

Construction noise and vibration Monthly Report – December 2021

Warwick District Council

Non-Technical Summary	1
Abbreviations and Descriptions	3
1 Introduction	4
1.2 Measurement Locations	6
2 Summary of Results	7
2.1 Summary of Measured Noise and Vibration Levels	7
2.2 Exceedances of the LOAEL and SOAEL	10
2.3 Exceedances of Trigger Level	13
2.4 Complaints	13
Appendix A Site Locations	14
Appendix B Monitoring Locations	21
Appendix C Data	27
List of tables	
Table 1: Table of Abbreviations	3
Table 2: Monitoring Locations	6
Table 3: Summary of Measured dB L_{Aeq} Data over the Monitoring Period	8
Table 4: Summary of Exceedances of LOAEL and SOAEL	11
Table 5: Summary of Exceedances of Trigger Levels	13
Table 6: Summary of Complaints	13

Non-Technical Summary

This Noise and Vibration Monitoring Report fulfils HS2 Limited's commitment detailed in the Environmental Minimum Requirements (EMRs), Annex 1, Code of Construction Practice, to present the results of noise and vibration monitoring carried out within Warwick District Council (WDC) area during the month of December 2021.

Within this period monitoring was undertaken at the following worksites:

- Noise monitoring were undertaken at the Burton Green Tunnel worksite (ref.: BGT), where work activities included concrete pouring and water pumping works.
- Noise monitoring was undertaken at Bockenden Cutting (ref.: BC), where work activities included installation of temporary fencing and water pumping works.
- Noise monitoring was undertaken at the A429 Kenilworth Road Overbridge (ref.: A429KRO), where no work activities were underway.
- Noise monitoring was undertaken at the A46 Compound (ref.: A46C), where work activities included installation of drainage sump, movement of compound and construction of road tie-in.
- Noise monitoring was undertaken at the Stoneleigh Park (ref.: SP), where no work activities were underway.
- Noise monitoring was undertaken at the Cubbington Road (ref.: CR), where no work activities were underway.
- Noise monitoring was undertaken at Fosseway Diversion (ref.: FD), where work activities included roadworks and utility works.
- Noise monitoring was undertaken at Offchurch Cutting (ref.: OC), where work activities included:
 - In the Valley Field area: Pond construction and fencing, temporary drainage construction and filling of embankment earthworks.
 - in the Offchurch Cutting central area: Draining of reservoir, earthworks at reservoir, cutting of temporary ramp and ground investigation which included boreholes and trial pits.
 - In the Welsh Road area: Earthworks, conveyor belt construction and road widening.

Further works, where monitoring did not take place, were also undertaken at:

- Burton Green, as part of water utility works.
- Burton Green, as part of power utility works.

There were two exceedances of the HS2 threshold levels for significant noise impacts, which are defined in Information Paper E23 (<https://www.gov.uk/government/publications/hs2-information-papers-environment>), during the reporting period.

There were no exceedances of trigger levels as defined in Section 61 consents during the reporting period at any monitoring position.

One complaint was received during the monitoring period. A description of the complaint, the results of investigations and any actions taken are detailed in Table 6 of this report.

Abbreviations and Descriptions

The abbreviations, descriptions and project terminology used within this report can be found in Table 1.

Table 1: Table of Abbreviations

Acronym/Term	Definition
$L_{Aeq,T}$	See equivalent continuous sound pressure level
Ambient sound	A description of the all-encompassing sound at a given location and time which will include sound from many sources near and far. Ambient sound can be quantified in terms of the equivalent continuous sound pressure level, $L_{pAeq,T}$
Decibel(s), or dB	Between the quietest audible sound and the loudest tolerable sound there is a million to one ratio in sound pressure (measured in Pascal (Pa)). Because of this wide range, a level scale called the decibel (dB) scale, based on a logarithmic ratio, is used in sound measurement. Audibility of sound covers a range of approximately 0-140dB.
Decibel(s) A-weighted, or dB(A)	The human ear system does not respond uniformly to sound across the detectable frequency range and consequently instrumentation used to measure sound is weighted to represent the performance of the ear. This is known as the 'A weighting' and is written as 'dB(A)'.
Equivalent continuous sound pressure level, or $L_{Aeq,T}$	An index used internationally for the assessment of environmental sound impacts. It is defined as the notional unchanging level that would, over a given period of time (T), deliver the same sound energy as the actual time-varying sound over the same period. Hence fluctuating sound levels can be described in terms of an equivalent single figure value, typically expressed as a decibel level.
Exclusion of data	Measurement of noise levels can be affected by weather conditions such as prolonged periods of rain, winds speeds higher than 5m/s and snow/ice ground cover. Noise levels measured during these periods are considered not representative of normal noise conditions at the site and, for the purposes of this report, are excluded from the assessment of exceedances and calculation of typical noise levels and are also greyed out in charts. Identifiable incongruous noise and vibration events not attributable to HS2 construction noise are also excluded.
Façade	A facade noise level is the noise level 1m in front of a large reflecting surface. The effect of reflection, is to produce a slightly higher (typically +2.5 to +3 dB) sound level than it would be if the reflecting surface was not there.
Free-field	A free-field noise level is the noise level measured at a location where no reflective surfaces, other than the ground, lies within 3.5 metres of the microphone position.
LOAEL	Lowest Observed Adverse Effect Level - the level above which adverse effects on health and quality of life can be detected.
Peak particle velocity, or PPV	Instantaneous maximum velocity reached by a vibrating element as it oscillates about its rest position. The PPV is a simple indicator of perceptibility and risk of damage to structures due to vibration. It is usually measured in mm/s.
SOAEL	Significant Observed Adverse Effect Level - the level above which significant adverse effects on health and quality of life occur.
Sound pressure level	The parameter by which sound levels are measured in air. It is measured in decibels. The threshold of hearing has been set at 0dB, while the threshold of pain is approximately 120dB. Normal speech is approximately 60dB at a distance of 1 metre and a change of 3dB in a time varying sound signal is commonly regarded as being just detectable. A change of 10dB is subjectively twice, or half, as loud.
Vibration dose value, or VDV	An index used to evaluate human exposure to vibration in buildings. While the PPV provides information regarding the magnitude of single vibration events, the VDV provides a measure of the total vibration experienced over a specified period of time (typically 16h daytime and 8h night-time). It takes into account the magnitude, the number and the duration of vibration events and can be used to quantify exposure to continuous, impulsive, occasional and intermittent vibration. The vibration dose value is measured in $m/s^{1.75}$.

1 Introduction

1.1.1 HS2 is required to undertake noise (and vibration) monitoring as necessary to comply with the requirements of the High Speed Rail (London-West Midlands) Environmental Minimum Requirements, including specifically Annex 1: Code of Construction Practice, in addition to any monitoring requirements arising from conditions imposed through consents under Section 61 of the Control of Pollution Act, 1974 or through Undertakings & Assurances given to third parties. Such monitoring may be undertaken for the following purposes:

- monitoring the impact of construction works;
- to investigate complaints, incidents and exceedance of trigger levels; or
- monitoring the effectiveness of noise and vibration control measures.

1.1.2 Monitoring data and interpretive reports are to be provided to each relevant local authority on a monthly basis and shall include a summary of the construction activities occurring, the data recorded over the monitoring period, any complaints received, any periods in exceedance of agreed trigger levels, the results of any investigations and any actions taken or mitigation measures implemented. This report provides noise data, and interpretation thereof, for monitoring carried out by HS2 within the Warwick District Council (WDC) area for the period 1st to 31st December 2021.

1.1.3 Construction sites in the local authority area where monitoring was undertaken during this period include:

- Burton Green Tunnel worksite (ref.: BGT, see plan 1 in Appendix A), where work activities included:
 - concrete pouring; and
 - pumping water from excavation.
- Bockenden Cutting (ref.: BC, see plan 1 in Appendix A), where work activities included:
 - installation of temporary fencing; and
 - water pumping works.
- A429 Kenilworth Road Overbridge (ref.: A429KRO, see plan 2 in Appendix A), where no work activities were underway.
- A46 Compound, (ref.: A429KRO, see plan 3 in Appendix A), where work activities included:
 - installation of drainage sump;

- movement of compound; and
- construction of road tie-in.
- Stoneleigh Park, (ref.: A429KRO, see plan 3 in Appendix A), where no work activities were underway.
- Cubbington Road (ref.: CR, see plan 4 in Appendix B), where no work activities were underway.
- Fosseway Diversion (ref.: FD, see plan 5 in Appendix A), where work activities included:
 - works on the Southern Roundabout; and
 - utility works along Welsh Road .
- Offchurch Cutting worksite (ref.: OC, see plan 5 in Appendix A), where work activities included:
 - In the Valley Field area:
 - pond construction and fencing;
 - temporary drainage construction; and
 - filling of embankment earthworks.
 - In the Offchurch Cutting central area :
 - draining of reservoir;
 - earthworks at reservoir and cutting of temporary ramp; and
 - ground investigation which included boreholes and trial pits.
 - In the Welsh Road area:
 - earthworks for formation of landscape embankment;
 - conveyor belt construction; and
 - road widening on Welsh Road.

1.1.4 Further works, where monitoring did not take place, were also undertaken at:

- Burton Green, as part of water utility works.
- Burton Green, as part of power utility works.

1.1.5 The applicable standards, guidance, and monitoring methodology is outlined in the construction noise and vibration monitoring methodology report which can be found at the following location

<https://www.gov.uk/government/collections/monitoring-the-environmental-effects->

[of-hs2](#). Noise and vibration monitoring reports for previous months can also be found at this location.

1.2 Measurement Locations

1.2.1 Fourteen (14) noise monitoring installations were active in December in the WDC area. Table 2 summarises the position of the noise monitoring installations within the WDC area in December 2021.

1.2.2 Maps showing the position of the noise and vibration monitoring installations are presented in Appendix B.

Table 2: Monitoring Locations

Worksite Reference	Measurement Reference	Address
Burton Green Tunnel (BGT)	BGT-N1	301 Cromwell Lane, Burton Green, Warwick, Warwickshire
	BGT-N2	Broadwell Woods Caravan Park, Red Lane, Burton Green, Warwick, Warwickshire
Bockenden Cutting (BC)	BC-N1	Thistle Estate, Red Lane, Burton Green, Warwick, Warwickshire
A429 Kenilworth Road Overbridge (A429KRO)	A429KRO-N1	Millburn Grange, Coventry Road, Kenilworth
	A429KRO-N2	Brookview, Milburn Grange, Coventry Road, Kenilworth
	A429KRO-N3	16 Kenilworth Road, Kenilworth
A46 Compound (A46C)	A46C-N1	Kingswood Farmhouse, Dalehouse Lane, Kenilworth
Stoneleigh Park (SP)	SP-N2	Stoneleigh Park, Kenilworth
Cubbington (CR)	CR-N1	Wychwood, Cubbington Road, Leamington Spa
Fosseway Diversion (FD)	FD-N1	Burnt Heath Cottages Long Itchington Rd, Offchurch, Leamington Spa
	FD-N2	Spring Hill Cottages Fosseway, Offchurch, Leamington Spa
Offchurch Cutting (OC)	OC-N1	Welsh Road, Offchurch, Leamington
	OC-N2	Valley Fields, Offchurch, Leamington Spa
	OC-N3	Brickyard Cottage, Welsh Road, Offchurch, Warwick

2 Summary of Results

2.1 Summary of Measured Noise and Vibration Levels

2.1.1 Table 3 presents a summary of the measured noise levels at each monitoring location over the reporting period. The $L_{Aeq,T}$ is presented for each of the relevant time periods averaged over the calendar month, along with the highest single period $L_{Aeq,T}$ that was found to occur within the month.

Table 3: Summary of Measured dB L_{Aeq} Data over the Monitoring Period

Worksite Reference	Measurement Reference	Site Address	Free-field or Façade Measurement	Weekday Average L _{Aeq,T} (highest day L _{Aeq,T})					Saturday Average L _{Aeq,T} (highest day L _{Aeq,T})					Sunday / Public Holiday Average L _{Aeq,T} (highest day L _{Aeq,T})	
				0700 - 0800	0800 - 1800	1800 - 1900	1900 - 2200	2200 - 0700	0700 - 0800	0800 - 1300	1300 - 1400	1400 - 2200	2200 - 0700	0700 - 2200	2200 - 0700

OFFICIAL

2.1.2 Appendix C presents graphs of the noise monitoring data over the month for each of the measurement locations. Noise data presented consists of the hourly L_{Aeq} values and, where relevant, the $L_{Aeq,T}$ values (where the time period T has been taken to be the averaging period as specified in Table 1 of HS2 Information Paper E23). The full data set for the monitoring equipment can be found at the following location: <https://data.gov.uk/dataset/24542ae7-dd44-444f-b259-871c4cc43b5e/environmental-monitoring-data>.

2.2 Exceedances of the LOAEL and SOAEL

2.2.1 The lowest observed adverse effect level (LOAEL) is defined in the Planning Practice Guidance – Noise (PPG) as the level above which "noise starts to cause small changes in behaviour and/or attitude, e.g. turning up volume of television; speaking more loudly; where there is no alternative ventilation, having to close windows for some of the time because of the noise. Potential for some reported sleep disturbance. Affects the acoustic character of the area such that there is a perceived change in the quality of life".

2.2.2 The significant observed adverse effect level (SOAEL) is defined in the 'Planning Practice Guidance – Noise' as the level above which "noise causes a material change in behaviour and/or attitude, e.g. avoiding certain activities during periods of intrusion; where there is no alternative ventilation, having to keep windows closed most of the time because of the noise. Potential for sleep disturbance resulting in difficulty in getting to sleep, premature awakening and difficulty in getting back to sleep. Quality of life diminished due to change in acoustic character of the area."

