nationally, (b) by age and (c) by UKHSA Region.**

**(a)** Total attendances 15/11/2020 - 14/11/2021

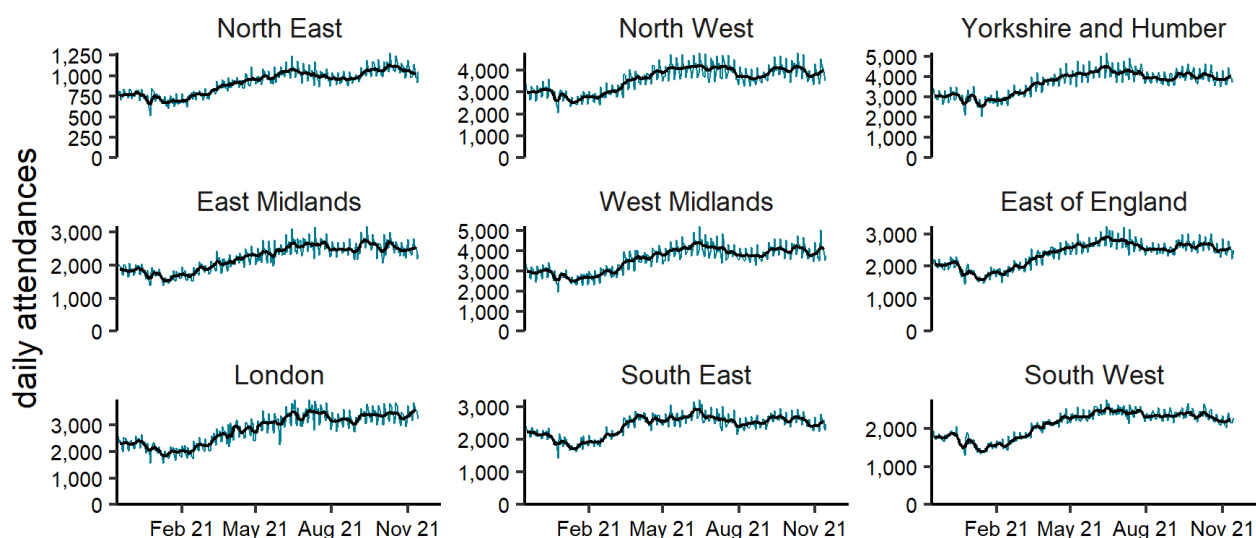

**(b)** Total attendances by age group (years) 15/11/2020 - 14/11/2021

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.

(c) Total attendances by region 15/11/2020 - 14/11/2021

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON. Black line is 7 day moving average adjusted for bank holidays.

**Table 2: The number of emergency department (ED) attendances, number with a diagnosis code included in surveillance each day during the most recent week.**

Date	Total attendances <sup>2</sup>	Diagnoses included <sup>2</sup>
08 November 2021	29,824	19,853
09 November 2021	27,562	18,778
10 November 2021	27,081	18,510
11 November 2021	26,267	18,241
12 November 2021	25,530	17,492
13 November 2021	23,968	15,848
14 November 2021	24,901	17,028

**Table 3: The number of EDs in total and in each UKHSA Region included in surveillance each day during the most recent week.**

UKHSA Region	Number of EDs <sup>2</sup>
North East	5
North West	16
Yorkshire and Humber	15
West Midlands	14
East Midlands	9
East of England	10
London	12
South West	11
South East	13
Total	105

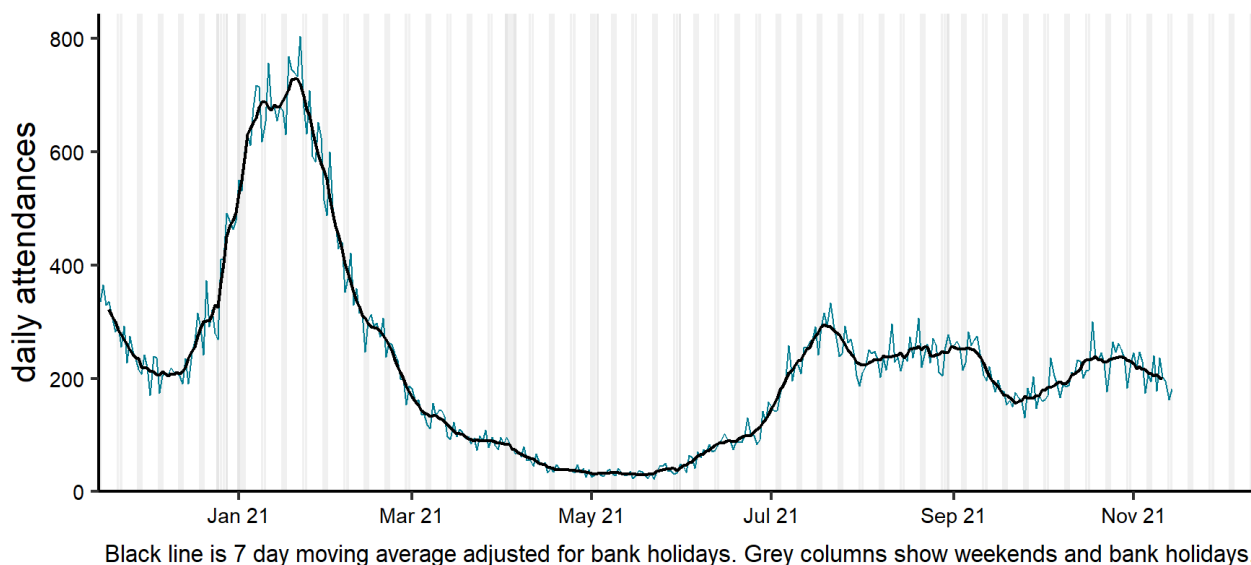

<sup>2</sup> only attendances from Type 01 EDs meeting the weekly reporting criteria are included in this report, see **Notes and caveats** for further details.

# Respiratory conditions

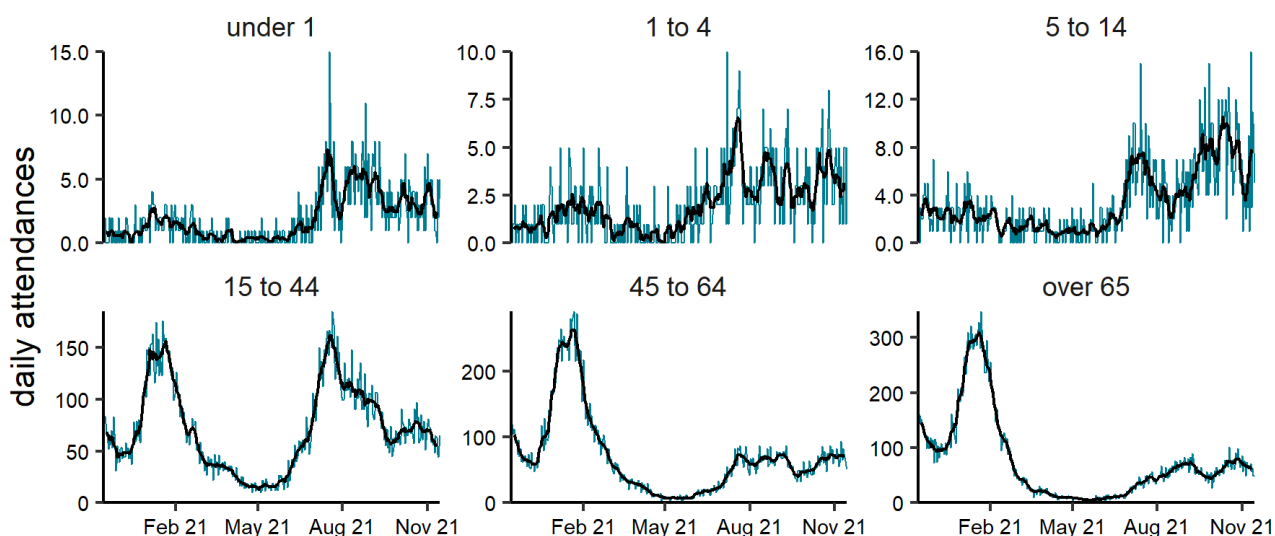

## COVID-19-like

**Figure 2: Daily number of COVID-19-like ED attendances (and 7-day moving average adjusted for bank holidays), England (a) nationally, (b) by age and (c) by UKHSA Region.**

**(a)** COVID-19-like 15/11/2020 - 14/11/2021

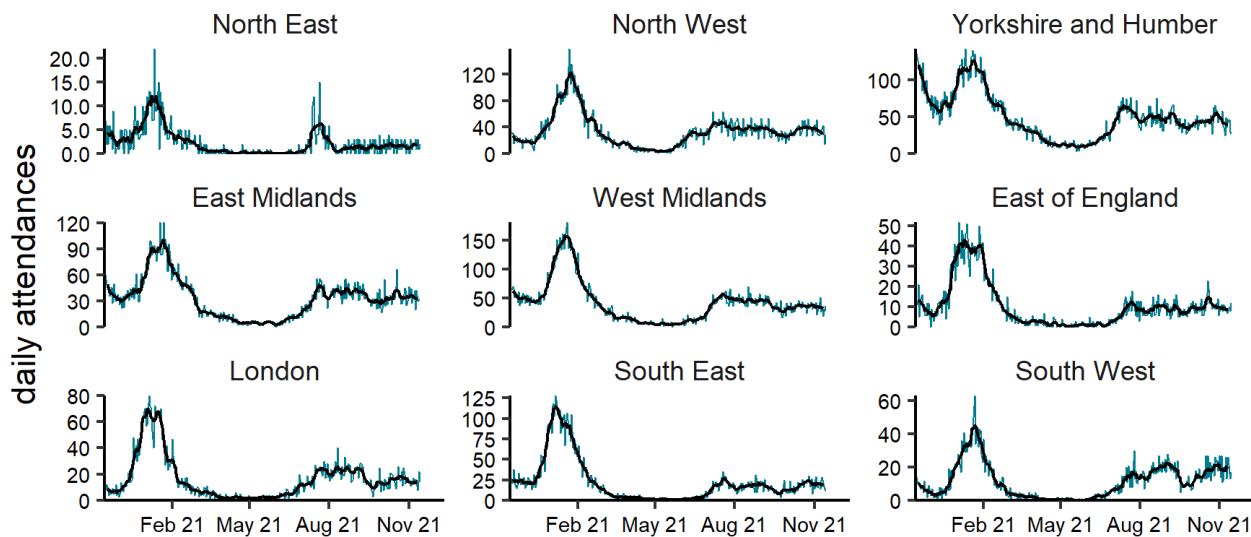

**(b)** COVID-19-like by age group (years) 15/11/2020 - 14/11/2021

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON. Black line is 7 day moving average adjusted for bank holidays.

