

## Statistical Release

The latest provisional monthly energy production, consumption and prices statistics produced by the Department for Business, Energy and Industrial Strategy were released on 23 December 2021.

Energy production and consumption statistics are provided in total and by fuel and provide an analysis of the latest 3 months data compared to the same period a year earlier. Energy price statistics cover domestic price indices, prices of road fuels and petroleum products and comparisons of international road fuel prices.

### **Energy production and consumption**

Highlights for the 3-month period August 2021 to October 2021, compared to the same period a year earlier include:

- **Primary energy consumption in the UK on a fuel input basis rose by 2.3%, with petroleum consumption increasing each month from April 2021 compared to 2020 as lockdown restrictions have been eased. On a temperature adjusted basis consumption rose by 4.6%. ([table ET 1.2](#) and [table ET 3.13](#))**
- **Indigenous energy production fell by 2.8%, but with UKCS production returning to more normal levels following maintenance, whilst renewables output remained low due to less favourable weather conditions. ([table ET 1.1](#))**
- **Electricity generation by Major Power Producers down 6.7%, with coal up sharply but gas down 10% in the last 3 months, whilst nuclear down 9.0% due to outages and renewables down 5.3% due to less favourable weather (mainly wind) conditions.\* ([table ET 5.4](#))**
- **Gas provided 43.4% of electricity generation by Major Power Producers, with renewables at 36.1%, nuclear at 17.5% and coal at 2.0%.\* ([table ET 5.4](#))**
- **Low carbon share of electricity generation by Major Power Producers was unchanged at 53.5%, whilst fossil fuel share of electricity generation stood at 45.8%.\* ([table ET 5.4](#))**

\*Major Power Producers (MPPs) data published monthly, all generating companies data published quarterly.

### **Energy prices**

Highlights for December 2021 compared to November 2021:

- **Petrol prices down 0.3 pence per litre, whilst diesel prices down 0.6 pence per litre. ([table QEP 4.1.1](#))**

Press enquiries: Tel: 020 7215 1000

## Data periods and coverage

*Statistics on monthly production and consumption of coal, electricity, gas, oil and total energy include data for the UK for the period up to the end of October 2021.*

*Statistics on average temperatures, heating degree days, wind speeds, sun hours and rainfall include data for the UK for the period up to the end of November 2021.*

*Statistics on energy prices include retail price data for the UK for November 2021, and petrol & diesel data for December 2021, with EU comparative data for November 2021.*

## Next release

*The next release of provisional monthly energy statistics will take place on Thursday 27 January 2022.*

## Data tables

*To access the data tables associated with this release please click on the relevant subject link(s) below. For further information please use the contact details provided.*

*Please note that the links below will always direct you to the latest published data tables. If you are interested in historical data tables, please contact BEIS ([kevin.harris@beis.gov.uk](mailto:kevin.harris@beis.gov.uk)).*