2.2.3 HS2 Phase One Information Paper E23: Control of Construction Noise and Vibration sets out the LOAELs and SOAELs for construction noise.

2.2.4 Where reported construction noise levels exceed the LOAEL and SOAEL, relevant periods will be identified. Summary statistics to evaluate ongoing qualification for noise insulation and temporary rehousing are also presented where relevant.

2.2.5 Table 4 presents a summary of recorded exceedances of the LOAEL and SOAEL at each measurement location over the reporting period, including the number of exceedances during each time period.

Table 4: Summary of Exceedances of LOAEL and SOAEL

Worksite Reference	Measurement Reference	Site Address	Day (Weekday, Saturday, Sunday, Night)	Time period	Number of exceedances of LOAEL	Number of exceedances of SOAEL
BGT	BGT-N1*	301 Cromwell Lane, Burton Green, Warwick, Warwickshire	All days	All periods	No exceedances	No exceedances
	BGT-N2*	Broadwell Woods Caravan Park, Red Lane, Burton Green, Warwick, Warwickshire	Saturday	0800-1300	1	No exceedances
BC	BC-N1*	Thistle Estate, Red Lane, Burton Green, Warwick, Warwickshire	All days	All periods	No exceedances	No exceedances
A429KRO	A429KRO -N1*	Millburn Grange, Coventry Road, Kenilworth	All days	All periods	No exceedances	No exceedances
	A429KRO -N2*	Brookview, Milburn Grange, Coventry Road, Kenilworth	All days	All periods	No exceedances	No exceedances
	A429KRO -N3*	16 Kenilworth Road, Kenilworth	All days	All periods	No exceedances	No exceedances
A46C	A46C-N1	Kingswood Farmhouse, Dalehouse Lane, Kenilworth	Weekday	0800-1800	1	No exceedances
SP	SP-N2	Stoneleigh Park, Kenilworth	All days	All periods	No exceedances	No exceedances
CR	CR-N1	Wychwood, Cubbington Road, Lillington, Leamington Spa	All days	All periods	No exceedances	No exceedances

Worksite Reference	Measurement Reference	Site Address	Day (Weekday, Saturday, Sunday, Night)	Time period	Number of exceedances of LOAEL	Number of exceedances of SOAEL
FD	FD-N1	Burnt Heath Cottages Long Itchington Rd, Offchurch, Leamington Spa	All days	All periods	No exceedances	No exceedances
	FD-N2	Spring Hill Cottages Fosse Way, Offchurch, Leamington Spa	Weekday Saturday	0800-1800 0800-1300	13 2	No exceedances No exceedances
OC	OC-N1*	Welsh Road, Offchurch, Leamington,	All days	All periods	No exceedances	No exceedances
	OC-N2*	Valley Fields, Hunningham Road, Offchurch, Leamington Spa	All days	All periods	No exceedances	No exceedances
	OC-N3	Brickyard Cottage, Welsh Road, Offchurch, Warwick	All days	All periods	No exceedances	No exceedances

* A distance correction has been applied while calculating exceedances of the LOAEL and SOAEL.

2.2.6 No exceedance of the SOAEL was recorded due to HS2 construction works during December 2021. LOAEL exceedances have been recorded at noise monitoring location ref.: BGT-N2, ref.: A46C-N1 and ref.: FD-N2 during core hours.

2.3 Exceedances of Trigger Level

2.3.1 Table 5 provides a summary of exceedances of the Section 61 trigger noise levels determined to be due to HS2 related construction noise measured during the reporting period, along with the findings of any investigation.

Table 5: Summary of Exceedances of Trigger Levels

Complaint Reference Number (if applicable)	Worksite Reference	Date and Time Period	Identified Source	Results of Investigation (including noise monitoring results)	Actions Taken
-	-	-	-	-	-

2.4 Complaints

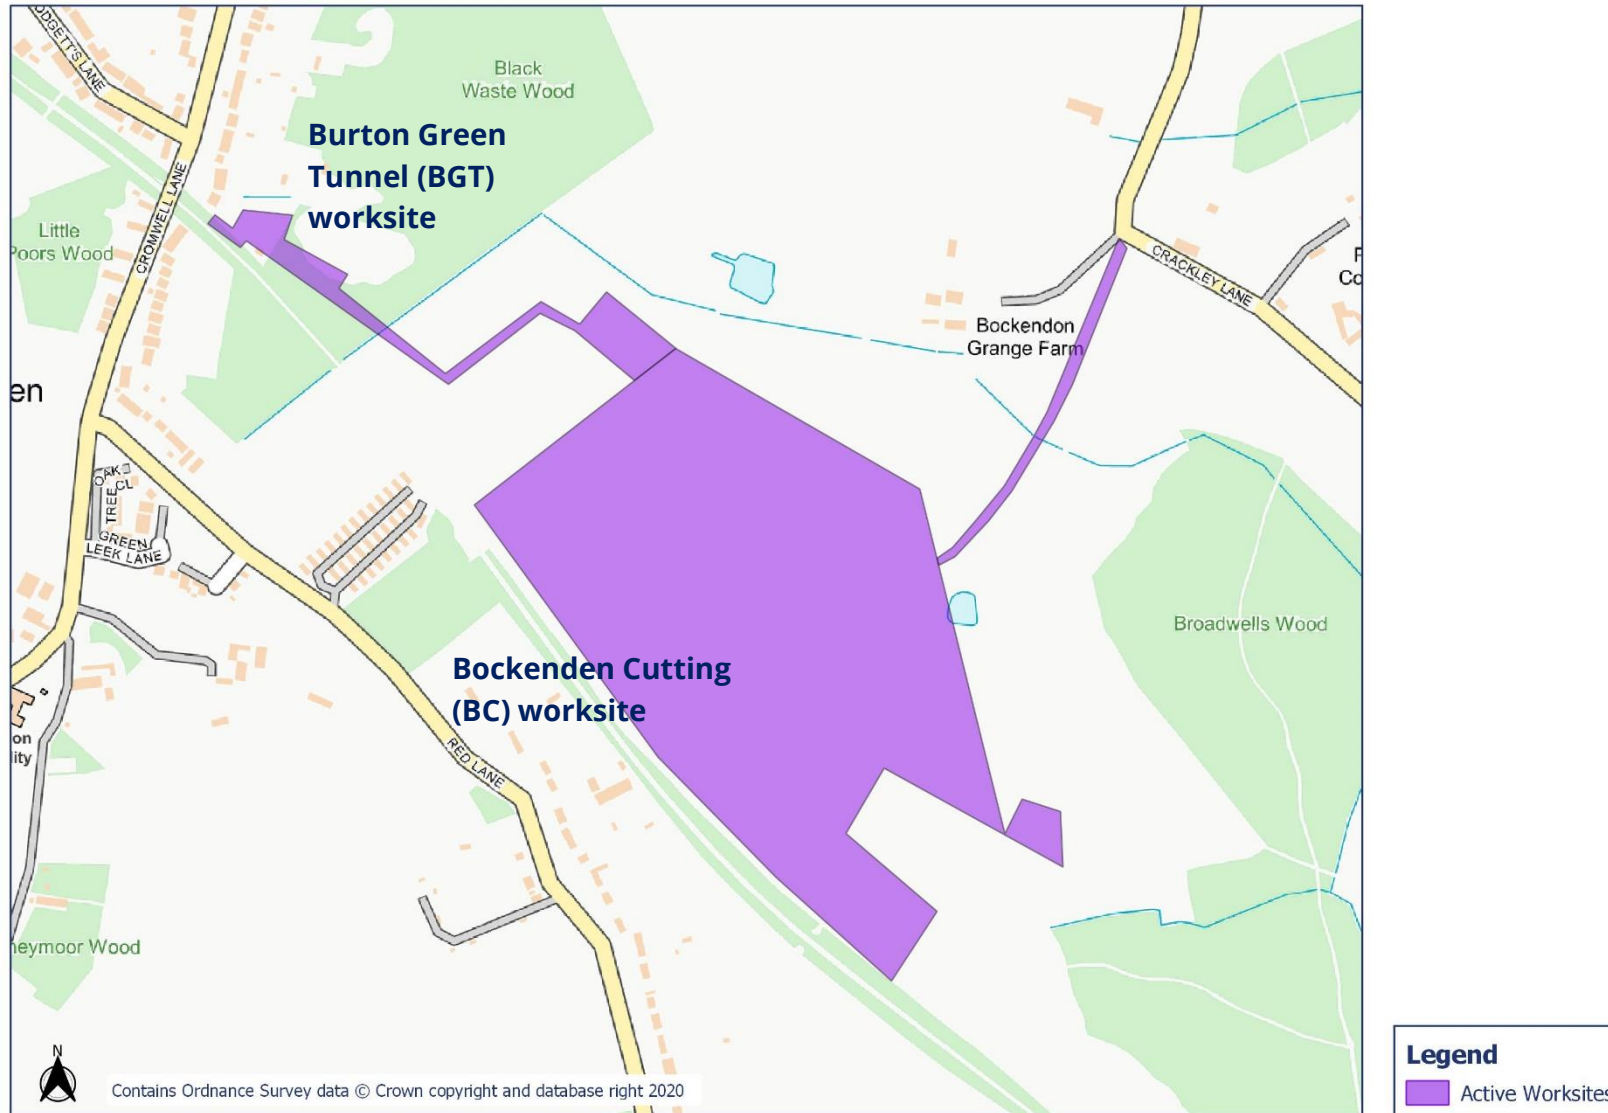

2.4.1 Table 6 provides a summary of complaint information related to noise and vibration received during the reporting period, along with the findings of any investigation.