(c)

COVID-19-like by region 15/11/2020 - 14/11/2021

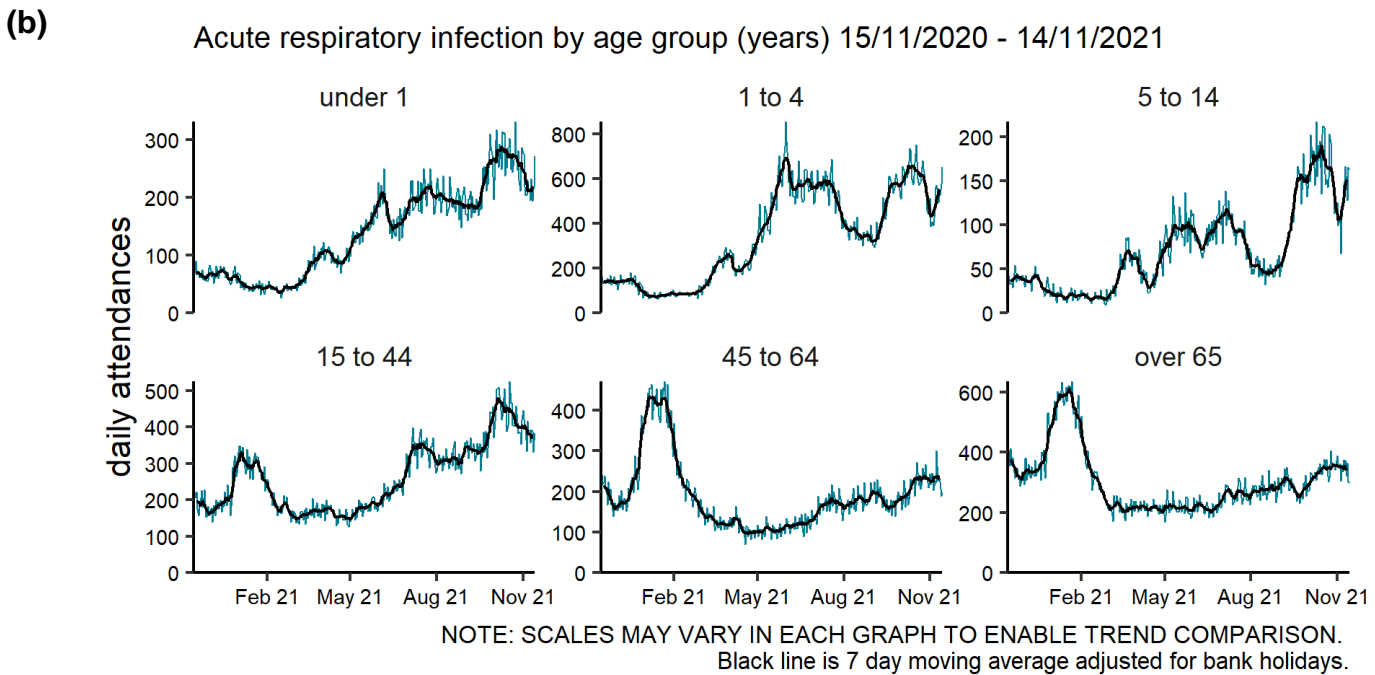

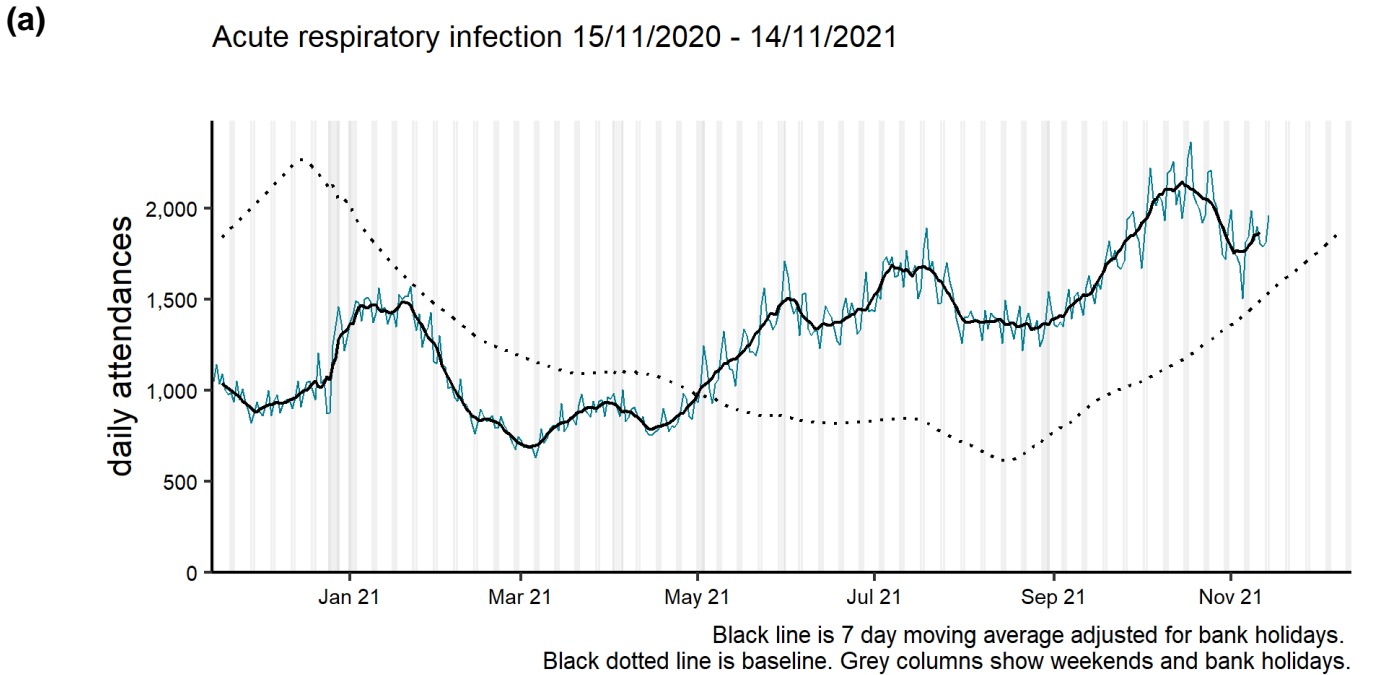

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.

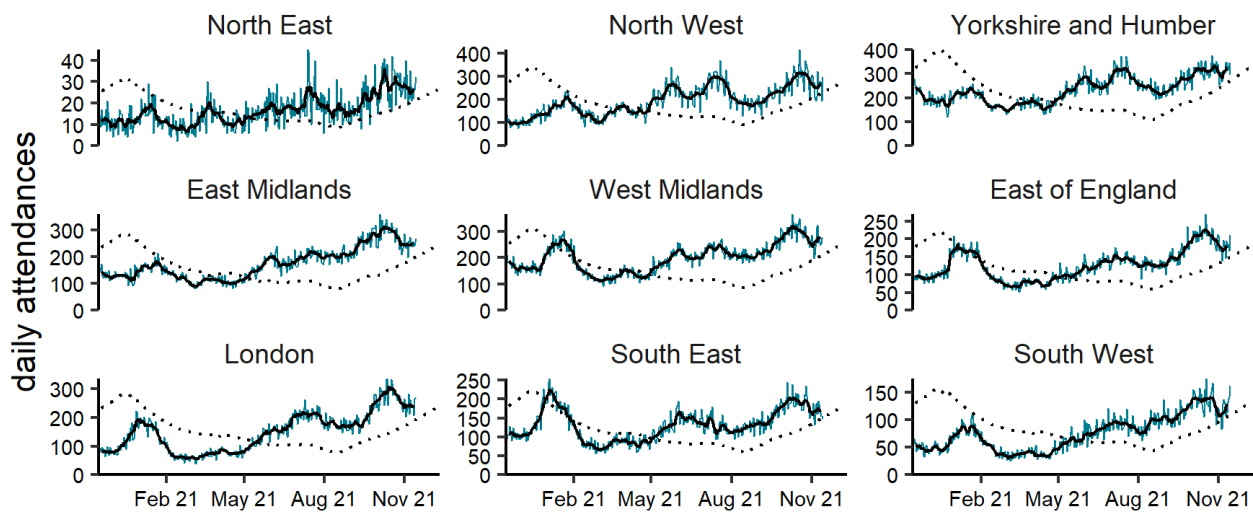

# Acute respiratory infections

**Figure 3: Daily number of acute respiratory infection ED attendances (and 7-day moving average adjusted for bank holidays), England (a) nationally, (b) by age and (c) by UKHSA Region.**

(c)

Acute respiratory infection by region 15/11/2020 - 14/11/2021

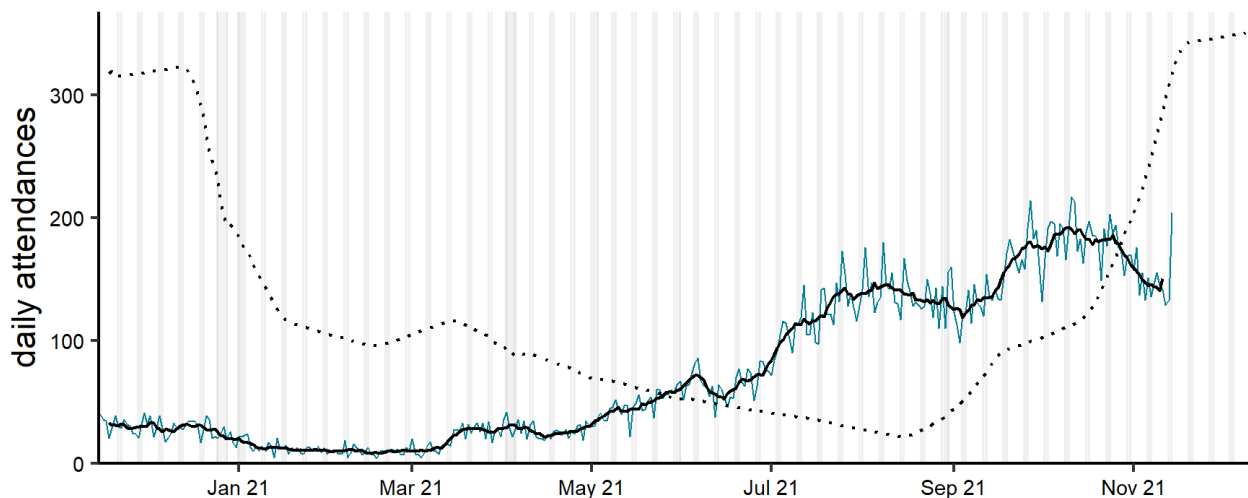

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.  
Black dotted line is baseline.

