Performance Managers

From: Marianne Bacon, CEP Sampling & Review Team

Memo Serial Number: WP208

Date: 03/03/2017

Subject: Work Programme Sustainment Sample Round 17a/December 2016

Action: For information

Timing: Immediate

Background

An internal processing issue has meant it has been necessary to extract a new Work Programme sustainment sample for December 2016.

Summary and Action

Due to an internal processing issue, it has been necessary to extract a new Work Programme sustainment sample for December 2016. The new sample was drawn on the 1st March 2017 replacing the original sample drawn on the 7th February 2017.

Service Requests for the new sample have been created. We will now be working with our colleagues to ensure the previous sample and service requests are cleared and closed down to avoid further confusion.

Please note that the sampling reports obtained from PRaP will show an increased sample size for December 2016 and the results of these will continue to change as we perform this closure activity.

I would like to reassure you that you will not be adversely impacted by this. I would like to take the opportunity to thank you for your patience and to apologise for any inconvenience caused.