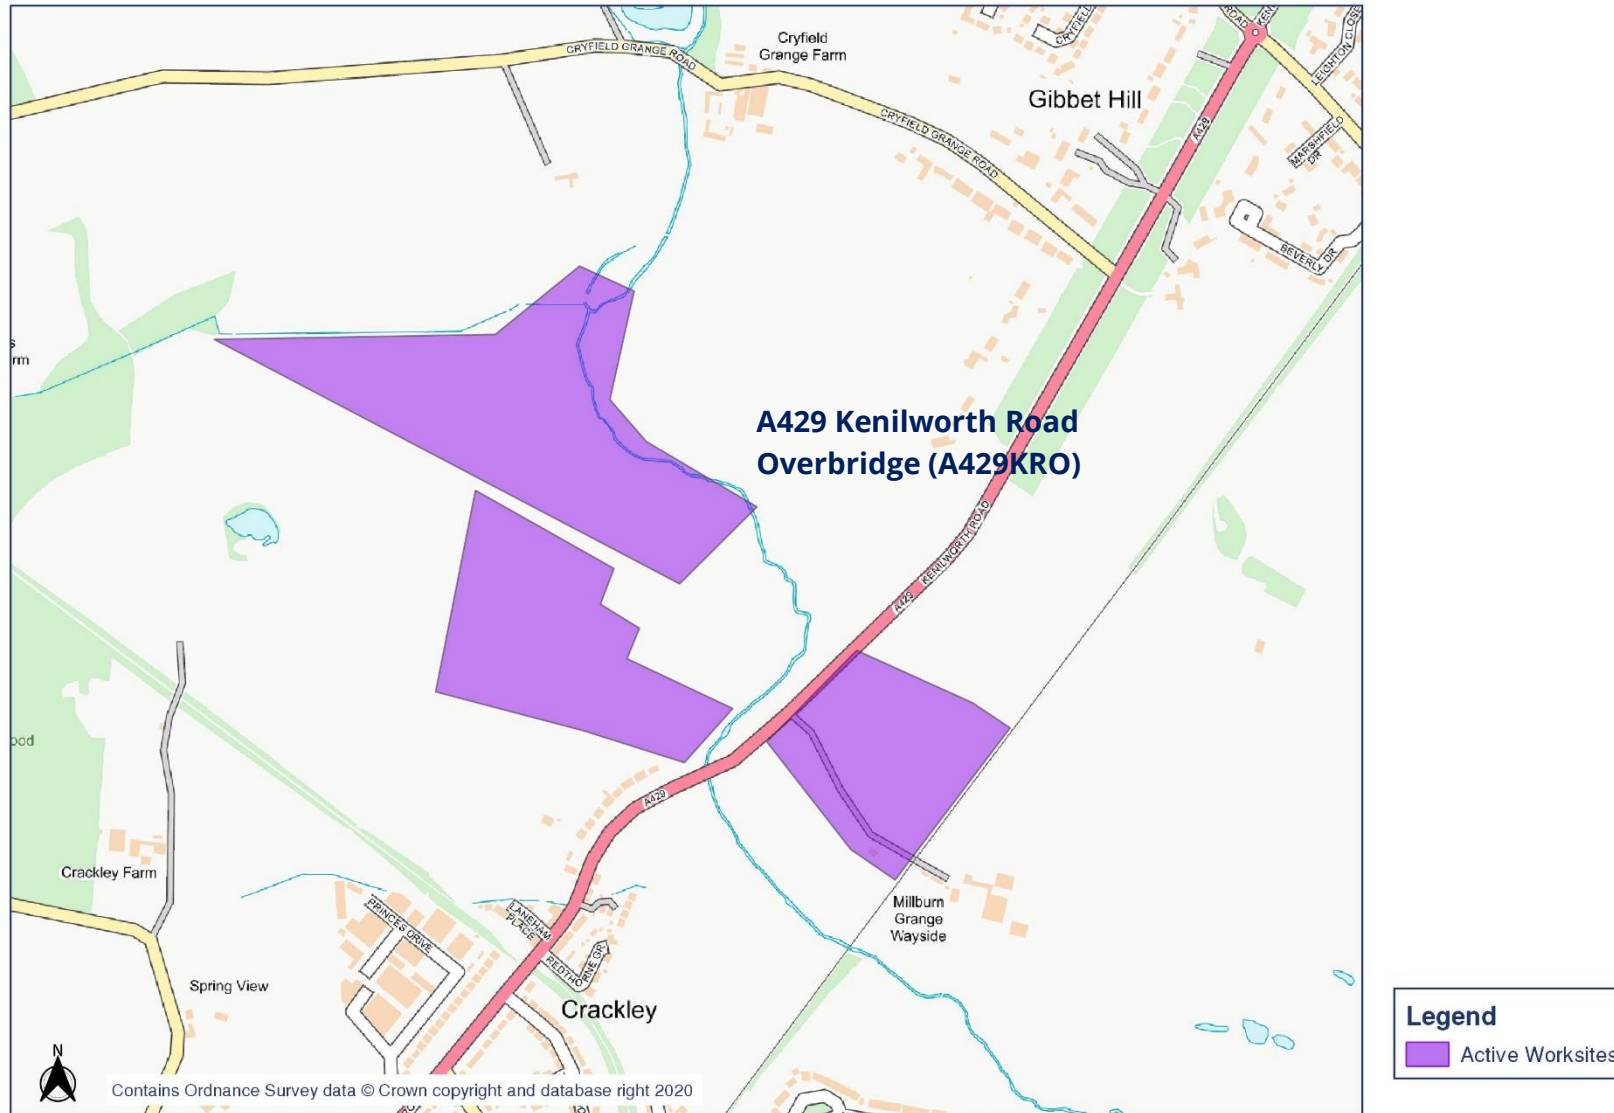

Table 6: Summary of Complaints

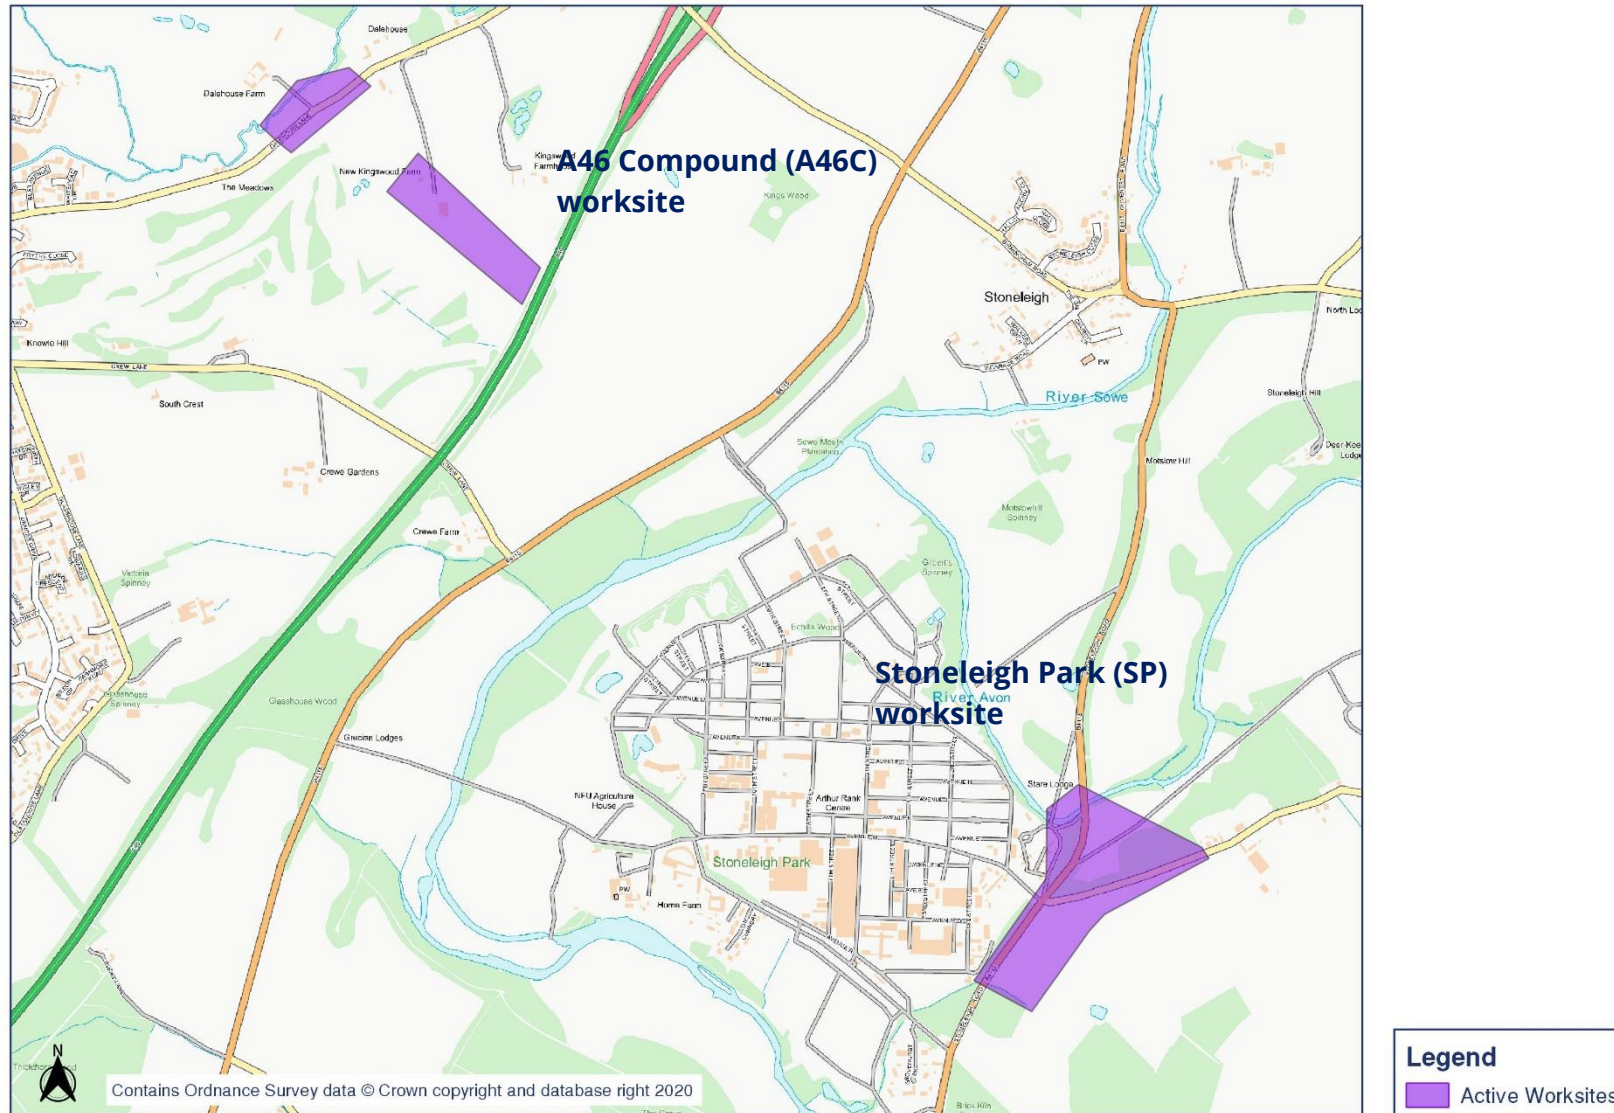

Complaint Reference Number	Worksite Reference	Description of Complaint	Results of Investigation	Actions Taken
HS2-21-43047-C	A46C	Complaint regarding early morning noise disturbance on two occasions from the horn of a reversing lorry.	Investigation with project team established noise did not emanate from local HS2 works. Unable to establish source of noise.	Complaint was closed as it is not related to HS2 works.