## Acute bronchiolitis/ bronchitis

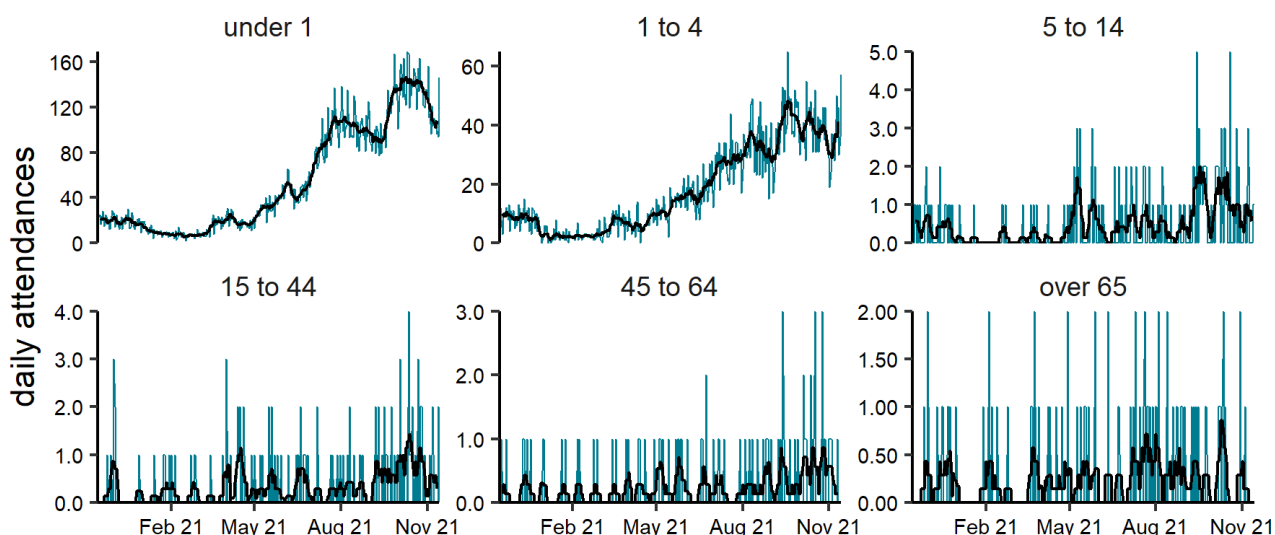

**Figure 4: Daily number of acute bronchiolitis/bronchitis ED attendances (and 7-day moving average adjusted for bank holidays), England (a) nationally, (b) by age and (c) by UKHSA Region.**

**(a)** Acute bronchiolitis 15/11/2020 - 14/11/2021

Black line is 7 day moving average adjusted for bank holidays.  
Black dotted line is baseline. Grey columns show weekends and bank holidays.

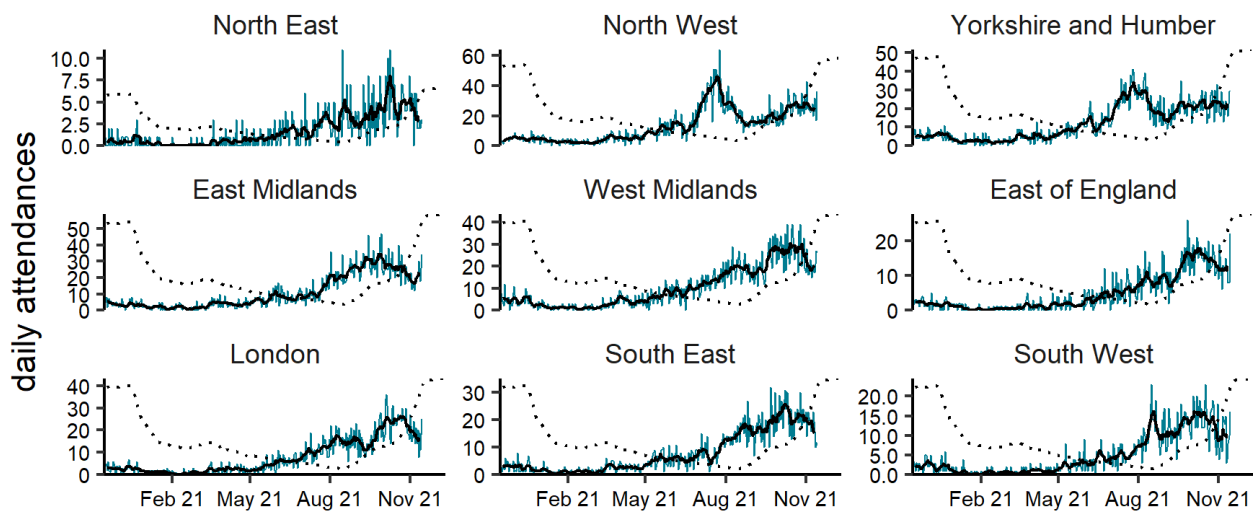

**(b)** Acute bronchiolitis by age group (years) 15/11/2020 - 14/11/2021

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.

(c)

Acute bronchiolitis by region 15/11/2020 - 14/11/2021

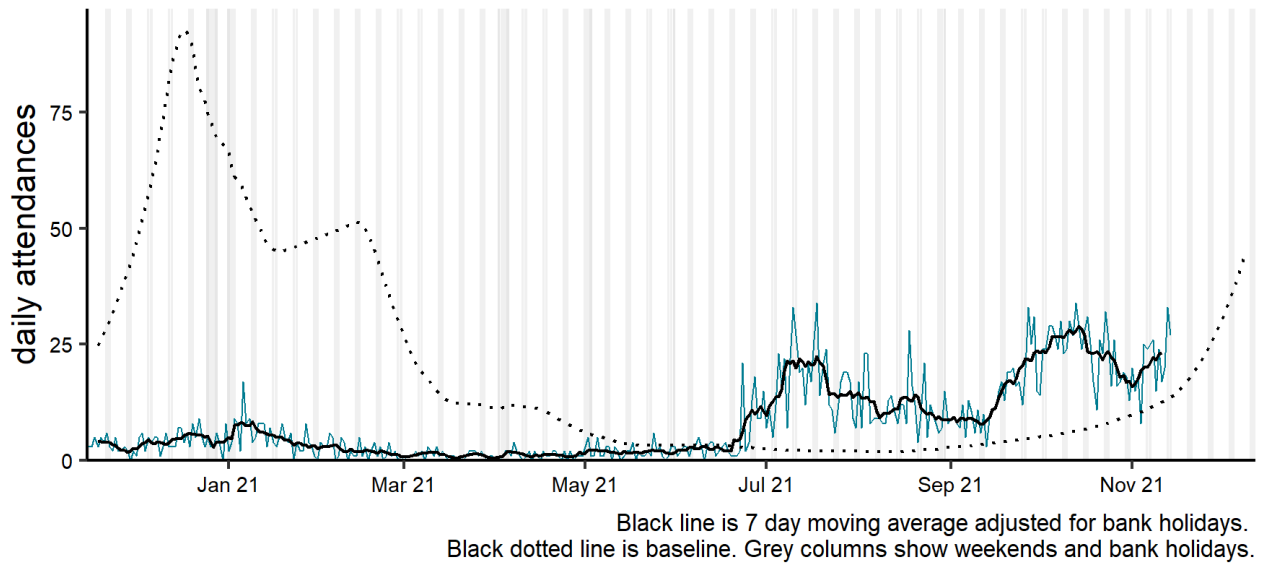

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.  
Black dotted line is baseline.

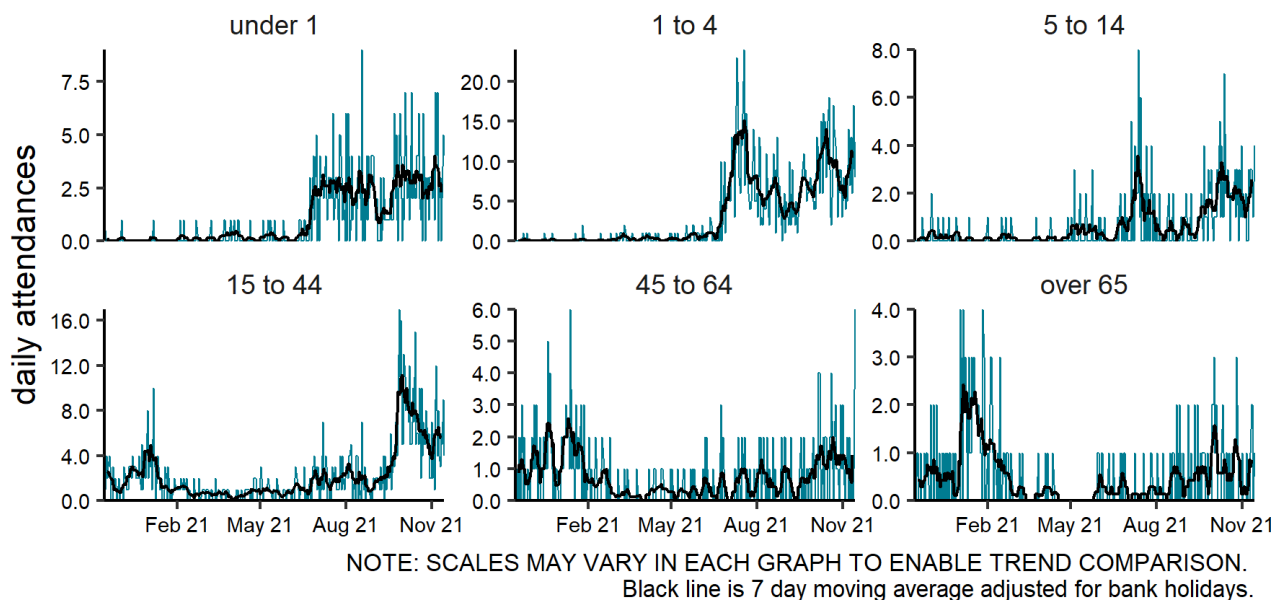

# Influenza-like illness

**Figure 5: Daily number of influenza-like illness ED attendances (and 7-day moving average adjusted for bank holidays), England (a) nationally, (b) by age and (c) by UKHSA Region.**

**(a)** Influenza-like illness 15/11/2020 - 14/11/2021

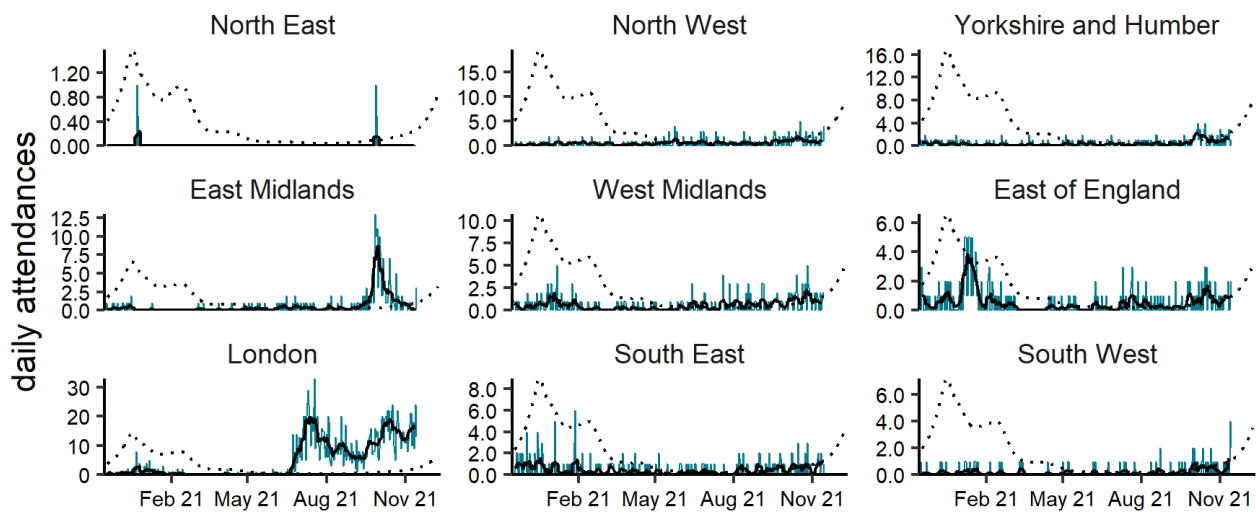

**(b)** Influenza-like illness by age group (years) 15/11/2020 - 14/11/2021

(c)

