Alert Number	2205-0120
Product Type	Explosive Atmospheres Equipment – Fan
Product Identifiers	Power Star Electrical BTF Series ATEX Rated Explosion Proof Portable Ventilation Extractor Axial Fan (220-240v) / EL10033459
Product Description	Electrically powered fan intended for use in potentially flammable or explosive atmospheres, such as spray booths and industrial environments.
Country of Origin	China
Counterfeit	Not counterfeit
Risk Level	Serious
Risk Type	The product has not been subject to an appropriate conformity assessment procedure under the Equipment and Protective Systems Intended for Use in Potentially Explosive Atmospheres Regulations 2016, and there is therefore no evidence this product is safe for use in potentially flammable or explosive atmospheres. The product does not meet the administrative requirements of these regulations with respect to product markings, instructions and the Declaration of Conformity.
Risk Description	This product has been assessed as presenting a serious risk of harm as it has the potential to act as an ignition source in a flammable atmosphere, which could lead to fire and explosion.
Corrective Measures	The products have been withdrawn from the market. We recommend customers stop using these products in environments where a flammable or explosive atmosphere could form. Customers should contact their distributor to request redress.
