| Product Type | Electrical appliances and equipment - Lamp |
| Product Identifiers | Other Product Identifier: Carton Number TAB-LAM-BLA-A |
| Product Description | A black desk lamp with flexible, adjustable neck. |
| Country of Origin | China |
| Counterfeit | Unknown |
| Risk Level | Serious |
| Risk Type | Electric shock and electrocution |
| Risk Description | The product poses a serious risk of electric shock as a result of inadequate insulation levels and poor construction. When tested there were live parts separated from accessible metal parts by basic insulation. The supply cord was connected to the internal wiring by means of soldered connections. They had not been looped-in before soldering and there were no barriers to prevent a detached wire from reducing creepage distances and clearances. Sharp edges were identified, and no bushing was found. The plug and its fuse did not comply with BS 1363 and BS1362 respectively, which included a lack of granular filler in the fuse body. The filler is required to ensure the safe operation of the fuse under fault conditions. Additionally, the product was not compliant with the marking or instructions requirement of the relevant standard. The product does not meet the requirements of the Electrical Equipment (Safety) Regulations 2016. |