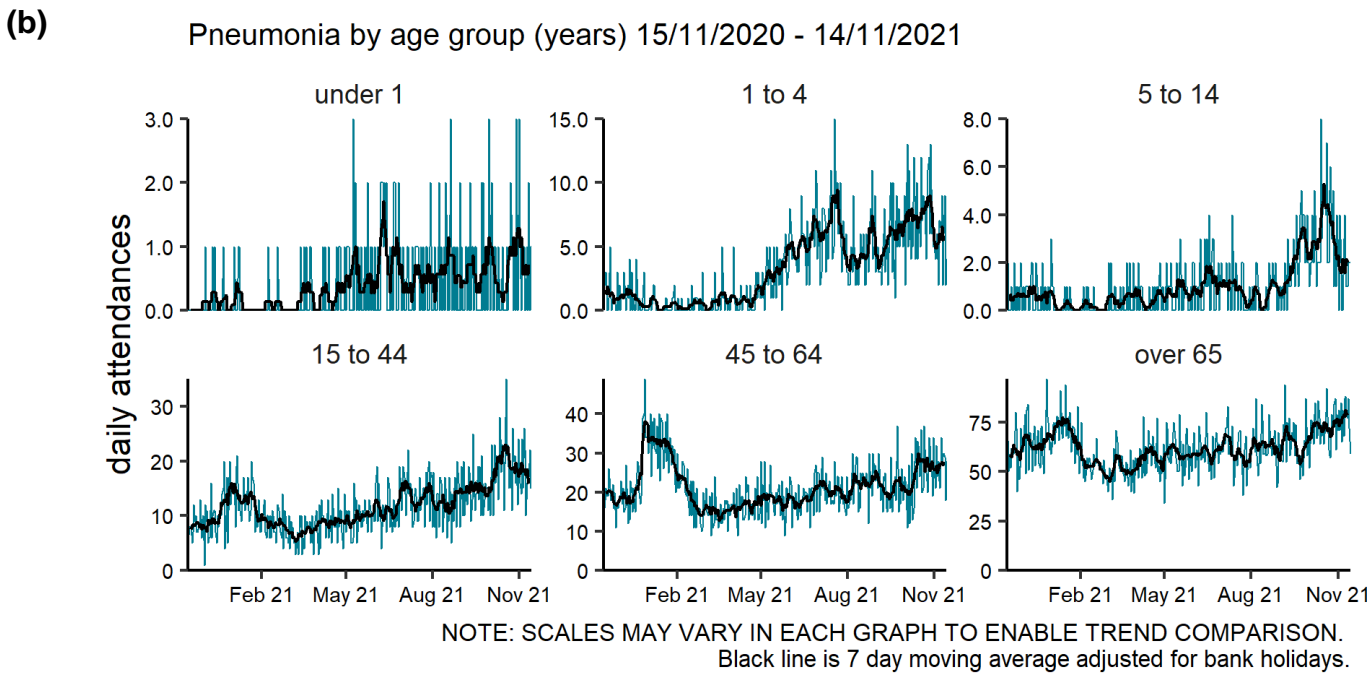

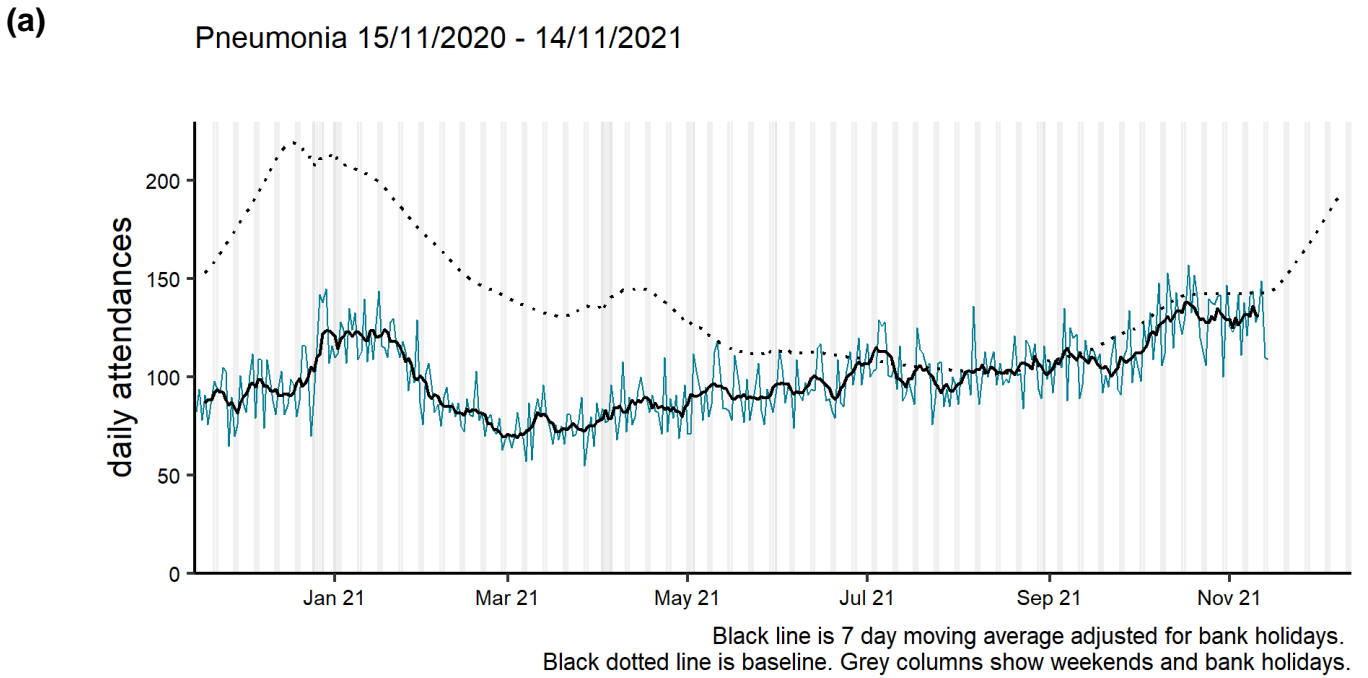

Influenza-like illness by region 15/11/2020 - 14/11/2021

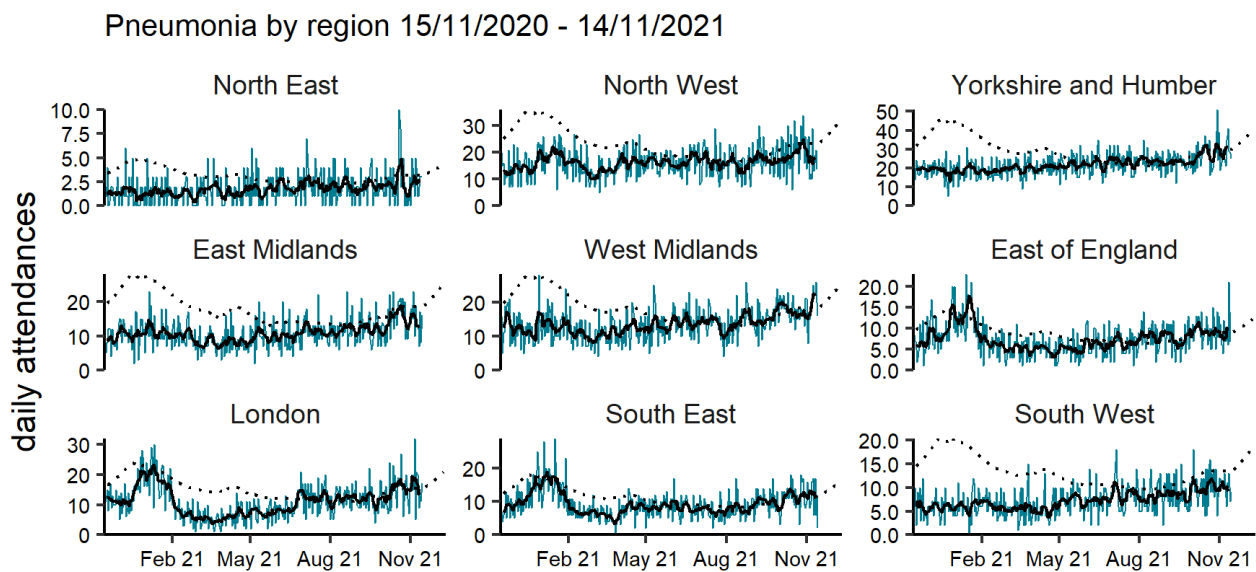

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.  
Black dotted line is baseline.

# Pneumonia

**Figure 6: Daily number of pneumonia ED attendances (and 7-day moving average adjusted for bank holidays), England (a) nationally, (b) by age and (c) by UKHSA Region.**

(c)

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.

Black line is 7 day moving average adjusted for bank holidays.

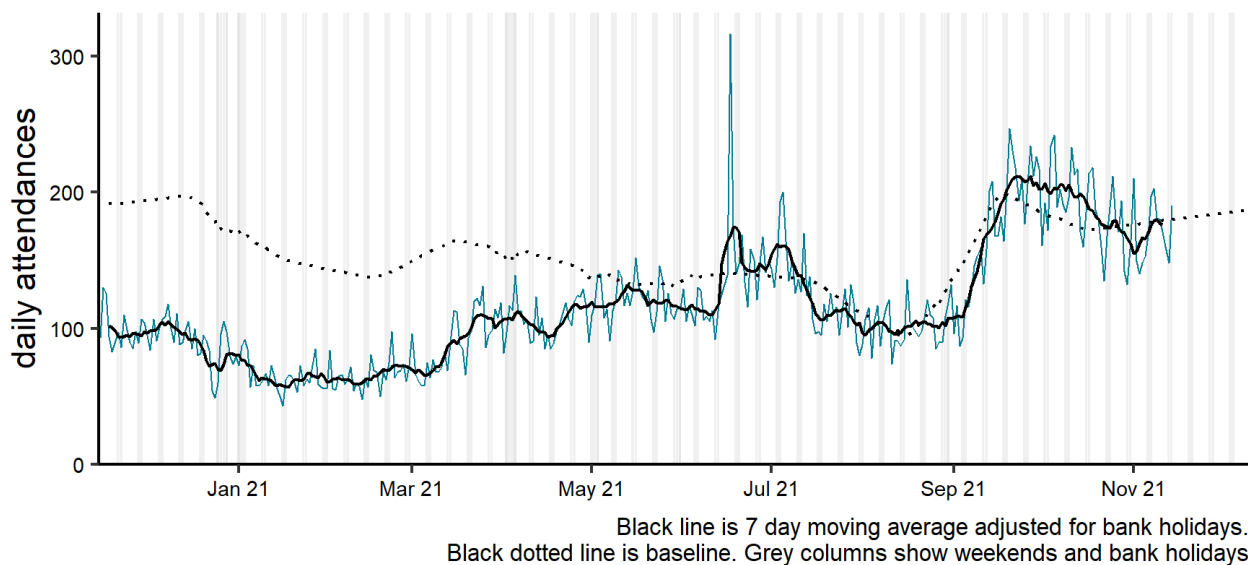

Black dotted line is baseline.

