

Application for an environmental permit

Form RSR-B4 – New or varied bespoke radioactive substances activity permit (unsealed sources and waste from unsealed sources)

Read through this form and the RSR-B4 guidance notes before you fill it in.

It should take less than two hours to fill in this application form.

If you are applying for a new bespoke permit for a radioactive substances activity involving unsealed sources and/or radioactive waste from unsealed sources on a non-nuclear site, fill in this form, together with forms RSR-A and RSR-F. Unsealed sources are sometimes known as open sources. If you also want to make on-site disposals of solid waste to land, also fill in form RSR-B5. If you need a permit to store radioactive materials in transit, complete form RSR-B2.

Only fill in the sections relevant to your application. If you are applying to vary (change) an existing permit for unsealed sources and/or radioactive waste you should only fill in the sections which cover the changes you are seeking.

For security reasons, do not refer to sealed sources on this part of the form. There is a separate form (RSR-B2) for radioactive substances activities involving sealed sources.
