Birds for approved bodies or conservation programs
GBHC211E

Part II: Certification	II. Health information	II.a. Certificate reference no	II.b.
	<p>I, the undersigned official veterinarian or the authorised veterinarian responsible for the holding described in point I.11 of (insert name of the country) certify that:</p> <ol style="list-style-type: none"> The country of dispatch is a member country of the World Organisation for Animal Health (OIE). Newcastle Disease (ND) and Avian Influenza (AI) in poultry and other birds kept in captivity, are notifiable in the country of dispatch. The bird(s) described in point 1.28 has/have been identified in accordance with Article 66(2) of Regulation 865/2006 and in such a way that the original holding, centre or organisation can be traced. <p>The bird(s):</p> <ol style="list-style-type: none"> has/have been subjected today, within 48 hours prior to the date of dispatch, to a clinical inspection and do not show any clinical signs of disease; have been isolated from other birds that do not have the same health status and kept continuously in a bio-secure establishment, for at least 30 days prior to and until the date of dispatch; come from a holding or a region that is not subject to animal health restrictions in connection with Newcastle Disease (ND) or Avian Influenza (AI); come from a holding where there have not been outbreaks of Newcastle Disease (ND) or Avian Influenza (AI) nor in the surrounding area within a radius of 10km for at least 30 days; only in the case of psittacines, come from a holding where there have not been outbreaks or detections of <i>Chlamydia psittaci</i> nor psittacosis (human disease) in the last 60 days and have not been in contact with animals from a holding on which psittacosis or <i>Chlamydia psittaci</i> has been diagnosed in the last 60 days; were sampled 7 to 14 days prior to shipment, with both oropharyngeal and cloacal swabs taken on [dd/mm/yyyy], and at least 48 hours after the start of isolation as per point 5 above. The swabs have been subjected to a laboratory virus isolation or RT-PCR test, performed in an official laboratory, with negative results for any Avian Influenza and Newcastle Disease virus. The testing has been carried out in accordance with the OIE Manual of Diagnostic tests and vaccines of Terrestrial Animals; <p>⁽¹⁾ 10. [The establishment of origin and the bird(s) identified above comply with the Avian Influenza protection provisions of Commission Decision 2007/598/EC and were vaccinated against avian influenza on [dd/mm/yyyy] with vaccine (name) and come from a holding on which vaccination against avian influenza was carried out during the past 12 months.]</p> <p>Transport requirements:</p> <ol style="list-style-type: none"> I certify that I have received written confirmation from the owner or their appointed agent that the birds will be transported in new containers or containers suitable for and that have been cleansed and disinfected satisfactorily as inspected by me on this day. The disinfection used, (name) is officially recognised as effective against viruses, and the recommended contact time of the disinfectant was observed. The container must bear on the outside of the container the unique certificate ID number that corresponds with the ID number provided for on the accompanying health certificate. The containers and/or transport is designed to prohibit the discharge of bedding, faeces and liquid, with capacity sufficient for the intended journey