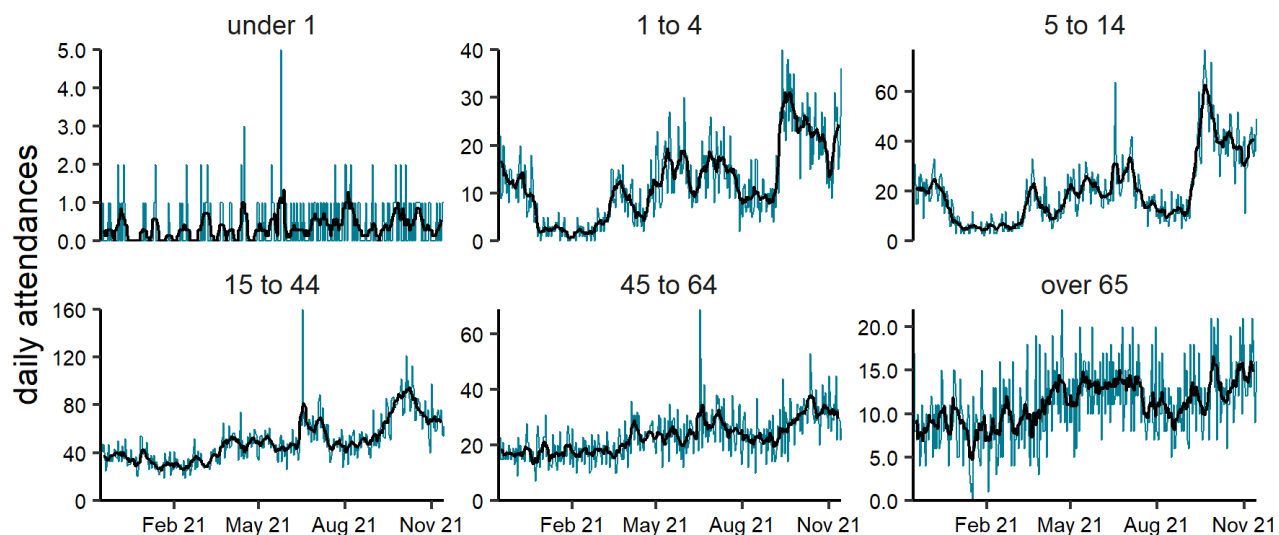

# Asthma

**Figure 7: Daily number of asthma ED attendances (and 7-day moving average adjusted for bank holidays), England (a) nationally, (b) by age and (c) by UKHSA Region.**

**(a)** Asthma 15/11/2020 - 14/11/2021

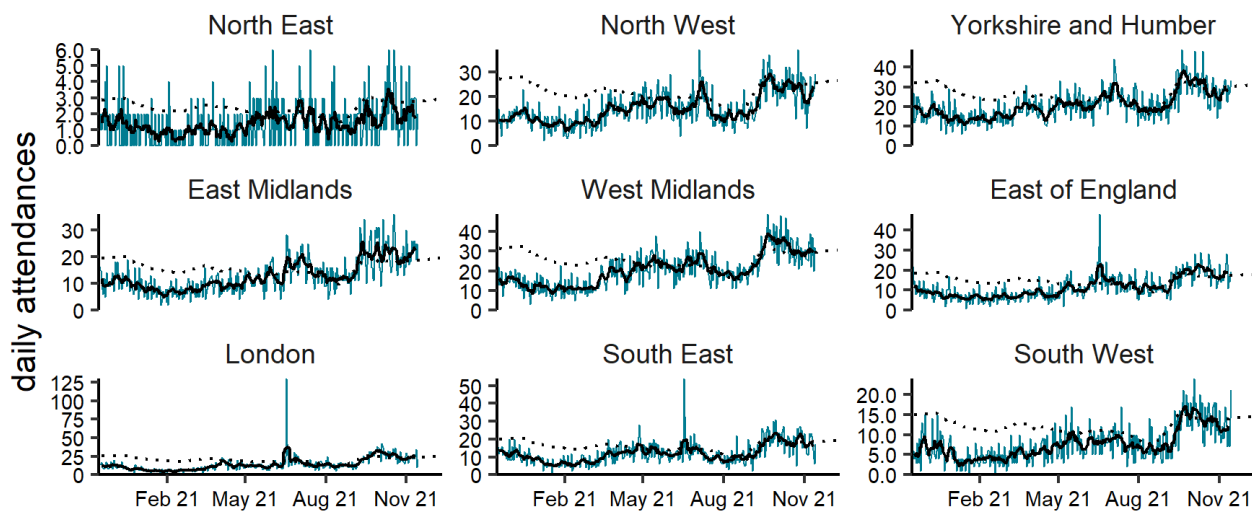

**(b)** Asthma by age group (years) 15/11/2020 - 14/11/2021

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.

(c)

Asthma by region 15/11/2020 - 14/11/2021

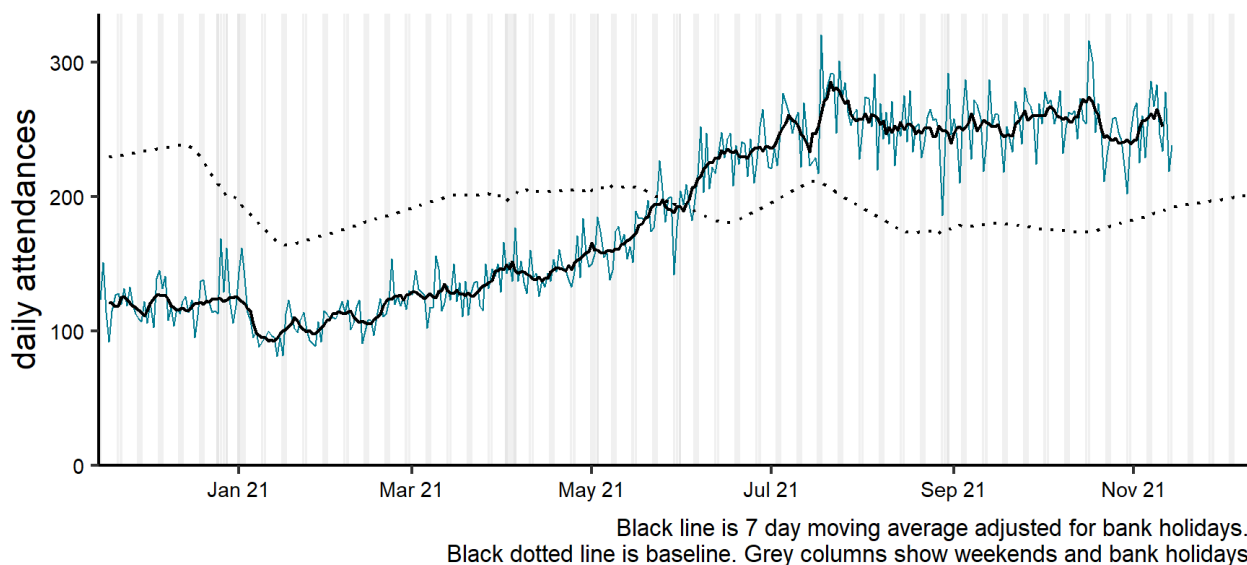

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.  
Black dotted line is baseline.

# Gastrointestinal conditions

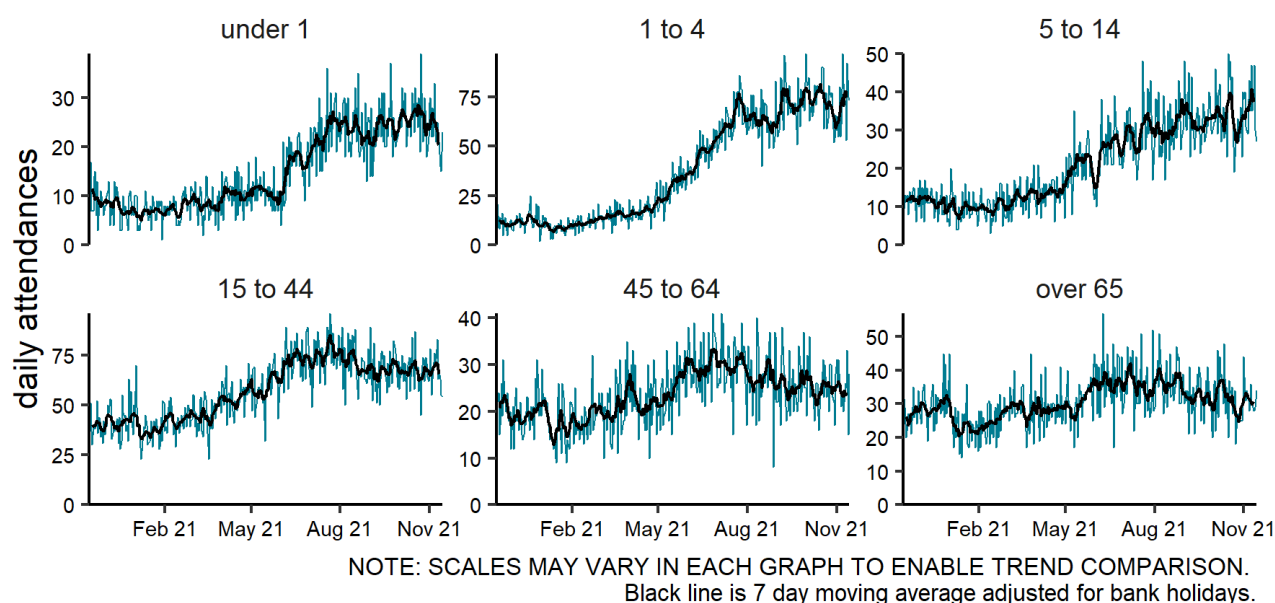

## Gastroenteritis

**Figure 8: Daily number of gastroenteritis ED attendances (and 7-day moving average adjusted for bank holidays), England (a) nationally, (b) by age and (c) by UKHSA Region.**

**(a)** Gastroenteritis 15/11/2020 - 14/11/2021

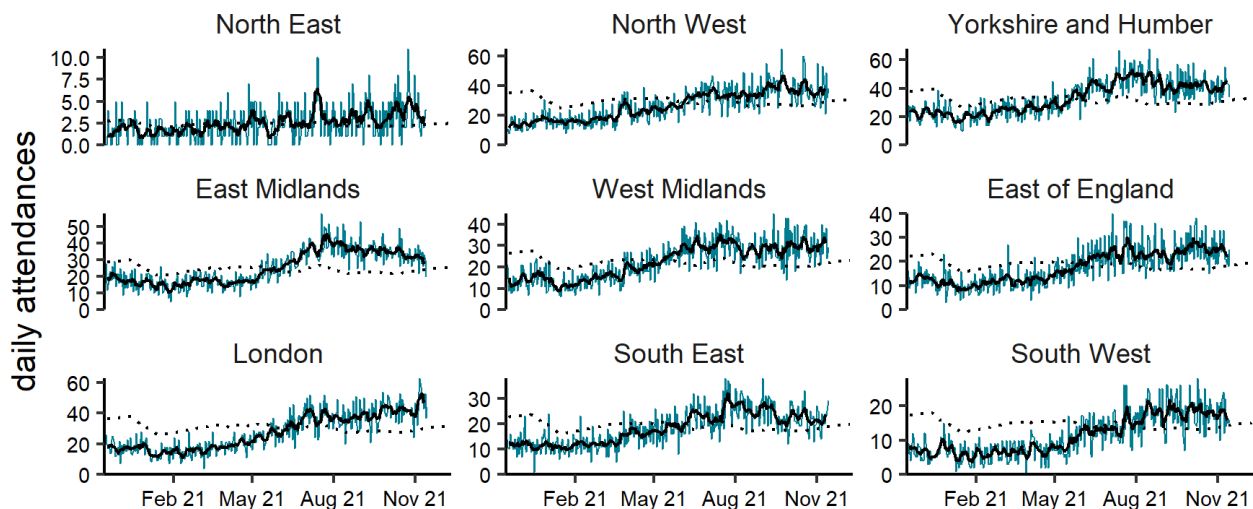

**(b)** Gastroenteritis by age group (years) 15/11/2020 - 14/11/2021

(c)

