## Tree Production Innovation Fund

The Tree Production Innovation Fund (TPIF) has been developed to support the England Tree Planting Programme (ETPP) and is funded under the Government's Nature for Climate fund with an aim of enhancing the quality, quantity and diversity of planting stock available for tree planting in England. The grant will support research and development projects that demonstrate potential to overcome one or more of the following challenges identified as barriers to tree nursery production during stakeholder consultation.

**Challenge 1:** How can we make better use of available seed and vegetative planting material to maximise the quantity, quality and diversity of trees produced?

**Challenge 2:** How can we develop growing systems to enhance their efficiency and resilience to change, whilst delivering improved quality and diversity of product? This challenge can include activities to promote biosecurity.

**Challenge 3:** How can innovative environmentally sustainable weed control solutions be used to reduce reliance on herbicides?

Applicants are invited to submit single year projects due to complete by March 2023, or multi-year proposals spanning up to three financial years (ending March 2025).