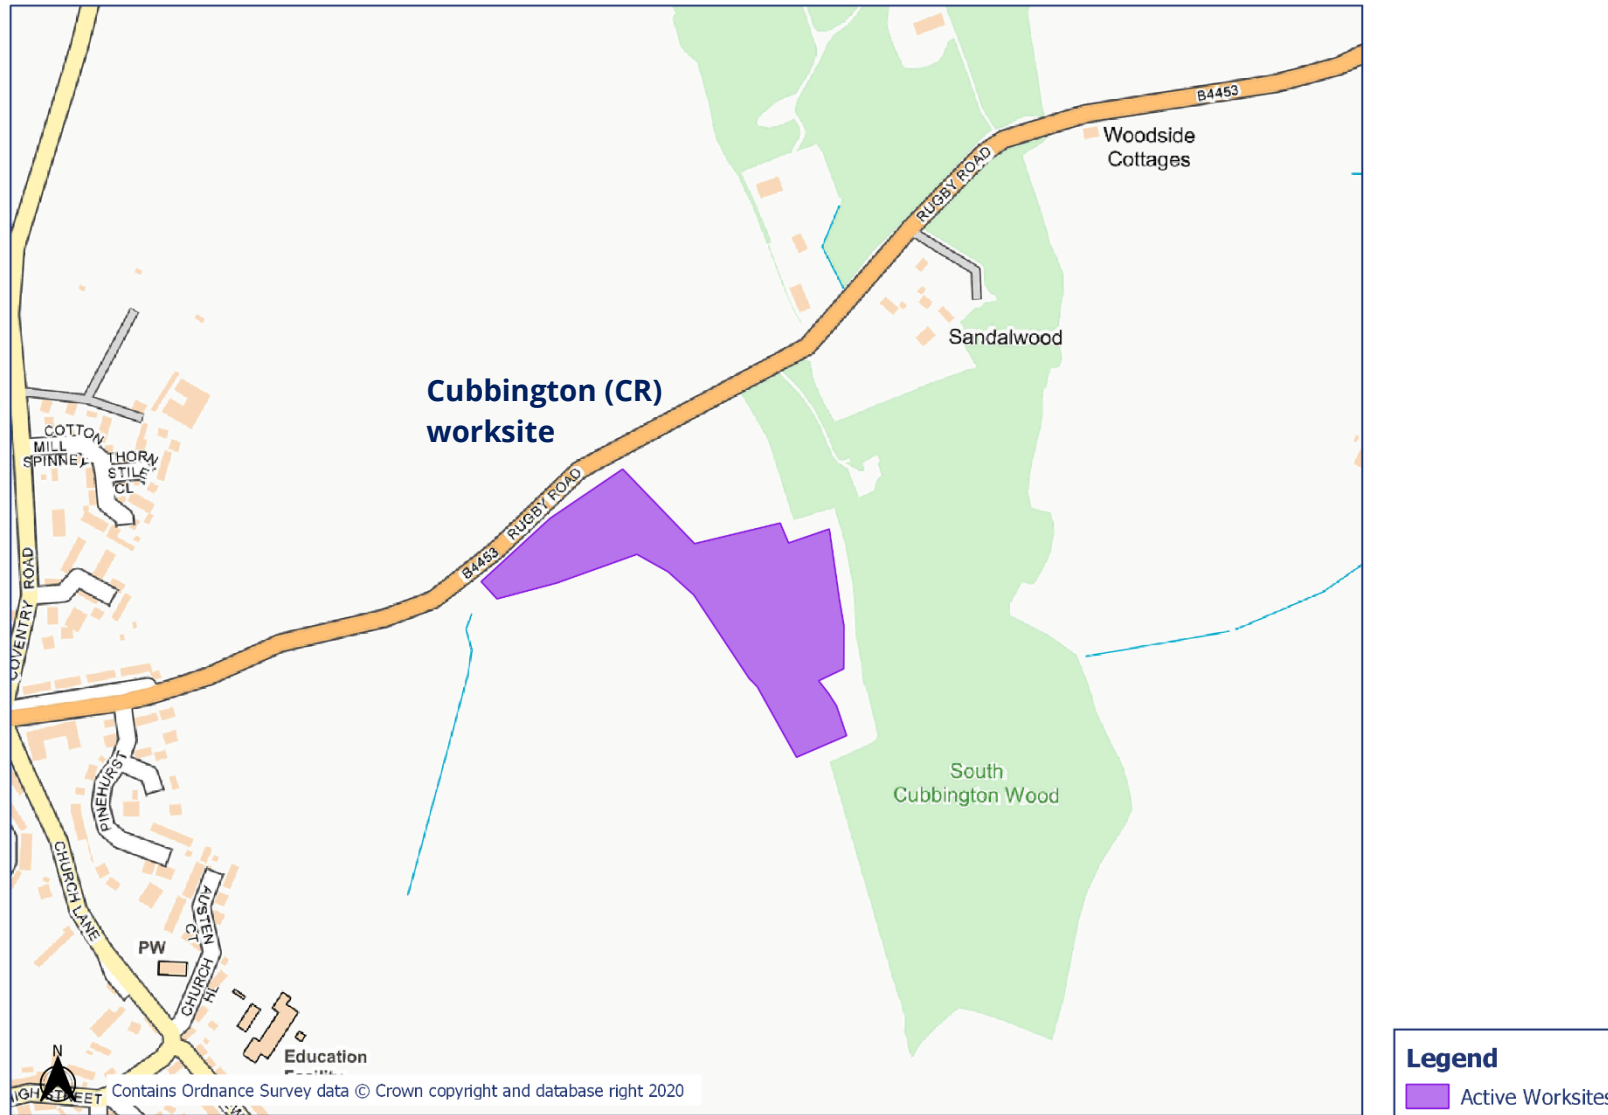

Appendix A Site Locations

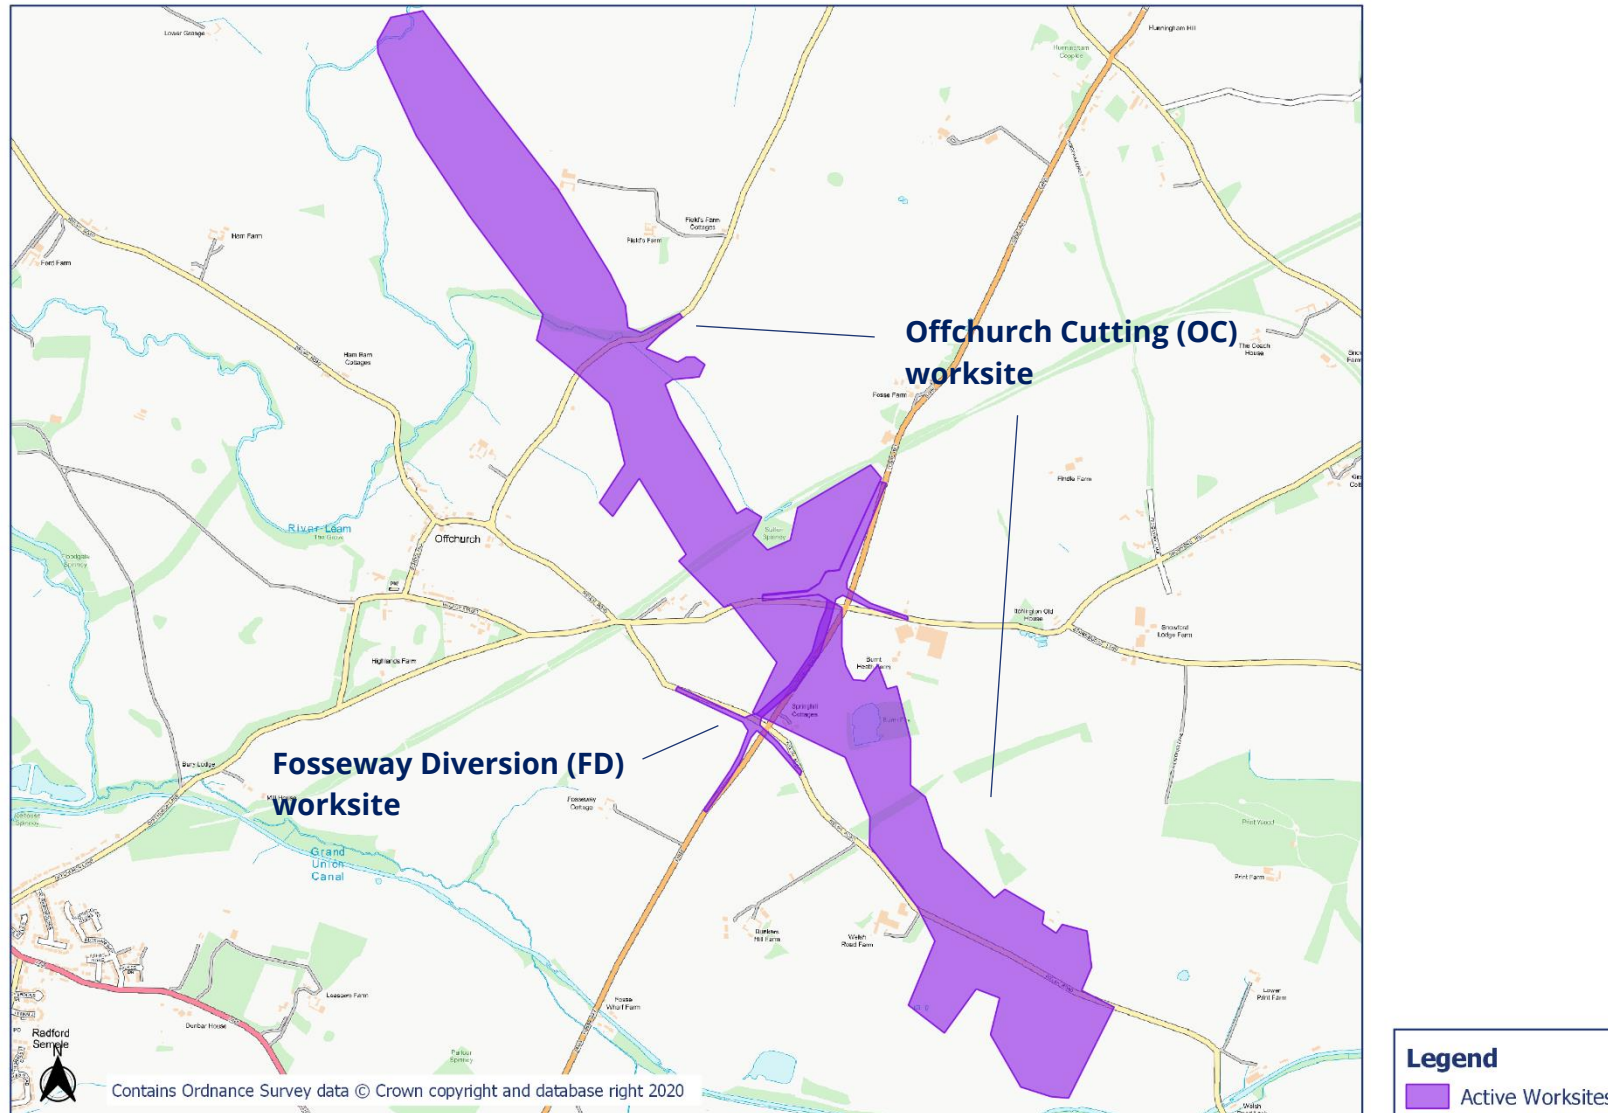

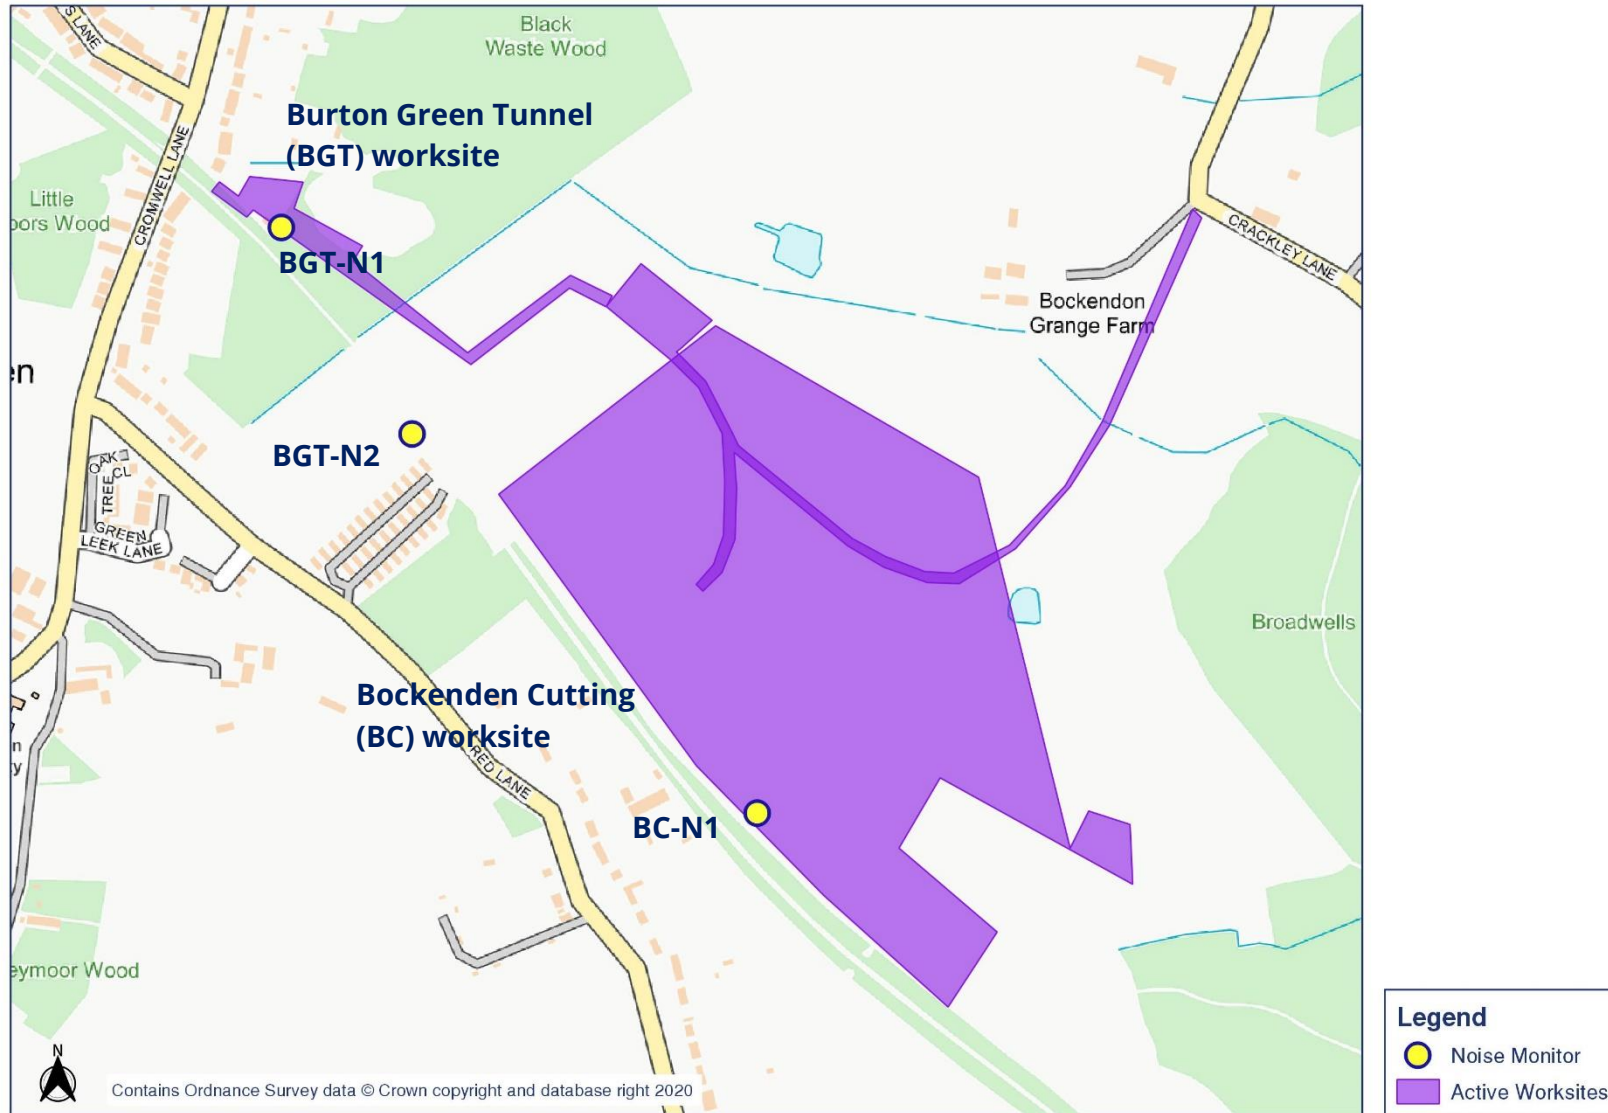

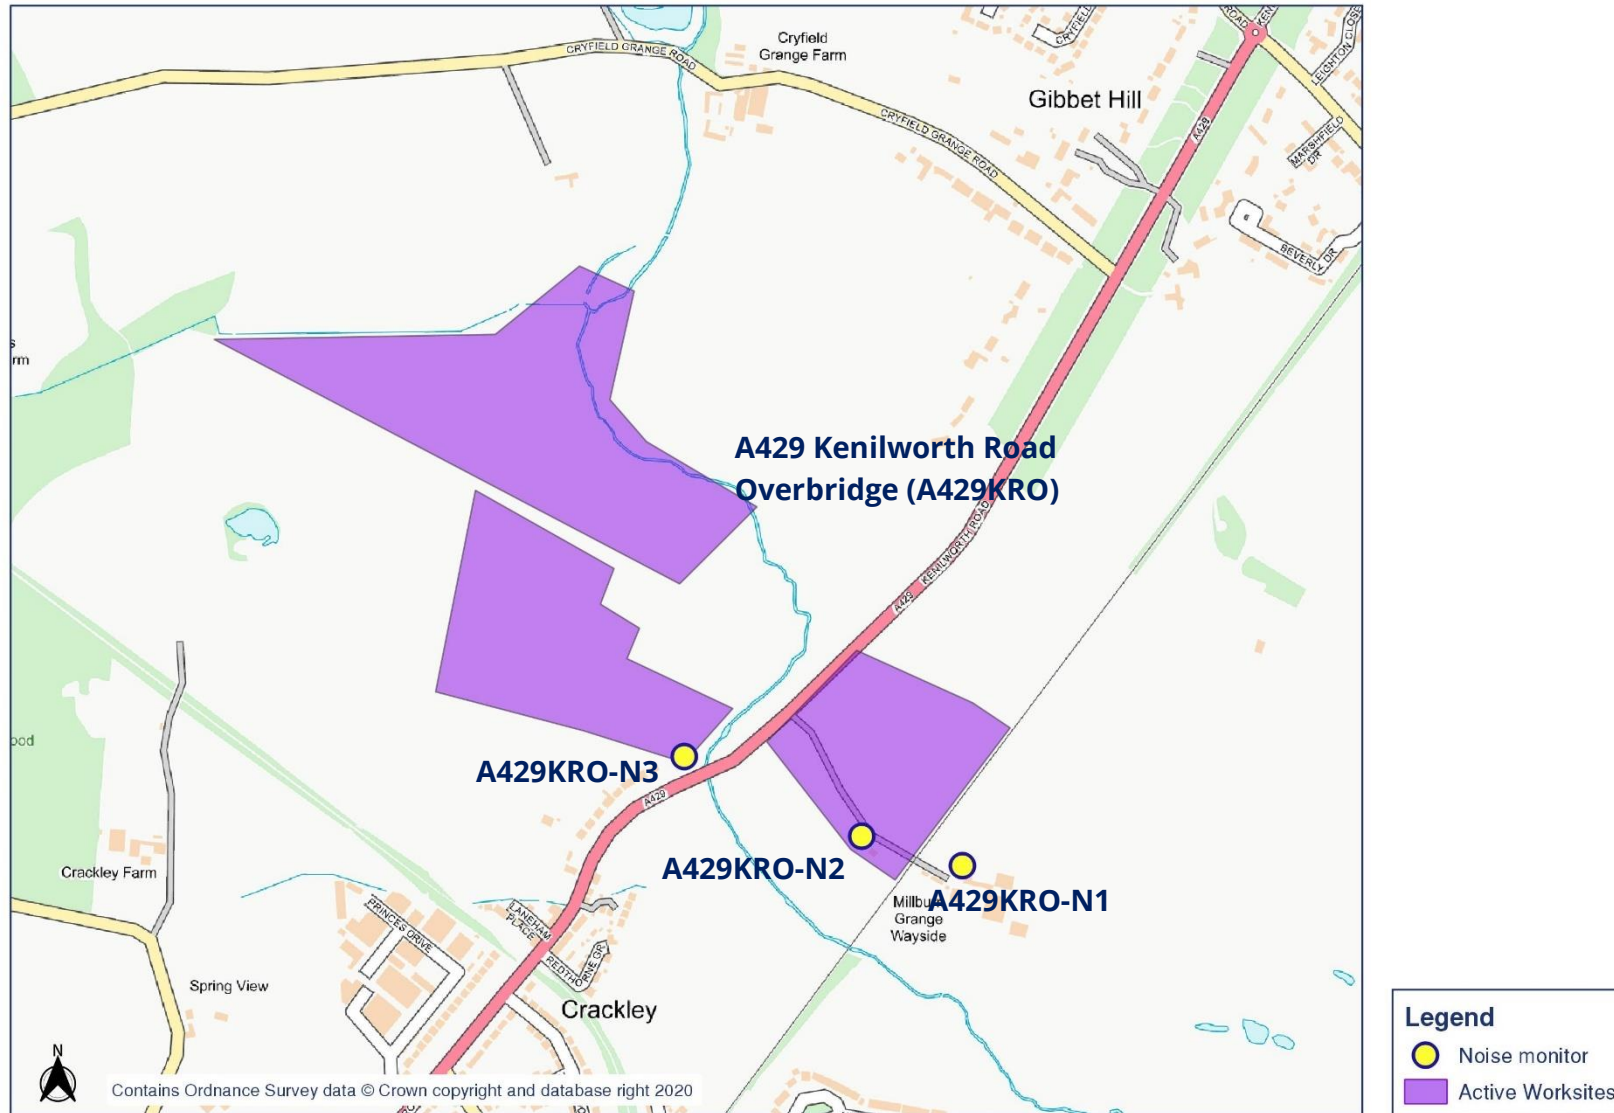

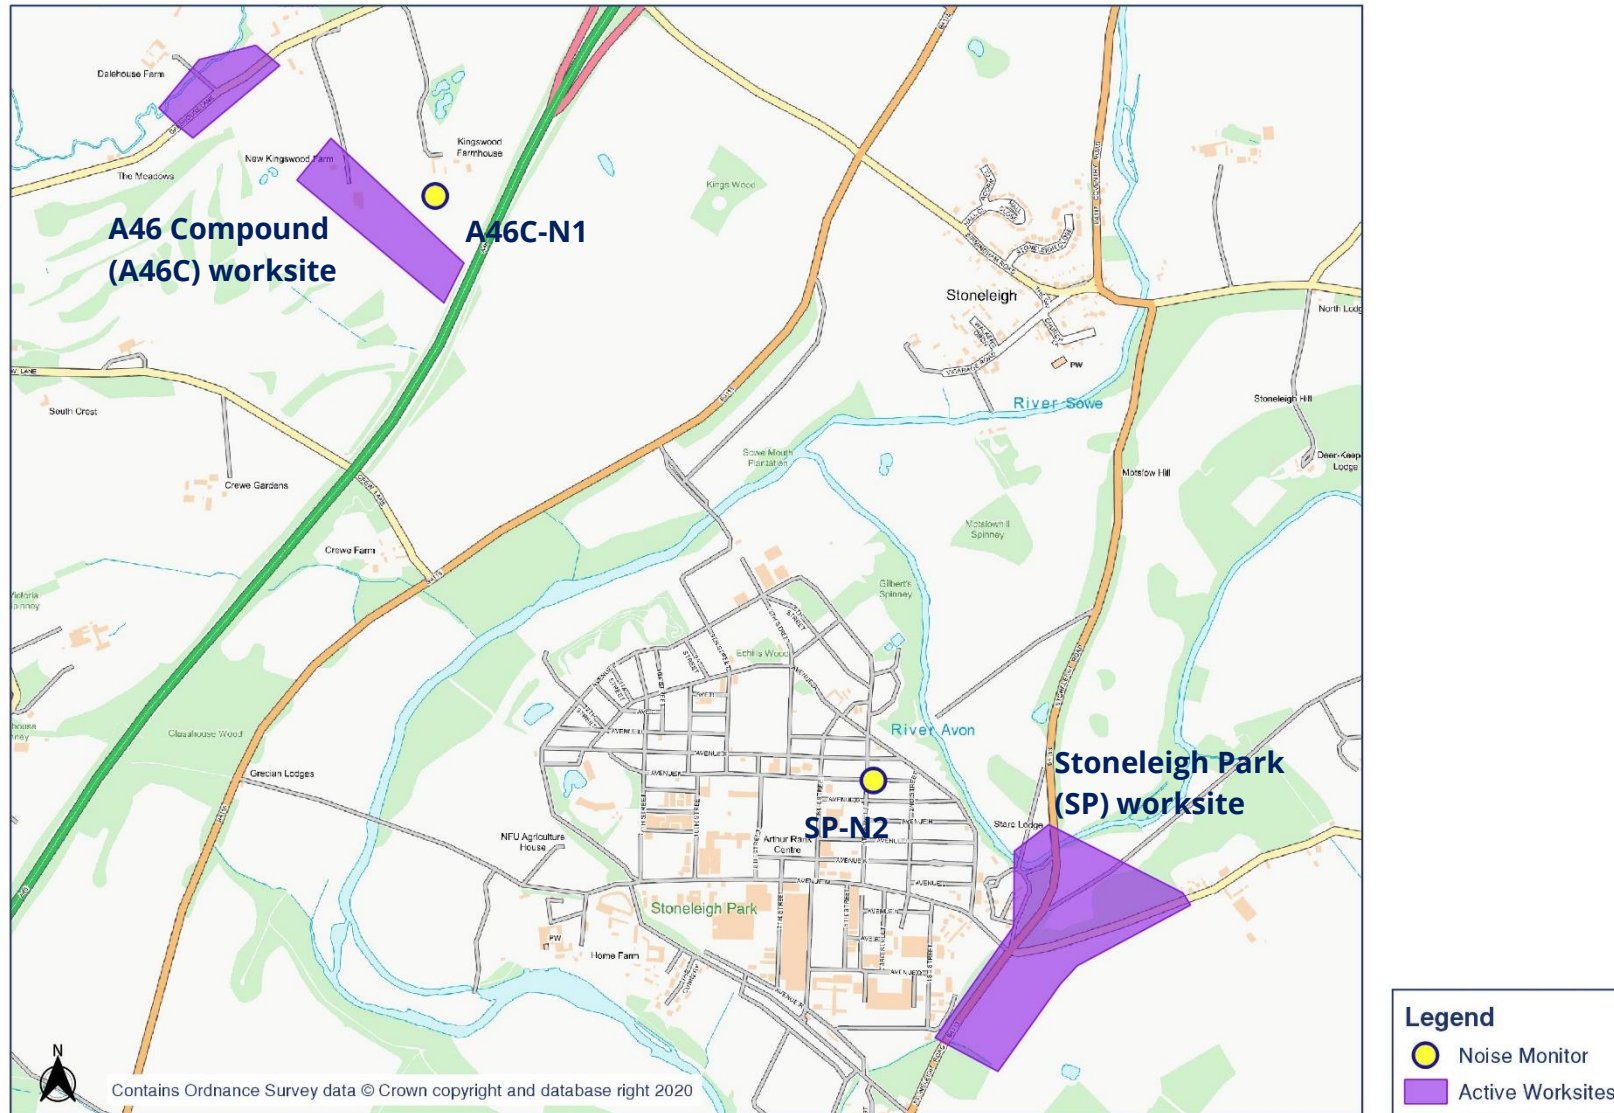

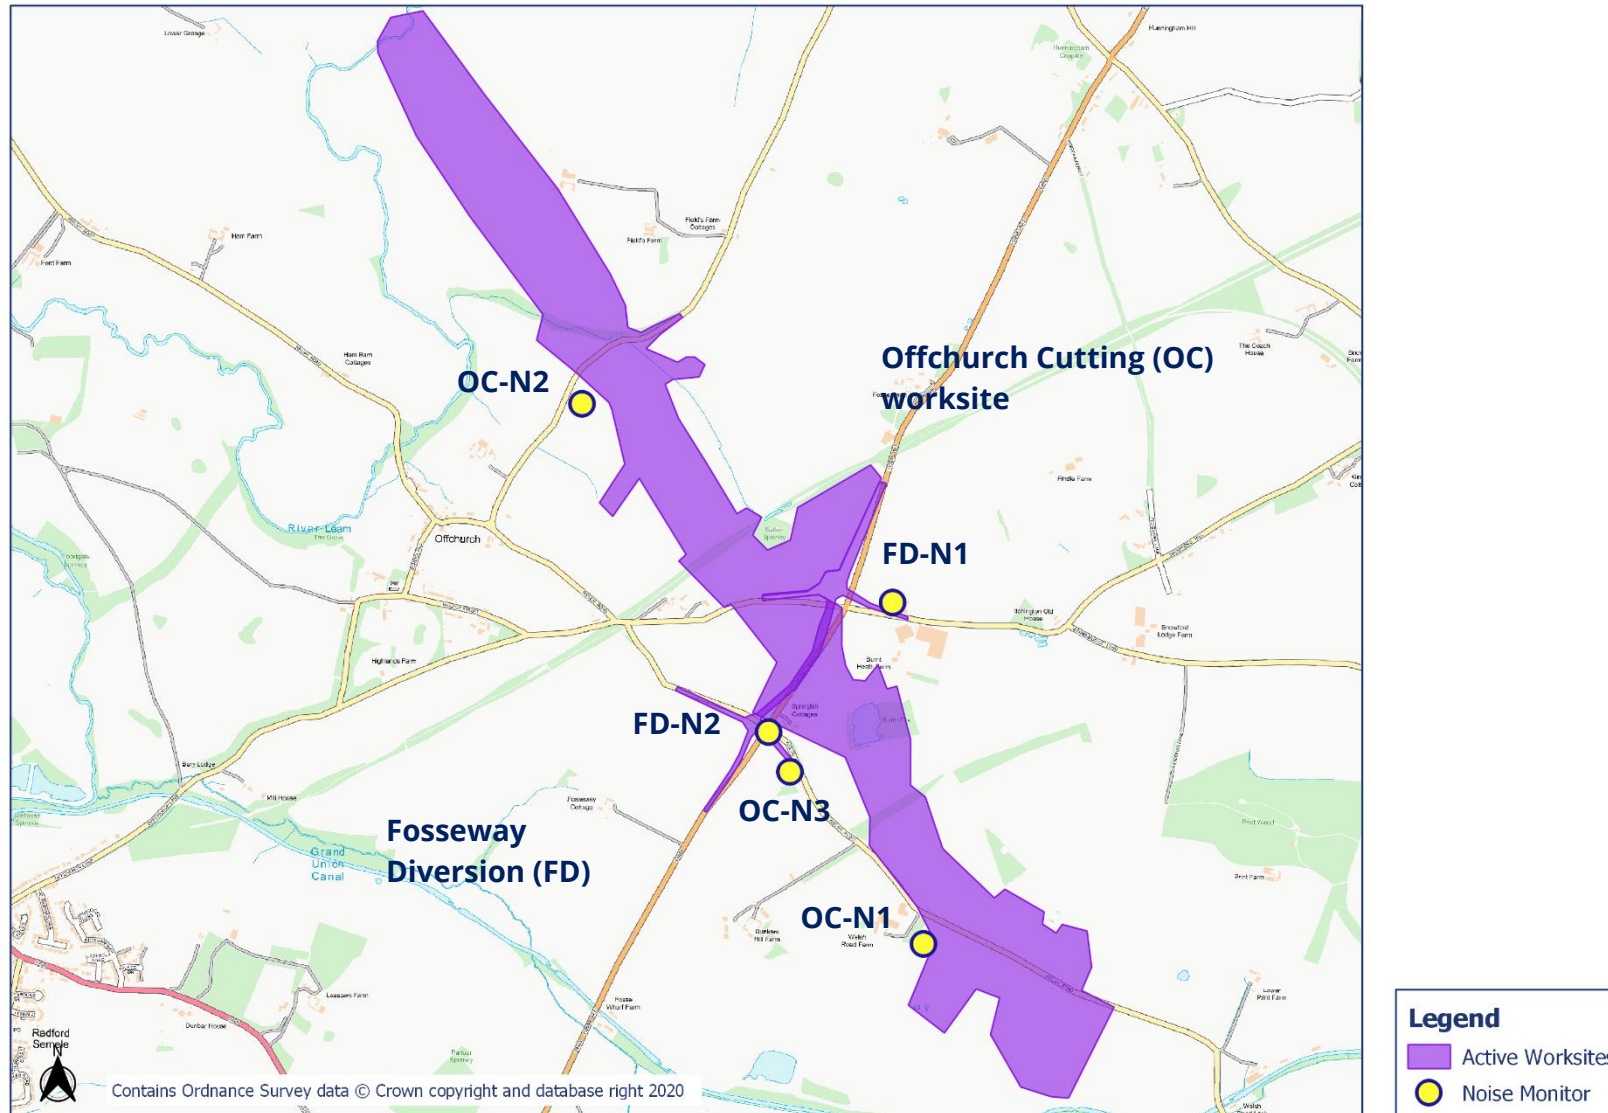

Appendix B Monitoring Locations

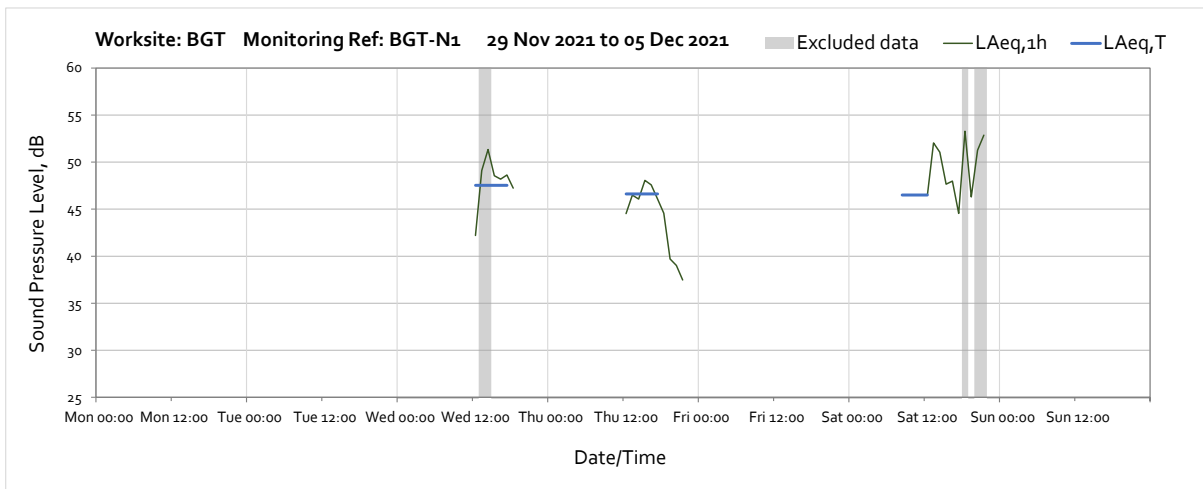

Appendix C Data

Noise

The following graphs show the hourly measured ambient noise level $L_{Aeq,1h}$ and, where relevant, the averaged noise level $L_{Aeq,T}$ values, where the time period T is as specified