| <b>Counterfeit</b>                          | No   |
| <b>Risk Level</b>                           | Medium   |
| <b>Risk Type</b>                            | Ingestion  |
| <b>Risk Description</b>                     | <p>The product presents a medium risk of ingestion as no warnings were present that these products should not be worn on other body parts, such as inside the nose or mouth. The Jewellery may be positioned so that both magnets are worn inside the mouth, for example, either side of the tongue. If two or more magnets are swallowed, there is a risk that the magnets become drawn to each other in the digestive system, which could cause severe injury or death if rapid medical attention is not sought. 4 individual studs were tested equating to 8 magnets. 2 back magnets and 1 front magnet were above the 50 kG2mm2 parameter.</p> |
| <b>Corrective Measures</b>                  | The product has been voluntarily withdrawn from the market.  |