Gastroenteritis by region 15/11/2020 - 14/11/2021

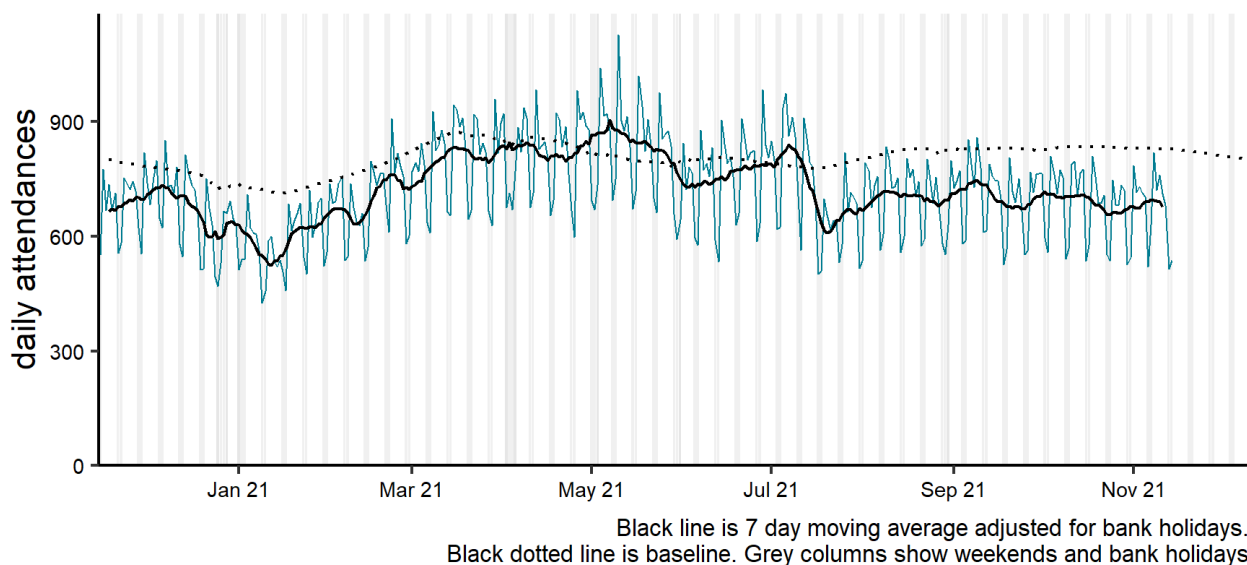

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.  
Black dotted line is baseline.

# Cardiac conditions

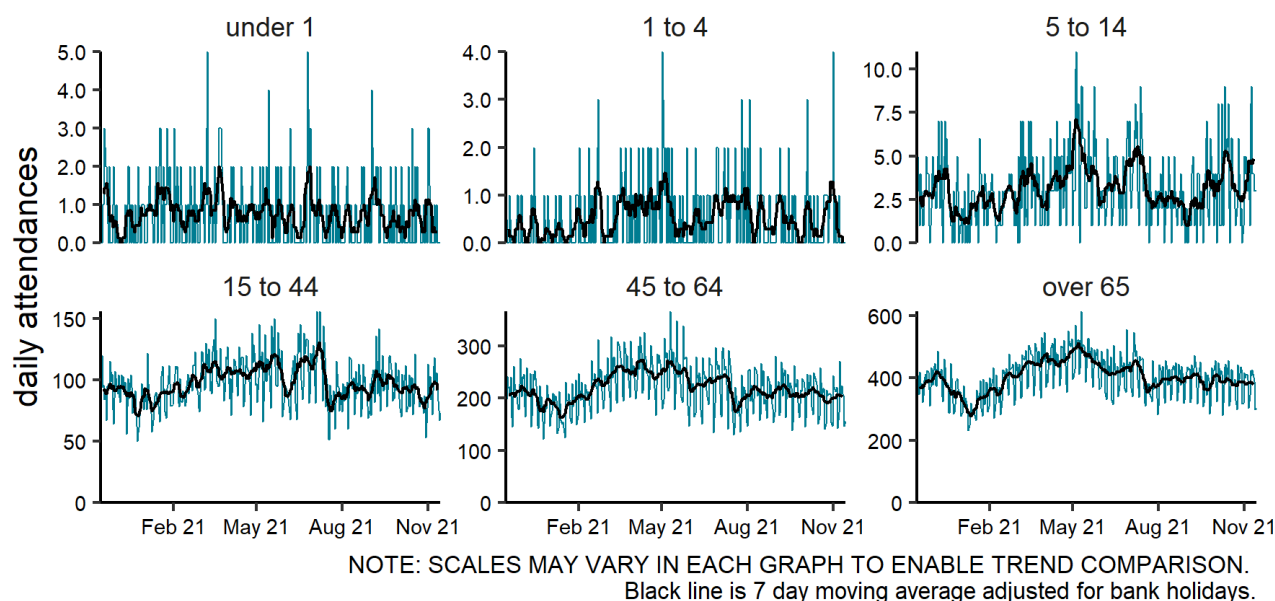

## Cardiac

**Figure 9: Daily number of cardiac ED attendances (and 7-day moving average adjusted for bank holidays), England (a) nationally, (b) by age and (c) by UKHSA Region.**

**(a)** Cardiac conditions 15/11/2020 - 14/11/2021

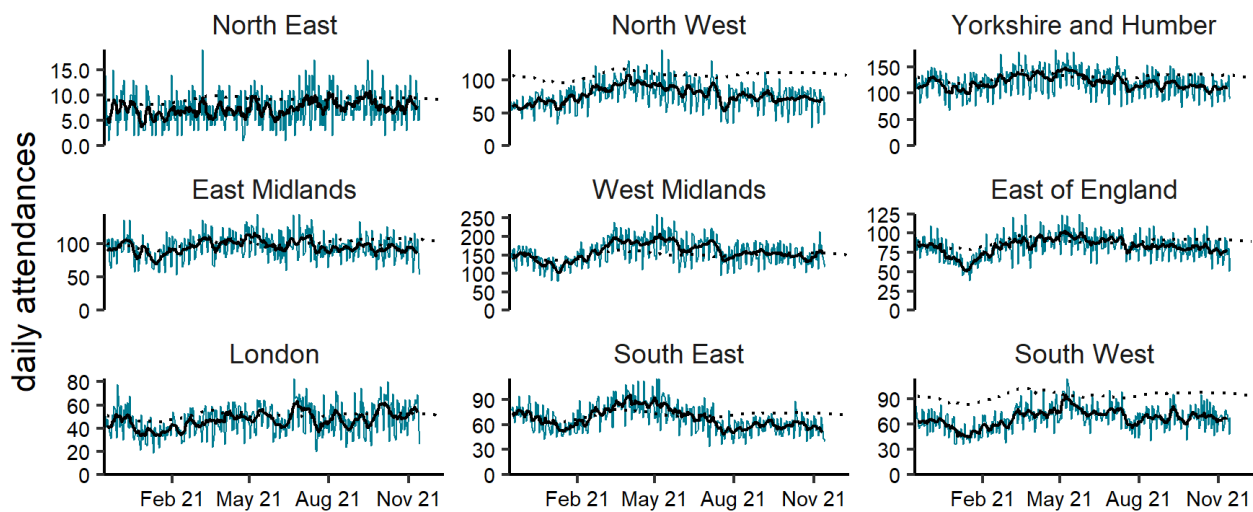

**(b)** Cardiac conditions by age group (years) 15/11/2020 - 14/11/2021

(c)

Cardiac conditions by region 15/11/2020 - 14/11/2021

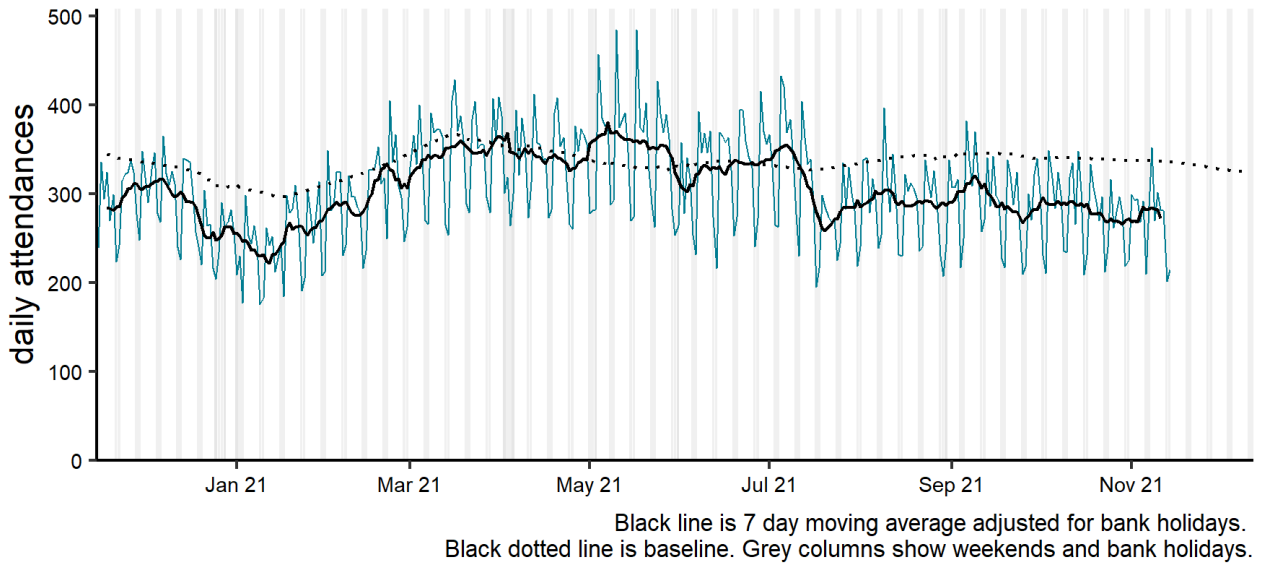

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.  
Black dotted line is baseline.

