

**EXPORT OF PRIMATES TO FRANCE**

**NOTES FOR GUIDANCE (NFG) FOR OFFICIAL VETERINARIANS AND EXPORTERS**

This document should not be read as a standalone document but in conjunction with 9019EHC.

**Scope of the certificate**

This certificate may be used for the export of primates where the certification takes place in Wales, Scotland or England, i.e. Great Britain only.

A note on English text and translation:

Please note that this certificate is taken from an English translation provided by French Authorities and the English text is therefore constrained by their model certificate.

**1. ANIMAL IDENTIFICATION**

**Country of origin and provenance**

'Provenance' - can be relevant if the animal(s) was/were not born and raised in GB, e.g.: born in Madagascar and then imported into GB. In that case, country of origin would be Madagascar and country of provenance would be the UK.

If the animals have always been in GB, then enter GB details for both cases.

**2. ORIGIN AND DESTINATION.**

Self explanatory. Where it is from, where it is going to and means of transport.

**3. CERTIFICATION**

The basic principles of certification apply and although this is not an EU level harmonised EU entry certificate, the general requirements that the EU specifies for its harmonised certificates should be followed.

EXPORTING COUNTRY: Although the certificate has been prepopulated with UNITED KINGDOM, this certificate should and can only be issued for animals that are certified in England, Scotland and Wales (i.e. Great Britain).

## **Sanitary Information**

Where statements are mutually exclusive, and reference by the superscript (2) be careful to delete both the English and French statements that are not applicable, as indicated by square brackets.

## **Notifiable Disease Clearance**

Where it is possible for the Official Veterinarian (OV) in Great Britain to obtain disease clearance themselves, the Centre for international Trade - Carlisle (CITC) will not issue a 618NDC notifiable disease clearance.

OVs must check the following sources of disease information for the United Kingdom immediately prior to certification, to ensure disease freedom statements can be certified:

- the Notifiable Disease Occurrence List for Great Britain (ET171) available on the Exports > Certification Procedures page of the APHA Vet Gateway
- the UK Status for Non-Notifiable Diseases Relevant to Export Certification (ET152) available on the Exports > Certification Procedures page of the APHA Vet Gateway.

[http://apha.defra.gov.uk//External\\_OV\\_Instructions/Export\\_Instructions/Certification\\_Procedures/index.htm](http://apha.defra.gov.uk//External_OV_Instructions/Export_Instructions/Certification_Procedures/index.htm)

### **For Great Britain:**

In the absence of a specific Notifiable Disease Clearance (618NDC) from CITC: OVs may certify that the UK has disease free status or region free status for those diseases mentioned in the health certificate, once they have checked

the disease list(s) for the last occurrence of the disease and have ensured it complies with the time frames in the certificate.

In the event of a disease outbreak that affects an OV being able to obtain their own disease clearance, CITC will notify OVs to make it clear which disease freedom statements should not be certified and where necessary, will issue a 618NDC notifiable disease clearance if the EHC can continue to be issued for certain regions that retain free status.

In the event of a disease outbreak after the EHC has been issued that affects the disease clearance, OVs must not

certify the EHC and must contact CITC immediately for advice on whether certification can still take place. If a disease outbreak affects the OV disease clearance procedures for this EHC, a 618NDC will be reinstated by CITC which will be issued with the EHC until a time when OV disease clearance can be reinstated.

**Disclaimer:** This certificate is provided on the basis of information available at the time and may not necessarily comply fully with the requirements of the importing country. It is the exporter's responsibility to check the certificate against any relevant import permit or any advice provided by the competent authority in the importing country. If these do not match, the exporter should contact the APHA Customer Service Centre, in Carlisle, via the link below.