in Table 1 of HS2 Information Paper E23. Periods with adversely weather affected noise levels are greyed out and have been excluded from the calculation of the $L_{Aeq,T}$ values in Table 3 of the main report.

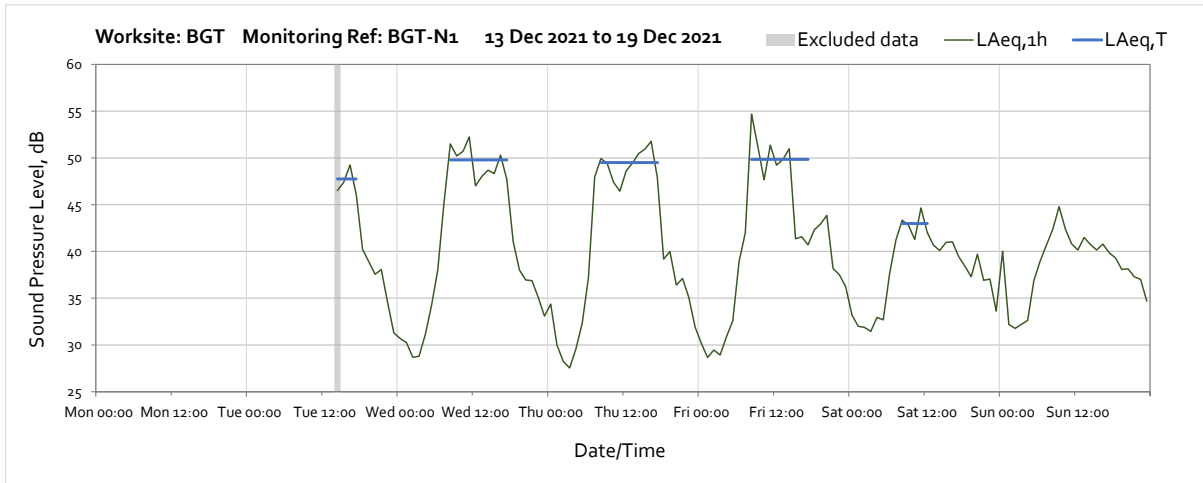

Worksite: BGT - Monitoring Ref: BGT-N1

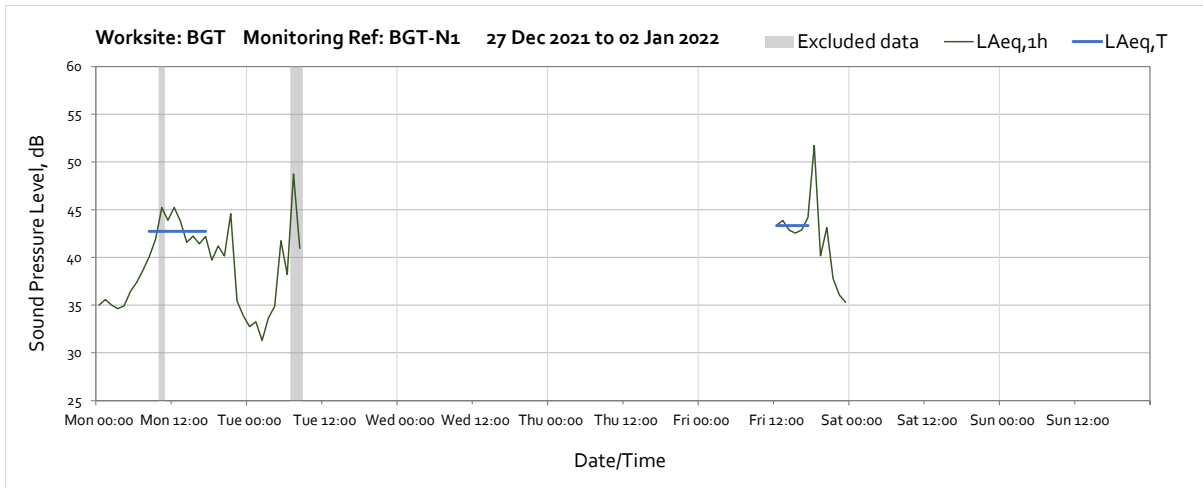

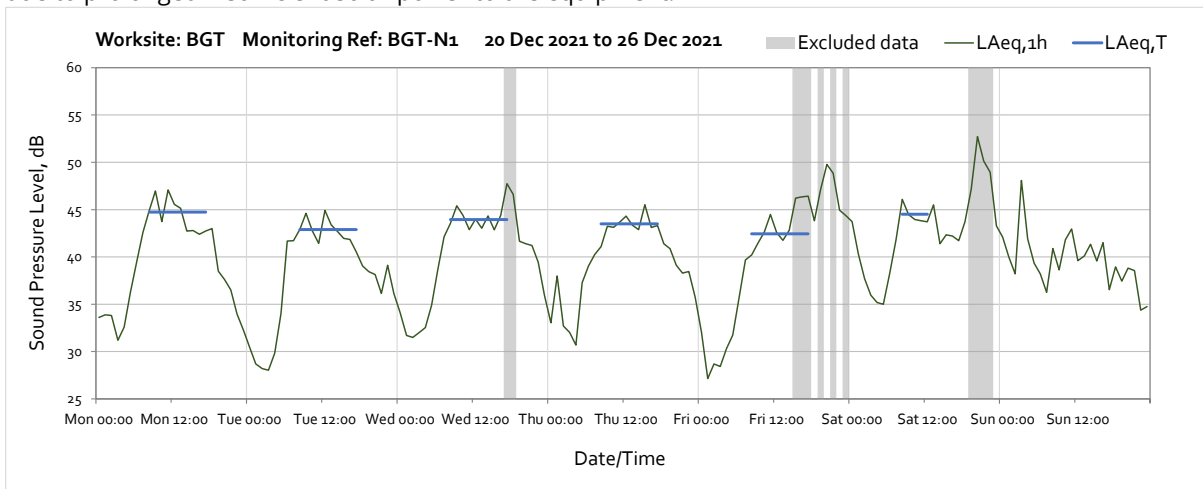

Note: Missing data throughout the week were due to prolonged insufficient solar power to the equipment.

Note: Missing data throughout the week were due to prolonged insufficient solar power to the equipment.