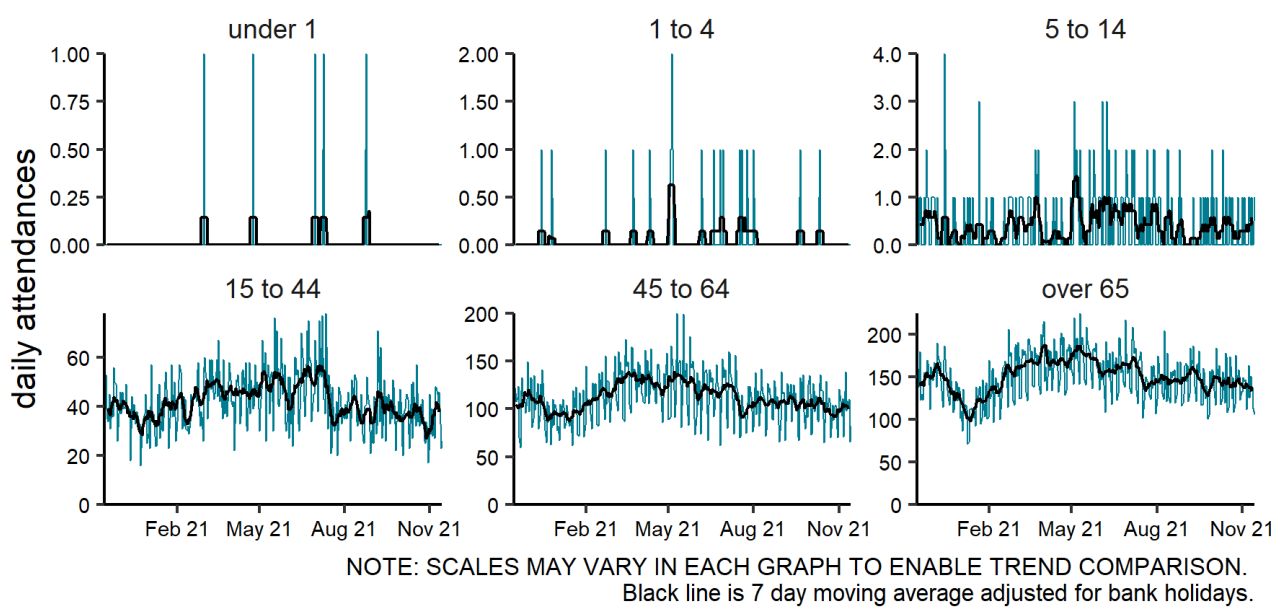

# Myocardial ischaemia

**Figure 10: Daily number of myocardial ischaemia ED attendances (and 7-day moving average adjusted for bank holidays), England (a) nationally, (b) by age and (c) by UKHSA Region.**

**(a)** Myocardial ischaemia 15/11/2020 - 14/11/2021

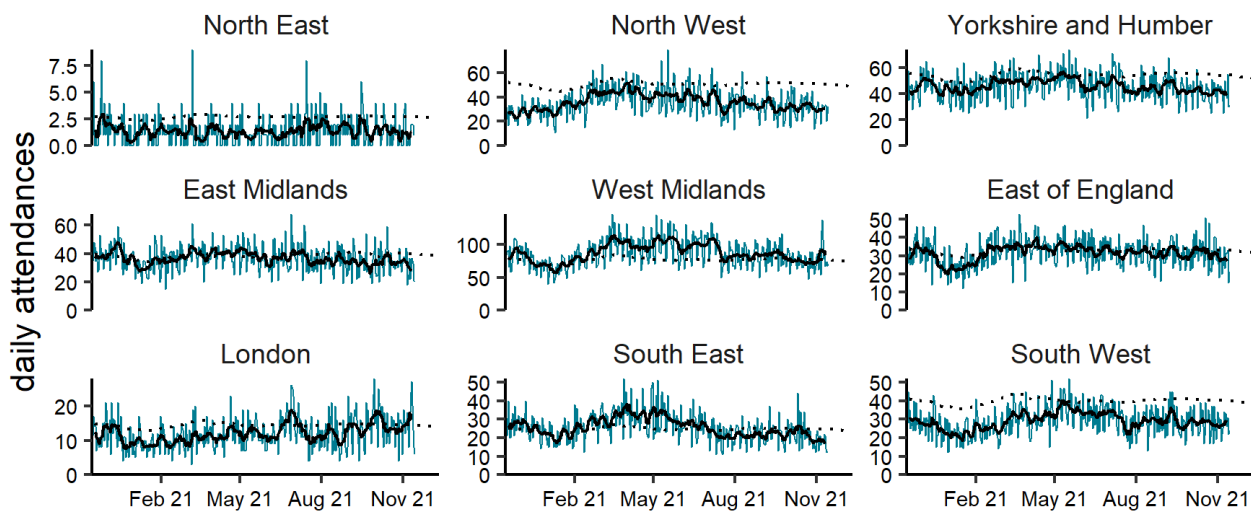

**(b)** Myocardial ischaemia by age group (years) 15/11/2020 - 14/11/2021

(c)

Myocardial ischaemia by region 15/11/2020 - 14/11/2021

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.  
Black dotted line is baseline.

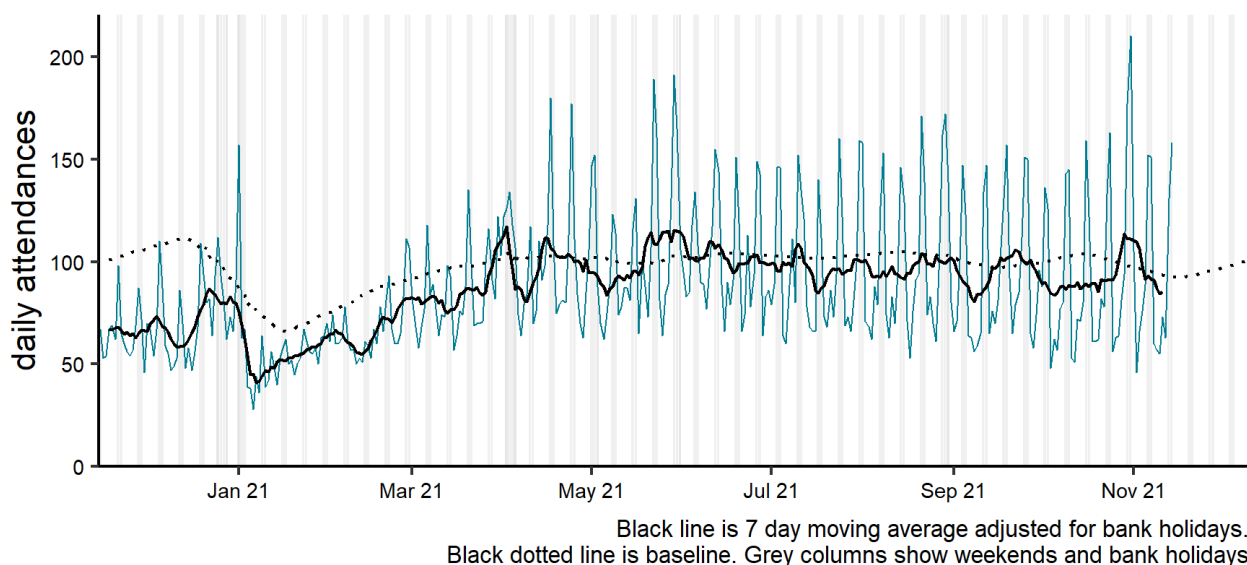

# Other conditions

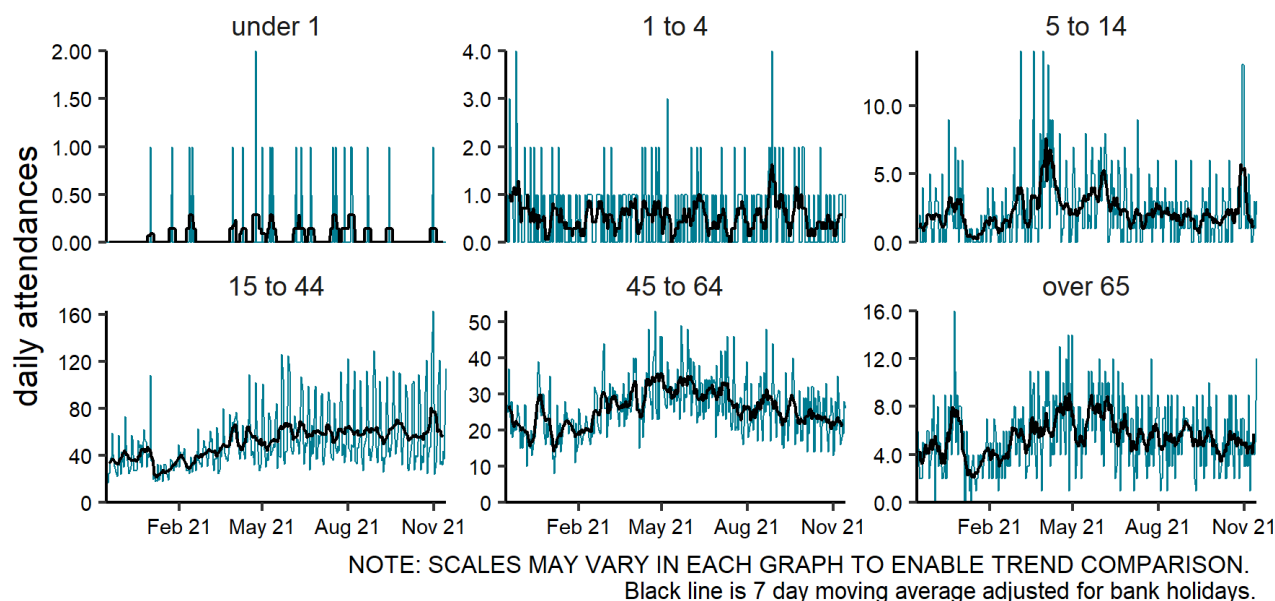

## Acute alcohol intoxication

**Figure 11: Daily number of acute alcohol intoxication ED attendances (and 7-day moving average adjusted for bank holidays), England (a) nationally, (b) by age and (c) by UKHSA Region.**

**(a)** Acute alcohol intoxication 15/11/2020 - 14/11/2021

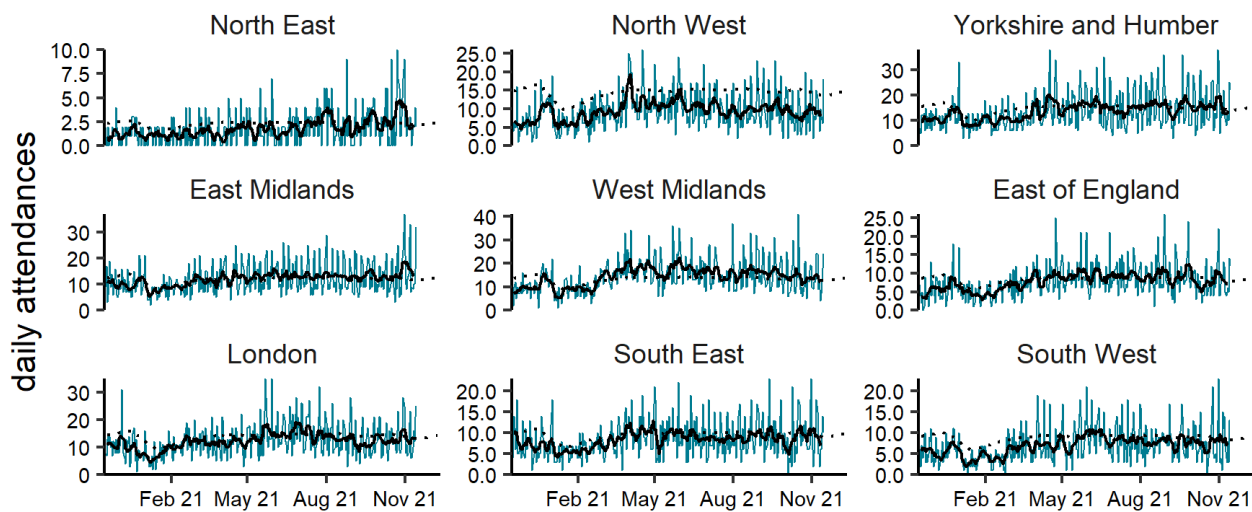

**(b)** Acute alcohol intoxication by age group (years) 15/11/2020 - 14/11/2021

(c)

Acute alcohol intoxication by region 15/11/2020 - 14/11/2021

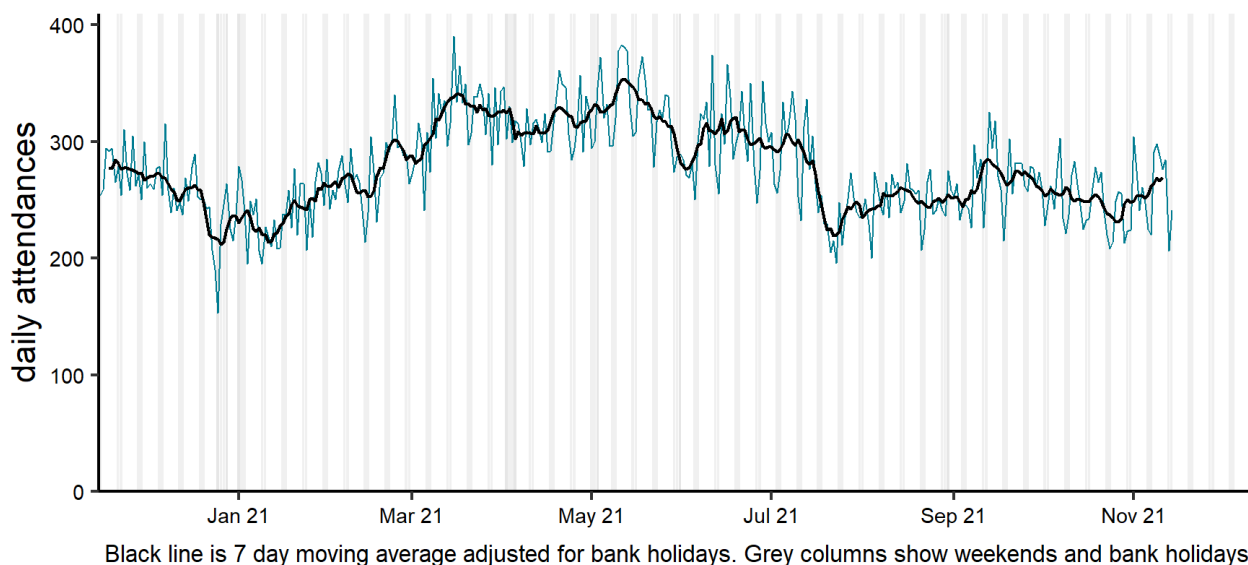

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.  
Black dotted line is baseline.

## Mental health

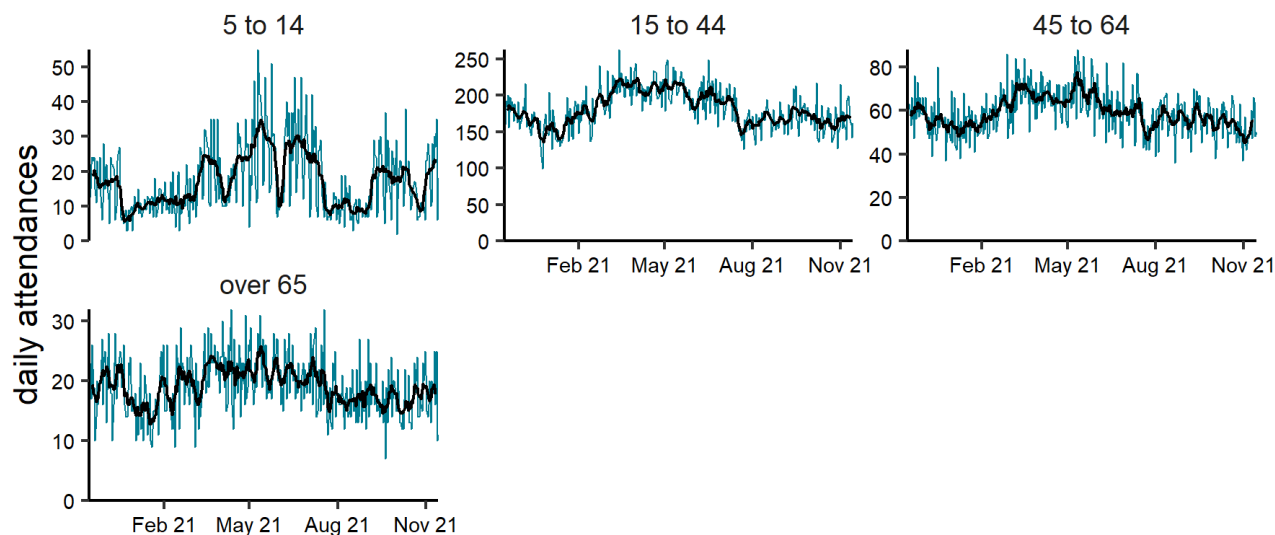

**Figure 12: Daily number of mental health<sup>3</sup> ED attendances (and 7-day moving average adjusted for bank holidays), England (a) nationally, (b) by age and (c) by UKHSA Region.**

<sup>3</sup> mental health attendances reported here are those with a primary diagnosis in the ECDS mental health diagnosis grouping. Attendances where the primary diagnosis relates to overdose, alcohol use or self harm are not included.

**(a)** Mental health 15/11/2020 - 14/11/2021

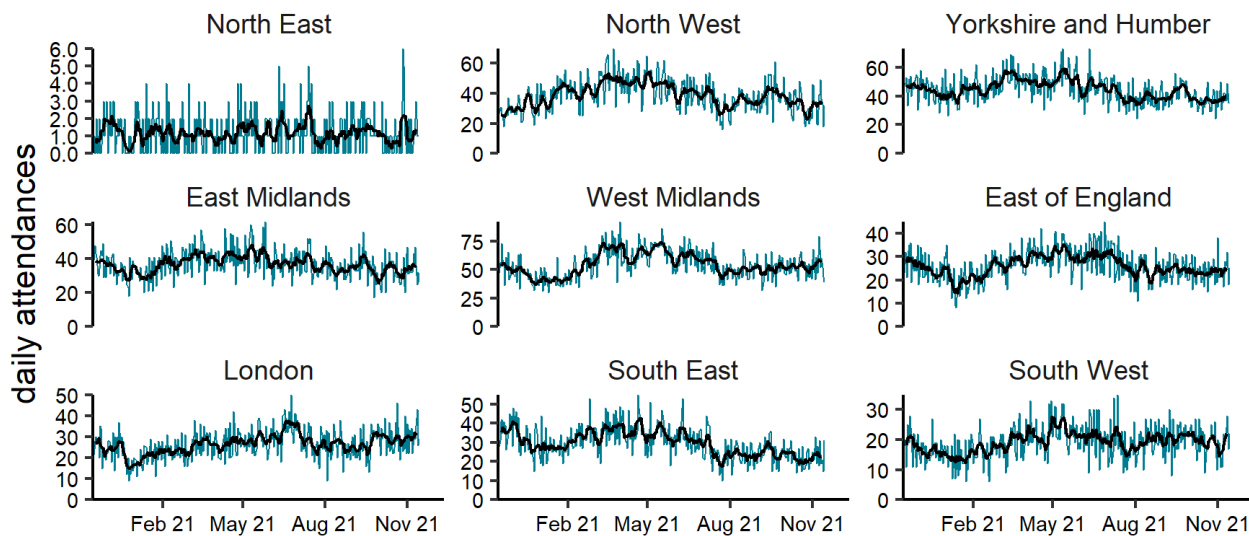

**(b)** Mental health by age group (years) 15/11/2020 - 14/11/2021

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON. Black line is 7 day moving average adjusted for bank holidays.

(c)

Mental health by region 15/11/2020 - 14/11/2021

NOTE: SCALES MAY VARY IN EACH GRAPH TO ENABLE TREND COMPARISON.  
Black line is 7 day moving average adjusted for bank holidays.

## Seasonal environmental conditions

During set periods of the year the Met Office operates both heat and cold weather watch systems, in association with UKHSA. Syndromic indicators are used to monitor the impact of both extreme hot and cold weather in England during these periods and will be included below (where an appropriate syndromic indicator is available).

[Cold weather alert](#) period: 1 November to 31 March

[Heat-Health Alert](#) period: 1 June to 15 September

Weather alert level (current reporting week): **Level 1 - Winter Preparedness and action**

## Notes and caveats

The following additional caveats apply to the UKHSA emergency department syndromic surveillance system:

- the data presented are based on a national syndromic surveillance system:
  - should be used to monitor trends not to estimate numbers of ‘cases’
  - an automated daily transfer of anonymised ED data is received from NHS Digital, from the [Emergency Care Data Set](#) (ECDS)
  - not all EDs currently provide data on a daily basis, EDs are eligible for inclusion in this report only where:
    - data relates to attendances at a type 01 ED
    - data for 7 of the 7 most recent days was received
    - data for those days was received within 2 calendar days of the patient arrival
  - when an ED meets these criteria, all historical data from that ED is included
  - EDs included each week is likely to change, which will affect the historical data inclusion
  - national coverage each week is included in **Table 2**,
  - the number of EDs in each region area is described in **Table 3**
- individual EDs will not be identified in these bulletins
- some syndromic indicators are hierarchical:
  - acute respiratory infections includes:
    - COVID-19-like
    - acute bronchitis or bronchiolitis
    - other and non-specific acute respiratory infections
    - influenza-like illness
    - pneumonia
  - cardiac conditions includes:
    - myocardial ischaemia
    - other and non-specific cardiac conditions
- baselines:
  - were last remodelled April 2021
  - are constructed from historical data since April 2018
  - represent seasonally expected levels of activity
  - take account of any known substantial changes in data collection, population coverage or reporting practices:
    - the COVID-19 pandemic period is excluded, to show seasonally expected levels if COVID-19 had not occurred
  - may be remodelled to include the impacts seen during periods of the COVID-19 pandemic if/when appropriate due to introduction of large scale public health interventions which may affect ED attendance levels

## Acknowledgements

We are grateful to the clinicians in each ED and other staff within each Trust for their continued involvement in the EDSSS.

We thank the Royal College of Emergency Medicine, NHS Digital and NHS England for their support in the development of national EDSSS, using anonymised data collection from ECDS.