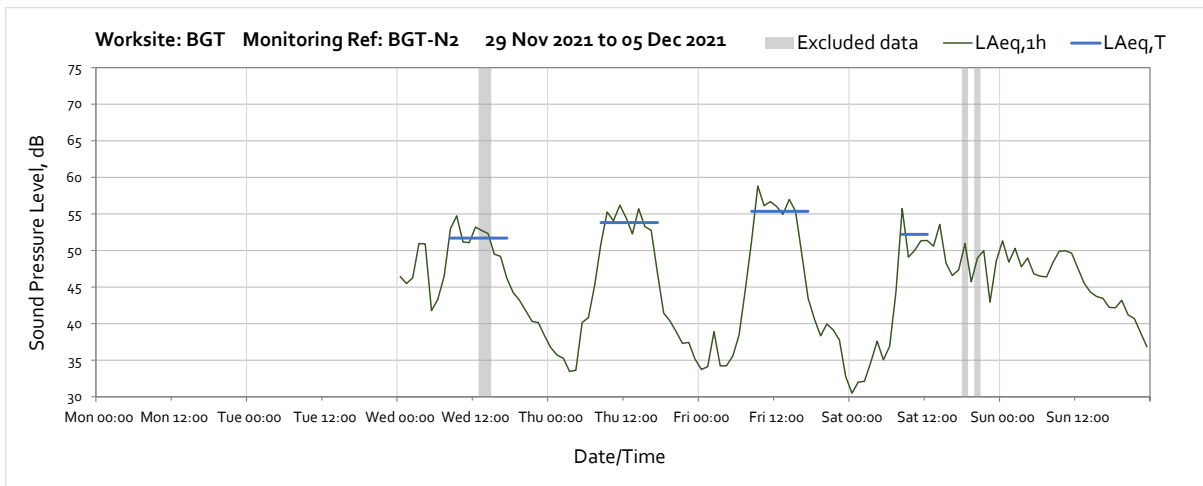

Note: Missing data between 00:00 on Monday 13th December and 13:00 on Tuesday 14th December was due to prolonged insufficient solar power to the equipment.

Note: Missing data between 09:00 on Tuesday 28th December and 11:00 on Friday 31st of December was due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

Worksite: BGT - Monitoring Ref: BGT-N2

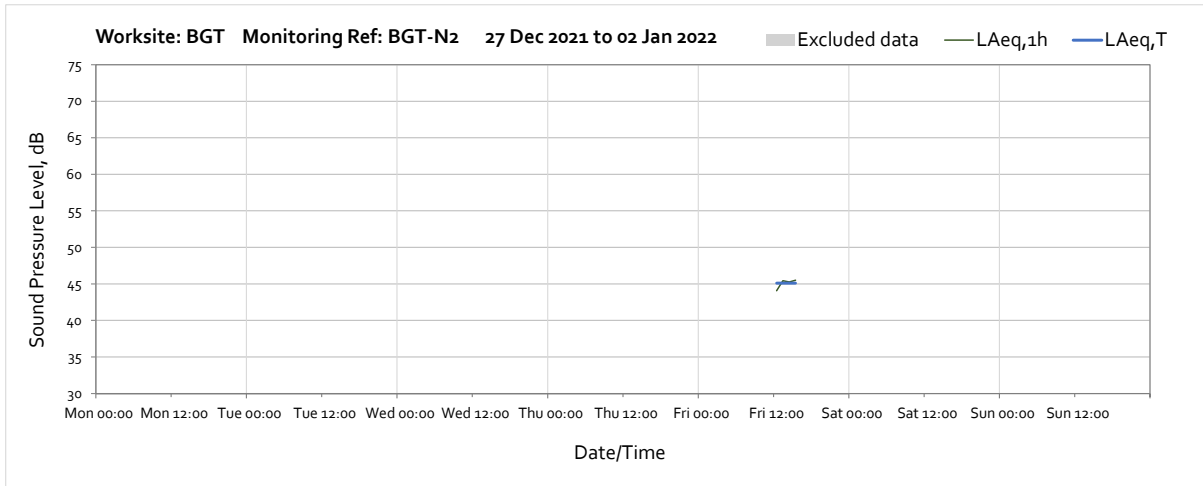

Note: Missing data throughout the week were due to prolonged insufficient solar power to the equipment.

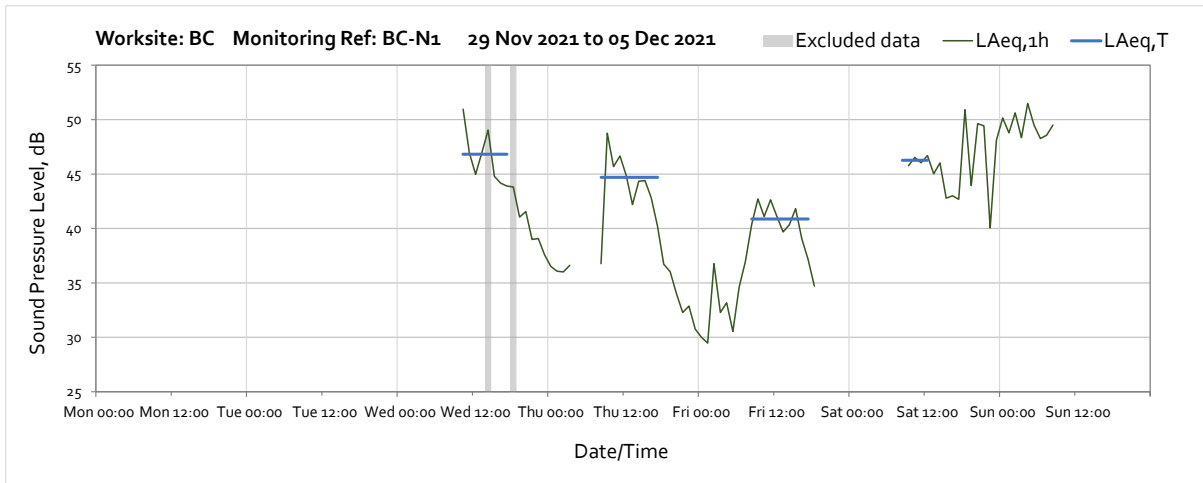

Note: Missing data throughout the week until 11:00 on Friday 31st December were due to prolonged insufficient solar power to the equipment.

OFFICIAL

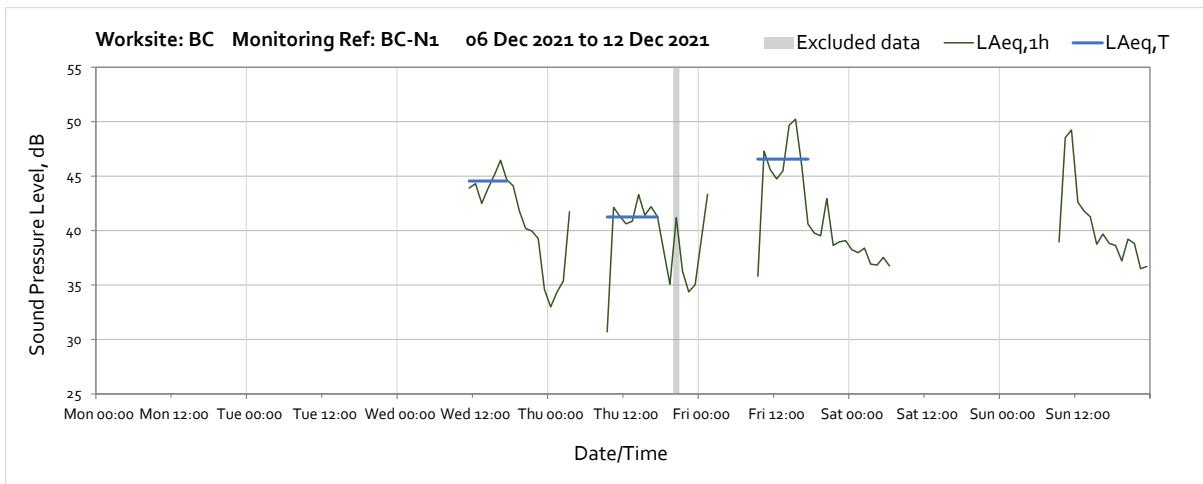

Note: Missing data between 16:00 and 23:00 on Friday 31st of December was due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

Worksite: BC – Monitoring Ref: BC-N1

Note: Missing data throughout the week were due to prolonged insufficient solar power to the equipment.

Note: Missing data throughout the week were due to prolonged insufficient solar power to the equipment.

OFFICIAL

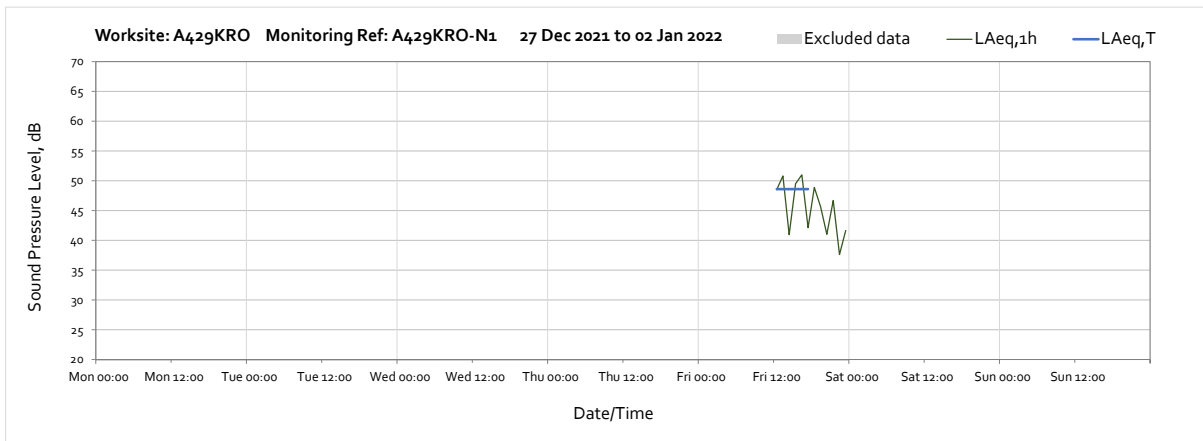

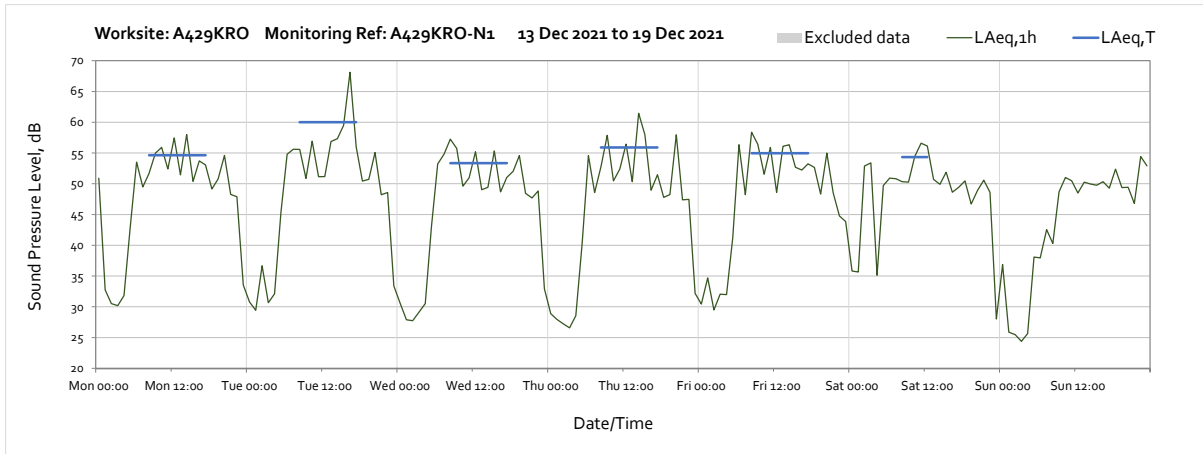

Note: Missing data between 22:00 on Monday 13th December and 23:00 on Friday 31st of December was due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

Worksite: A429KRO – Monitoring Ref: A429KRO-N1

Note: Noise levels represent baseline noise levels since no works were undertaken during this period

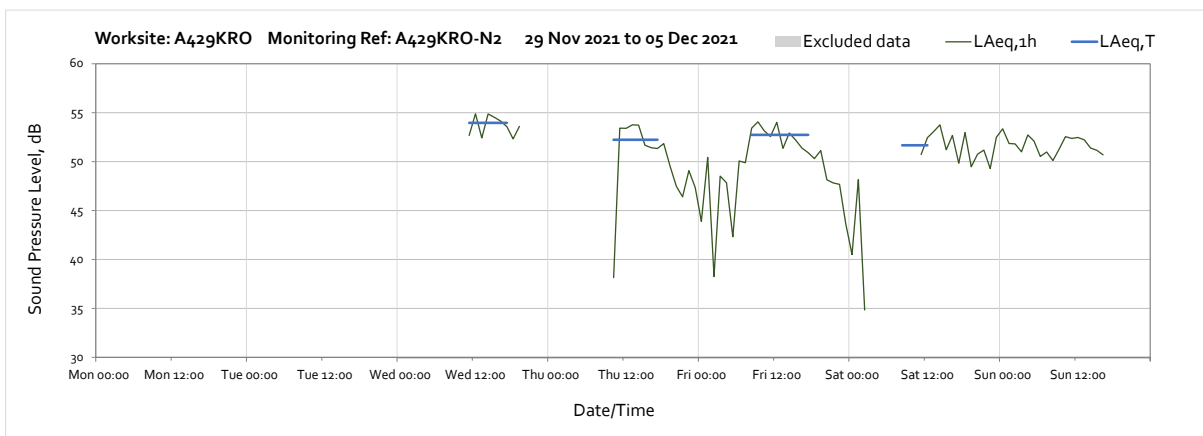

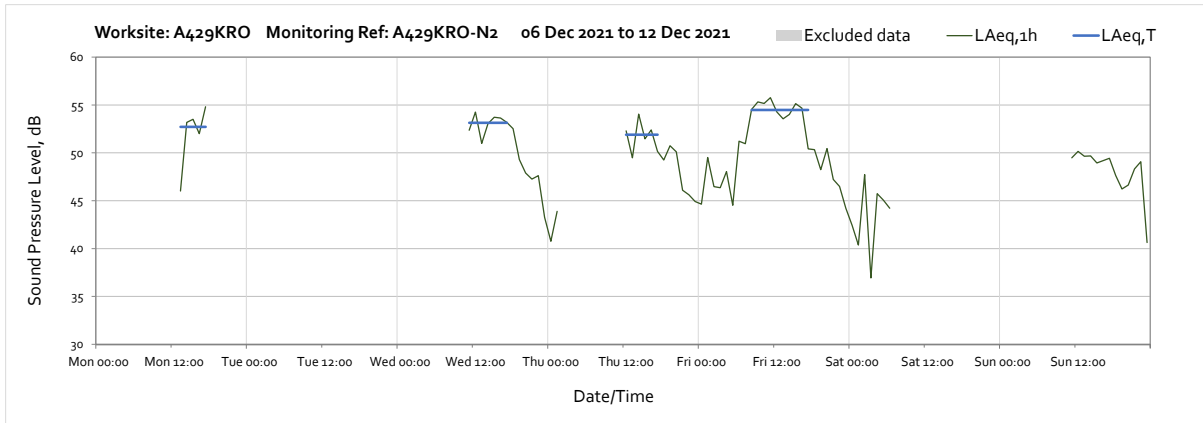

Note: Missing data between 00:00 on Monday 20th December and 11:00 on Friday 31st of December was due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

Worksite: A429KRO – Monitoring Ref: A429KRO-N2

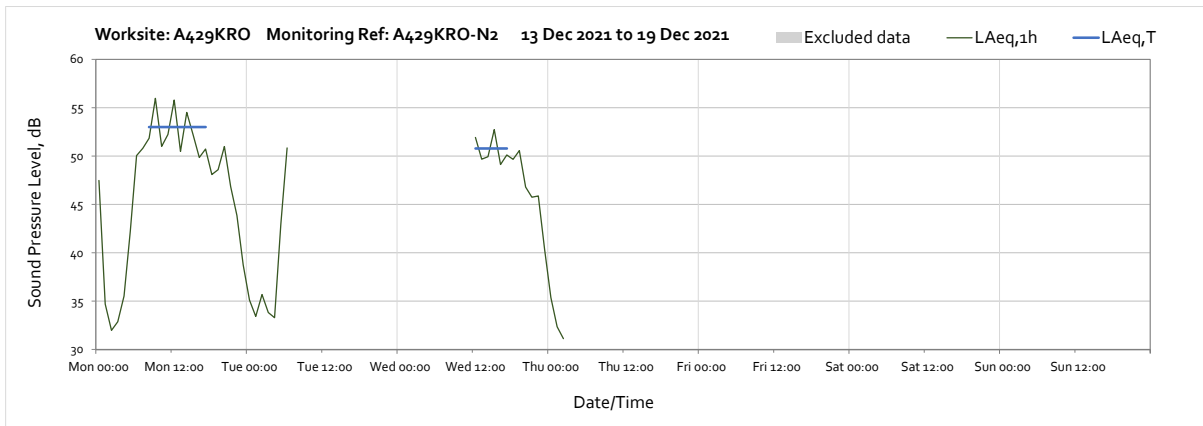

Note: Noise levels represent baseline noise levels since no works were undertaken during this period

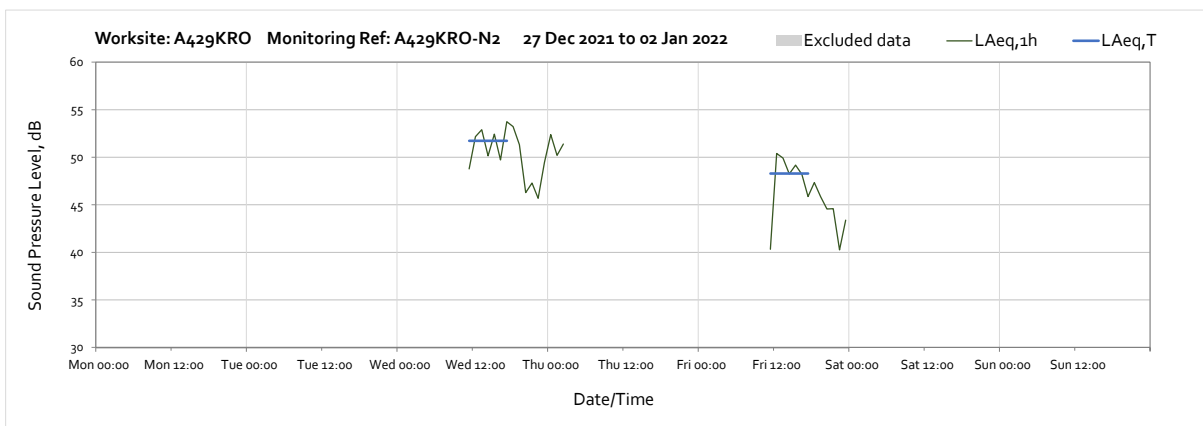

Note: Missing data throughout the week were due to prolonged insufficient solar power to the equipment.

Note: Missing data throughout the week were due to prolonged insufficient solar power to the equipment.

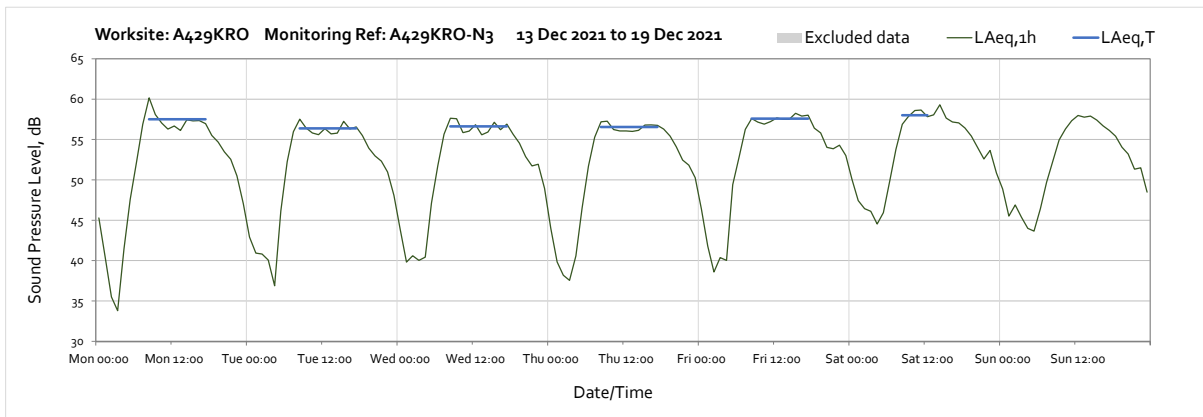

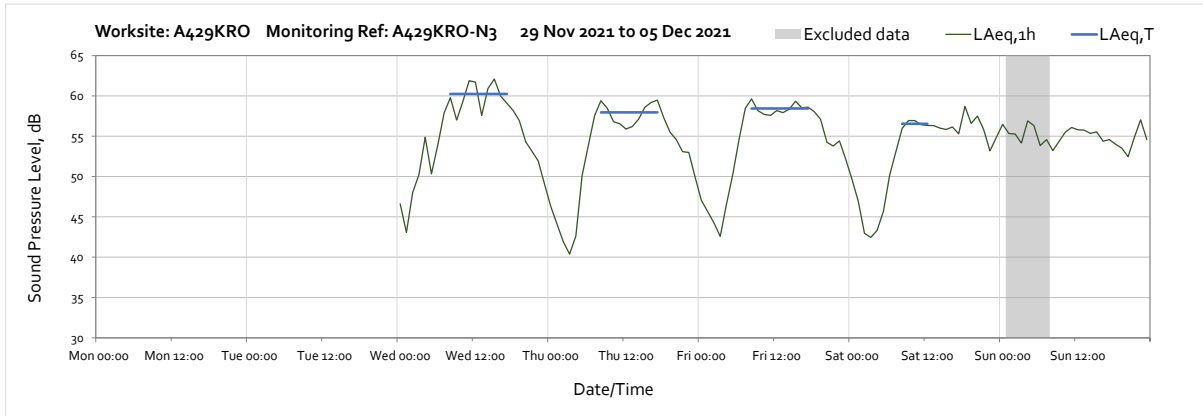

Note: Missing data throughout the week until 10:00 on Wednesday 29th December were due to prolonged insufficient solar power to the equipment.

Note: Missing data in between 03:00 on Thursday 30th December and 10:00 on Friday 31st December were due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

Worksite: A429KRO – Monitoring Ref: A429KRO-N

Note: Noise levels represent baseline noise levels since no works were undertaken during this period

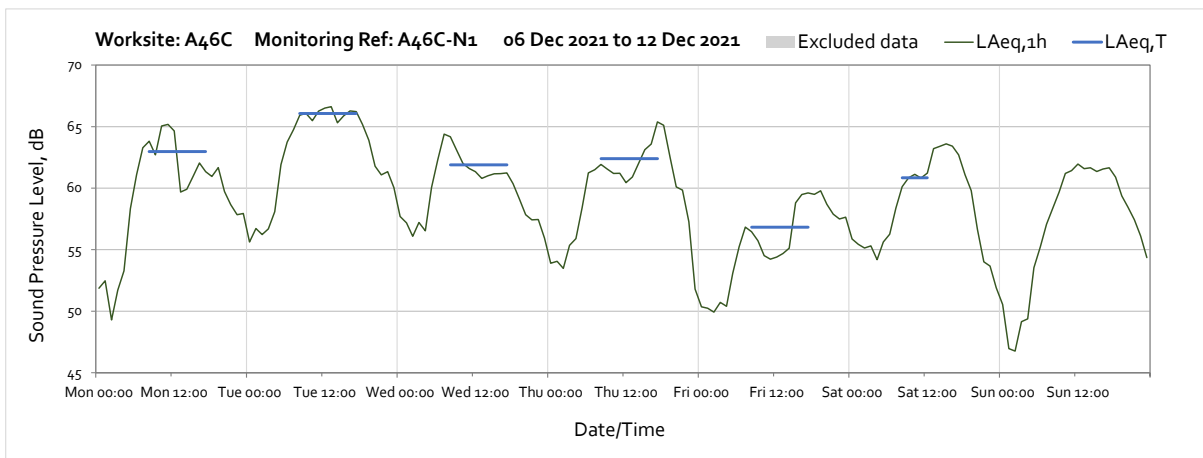

Note: Missing data in between 13:00 on Tuesday 21st December and 10:00 on Wednesday 29th December were due to prolonged insufficient solar power to the equipment.

Note: Missing data in between 19:00 on Wednesday 29th December and 10:00 on on Friday 31st December were due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

Worksite: A46C – Monitoring Ref: A46C-N1

Note: Missing data throughout the week until 10:00 on Wednesday 29th December were due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

Worksite: SP – Monitoring Ref: SP-N2

Note: Noise levels represent baseline noise levels since no works were undertaken during this period

Note: Missing data in between 21:00 on Wednesday 1st December and 10:00 on Thursday 2nd December was due to an error within the measuring equipment.

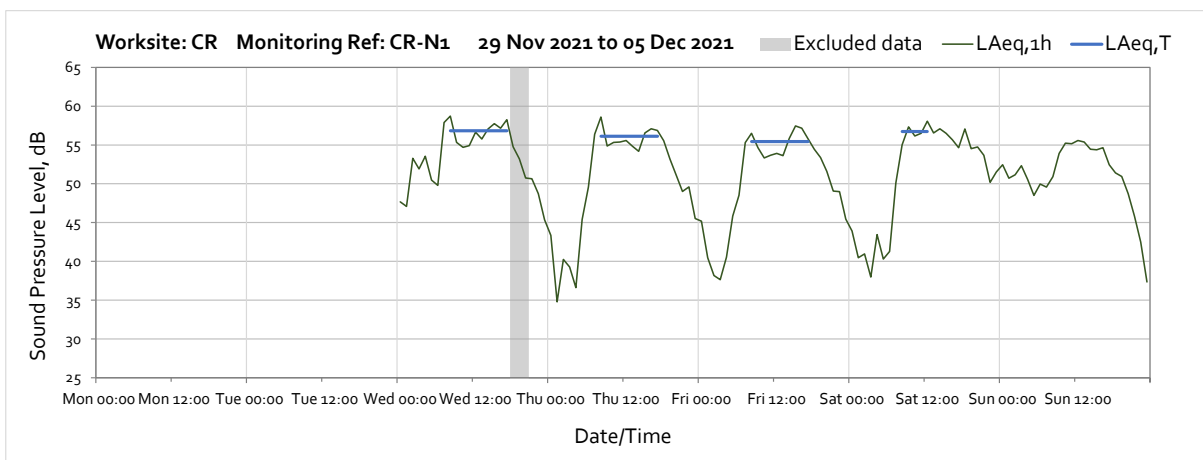

Note: Missing data in between 20:00 on Wednesday 22nd December and 09:00 on Tuesday 28th December were due to prolonged insufficient solar power to the equipment.

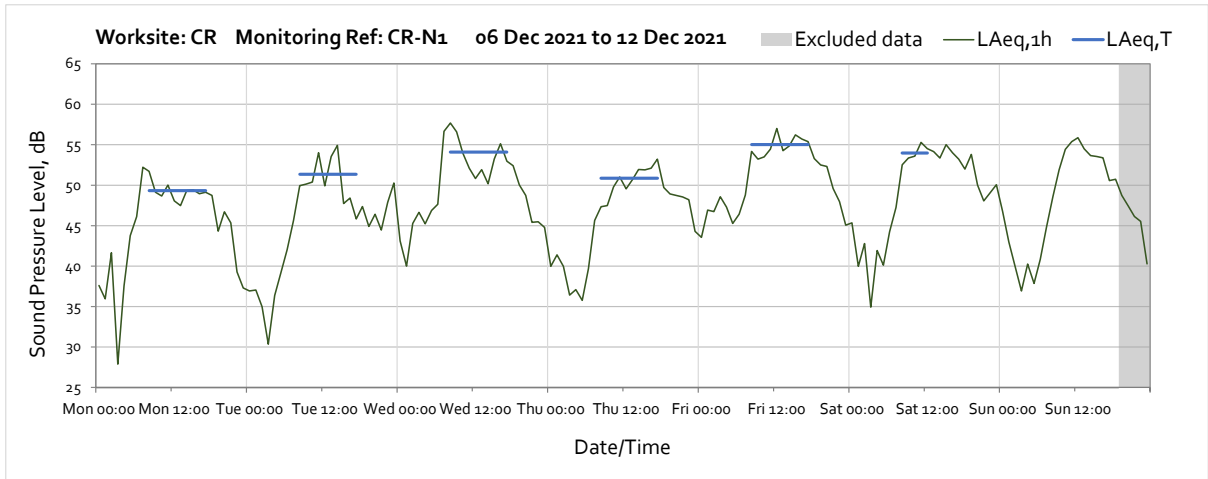

Note: Missing data throughout the week were due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

Worksite: CR – Monitoring Ref: CR-N1

Note: Noise levels represent baseline noise levels since no works were undertaken during this period

Note: Missing data in between 09:00 on Saturday 25th December and 09:00 on Friday 31st December were due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

Worksite: FD - Monitoring Ref: FD-N1

Note: Missing data in between 12:00 on Thursday 2nd December and 14:00 on Tuesday 7th December were due to prolonged insufficient solar power to the equipment.

Note: Missing data in between 22:00 on Tuesday 7th December and 20:00 on Friday 24th December were due to prolonged insufficient solar power to the equipment.

OFFICIAL

Worksite: FD – Monitoring Ref: FD-N2

Worksite: OC - Monitoring Ref: OC-N1

Note: Missing data AT 14:00 on Wednesday 1st December were due to prolonged insufficient solar power to the equipment.

Note: Missing data in between 04:00 on Saturday 25th December and 09:00 on Friday 31st December were due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

Worksite: OC – Monitoring Ref: OC-N2

Note: Missing data in between 08:00 on Friday 17th December and 09:00 on Monday 20th December were due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

OFFICIAL

Note: Missing data in between 23:00 on Monday 20th December and 09:00 on Friday 31st December were due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.

Worksite: OC – Monitoring Ref: OC-N3

Note: Missing data in between 13:00 on Wednesday 29th December and 09:00 on Friday 31st December were due to prolonged insufficient solar power to the equipment. To ensure there is no loss of power again solar maintenance is being conducted.
